Looking at the hefty girth of Sen. Edwin C. Johnson of Colorado, who tips the beam above 225 pounds, you would never guess that he eats only one meal a day.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for October 10

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

REVERENCE FOR GOD

LESSON TEXT—Exodus 20:3-7; Matthew 4:10, 6:9; John 4:23, 24.
GOLDEN TEXT—God is a Spirit; and they that worship him must worship him in spirit and in truth.—John 4:24.

The first three commandments bring man into the presence of God, where he is taught how to worship God in spirit and in truth.

"The first commandment (Exod. 20:3) bids us worship God exclusively; the second (vv. 4-6) bids us worship Him spiritually. The first commandment forbids us to worship false gods; the second forbids us to worship the true God under false forms" (Farrar). The third commandment (v. 7) indicates that true worship will deal reverently with the name of God.

Israel had lived among the Egyptians, a people known for their worship of images, and were about to enter into Canaan where there were many false gods. The Lord was therefore careful not only to forbid the worship of other gods, but also to forbid the making of images of any kind, whether they represented the many gods of heathendom, or were attempts to symbolize the true God.

I. The Command to Worship (Exod. 20:3-7).

God first claims the entire devotion of man. If He is Jehovah, the Lord God, it is obvious that there can be no other god before Him. He is a personal God (v. 2) with whom it is possible for man to have fellowship. He must come first in our thought and our love.

The second commandment expressly forbids idolatry in any form. The injunction is twofold. (1) Men are forbidden to make any material likeness which to them represents a being to be worshiped. It matters not whether it be an image or what men believe God to be like, or the image of an angelic being, a heavenly body, in fact, "anything that is in the heaven above," or on the earth—such as a man or animal; or under the water—such as a fish. (2) If such objects have been made either by ourselves or others we may not bow down to them, nor render any service to them. Let us all examine our religious ceremonies and practices in the light of God's commandment.

Observe that obedience to this command brings rich blessing to "thousands" (v. 6), whereas disobedience is a curse not only to the man who disobeys, but also to his descendants.

The careless, vain or irreverent use of God's name is forbidden (v. 7). How common that practice is today, even among Christian people. If we do not actually use His name, we use some slang expression which stands for His name.

Now we turn to two passages from the Gospel of Matthew to see how Jesus practiced these commandments.

II. The Example of Christ (Matt. 4:10; 6:9).

To the temptation of Satan, offering rich reward for an act of worship to himself, Jesus gave prompt and effective reply by quoting Deuteronomy 6:13. Thus He gave His approval to the command that all our worship and service is to be given to God.

This spirit shows itself in the reverent devotion of the prayer (6:9) which Jesus taught His disciples. The name of God is to be hallowed—that is, to be regarded as holy. No one set a higher example of that than our Lord. Himself God, He was obedient to the Father, even unto death, always doing those things which pleased Him and honored His name (John 8:29; Phil. 2:8).

III. The Manner of True Worship (John 4:23, 24).

God is to be worshiped in spirit and in truth, not in dead formalism or by empty ritual. "There must be reality in such devotion.

One would suppose that a truth so obvious and vital would long since have been completely saturated the life of the church as well as of the individual believer. "God is a Spirit, and they that worship him must worship him in spirit and in truth."

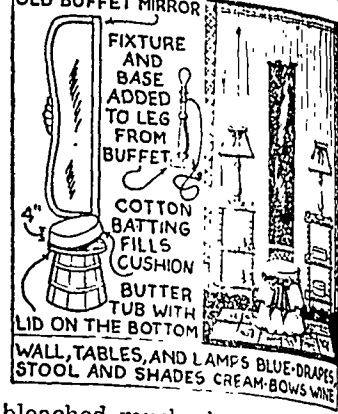

Even today, countless men and women still believe that worship has something to do with place (vv. 20, 21) or race (v. 22) or some other external device or formula. What a pity, when the gracious and delightful way to worship is through personal spiritual communion between God and man.

Deadening formalism is not our only enemy. There is the powerless preaching of modernism—and in all honesty must we not admit that even some so-called fundamentalism has in many respects lost the true spirit of the faith for which it rightly contends.

We see then that the commandment of God regarding reverence is not just a law on a faded page in an ancient manuscript. It is a living, vital reality, operative today.

Curtains to Cover Frame of Mirror

A LONG mirror with a table each side makes an ideal place to dress. Here you have with the old mirror from the buffet turned end-wise and the irregularities of the frame covered with cream colored curtains of the

bleached muslin hung from a buffet and how its various parts were used is in BOOK 7 of the series offered with these articles. Directions for making a spool table similar to those illustrated are in BOOK 5. Also the directions in the rug illustrated are in BOOK 5. Books are 15 cents each. Send your order to:

MRS. RUTH WYETH SPEARS
Bedford Hills New York
Drawer 10

When you hear a Marine called a "Leatherneck," it has nothing to do with the epidermis of his neck. Years ago the Marine uniform was equipped with a high stiff leather collar. From that time on, "Leatherneck" has been the word for a Marine. The word for his favorite cigarette is "Camel"—the favorite cigarette also of men in the Army, Navy, and Coast Guard. (Based on actual sales records from service men's stores.) And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S. and to men in the Navy, Marines, and Coast Guard wherever they are.—Adm.

DEODORANT CREAM

HIGHLIGHTS . . . in the week's news

ITALIAN CROPS: Italy is believed to have harvested more wheat this year than she ever did, even before the war, but most of it will probably fall to the German army, say department of agriculture spokesmen. They think the crop may have amounted to 280 million bushels. Indicating that looting of food supplies is taking place, is a report by way of Stockholm.

"PAY DAY": Farm soils working overtime to meet the war's vast production quotas can be restored if farmers will earmark part of their present war bond purchases for peacetime soil rebuilding projects, including the use of nitrogen, phosphorus and potash, according to a statement by the Middle West Soil Improvement committee made recently.

To the People of this Community:

HURRY-UP JOB!

The Third War Loan is a hurry-up job for the home front. The government must rush billions of dollars to the fighting fronts in the form of extra munitions.

3rd WAR LOAN

It's actually a matter of life or death for Americans in uniform. Once the invasion got under way we committed ourselves to the use of large numbers of troops and great stores of supplies. Any let down or crack-up in the supply trains could prove fatal.

Your job is to see to it that there is no shortage of anything needed to make the invasion swift and sure. We do not want another Bataan or Corregidor.

Get that extra War Bond today. Show that you are with our boys in this critical hour of invasion.

CARTOON

Miss Gertrude Grosshuesch, who is taking nurses training at the Deaconess Hospital at Marshalltown, spent Saturday and Sunday in Klemme visiting with her parents, Rev and Mrs. Calvin Grosshuesch and family.

Mrs Herman Paul and Grandma Suckow left Saturday for Milwaukee, Wisconsin for a visit with the Lawrence Schaefer family. Mrs Schaefer is a daughter of Grandma Suckow and sister of Mrs. Paul. They intend to remain in Milwaukee for a couple of weeks.

Rev. Harry Buss and family of Hudson, Iowa, came Saturday and returned home Sunday after visiting with relatives in the community. Rev Buss has purchased a small farm near Waterloo and will take a year's leave of absence from the ministry as his wife has not been well. The Buss family will move to their farm.

A picnic dinner was held Sunday in honor of Pfc. and Mrs Herbert Webner and Dennis of Madison, Wis., at the Kenneth Schlawn home at Garner. Those present were Mr. and Mrs. N C Nelson, Mrs Lloyd Brockman, Mr. and Mrs. Dan Webner and Etta Lou, Miss Elmer Olson, Mr. and Mrs. Donald Webner and Earl, Mr. Ted Webner, Miss Hilda Peterson, Mr. and Mrs Mike Kinsella and family. Mrs Henry Thomas of Ventura

Chester Ward, son of Mr. and Mrs Frank Ward, is now in Los Angeles, California, where he will work at his trade, that of a watchmaker and jewelry repairman. Chester has been employed at Waukegan, Ill., but changed to the west to benefit his health. In a letter received by his parents, he said he enjoyed Sunday dinner at the Don Stille home and also visited with Seaman Keith Stille of the U. S. Navy.

Many Clothes Conserved

Through Careful Handling

Home sewing has always been a dollar stretcher, and now it is especially important in this war effort. A garment made at home means that time and energy are released for some factory to turn out war goods. Remodeling old clothes so that they are neat and trim, reclaiming every piece of fabric not hopelessly worn out are important phases of the wartime conservation program.

The day-by-day detail care a dress receives, the way it is pressed, the promptness with which spots are removed, the frequency of airing and even the way it is placed on the hanger have a direct bearing on its appearance and the service it gives.

Regular brushing is one of the "care" details too often neglected. Dresses, coats and suits should be brushed both inside and outside before they are put away in the closet. Dust and lint collect along seams and in pockets and should be removed regularly. A clothes brush should be used for wool and wool-like dresses and a soft cloth for silks and rayons. Brushing is done in the direction of the grain of the cloth or with the nap if the material is a pile fabric. A rubber sponge brush or a brush covered with a piece of velvet is a good device for removing lint from a dark wool garment.

Fresh air helps to restore the resiliency to a fiber. Hence it is good practice to hang garments outdoors frequently. In any case they should not be placed in the closet immediately after wearing unless the closet is well ventilated. If it is impossible to hang them out of doors, they should be placed near an open door or window.

These Were the Days—

Men Wore Steel Collars!

Steel was a fashionable metal in Civil war days. It was worn by both men and women who followed fashions. Enameled steel collars, which, according to advertisements, could be "instantly cleaned by a slight rub with a wet cloth," were in much demand, and "double elliptic" hoop skirts, though they consumed a fair share of the country's spring steel, were the last word in wartime dresses.

Men bought an ordinary steel collar for as low as 30 cents, but "snow white" cost as much as a dollar, and "illusion-stitched, finished and corrugated" set buyers back \$1.25. "A suitable tie" sold for \$1 and men's cuffs at \$2.50.

Two separate patents for steel collars were granted in April and August of 1864, says "Steel Facts." The second of the two claimed to be the first steel collar to "unite two pieces of sheet metal . . . by a rivet." The rivet head was used to "receive and retain" the necktie. Another device was "a hook on the inside of the collar at the front to take the button-hole of the shirt."

Soon afterward the manufacturers entered the women's field.

Popping expansion of popcorn is determined by the relative percentage and location of hard and soft starch in the kernel and the proper moisture content.

In some eastern areas butter is virtually unobtainable now.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. to

Ira Overholt and Jay Griggs were at Spirit Lake on business Monday.

Herman Paul was at Des Moines Sunday for a visit with his daughter, Mrs. Eddie Epps and family.

Mrs. R. W. Elder returned Friday from Ames where she spent a few days visiting with her son, C. R. Elder and family.

Miss Jacqueline Kudje, teacher at Kanawha, spent Sunday in Klemme with her parents, Mr. and Mrs. Art Kudje and family.

Mr and Mrs. Wayne Pavey and daughter, Carol Ann, of Webster City, spent Sunday visiting at the parental, Wallace Pavey home.

Mrs. John Clements, Miss Bertha Johnson, LuVerne Lewis and Mrs. Gerald Koerner and son Terry were Mason City visitors Saturday.

Pfc. and Mrs. Herbert Webner and son Dennis of Madison, Wisconsin, spent a three day furlough at the parental Dan Webner home.

Mr. and Mrs. George Buseman have been notified by the War Department that their son, Wayne has arrived safely at his destination over seas with the U S Army.

Mrs. Ewalt Janke and children of Mason City came Friday for a visit at the parental Ben Mullin home until Sunday when Mr. Jahnke came over to take them home.

Mr. and Mrs. Earl Pethram and daughter, Bernadine; Mrs. Pethram's mother, Mrs. Bessie Walker, all of Chapin, were guests at the Wallace Pavey home Sunday.

Sunday dinner guests at the E. H. Patet home were Mr. and Mrs. Erdman and children of Forest City; Mr and Mrs John Lackore of Forest City; and Mrs Meyer and daughter Lila of Hayfield.

The hostesses at the W. S. C. S. meeting at the Klemme Methodist Church on Thursday afternoon are Mesdames E. H. Patet, John Neuberger, Mrs. Lew Neuberger and Mrs. Henry Busse.

Rev. Harvey is quite some gardener. The other day he brought a sweet potato to The Times that weighed 3½ pounds. Can anyone of you Victory gardeners beat that?

Mrs. Cleo Ingle and children left Friday for their home at Waukesha, Wisconsin, after visiting with her mother, Mrs. Lena Schroeder and other relatives here for about two weeks.

Mr and Mrs. Bert Mathews and Grandma Smith of Clear Lake were dinner guests Sunday at the John Day home. Grandma Smith will remain at the Day home during the month of October.

Lt and Mrs Harold Wicks, Mr and Mrs. Albert Kehl, Mr and Mrs Verle Keraus and Mickey were dinner guests with Mr. and Mrs. Ed Buntbach and Junior Tuesday evening.

Sunday evening callers at the Dan Webner home were Mr. and Mrs. Kenneth Schlawn and Bobby Mrs. and Mrs. Willard Palmer and Dottie, Mr. and Mrs. Mike Kinsella and family.

Clarence Swalve returned home last week Monday from the Belmont Hospital where he underwent an operation for appendicitis. Clarence is making a good recovery. Ed. Grifford is at the Swalve farm helping with the work while Clarence is recuperating.

Mrs. Lyle Wilcox received a gift Saturday from her husband, Lt. Wilcox who is now stationed in England. The gift was a beautiful casserole which was intended as a birthday present for Mrs. Wilcox, whose birthday was September 17.

"Cap" Blank of Kanawha and Miss Nadine Kimball drove to Boone Sunday for a visit with the latter's parents, Mr. and Mrs. Walter Kimball and family. Mr. and Mrs Kimball have purchased a house in Boone and will move into their new home soon.

Jim Denny of Garner was in Klemme on business Monday forenoon.

Mr. and Mrs. Reuben Lemke and children moved Monday to the Mrs. Rhine Lemke farm northwest of Klemme. Mr. and Mrs. Herman Thiemann, who recently purchased the house where the Lemkes lived, will move to town soon.

Arnet Waddingham and family moved Tuesday into the T. Blank house which was vacated by the Pete Paulson family. The Waddingham family had resided in the Albert Schmidt house in the north part of town.

Mr and Mrs Peter Paulson and son moved last Wednesday to Reinbeck, Iowa, where Mr. Paulson will work for the railroad. Mr. Paulson has been employed by the Rock Island here for the past year or more.

The ladies of the Liberty and Klemme Methodist Churches had fall house cleaning last week. Wednesday the ladies cleaned the Klemme church, and Friday the Liberty church was given a house cleaning.

Miss Gertrude Grosshuesch entertained to dinner Sunday at the home of her parents, Rev and Mrs Calvin Grosshuesch, the following young ladies: Avis Barz, Lucille Hartbeck, Irene Becker, Arlene Wille and Eunice Larsen.

Rev Wm Suckow, of Postville, Iowa, visited for a few days the latter part of last week with Klemme relatives. He is a son of Mrs H L Suckow Rev. Suckow and family are moving to Van Meter, Iowa, where he will be pastor of the U B Church.

The past week a number of Klemme women have helped with the seed corn at Belmont. Those who have been working with the seed are Mrs. Phillip Bock, Mrs. Loren Gast, Mrs. Ed Rall, Mrs. Martha Bredbenner, Mrs August Baack, Mrs. Roy Schaefer. A number of the same ladies assisted with de-tasseling corn earlier in the season.

Lt and Mrs. Ray A Jorgenson, Jr and baby daughter, Maryl Judy, left Tuesday for their home at Dodge City, Kansas, after enjoying a week's visit at the parental R. A Jorgenson, Sr home. They were accompanied by Mr Titus Davis of Merriam, Kansas, who spent the past week visiting with his daughters, Mrs Lyle Liebendorfer at Forest City, and Mrs. R. A. Jorgenson, Sr at Klemme.

U-DELT-EM CLUB MET WITH MRS. FRED J. ARNOLD

The U-Delt-Em Bridge Club began their fall and winter play by meeting at the home of Mrs. Fred J. Arnold last week Thursday.

The high score in contract was won by Mrs. P. M. Wilson, second high by Mrs. Art Kudje and third high score by Mrs. Geo. Lawhorn.

FIRE IN FIRE HOUSE

The fire siren warning in Waverly one day last week called attention of people to a fire in the fire station and to one of the best trucks at that. Fire was discovered under the truck, damaging a lot of hose and the truck's good tires. Firemen were able to get the truck out of the building and into the street before the building caught fire.

CHRISTMAS SEALS FOR U.S. SEAS MAILING READY

Mrs. Martha Bredbenner announces that Christmas Seals now obtainable for those who send packages to service overseas. You may get your seals either from Mrs. Bredbenner or the Lau Bros Store.

MEMORIAL

A granite boulder was recently placed on a hillside at the Upper Palisades on the Cedar river near the spot where the late Charles Kosek of Cedar Rapids used to moored his houseboat. The spot is also his favorite place of relaxation. The boulder has been suitably inscribed. The Linn County Fish and Game Club, of which Kosek was a member, was in charge of the dedication.

- HERE ARE SOME TIMELY . . .

Fall Reminders

THAT THE FIRST FROSTS OF THE SEASON should be a reminder to us that COLD WEATHER is just around the corner and that NOW is the time to prepare your house before cold weather sets in for good.

- STORM SASH AND STORM DOORS

STORM SASH AND STORM DOORS not only add to your comfort, but they actually SAVE YOU MONEY by saving fuel. Order these at once as they are going to be slow to get. We have IN STOCK a good assortment of Combination Storm and Screen Doors.

- ZONOLITE INSULATION WILL PAY FOR ITSELF!

ONE OF THE BEST INVESTMENTS you can make is to INSULATE your house with ZONOLITE. There are a number of houses in Klemme and vicinity that are insulated with ZONOLITE. The owners will tell you that the insulation has more than paid for itself in the fuel saved. Your house is also WARMER in WINTER and COOLER in SUMMER when insulated with ZONOLITE!

- WHAT ABOUT THAT OLD LEAKY ROOF?

IF YOUR ROOF IS NOT IN GOOD CONDITION, better have it looked after right away. NOW is a good time to lay a new roof before cold weather sets in. (It can be laid right over the old roof for extra protection and extra insulation.) We can do the job complete from furnishing you with shingles to do the carpentering for you.

- FIX UP YOUR HOUSE BEFORE COLD WEATHER

Northern Lumber Co.

Crowd Attends Methodist Church 50th Anniversary

FIVE HUNDRED CAME TO THE SERVICES OCTOBER 10

E. Whyte, Builder Of Church Gave Address Sunday Morning

page can be added to Methodist history of this community which would describe the celebration of Fifty Methodist which was observed Sunday and Monday at services at the Klemme Methodist Church.

Church was packed for all services held Sunday. Observance of the Golden Anniversary Sunday morning when E. Whyte, now of Ida delivered the sermon. Rev. was pastor here at the time brick church was planned and dedicated in the fall

Worship dinner was served in church dining room at noon and of four hundred people served by the ladies of church. Afternoon session was turned to the many former pastors and each talked briefly, but some special occasion was pastorate here Rev. district superintendent addressed the congregation.

Evening, the services began with an old fashioned song service by Rev. Fred Griewe, followed by the sermon by Rev. Harvey Nelson, a young man, now pastor of the church.

Supper was enjoyed by the services with Howardeshell, of Dows, in charge of the arrangements.

well pleased and the could not have been any many former residents from a great distance to attend the celebration.

booklets were given which contained the history of the church in this community. It was compiled and written by Arne Meyer, and is re-produced in the issue of The Times. Credit also goes to Mr. for making the beautiful cross, lighted by fifty electric bulbs and displayed in front of the church.

HOUSE HELD FOR VISITING MINISTERS AND WIVES AT HARVEY HOME

Mrs. Herschel E. Harlow, open house at the parsonage after noon from 2:00 until 6:00 for the visiting ministers and their wives who came to attend the anniversary celebration of the Methodist church.

was served by Mrs. Harlow. The labels carefully in buy- stock feed

ABOUT 800 ENJOY FARM BUREAU DAY; WINNERS OF EVENTS ANNOUNCED

A crowd estimated at 800 attended the Hancock County Farm Bureau day program at Britt Saturday. Herb Plambeck, who farm news editor, was the main speaker telling of his trip to England with emphasis on Agriculture. He exhibited an incendiary bomb which had gone through a barn in Scotland. He said that most of the bombs dropped on the English farm were incendiaries.

Clark Lackore was in charge of the program. H. C. Armstrong, Britt, Chairman of the Hancock County War finance committee, gave the welcome talk and Virgil Cook, Klemme, president of the farm bureau, responded.

Winners in the various sports contests were as follows:

Potato masher throw Mrs. Alfred Goll, first, Mrs. Emory Weaver, second. Softball throw women and girls age 12 and over Mrs. Alfred Goll, first, Mavis Neuhung, second, girls under 12 Ilene Oxley, first, Pearl Brandt, second, boys under 12, James Harvey, first, Keith Kornel, second.

Nail driving women and girls 12 and over, Mrs. Clarence Smith, first, Mrs. Clarence Bird, second, girls under 12, Ilene Oxley, first, Pearl Brandt, second, boys under 12, Billy Goug, first, Jas. Harvey, second.

Softball games, men's division, Erin township first, 4-H boys division, Liberty township first, 4-H girls division, Liberty township, first.

Ball games were held at the athletic field and other events at Memorial Park.

LEGION AUXILIARY NOTES

The Auxiliary voted to send \$8 to purchase requested clothing for our assigned child.

We are sponsoring a Halloween Dance, Saturday, Oct. 30th.

The six County Units are entertaining the Navy Mothers at a county meeting at Britt Oct. 26.

Our Unit voted to contribute \$10 to the War Relief Fund.

Plans are under way for an Armistice Day program.

HANCOCK HAS MOST OF TAX MONEY IN BAG

Property tax collections up to Oct. 1 totaled \$560,594, total levy, according to an announcement made this week by County Treasurer Roy L. McMillin. The total levy for the year is \$588,638. Last year 93 per cent of the tax was collected.

The 2nd half of homestead exemption money was received from the state and totaled \$37,825. Drainage collections for 1943 totaled \$9,822. Interest and penalty on tax totaled \$1,110.

Hancock county has purchased \$30,600 in war bonds from the permanent school fund.

Anton Ahrenkeil, Prominent Resident, Died Suddenly

FUNERAL SERVICES HELD MONDAY AT U. B. CHURCH

Had Resided At Goodell For The Past Twenty-five Years

Funeral services were held Monday for Anton Ahrenkeil, 56, prominent resident of Goodell, who died at his home last Wednesday evening after a brief illness.

Services were held at the U. B. Church with the Rev. Harold R. Knight officiating. The Masonic Lodge of Belmond, of which Mr. Ahrenkeil was a member, had charge of the services at the grave. Funeral arrangements were in charge of the Wellemeier Funeral Service of Klemme.

Interment was in Amsterdam cemetery near Goodell and Mr. Ahrenkeil was carried to his last resting place by his fellow townsmen Harold Savague, Amos Hanson, Max McMullin, Owen Conwell, Elmer Kinemonger and Ralph Hofer.

The obituary appears at the bottom of this page.

IRA OVERHOLT'S PARENTS MARRIED SIXTY YEARS

Mr. and Mrs. Ira Overholt are enjoying a visit from his parents, Mr. and Mrs. J. O. Overholt of Indianola, Iowa, who came Sunday afternoon for a few days visit in Klemme.

Mr. and Mrs. J. O. Overholt observed their sixtieth wedding anniversary on Thursday, October 7th, and so decided they would come to Klemme for a wedding trip.

Mr. and Mrs. J. O. Overholt are both enjoying good health and are very active despite their years.

Wedding Stationery printed and engraved at The Times Office

MEMINGITIS RATE CONTINUES HIGH, IOWANS WARNED

Disease Is "Likely" to Hold Same Rate Or Increase, Health Dept. Says

Occurring at an unusually high level during the first nine months of this year, epidemic meningitis is "likely" to continue at the same rate or possibly go higher during the coming months, the Iowa Health department said today.

The department stated that 70 cases of this disease were reported from the first of the year through September compared with only 8 for the corresponding period in 1942.

In September 12 cases were reported when only two had been looked for according to "expectation" tables based on the median average of cases from 1934 through 1942. Three cases are "expected" on this basis for October, but the health department is anticipating more.

Epidemic meningitis, it was brought out, frequently follows "waves of prevalence of other respiratory infection" and the department warned that the season of greatest prevalence of these infections is late fall and winter.

The virus of epidemic meningitis is often introduced by carriers, the department said, and transmitted by sneezing and coughing.

In many instances, according to the department, the disease is found among men in military organizations where the populations are concentrated. Travel of servicemen and civilians between military and civilian establishments may have something to do with the current state and national prevalence of the disease, the department said.

Preventive measures include avoiding upper respiratory infections, overcrowding and fatigue and maintaining good physical condition.

DORCAS CLUB MEETS NEXT THURSDAY AT CHURCH

The Dorcas Society of the Methodist church will meet next week on Thursday afternoon at the parlor of the Klemme Methodist.

The ladies will work on quilts, dish towels and stamp work for the coming bazaar.

CARD OF THANKS

We wish to express our sincere thanks to our neighbors and friends for their help and sympathy given all those who helped with the funeral service and who contributed flowers in memory of our husband and father.

Mrs. Anton Ahrenkeil.
Lt. and Mrs. Taalkus Ahrenkeil.

Hancock County War Chest Drive Begins Next Week, Oct. 21

To the People of this Community:

DRIVE DEPENDS ON YOU!

Would you take a free ride on a wounded soldier's back? That's exactly what you would be doing if you did not do your duty in the Third War Loan.

Your idle weight would be felt by him on the battlefield. Every civilian counts in this kind of war. Every civilian must make his energy and his dollars work for victory.

Keep in mind that while our national goal in this drive is 15 billions of dollars, this money is being borrowed from you and you and you. You are, as an individual, the deciding factor as to whether we reach this goal. An extra \$100 War Bond becomes an extra rifle, extra bullets and extra fighting power of every type.

THE EDITOR

HANCOCK COUNTY QUOTA SET AT FIFTEEN THOUSAND DOLLARS

Town Of Klemme Asked To Raise Its Share Of \$475.00

Dr. C. V. Hamilton, chairman of the Hancock County War Chest, announces that there will be a kickoff meeting for the War Chest drive, the meeting to be held at Duncan community hall Wednesday night, Oct. 20, 8 o'clock. The meeting will precede the War Chest drive which begins Oct. 21 and continues through Oct. 28. About 225 workers will attend the kickoff.

The speaker at the kickoff will be E. L. C. White, of Spencer, field representative for the National War Fund in this district. The Hancock County War Chest is the local unit of the National War Fund. The Catholic women of Duncan will serve refreshments.

All War Chest workers are expected to attend the meeting and all will receive a card notifying them of the meeting.

The Hancock County War Chest quota is \$15,000. That amount includes a sum to cover a year's expense of civilian defense in Hancock County.

The National War Fund will include money for all war relief agencies except the American Red Cross, and the money given to the Hancock County War Chest will go into the National War Fund. By uniting all war relief agencies under the war fund, it makes it possible for people to give once for all of the 17 causes included without being solicited repeatedly for the various agencies helping in the war effort.

More than half of the money will be utilized for services to the armed forces. The U. S. O. will receive about 55 percent of the funds raised. These war relief agencies are made possible in only one way and that is through the voluntary gifts of those back home through the National War Fund.

Klemme's Quota \$475.00

J. C. Thomas, chairman for the War Chest Drive for the town of Klemme, announces that Klemme has been called upon to contribute \$475.00.

Every home and business place in the town will be called upon and you are asked to contribute liberally if the quota is to be met.

Klemme has never yet fallen down and has always gone over the top in these drives. Klemme will not let our men at the front down in this drive.

KLEMMME YOUNG LADY ENLISTS AS CADET NURSE

Miss Gertrude Grosshuesch, only daughter of Rev. and Mrs. Calvin Grosshuesch, recently enlisted in the U. S. Army as a Cadet Nurse.

Although Miss Grosshuesch is under Army command, she will continue her course in nurse training at the Deaconess Hospital in Marshalltown, Iowa, where she recently completed her first year of study as a nurse.

ELL TOWNSHIP BOYS AND GIRLS 4-H CLUBS TO MEET

The Ell township boys and girls 4-H clubs will meet at the Chas. Goll home on Thursday evening, October 14, to elect officers and invite prospective 4-H members.

The county goal of 450 4-H club members for 1943 is a big one and each club is going to do its utmost to reach this goal.

Projects of all kinds are available. Invite your friends to become members. "Bring at least one prospective member" is the theme song of the 4-H leaders.

We want your news. Phone 12.

Obituary Of Anton Ahrenkeil, Goodell

Fifty-six years ago, a baby boy came to add to the home of George and Mette Ahrenkeil. It was their second child and they named him ANTON NELS AHRENKEIL.

His birthday was July 5th, 1887, and the place of his birth was Hartford, Iowa. His parents were natives of Denmark.

When Anton was a small child they moved to Hancock County where they farmed for many years. Here Anton attended the rural schools of Liberty Township and grew to manhood. Later he left the farm and for seven years helped different land-owners drain their lands with tile. Then for one year he was employed as a street car conductor in Chicago, which time he became interested in railroading. He then served as apprentice to Tom Schell, agent at Klemme for three years. He served as station agent one year at Osgood, one year at Miller, Iowa, and for twenty-five years as Rock Island agent at Goodell, Iowa, which position he held at the time of his death.

On December 15, 1916, Anton N. Ahrenkeil

and Agnes Blank were married. They are the parents of one son.

In addition to being a good husband and father, and besides being an efficient station agent, he was a useful citizen in the community where he lived. He served on the school board for 17 years, 6 of these as president. At present he was a member of the town council, on which board he had served for 20 years. He served as manager of the Community Hall ever since it was built. He was a 32nd degree Mason.

Mr. Ahrenkeil had suffered with headaches for some months, but Wednesday night a more severe attack struck him, and his passing occurred at 11:00 p. m., October 6, 1943 at the age of 56 years, 3 months and 1 day.

He leaves to mourn his passing his wife of Goodell, Iowa, his son, Lt. Taalkus Ahrenkeil in the Army Air Corps, and wife Mary, of Victorville, California.

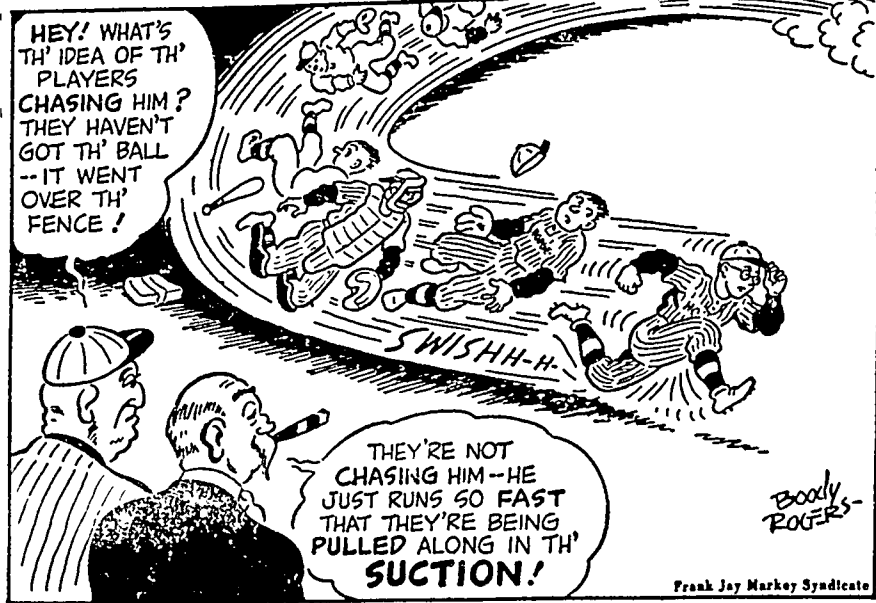

Two aunts, Mrs. Mary Ahrenkeil of Goodell, Iowa; and Mrs. John P. Christians of Davison, Iowa, and other more distant relatives and friends.

WNU--N

That Naggins Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and irregular habits, improper diet, drinking--its risk of exposure to cold--throws heavy strain on the kidneys. They are apt to become over-taxed and fail to filter out the blood. You may suffer aching back, headache, dizziness, getting up at night, leg pains, swelling, feeling tired, nervous, all worn out, and times burning, scanty or too frequent urination.

Try Doan's Pills. Doan's Pills are known to pass off harmful kidney wastes. They have had many centuries of public approval and are recommended by grateful users everywhere. Ask your neighbor!

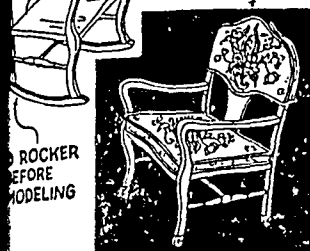

DOAN'S PILLS

THE HOME FRONT

RUTH WYETH SPEARS

There is a knack about selecting the right thing from the junk in Mother's attic—a second hand furniture store is a rocker not at all but just awkward to have. What you need is a chair that will push against the wall; may be used at a desk or for honor at the head of

REMOVE ROCKERS, AND ADD CASTERS FOR HEIGHT. PAINT CHAIR AND MAKE HARMONIZING CHINTZ CUSHION AND BACK COVER.

able. The chair you want is in that old rocker. You must see it in your mind's eye.

Remove the rockers and on go the casters and a seat cushion make it the right height. That makes it useful but still no better. A remnant of flowered fabric will cover the cushion and objectionable part of the back. Paint to match the blue background of the chintz bring the whole thing together. Often too prominent curves. A cherry red in the chintz may be matched in welting for the back of the chair back and cushion covers.

This sketch is from BOOK 5 in series of booklets prepared for readers. BOOK 5 also contains more than 30 ideas for transforming old furniture into fascinating things from odds and ends on hand. To get a copy send 15 cents with your order to:

HOUSEHOLD MEMOS

by Lynn Chambers

Bring Out Bean Pots for Guest Dinners!
(See Recipe Below)

Company Nights

"It may be on a strict ration budget, but it isn't necessary to ration hospitality if you plan the food and entertainment wisely. Food and pleasant conversation shared with friends make the long, cool nights, and work-filled days easier to share. Plan soon to have someone over for you can do it with today's recipes without stretching the ration or budget book out of joint.

Dishes should be hearty enough to satisfy any man-sized appetites you encounter, but pretty enough to draw compliments, too. Have things easy to fix so that you can have plenty of time to take part in the social activities of the evening.

Enlist the help of the children in setting up the tables, polishing silverware and glasses. They'll like doing it and it will ease the load on you.

Baked beans are grand for fall entertaining and they really make those points go a long way. They certainly answer the need for heartiness to satisfy appetites fanned by the coolness in the air, and when served in attractive casseroles with gay table background, they answer the beauty requirement.

If you make the beans yourself, a little pork goes a long way when it travels with other such savory foods as mustard, molasses, brown sugar, tomato sauce and vinegar.

*Home Baked Beans. (Serves 6 to 8)

- 2 cups navy beans
- 1/4 pound fat salt pork
- 1 1/2 teaspoons salt
- 1/2 cup brown sugar
- 1/2 teaspoon dry mustard
- 2 tablespoons molasses
- 1 small onion, quartered
- 1/2 cup catsup, if desired

Wash beans. Cover with water and soak them overnight. Cook slowly until the skins burst or until just tender.

Drain, reserving liquor. Place half the beans in bean pot or casserole. Bury a slice of pork in beans and another slice in the remaining ingredients. Add remaining beans and seasonings. Place remaining salt pork over the top. Cover with bean liquor. Cover and bake in a slow oven (250 to 300 degrees) 6 to 8 hours. If necessary, add more liquid.

Individual bean pots make serving simpler. The beans may be baked in small pots, or, if desired, baked in a large pot, ladled out into small pots before serving.

Relax your taut nerves and forget war worries by serving a delicious decaffeinated coffee—hot or cold. If making the coffee in a percolator, it needs slightly longer to bring out the full, rich coffee flavor.

Boston brown bread is the traditional accompaniment for baked beans. Slice it very thin, spread with butter or cream cheese, whichever suits your palate best.

Lynn Says:

Point Savers: Discarding leftovers is waste, for they can make many a meal, and a nice one. Use leftover meats or poultry and a combination of vegetables, and tuck that under a flaky pie-crust for a wonderful meat saver. Remember pie crust is packed with energy value because of the shortening.

Try high quality shortening for making pastry. It is fresh and sweet, doesn't have to be kept in the refrigerator and is of a nice texture to blend with flour.

To roll pie dough thin, cover board with a heavy muslin, and rolling pin with a child's white sock.

Lynn Chambers' Point-Saving Menu

- *Home-Baked Beans
- Boston Brown Bread Sandwiches
- Lettuce, Carrot, Tomato, Onion Salad
- Fruit Ambrosia
- Coffee
- *Recipe Given

Another dish worthy of consideration on cool nights for entertaining is this ground meat pie—that serves six with just a pound of meat:

Hamburger Pie. (Serves 6)

- 1 medium-sized onion, chopped
- 1 pound ground beef
- Salt and pepper
- 2 1/2 cups green beans
- 1 can condensed tomato soup
- 5 medium-sized potatoes, cooked
- 1/2 cup warm milk
- 1 beaten egg
- Salt and pepper

Brown onion in hot fat; add milk and seasonings. Brown. Add beans and soup. Pour into a greased casserole. Mash potatoes, add milk, egg and seasonings. Spoon in mounds over meat. Bake in a moderate oven (350 degrees) 30 minutes.

A waffle supper is another way of entertaining which can be inexpensive and consume only a few points. There are loads of things to do with waffles—either for main course or desserts. Make plain waffles and serve them with creamed chicken or leftover veal creamed with mushrooms. For desserts, try them with berries or fruit or a combination of ice cream and fruit or berries.

Walnuts in waffles make them taste wonderfully good. Serve a few tender, sizzling link sausages with these for a particularly tempting late evening snack:

Walnut Waffles. (Makes 4 to 6 waffles)

- 2 well-beaten egg yolks
- 1 1/2 cups milk
- 2 cups pastry flour
- 1/4 teaspoon salt
- 4 teaspoons baking powder
- 6 tablespoons oil
- 2 stiffly beaten egg whites
- 1 cup broken walnut kernels

Combine beaten egg yolks and milk. Add flour sifted together with salt and baking powder, then add oil. Beat until smooth, fold in egg whites and nuts. Bake in ungreased waffle iron.

As meat shortages become more acute, cereals are once more taking their place in the American diet. Spaghetti, macaroni, noodles, etc., all belong to the cereal family and may be used admirably for meat stretchers and substitutes. Combine them with one of the complete protein foods such as meat or cheese and you have a very satisfying, filling dish. Here's a dish fortified with grated cheese and another protein food, eggs:

Baked Eggs on Spaghetti. (Serves 8)

- 1 1/2 cups spaghetti
- 2 tablespoons butter or substitute
- 4 tablespoons flour
- 1 teaspoon salt
- 2 cups milk
- 1 cup American-style grated cheese
- 8 eggs
- Buttered crumbs

Cook spaghetti in 4 quarts boiling salted water until tender. Drain. Add melted butter. Add flour and salt mixed thoroughly. Pour in milk gradually. Cook, stirring constantly until thick. Add cheese and blend. Mix with spaghetti. Pour into shallow, greased baking dish. Break eggs onto spaghetti, sprinkle with buttered crumbs and salt. Bake in a slow oven (300 degrees) about 30 minutes or until eggs are cooked.

Are you having a time stretching meats? Write to Miss Lynn Chambers for practical help, at Western Newspaper Union, 210 South Desplains Street, Chicago, Ill. Don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

POST-TAX IMPRESSION

- 1—Are you married or single (whichever is the lesser)?
- 2—Are you single and living with no dependents other than those minus 10 per cent?
- 3—Are you a married person earning over \$1,200 a year and living with your 1941 or 1942 wife (whichever is the larger)?
- 4—In making out this income return have you first made every effort to convert from money to coal?
- 5—Print full name in this space and list any claims for exemption from Classification as a Class 1-A taxpayer.

6—If you have ever been rejected as a taxpayer give name of examining doctor and state nature of your physical ailment.

7—Were you ever turned down as a taxpayer for defective eyesight, poor hearing, glandular disturbances or poor circulation?

8—If you have ever made application to be deferred as a taxpayer on account of flat feet make a cross in this space.

9—On dotted line below give your best estimate or guess (whichever is the larger) as to your income between now and New Year's eve. It is now first down, 20 yards to go.

10—Give the names and addresses of three responsible guessers in your community who will indorse you as a man whose guesses are fairly reliable or wholly accurate (whichever is larger).

11—Do you decline to pay income taxes on the ground you are a conscientious objector? Any luck?

12—State your weekly income in this space and specify if your employer is a married man living with his uncle or a single man living alone on the April, 1942, level.

13—Multiply this by your best estimate of the number of dependents on both sides, minus October, and subtract 2 per cent for shrinkage. (See Section X; third or fourth door to the left, whichever is the larger). And remember no cuffs or belts.

14—In this space list your estimate of tax for the period hereinafter known as the Erie and state if you can convert from cash to oil.

15—To estimate the number of red coupons necessary for receipt for this payment add 3 per cent ad valorem and subtract serial numbers on all four tires. This leaves you all even.

16—Multiply the above result by the first six months of 1944 and give your best estimate, conclusion or speculation (whichever is the largest) of what you will have March 15, 1945, barring a collapse of your second front.

17—Print first and last name (whichever is the lesser) on this line, minus the 1942 middle initials (unless in essential industry) and give an estimate of your 1944 address (if single and living with your folks).

(Note—By act of congress, August, 1941, a penalty of \$10,000 fine and twenty years in prison (whichever is the larger) is provided for any person or persons (whichever is the smaller) having a complete understanding of this tax blank, unless thirty days notice shall have been given in writing or by phone (whichever is looser).

THE HAPPY BUTCHER

A butcher has just been sentenced to five days in jail and fined \$25 for charging too much for meat. But we are not worried. If he will just take a small steak to the hoosegow with him his confinement will be brief.

It seems that this butcher charged \$1 for a rib steak that should have cost 72 cents, and 59 cents for 42 cents worth of chops. Elmer Twitchell is heading a national campaign to have his sentence and fine rescinded and some sort of medal substituted. "Any butcher who doesn't overcharge more than that these days is a friend of the public," declares Elmer.

"I talked with this butcher," said Mr. Twitchell today, "and he is delighted. He says five days will be too short a time to get away from all those rulings, counter-rulings and Greek orders issued to the markets by OPA every week.

"I tried to tell him that it was all wrong putting butchers in jail, as it was the chiseling, bribe-taking wholesalers and black market racketeers who belonged there. They are the guys who make the butchers violate OPA ceilings. But he ordered me to let him alone. He said jail would be wonderful compared to the life he has led trying to follow the rules and meet the stern demands of his customers."

We understand the butcher resents assistance and is mighty glad to go to jail.

"The poor butcher was a pathetic figure, but very happy. He wanted to know if it would be wrong to send the judge a box of cigars for being so nice.

"His main satisfaction was that he would get away from the black market racketeers. I told him he needn't worry about that. None of these birds ever get sent to jail."

PATTERNS

SEWING CIRCLE

8484
34-48

Soft, Simple.

THE soft simplicity of this dress makes it ideal as an afternoon frock, in satin or one of the new crepes for fall. The bodice may be brightened with ruffling.

Pattern No. 8484 is for sizes 34, 36, 38, 40, 42, 44, 46, 48. Size 38 requires 3 1/2 yards 39-inch material.

Perfection.

WHEN you want to look your best, put on this flattering two-piece with softly detailed jacket and well-fitting skirt.

Pattern No. 8467 is in sizes 10, 12, 14, 16, 18 and 20. Size 12 jacket takes, with short sleeves, 1 1/2 yards 39-inch material, skirt 1 1/4 yards.

To mend broken glassware, dip it into melted powdered alum. Remove it and hold the pieces together with adhesive tape until the alum has hardened.

For safe storing, mattresses should be covered, then hung or placed on a flat surface with no more than one mattress on top of another, in a dry, well-ventilated space.

Do not wash eggs. Washing destroys the protective film that keeps out air and sun.

When babies shoes become dangerously slippery, sandpaper the soles to prevent falling.

A cork when soaked in hot water—even if it is a little too large—will fit a bottle readily.

NOTHING CAN DO MORE FOR YOU

In the entire field of aspirin than St. Joseph Aspirin. None faster, none safer. The world's largest seller at 10c. Also sold in economy sizes—36 tablets, 20c, 100 tablets, 35c. Demand St. Joseph Aspirin.

"REGULAR" AGAIN AFTER 2 WEEKS!

"Cereal Brought Relief from Long Siege of Purgatives!"

Here's a sincere, unsolicited letter every disappointed "doser" will want to read:

"I was a sufferer from common constipation. Took pills or medicines of some kind, but got no lasting relief. Finally, I tried KELLOGG'S ALL-BRAN. Have been eating it about 2 weeks now, and have stopped taking pills and things. My bowels move regularly every day. I am a KELLOGG'S ALL-BRAN eater from now on!" Mr. Burl Brown, Warren, Ark.

How do scientists explain KELLOGG'S ALL-BRAN'S gentle-acting, amazing relief, so familiar to thousands? Simply this: Lack of certain cellulose elements in the diet is a common cause of constipation. KELLOGG'S ALL-BRAN is one of Nature's richest sources of these elements—which help the intestinal flora lighten and fluff up the contents of the colon, for easy, natural elimination. Not a purgative, that robs the system of water. Not "roughage" that acts by "sweeping you out!" ALL-BRAN is a gentle-acting, "regulating" food!

Eat KELLOGG'S ALL-BRAN regularly. Drink plenty of water. See if it doesn't give you the relief you've dreamed of. Insist on genuine ALL-BRAN, made only by Kellogg's in Battle Creek.

Store Clothing

An attic is traditionally a storage
place. But it's safer to store
idle linens, blankets and clothing
at room temperature or lower, ac-
cording to Miss Gladys Adams, 4-H
clothing specialist. Because it
would be cooler, a large storage
closet on a lower floor would cause
less damage to stored fabrics.

Historical Sketch

From an historical standpoint, Methodism is still young in
Hancock County, Iowa.

In the year 1870, before the white man came with his plow
and other farming implements, Hancock County was but a vast
unbroken prairie where coyotes howled; where the wild flowers
bloomed in profusion; where an occasional prairie fire blackened
the landscape, where blizzards shrieked in unchecked fury
across the treeless plains;

SEBASTIAN ELL

Ell, who with his large fam-
ily settled in the township which now bears his name.

It was in the following year, 1871, that Reverend William
Koerner, a circuit rider, called at the farm home of Sebastian
Ell and conducted a religious service. This marked the begin-
ning of German Methodism in Hancock County.

Reverend Koerner faithfully ministered to the religious
needs of the scattered German families from Shell Rock to Al-
gon, including Charles City, Nora Springs, Mason City, Clear
Lake and Concord. He preached nearly every day of the week
in some farm home or school on his circuit.

On Thanksgiving Day, 1872, Reverend Gottlieb Haefner
moved to Concord as the first resident pastor. Religious serv-
ices were held in the new Court House in Concord, and the scat-
tered settlers drove many miles with their pony teams over sod
paths to attend worship.

The parsonage at Concord was a gift from Sebastian Ell.

During the next several years the pastors at Concord branch-
ed out and brought religious services to several nearby places,
such as Forest City, Ellington township, Liberty center school and
Belmond. In 1881 Reverend Gottlieb Haefner built the German
Methodist Church at Garner. In 1885 Reverend William Koerner
built the Liberty Methodist Church. Reverend Henry Kaste
brought German Methodism to Klemme in 1889, the year that
the town of Klemme was platted. He held services in the school
house.

Four years later, in 1893
the German Methodist Church
was built in Klemme under
the pastoral leadership of the
Reverend F. H. Wellemeier.
The Church was dedicated in
November of that year.

Klemme and Liberty
were linked together as a sepa-
rate charge in 1894 and Re-
verend Gottlieb Haefner was
our first resident pastor. Dur-
ing his pastorate the present
parsonage was built on the
present site at a cost of \$1,500
and the membership then to-
taled 222.

The Klemme German
Methodist Church was incor-
porated February 15, 1892,
the papers being signed by
the following trustees: Henry
Gruetzmacher, C. W. Knapp,
Henry Duesenberg, E. H.
Lenz and Julius Bettn.

F. H. WELLEMEIER

The first beginnings of the English Methodist Church of
Klemme started with the year 1890 and seemed to center around
two interesting women, Mrs. Amanda C. Kirkwood, and Mrs.
Myra Peitzke. Mrs. Amanda Kirkwood, who was the first woman
resident of Klemme, arrived here with her family in March
1890. Her husband, Alex Kirkwood was Klemme's first butter-
maker. A few weeks later Mrs. Myra Peitzke moved to Klem-
me and lived in a small new home which her husband, Henry
Peitzke, had just completed back of his blacksmith shop.

While the menfolk were busy getting their business places
established, these women were thinking about schools and churches
for their children. By fall, the Schaefer and Dow families
had arrived and through the joint efforts of several women, soon
a Sunday School was started in a little school house which then
stood on the Allie White farm, one mile south of Klemme. Re-
verend Nolte preached there occasionally and later Reverend
Humphrey from Belmond supplied quite regularly.

The first resident pastor of the English Methodist Church
was Reverend Charles Plummer, who, in 1894, started plans for
a church building. His successor, Reverend C. E. Anderson,
completed the project and the new church was dedicated in 1895.

Articles of Incorporation for the English Methodist Church
of Klemme were filed April 2nd, 1895 and were signed by Jose-
phine Palmby, Amanda C. Kirkwood, Elizabeth Dickenson, W. D.

rick, W. G. Dickenson, J. H. Harr, Mort Palmby and J. P. Larsen.

GOTTLIEB HAEFNER

structure was built. It was dedicated on October 5th, 1930.
Now, those who enter the sanctuary of our new church invari-
ably exclaim, "What a beautiful Church!" The German Metho-
dist Parsonage was kept for the minister's home.

The new Church was built with a tower for Chimes. These
were installed in 1941, during the pastorate of Reverend Herschel
E. Harvey, the present minister. The musical tones that go out
from the tower are an inspiration and an invitation to worship
for all who hear them. At this time a special tower was built
to house the church bell. This bell, which was provided by the
Womens Foreign Missionary Society while Mrs. Louise Stille was
its president, was retained from the original German Methodist
Church.

THE GERMAN METHODIST CHURCH

Pictured here is the Ger-
man Methodist Church which
was built in Klemme, Iowa,
in 1893. It was used as a
place of worship for thirty-
seven years, and then torn
down and the lumber sold at
auction.

On the lots where the old
church stood an orchard of
fruit trees now thrives. We
think of Reverend J. L. Ras-
ton whenever we eat of the
fruit, as he planted the trees.

This church entertained the
Northwest German Metho-
dist Conference in the fall of
1909 while Reverend George
Wessel was pastor.

THE ENGLISH METHODIST CHURCH

Pictured above is the former English Methodist Church of
Klemme, Iowa. Building operations were commenced in the fall
of 1894 and the building was completed and dedicated several
months later.

Shortly after the English and the German branches of the
Klemme Methodist Churches consolidated in 1923, this church
building was dismantled and the parsonage moved off to make
room for the new brick church building which now stands on
these lots.

HARRY E. WHYTE

BUD, playing grown-up, typifies the millions who responded
to the call for volunteers to guard the home front. They studied
first aid, fire fighting, plane types. They kept lonely vigils at
isolated posts. They took their jobs with deadly seriousness—
showed the world that America knew the meaning of "Alert!"

America's railroads know the meaning of that word, too.

Because of their alertness munitions plants operated at capacity,
fighting men and materials moved with great dispatch, and
entire war machine meshed and moved smoothly and swiftly.

ROCK ISLAND'S Program of Planned Progress typifies the alert-
ness so vital to the continued efficient operation of America's
railroads. For it visualizes improvements—what is to be done
when and how. With the transition from war to peace, ROCK
ISLAND will be ready!

As yesterday—and today—so tomorrow ROCK ISLAND'S
purpose is to provide the finest in transportation.

GUARD TOMORROW'S SECURITY
WITH WAR BONDS!

WEEKLY NEWS ANALYSIS

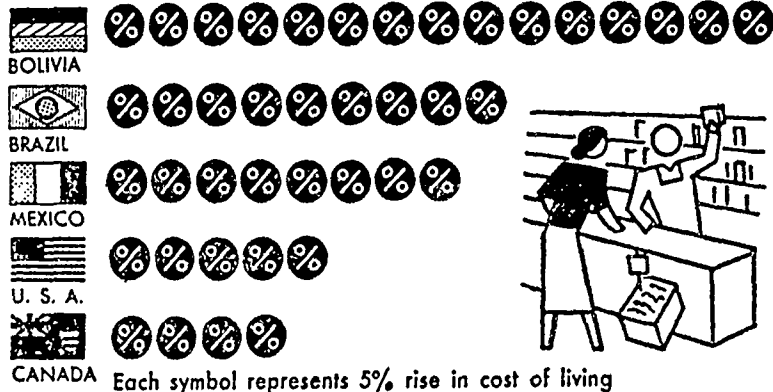

Allied Armies Launch Strong Offensive Against German Strongholds in Italy; Russ Score New Gains Along Dnieper; Dairymen Get First Federal Subsidy

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

TELEFACT

COST OF LIVING INCREASES IN THE AMERICAS

(SINCE OUTBREAK OF WORLD WAR II)

NAPLES: Gutted City

By the time Allied forces had opened their offensive against Naples, the Nazis had turned the big port city into a mass of flames. They wrecked and scuttled every ship that had escaped Allied bombs and destroyed every wharf.

The Fifth and Eighth armies were bringing their full power to bear against their objective. That the Germans had early given up hope of holding the city was proved by the wholesale destruction of all usable facilities. At least 30 ships lay sunk or aground in the harbor as the result of Nazi scuttling and Allied bombs. Bombers had also wrecked railroad yards so thoroughly that no traffic had come into them for weeks.

Corsica

Even as the offensive against Naples began, French troops and American Rangers were driving ahead in Corsica, island of Napoleonic history. They had closed in on Bastia, northeastern port of the island, and Allied naval and air forces had clamped on a tight blockade against German escape.

MILK PRODUCERS: Get First Subsidy

History was made in the dairy industry with the disclosure that the government has paid its first subsidy to dairymen. The announcement was made as Fred M. Vinson, economic stabilization director, took over the job of arbitrating a widespread milk price disagreement.

Senator Kenneth McKellar of Tennessee stated that Vinson told him a subsidy had been given milk producers in the drought-stricken area near Memphis. Other official sources said the subsidy would total 50 cents a hundredweight, approximately equal to one cent a quart.

LIFE INSURANCE: On War Deaths

Deaths in the United States army, navy and marine corps up to the end of June, 1943, have resulted in life insurance claim payments totaling 32 million dollars, the Institute of Life Insurance has reported.

Of 23,700 policies on which payments were made, \$15,100,000 was paid out under 11,100 policies in the first six months of this year by American life insurance companies.

"The number of deaths is probably half the number of claims paid," the institute said. The average ownership of life insurance is two policies per policy holder.

RUSSIA:

'Disengaged' Nazis

German troops continued to "systematically disengage themselves" as the Red army smashed on toward Smolensk, captured Poltava, the last Nazi base in the southern Ukraine, and engulfed German defenses along a 300-mile line just short of the middle Dnieper river.

Continuing their drive on Smolensk, the great Nazi eastern front stronghold that once was Hitler's headquarters, the Russian army closed in from the southeast, overrunning 863 villages and killing more than 5,300 Germans.

A Berlin broadcast acknowledged the peril to Smolensk, Kiev and other eastern front bastions. But Berlin was hesitant to paint the overall picture. For instance, The Germans at one time held approximately 500,000 square miles of Russia proper. It is estimated that they now hold only 200,000.

HESS:

Official Version

For two years British government sources kept their silence on the object of Nazi Rudolph Hess' flight to Scotland. Then Anthony Eden stood before parliament and told the official story:

Hess had made his historic and fantastic flight "on a mission of humanity." He came to Great Britain with specific peace terms because at that time Hitler feared a long war and didn't want to fight England. Among the peace terms that proved a stumbling block were these stipulations:

- (1) Hitler would not deal with Prime Minister Winston Churchill.
- (2) Germany wanted a "free hand" in Europe with the British empire to remain unmoled.

HANOVER:

Hangover

In one of the most destructive bombing raids yet delivered on the Reich, the Royal Air Force demolished a large area of Hanover and struck a crippling blow at an industrial machine already staggering from repeated onslaughts.

The Hanover raid was one of the most destructive to be delivered on Germany. Block busters and incendiaries were poured into rubber factories, railroad yards and supply depots at the rate of approximately 133,000 pounds a minute. London sources said the raid was one of the greatest air blows of the war.

Equally heartening was the indication that the RAF may have found the answer to anti-aircraft defenses and night fighters. Its losses were only 26 aircraft, a remarkable record for such a large-scale attack.

ALLIED CHIEF: Post to Marshall

To Gen. George C. Marshall was to go the supreme command of all Allied forces, it was reported, even as congress loudly protested over the general's rumored removal as chief strategist of the Allied armies.

According to the rumors, General Marshall's differences with British leaders over war plans resulted in pressure for his removal as U. S. chief of staff, in which capacity he mapped all U. S. military activity and thus influenced British action.

Official Washington waited to see whether General Marshall's reported appointment as supreme commander of all Allied forces carried with it the responsibility of continued planning, or whether it only involved execution of somebody else's strategy.

LEGION:

New Program

When the final gavel fell on this year's American Legion convention held in Omaha, Neb., delegates could look back on these major developments in the organization's program:

- (1) Election of a new commander, Warren H. Atherton of Stockton, Calif.
- (2) Pledging of a "middle road" conservative stand on the two important issues of foreign relations and domestic affairs.
- (3) Expansion of the Legion's Americanization program.
- (4) A memorial to congress calling on that body to tighten up the law on franking privileges to prevent congressmen from using the mails to promote the propaganda of an "un-American" cause.

GLOOM:

From Jap Radio

In a gloomy forecast of new Allied aerial blows, the Tokyo radio announced that Japan is getting ready to evacuate Tokyo and other important cities "in view of the decisive phase upon which the war will enter during the coming months."

Premier Tojo announced that the Japanese government had decided to prepare "for the moving of government departments, industrial establishments and the civilian population" from Japan's major cities.

The Tojo cabinet also called for total mobilization of the civilian population, abolishment of age limits to make all persons liable for national service and strengthening of government control over industry.

MASS INVASION: At 'Right Time'

Plans for a gigantic second front in France and the Low Countries "at what we and our American Allies judge to be the right time" were promised by Prime Minister Churchill in his war report to Great Britain's house of commons.

During his optimistic speech of two hours and seven minutes, Churchill defended the Italian campaign, terming it a "third front," and forecast a Stalin-Roosevelt-Churchill conference before the end of the year. He sketched Allied progress in air, sea and land warfare.

SAVINGS:

Go Up

During the three months ended in June, every working person in the U. S. added approximately \$60 to his cash and deposits.

This figure was indicated by reports of the Securities and Exchange commission, which declared that individual savings for the quarter totaled \$2,900,000,000. The figure per working person is obtained by breaking the SEC estimate among the nation's estimated labor force of 53 million people.

Washington, D. C.

QUEZON ON THE JOB

It's bad news for the Japs that President Quezon of the Philippines is back in Washington. They knew—though it was not generally realized in Washington—that Quezon had suffered a relapse of his old illness, tuberculosis, which has plagued him off and on for 20 years.

Quezon was a well man at the time of Pearl Harbor. But confinement in the dampness of Corregidor, during the Jap attack, brought the illness back again. That was one reason MacArthur urged him to return to the U. S. in a submarine. When he came to Washington, Quezon was advised to take things easy. Instead he rushed into the official activities of Philippine Commonwealth affairs, not sparing himself.

His physicians advised him not to remain in Washington during the summer of 1942, nor last winter. But he remained nevertheless. Result was that last spring he suffered a further relapse.

Specialists were summoned, and Quezon was given the stern advice that he would have to get out of the humid climate of Washington immediately, if he wanted to live. Yielding to pressure, he went to Saranac, N. Y., and submitted himself to a rigid discipline during most of the past summer.

Quezon led the life of an invalid, sitting in the sunshine in a wheel chair, listening to the radio, or to his nurses as they read to him. Result of this regime was that the tuberculosis was arrested, and Quezon gained 12 pounds.

When the Japs heard of his relapse, they were ready to say to the people of the Philippines, where Quezon is still highly popular: "Look, this is the skeleton you pin your hopes to."

But today Quezon is back on his feet and back at his desk, still hoping to realize his one great ambition, to see U. S. and Philippine forces march into Manila.

SEVEN MINUTES TO WAR

Every day now, pictures are arriving in a little room in Washington which seven minutes before were in Algiers, 3,400 miles away. One day, just after the landing in Italy, 41 pictures came through the air and landed safely on top of the Pentagon building, in a little room marked "Confidential—Keep Out."

Inside that room is a little machine not as big as a typewriter, with a little cylinder on it. The cylinder spins around, exposing a negative to dots and dashes of light, and after seven minutes, the exposure is complete. From there on, it's merely a matter of developing the negative, and the U. S. public has a picture of the landings in Italy, or the surrender of the Italian fleet.

And ditto for the South Pacific. It is farther away, but the seven minute requirement still holds. From an unmentionable post in Australia, the dots of light flash into the little room, and you have a picture of General MacArthur flying in a bomber over New Guinea.

The pictures may have been taken by any one of the four photo syndicates—Acme, AP, INP, or Life—or they may have been taken by the Army Signal service. In any case, they can be telephotoed only by the official airwaves.

What would be a highly expensive daily transmission cost for the photo agencies is thus fully borne by the war department. Officials justify the cost in terms of keeping the public abreast of the war—in fact, only seven minutes away from the war.

MERRY-GO-ROUND

Ex-Congressman Joe Casey of Massachusetts, now doing various inside jobs for the White House, recently made a political survey of New England, reported that Maine was so strong for Roosevelt's war policies that the only Republican who could beat him was Wendell Willkie.

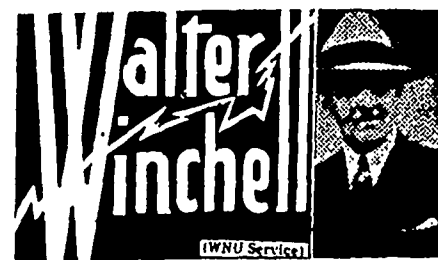

Admiral Standley, U. S. ambassador to Russia, has cleared with the state department a significant speech in which, after praising Russian victories plus those of England and the United States, he says: "A victory for one is a victory for all." Highly inflammatory remarks in Negro newspapers, some of them close to sedition, are being studied by the army.

Lew Douglas, war shipping administrator, was personally thanked by the President for the job he did in helping to smooth British and American general staff feelings at Quebec. There have been some very vigorous differences between them, and thanks partly to Douglas, things were smoothed out considerably at Quebec.

CAPITAL CHAFF

Winsome Molly Flynn of OCD recalls that on the day before Pearl Harbor she drove up to the White House door, on invitation to Mrs. Roosevelt's tea, and was told by guards, "We don't see your name on the list, but it's all right if you say so." Today, you can't get near the White House.

Among the canniest officials of OCD is Stanley McCandless, on leave from Yale university. At Yale, he was a stage-lighting expert. With OCD, he is a black-out expert.

Private Papers of a Cub Reporter:

The Washington Wire: It almost causes fist fights when you mention it, but they are saying we'll have a new Chief Justice of the Highest Court in 1945. . . . The big corporations which want to put up reserves for post war conversion will soon be cussing the Treasury's Randolph Paul, who wants them paid out in taxes now. . . . The U. S. is getting so much coin that the Democratic Nat'l Committee ain't gettin' any. . . . Otto Hapsburg was rejected by the army because he claims Hungarian citizenship. . . . His sponsor is a cabinet member's wife! . . . The inner circles hear that Stalin thinks Germany will be out of the war by March.

E. P. Dutton, publisher of the sensational No. 1 best seller ("Under Cover") has enough paper to sell another 60,000 copies. They indemnify book sellers against libel actions (none to date) as a result of selling it. . . . In Detroit Ass't FBI Chief Bugas said: "The FBI, in its antispiny work, hasn't had two cents' worth of help from Mr. Dies!" . . . How come the Dept. of Justice doesn't go after Joe Kamp for putting out pamphlets titled: "Dep't of Justice—From the Secret Files of the FBI"? . . . Isn't the use of the Dep't of Justice name illegal? There is a Presidential order saying that the FBI reports are so secret not even Congressional committees may see them.

War Correspondent Robert Casey (his last book was "Torpedo Junction") was invited by the navy to do a book about submarine warfare. . . . After three months with our undersea fighters, Casey submitted the manuscript. . . . The navy censors deleted nearly 40 per cent of it. . . . Casey was so infuriated he refused to permit the expurgated document to be published. . . . Shortly after, the U. S. asked the star reporter to do another job. . . . "On one condition," he said, "that I am assigned where there are no American censors!" . . . Casey is now abroad getting the facts without "editing."

New York Melodrama: In the Mutual Radio Theater on 52nd St. the other night the solicitation from the stage (for broadcast spectators) failed to arouse one citizen to buy a bond or stamp. After what seemed like ages and still no bond sales, a sailor yelled from the balcony. . . . He rushed down to the stage. . . . From his blouse he took a single crumpled dollar. . . . Announcing it was his last dollar, he bought stamps with it. . . . Then with a defiant air, he licked the stamps and pasted all of them on the stage. . . . Then he left—head high—with a glare of contempt at the audience. . . . You could have heard their blushes drop for the next few minutes. . . . After that, 950 people rushed to the stage to buy theirs. . . . Hmf!

The White House phone number is National 1414. . . . The Troika night spot in the Capital 4141. . . . The cafe's exploiter in New York phoned the Troika. He absentmindedly asked for National 1414. When the Washington voice said hello, the p. a. shouted, "Well, we got in the papers today."

"Really!" retorted the White House operator. "Don't we usually?"

A State Dept. source insists that the facts are absolutely correct. . . . It seems that just before the recent blowup in Denmark, the Nazis had gone to King Christian and told him they wanted the Nuremberg laws put into effect in Denmark. . . . "But," the King protested, "I can't do it. Those laws are barbaric!"

"Don't be a fool," said the Nazis. "Those laws are only designed to oppress the Jews of Denmark."

"Examine the Danish constitution," said the King coldly. "You will see that my official title is 'King of All the Danes!'"

Vignette of a Patriot: She's a little old Jewish lady of about 65. . . . She was inspecting the Coney Island garbage cans, with a stick in one hand and a big bag in the other. . . . She looks for tins that housewives neglect to save for salvage.

Three of her grandsons (all college graduates) are at the fighting fronts. . . . A neighbor saw her pecking at one can. . . . "You won't find any there," he said, "all the folks in this house save their cans." . . . "Maybe," was the reply—as she kept prodding the garbage, "somebody forgot."

Sounds in the Night: In the Stork: "He's in 6-Z. Rejected by the army and civilians!" . . . At the Park Central Roof: "He must be important. Look at all the smiles in front of him and the sneers behind him!" . . . At the Enduro: "Tell me something. If you had it to do over again, would you still be the rat that you are?"

Ex-Mayor J. J. Walker, snapped by a news photogger at Shor's, quipped: "It'll take more than one bulb to bring me back!"

Uncle Phil Says:

I pity the man who doesn't like to read a book on a rainy day.

Of all the animals, the dog seems to get the most out of life. He knows how to love.

Some of the worries which come to us are really none of our business.

A lot of things can be done with money, but saving it seems to be the hardest.

Fashion wears out more apparel than women do.

Many a good business has been built up primarily on good manners.

We'll admit that inquisitiveness born in the right direction is useful, but in ours.

The mystery of what is in the dishes you like most sometimes accounts for your fondness for them.

Relief At Last For Your Cough

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

CREOMULSION

For Coughs, Chest Colds, Bronchitis

Yearning Every yearning proves the existence of an object meant to satisfy it; the same law creates the giver and the receiver its longing and its home.

SNAPPY FACTS ABOUT RUBBER

ABOUT RUBBER

Heat and friction are the greatest enemies of rubber. Tire treads wear out five times as fast in a temperature of 100 degrees as when the thermometer registers 40 degrees.

Rubber previously used for garden hose will provide for lives on carriages of 8,500 "75's" and 6,800 37-mm. anti-aircraft guns and 600 pontons for Army bridges.

Samuel Peal was granted the first rubber patent in England in 1791. It covered the waterproofing of leather, cotton, linen, etc.

It was on peace

B.F. Goodrich

FIRST IN RUBBER

HIGHLIGHTS . . . in the week's news

SOAP: More soap is on the way, say spokesmen of the War Food administration, promising a 28 per cent increase in supplies by November 1.

BATTING: Luke Appling of the Chicago White Sox baseball team is leading the American league with a batting average of .324, slightly above the second place man, Dick Wakefield of the Detroit Tigers.

DEBT: Congress may soon be asked to raise the debt limit of the nation to 300 billion dollars, Representative Cannon, chairman of the house appropriations committee, stated recently. He said that at the present rate of spending, between seven and eight billion dollars monthly, the government is approaching its present limit of 210 billions.

How America Treats Axis Prisoners of War Concentration Camps Throughout U. S.

Good Treatment Yields Dividends Captor Nations

WHAT is our treatment of prisoners of war? Are they overpaid? Do they have to work? These and many other questions are being asked as the war of Axis prisoners mounts. As a matter of fact, the prisoner problem has become a real one since the mass surrender of Axis prisoners in Tunisia. After Sicily was captured, Gen. Eisenhower on his hands the staggering number of 135,000 Axis prisoners. It is a job for any man's army.

While it is true that prisoners of war are enemies of this country, and they have been directly responsible for the loss of American lives, they cannot be treated as enemies, but must be treated as soldiers rather than criminals, always with this thought in the background—the treatment we accord enemy prisoners will, in some measure, determine the kind of treatment given American soldiers who have been unfortunate enough to fall into enemy hands.

There are at least two other reasons for the good treatment of prisoners, aside from humanitarian considerations, one being upon a treaty made at Geneva on July 27, 1929, and the other a purely psychological one, namely, that war-weary, underfed troops may be tempted to lay down their arms to an enemy who feeds them liberally and gives them safe quarters.

Geneva Conference. The Geneva Convention, which was ratified by 37 countries (which, by the way, did not include either Germany or Russia) certain rules on treatment and behavior were formulated. Under the provisions of the Geneva Conference soldier prisoners are required to work, but officers are not. The amount of time a prisoner must work is based on the number of hours put in by free labor in the adjoining territory, and one week is to be a day of rest. Food and clothing must be provided for the detaining army.

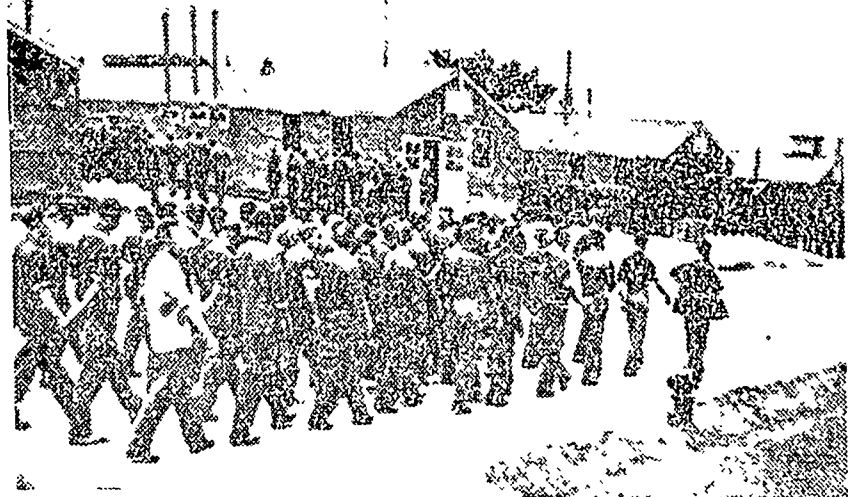

Occupational classification is determined by the prisoner's physical makeup. For instance, the prisoner who was formerly engaged as a clerk or teacher should not be put to hard labor. This provision, however, has been largely ignored in the countries, where many a scholar soldier grinds out a day that is his strength sorely.

Every concentration camp has different crafts and trades assigned to the prisoners, but in no case do they work on projects directly connected with the war effort, as a precaution against sabotage.

Payment for labor is at the rate of 30 cents a day for the ordinary soldier, here in the United States, where we have some 70,000 Axis prisoners scattered throughout the country in 22 camps. The rate of pay for officers ranges from \$20 a month to \$40 a month. Officers who have been assigned no work get paid anyway, at the regular scale.

Fed Army Rations. Prisoners in the U. S. army camps are fed the regular army field rations. In this respect they fare much better than General Wainwright and his gallant band of defenders who laid down their arms at Corregidor only after food and other supplies had been cut off. The Japanese diet consists mainly of rice, and there is reason to believe that the heroes of Bataan and Corregidor have suffered considerably from malnutrition since they fell into enemy hands. The Japs evidently have nothing much better to offer, even the warriors of Guadalcanal and New Guinea have been forced to rely upon rice as their mainstay. Kiska and Attu furnished evidence of the Japs' utter dependence upon rice as a fighting food.

While the Japanese government has recently agreed to certain proposals for the treatment of prisoners, their at-

Pictured here are some of the 2,000 German prisoners of war who are housed at Camp Breckenridge, Ky. They are marching to the mess hall. German prisoners are closely guarded at all times, for, unlike the Italians, they refuse to play ball and are confidently arrogant. Most of them are glad to work to relieve the boredom of inactivity.

itude has been far from satisfactory. A case in point was the shooting of the U. S. fliers who bombed Tokyo with General Doolittle's squadron which took off from Shangri-La (aircraft carrier, Hornet) and who had the extreme misfortune of either being shot out of the skies or forced down for other reasons. These prisoners, it was later announced by the Japs, were shot, contrary to all the rules of war, as a deterrent to other American fliers who might engage in the bombing of Japan. This violation of the international rules of war has not, however, worked, and Japan may well tremble in its boots for the day of reckoning which is drawing closer with each dawn. Bombing perimeters are drawing closer to the heart of the Japanese empire day by day.

The bulk of the work done by Axis

captives in the United States is agricultural. This field, of course, offers the least opportunity for sabotage. When captives engage in this work they do not in any sense compete with native labor, but are simply supplementary to it. Farmers arrange with their county farm agent for the employment of prisoners. The number is usually small and the prisoners are scattered over wide areas, thus removing from this practice all element of hazard.

Generally speaking, Axis prisoners, with the exception of the Japs, of whom we have only a very small number, are a contented lot. They have better food, clothing and shelter than they had under the Nazi banner, in a certain sense they have more liberties, and for them the war is over.

More Gifts for Overseas Servicemen

Based on increasing demand for gift items it is estimated that overseas servicemen and women will receive 20 per cent more Christmas presents per capita this year than last, and the home folks may expect an even larger percentage of reciprocal gifts, mostly of the luxury and sentimental type. This forecast was made by John C. Goodall, general manager of the Merchandise Mart, Chicago, following a checkup among gift item manufacturers and distributors, including those who sell

Ernest J. Kreutgen, Chicago postmaster, (left) explains to George McCarthy, foreman in charge of foreign mail, how packages should be wrapped and addressed to get favored delivery service to men in the armed forces overseas.

to retailers and army and navy post exchanges.

Reasons given for the expected increase in the number of gifts sent this year overseas are:

1. The moved-up official mailing date, September 15 to October 15, extended to November 1, for those in the navy, marine corps and coast guard, will stimulate early shopping, and the five pound limitation on gift packages means more will be sent.
2. More stores have installed special gift counters or departments which means more display, advertising, and sales.
3. The home folks are now better advised on the gift preferences of servicemen and women, and know more specifically where they are stationed, hence can make their selections more intelligently.
4. The overseas forces, operating on more fronts, and facing more varied climatic and geographical conditions, become eligible for a wider variety of gifts.

The tendency to send more gifts to those furthest from home also favors increased sales. While shortages at home are developing in such items as watches, leather novelties and jewelry, it is thought heavier

purchases of more available items will more than offset these.

The number of gifts to come from service personnel abroad to relatives and friends at home is expected to be larger per capita because manufacturers and distributors, who sell to army and navy post exchanges, particularly in the Mediterranean area, already report rising sales to servicemen and women. More post exchanges, greater opportunity afforded servicemen to buy direct from the natives, who also sell to PX, is a factor now boosting sales. Other sales stimulants are that overseas servicemen and women, in high spirits themselves, are not so sure about the morale of the homefolk and seek to bolster it by gifts. Flush with cash, and conscious of accumulated favors from home, the overseas contingent find themselves in an ideal spot to reciprocate.

Among American made gift items most popular at overseas post exchanges are pins, clips, earrings, vanity cases, many bearing the insignia of the various branches of the service. Ornate pillow tops and handkerchiefs, which embody delicately worded sentiments, come to the aid of thousands of less articulate servicemen. Such items are prime favorites overseas as well as at post exchanges at home.

Necklaces, embroideries, pipes, laces, opal and topaz jewelry, metal and leather handicraft of Latin and Oriental origin, is also in high favor. Watches, one of the top preferences among all in the service, are relatively easy to get in the Mediterranean area, since many of them come direct from Switzerland.

The gifts servicemen may expect from the home folks parallel somewhat those sent last year, although there will be a wider selection to choose from. Furlough bags, small carry-all and sewing kits, duffle bags, wallets, religious medals, identification bracelets, photo cases, pen and pencil sets, shaving equipment, insignia pieces, and of course cigarettes, are high on the preference list of servicemen.

Money belts are not expected to be as popular this year as last, while watertight pocket-size holders for miscellaneous personal things are in high vogue. Pocket-sized games such as checkers, cribbage, gun rummy, backgammon and acey ducey are similarly popular.

While these gift items have general popularity among the forces overseas as well as at home, a variety of gift preferences is developing. A large number on the Pacific front, for instance, show partiality to such articles as knives, sun glasses and anti-sun and bug lotions.

The growing number of service women is dictating the installation of women departments in post exchanges. Heavy orders for toiletries, apparel items, and the more esthetic type of gifts are reported.

B-26 Marauders at a U. S. base, somewhere in England. This new twin-engined medium bomber has recently been introduced in Europe.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

JESUS AND THE SABBATH

LESSON TEXT—Exodus 20 8-11; Isaiah 58 13, 14, Mark 2 23-36.

GOLDEN TEXT—And he said unto them, The sabbath was made for man, and not man for the sabbath.—Mark 2 27.

The sabbath was essentially a day of rest and worship; hence the principles which surrounded it and directed its life may be applied to our day of rest, which is the first day of the week—the Lord's day.

That word "rest" sounds a little strange in this busy world of ours, and yet it is an important one. It means quiet for the struggling one, calm for the troubled, repose for the weary, tranquility for the disturbed, cessation of labor for the worn-out one.

God in His infinite wisdom saw that without rest man would soon destroy himself, and He made provision for one day in seven when labor should cease and man should be free for that recreation of soul and body which should fit him for the labor of the week.

Our lesson answers two important questions about our rest day, namely, Why? and How?

I. Why We Keep a Day of Rest (Exod 20 8-11, Isa. 58:13, 14).

The chief reason is that God commands it. One day out of seven is for our recreation by rest and worship. That should be sufficient to cause His people to "remember" the day "to keep it holy."

Doubtless it is true that essential war work and related activities must be carried on, even on Sunday. God did not forbid works of necessity. But even though there is this need, who will deny that many use Sunday for work that is not essential—and countless others devote it to godless pleasure.

Notice that the day of rest was to be not only for the family, but also for servants and for visitors. The employer who unnecessarily operates his factory or office on Sunday violates this commandment. Note also that the man who is to rest on the seventh day is supposed to work on the six days.

The precept of Exodus 20 is enforced by the promise of Isaiah 58. The man who delights in keeping God's commandment regarding the day of rest, will find that God delights in and honors him. Both men and nations have found this to be true.

II. How We Keep a Day of Rest (Mark 2:23-36).

The formalists of Christ's day, the Pharisees, had overlooked the heart of God's law and the holy living which it was intended to produce, and had bound up even the observance of the sabbath (which was intended to be a day of rest and gladness) in such a mass of technical "thou shalt nots" that it was a day of fear. They had a false outward profession of worship and had entirely missed the true spirituality of God's law, a fact which drew upon their heads the anger and rebuke of our Lord.

The two incidents in this portion of our lesson reveal that under the cloak of earnestly observing the law of the sabbath, the Pharisees were actually covering their own hypocrisy and their hatred for Christ.

The accusations against the disciples because they had taken and eaten grain was not on the ground that they had stolen, for the law (Deut. 23:25) guaranteed that right to the one who passed through his neighbor's field. The Pharisees contended, however, that the disciples had worked on the sabbath in picking and hulling the grain.

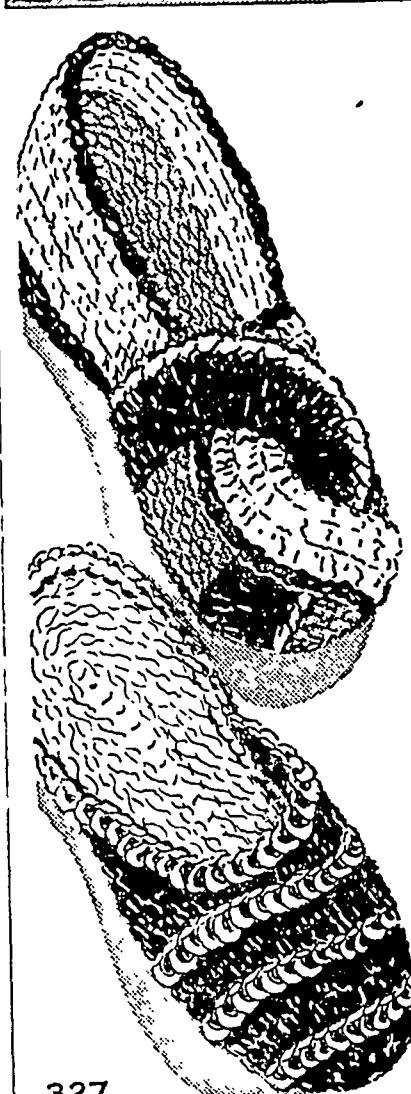

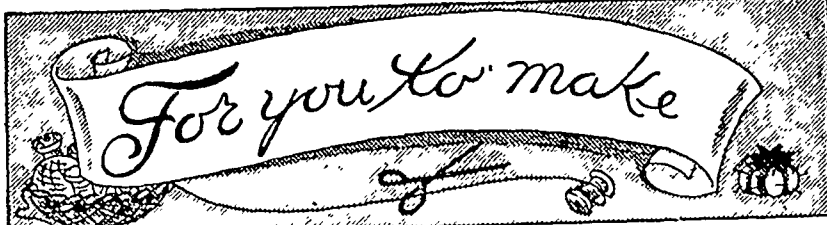

The healing of the man with the withered arm revealed that back of their professed concern for the sabbath was a real hatred for Christ. It is an appalling thing that in the house of worship on the very sabbath day, these men, outwardly so religious, were plotting against our Lord.

"They watched him," and even so the enemies of the Cross watch us who are His followers. They are not concerned that the man with the withered arm, or with the withered soul may be helped, but only that they may find something to condemn.

Jesus cuts across human hypocrisy and hatred to declare that the true keeping of the sabbath is to do the work of God. No work of necessity (like plucking the grain) or of mercy (like healing the withered arm) is ever out of place on the day of rest.

A word of caution is needed, for some have sought to interpret this Scripture as providing biblical ground for doing all sorts of things on their day of rest. That day is for man's good, not for his destruction. His greatest good is served by rest, worship, spiritual development, Christian fellowship, and the doing of deeds of necessity and mercy.

The desecration of the Lord's Day in our time is a serious matter. Let us not contribute to its deterioration. America needs Sunday as a day of rest and worship.

327

RIGHT "in step" with the times is this crocheted footwear. It's economical to make (the soles are crocheted of rags) . . . it's quick to do . . . and it launders perfectly.

ASK ME ANOTHER?

A General Quiz

The Questions

1. What is the highest mountain in the Western hemisphere?
2. A desiccated article is what?
3. What was the capital of the United States from 1790 to 1800?
4. How many islands are included in the Hawaiian group?
5. At what degree centigrade does water boil?
6. What is a censor?
7. Who was the vice president of the Confederacy?
8. What state uses a pelican as its emblem?

The Answers

1. Mount Aconcagua in the Andes.
2. One from which moisture has been taken.
3. Philadelphia.
4. Twenty.
5. One hundred degrees.
6. A vessel for perfumes.
7. Alexander Stephens.
8. Louisiana.

KEEP RULES IN MIND TO AVOID FARM ACCIDENTS

Farm safety, especially during harvesting operations, depends mainly on the individual and his keeping a few simple rules in mind. Regardless of the care used by manufacturers of farm machinery in the design and construction of equipment, many conditions cannot be completely safeguarded against without interfering with reasonable accessibility and efficient operation.

Workers should remember particularly that combines or corn pickers should never be cleaned, greased or adjusted while they are running, nor should they ever be operated unless all safety shields are in place, including the shield furnished by the tractor manufacturers to cover the front universal joint.

They should take special precautions to keep hands, feet and clothing away from revolving snapping rollers. Ragged, torn or frayed jackets or pants should be left hanging on the hook and only clothes in fairly sound shape worn around machines.

Extension agricultural engineers at Iowa State College advise also that a metal sediment bowl be installed on the fuel line of the tractor, to lessen fire danger.

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. to

J. C. Pavey, of Garrison, Iowa, visited with his brother, Wallace and wife, Friday evening.

Fred A. Arnold was transacting business in Mason City Thursday afternoon.

Mrs. J. C. Thomas and Mrs. P. M. Wilson were Mason City visitors on Monday afternoon.

The Standard Oil Co. is building another storage tank to add to their equipment here.

Walter Eisberg of Garner, was transacting business in Klemme Saturday evening.

Mr. and Mrs. Donald Bacon and children of Buffalo Center spent Sunday in Klemme visiting at the parental Art Wellemeyer home.

Miss Mary Jane Lucas, manager of the Central States Electric Co. at Garner, was in Klemme Monday on business.

Rev. and Mrs. Earl Josten and baby of Des Moines, visited with Klemme relatives and friends on Monday.

Rev. and Mrs. Harry Whyte and son of Ida Grove, were dinner guests Monday at the home of Mrs. C. A. Arnold.

Mrs. George Rule of Dow City and Mrs. Jess Gregory and son Byron are visiting at the home of Mr. and Mrs. Gerald Koerner.

Rev. William Suckow, who will serve as pastor of the U. B. Church at Van Meter this year, visited at the Herman Paul home Monday.

Mrs. Orville Bridges and daughter, and Miss Phyllis Swanson were Mason City visitors Thursday afternoon.

Mr. and Mrs. Marvin Isvik of Chicago, were dinner guests Friday evening at the R. W. Elder home.

Mrs. Henry Medaus has been informed by the government that her grandson, Duane Johnson has arrived safely in England.

Mrs. Tony Ahrenkeil of Goodell is moving to Klemme this week. Mrs. Ahrenkeil will live in the Lucas house north of the Henry Keeper home.

Mr. and Mrs. Norman Missman of Woden were visiting at the Dr. W. F. Missman home Sunday and attending the services at the Methodist Church.

Miss Irene Harms, who teaches at Newton, Iowa, came Saturday to attend the 50th anniversary celebration at the Methodist church and to visit at the J. C. Thomas home.

Mrs. C. G. Waterman and Mrs. Lyle Wilcox were Mason City visitors Tuesday. They took Mrs. Mary Waterman there to take a train for Chicago.

Mr. and Mrs. Rudolph Hefte and daughter, Marlys, of Amarilla, Texas, came Saturday for a visit at the parental, Mrs. Daisy Lemke home.

Miss Stella Thieman, who is taking a beauty culture course at Des Moines, spent the week end visiting with her parents, Mr. and Mrs. George Thieman.

Elwyn Jacobs, who is a freshman student at Simpson College, Indianola, Iowa, spent the week end in Klemme visiting with his parents, Mr. and Mrs. Ed Jacobs and family.

Mr. and Mrs. Marvin Isvik and baby came Wednesday from Jewell for a visit at the parental C. A. Larsen home before returning to Chicago after enjoying a vacation in Iowa.

Mrs. C. A. Arnold and Miss Minnie Lenz returned home Friday from their visit at Watertown, South Dakota. Mr. Adolph Ridder is still very ill and in the hospital at Watertown.

Duane, son of Mr. and Mrs. Henry Lewis, was absent from school several days the past week as he had his tonsils removed last week Tuesday. Duane is making a good recovery from the operation.

Mr. and Mrs. Fred G. Steffen and Mr. and Mrs. Paul Grange of Mason City attended the services at the Methodist Church Sunday morning and afternoon and visited with Klemme friends.

Mrs. Ernest Adams Scheetz and daughter Mary Elizabeth, of Wacom, Iowa, came last Wednesday for several days visit with her sisters, Mrs. Quentin Stille and Mrs. Bert Jones and families.

Miss Jacqueline Kudje came home from Kanawha Friday evening to spend the week end visiting with her parents, Mr. and Mrs. Art Kudje. Miss Kudje has thirty-four pupils in her room in the grade school.

Rev. and Mrs. J. L. Ralston were dinner guests Monday at the home of Mr. and Mrs. R. W. Elder. Lowell Ralston is in the U. S. army; Paul is a freshman at Morningside College and Margaret is a sophomore there.

The Rock Island depot was recently given a new coat of red paint. Formerly yellow paint and green trim was used but Agent Ole Ramsay said the red color is being used because of a shortage of the colors regularly used by the Rock Island.

M. F. Penrod, a former superintendent of the Klemme Schools, came from his home at Pulaski, Iowa, Saturday evening and attended the 50th anniversary celebration of the Methodist Church Monday he left for northern Minnesota to look after his farm.

Mrs. Mary Waterman left Tuesday noon for Chicago where she will spend the winter months at the home of her son-in-law and daughter, Mr. and Mrs. Axel Hofgren. Mrs. Waterman spend the summer in Klemme with her son, C. G. Waterman and family and with other relatives and friends.

There were a lot of visiting ministers and their wives in Klemme for the 50th anniversary celebration of the Methodist Church. They were entertained at various homes while in Klemme. Rev. Mitchell was a guest at the John Chambers home, Rev. and Mrs. A. B. Gedye at the Dr. D. P. Anderson home; Rev. and Mrs. Wessel, and Rev. and Mrs. J. L. Ralston, Margaret and Paul at the Elmer Arnold home; Rev. and Mrs. H. E. Whyte and son Lyn; Rev. and Mrs. Fred Griewe and Mr. Penrod at the E. H. Patet home.

GOOD PLAN TO CHECK UP ON WATER SYSTEM NOW

Iowa State College extension agricultural engineers suggest that the farm water system be given a particular bit of attention in preparing for winter.

Temporary water piping and livestock waterers should be disconnected and drained. Unprotected waterers and tanks should be banked with manure early in the fall, to prevent freezing. Tank heaters and hog water lamps should be checked over and put in to good working shape so they will be ready to install when needed. Automatic water pumps should be lubricated before winter starts, with oil applied to both motor and pump. Belts should be checked and tightened if necessary.

HANCOCK COMBINE AND CORNPICKERS OWNERS MEET

The Hancock County combine and cornpicker owners met to talk over the custom work problem. The group decided that \$3.50 per acre was a fair price to charge for each machine. They thought that conditions between fields would be a reason for varying the price per acre. That is ideal conditions might be some less and unfavorable conditions could be higher.

This meeting was called by Hancock County U. S. D. A. War board chairman Alfred V. Josten and Extension Director, Pual Henderson, Otis Litschwager. District AAA field man also assisted with the meeting. It was the general opinion of the group that farmers doing custom work should have him keep up this fall work at home.

NAME NEW MANAGER

Miss Mary Jane Lukas has been named manager of the Garner office of Central States Electric company, succeeding C. L. Fish who resigned recently. Miss Lukas has been assistant to Mr. Fish for some time. Fish is returning to Wellcome, Minn., where he will be employed by an electric firm.

Hot Sandwich

Hot peanut butter and bacon sandwiches will hit the spot for home for a quick lunch. The bread is toasted on one side, spread with peanut butter, topped with bacon and broiled slowly until the bacon is brown and crisp.

Now is a good time to lay in a supply of seed oats of the new rust and smut-resistant varieties, Tama, Boone, Control and Marion.

GREEN COLONIAL FURNACE SERVICE

Hancock County War Chest Begins Thursday

HANCOCK COUNTY'S QUOTA \$15,000.00

Shipments Asked To Raise \$600; Klemme's Quota \$475

Hancock County War Chest will begin Thursday of this year and continue through Thursday, October 28. The quota for this year is \$15,000. The Hancock County War Chest is in conjunction with the National War Fund Drive, the Hancock County War Chest being a unit of the National War Fund.

We are counting on the full participation of every citizen of the county in this campaign," said Herman C. V. Hamilton, "we want that Hancock county to do its full share."

Editors will call on every family in the county, the solicitors giving time to this most worthy cause. People are asked not to neglect their donations but should wait until the solicitor calls.

Quotas for the various towns and townships are as follows: Klemme, \$475; Goodell, \$175; Britt, \$1,700; Corning, \$400; Crystal Lake \$250; Kanawha, \$650; Woden \$250. All townships \$600 each. The \$15,000 total is an amount to cover the cost of county Civilian Defense for one year.

Just One Drive For All

The efficiency of a united drive of all 17 agencies of the National War Fund is apparent from the point of economy and conservation of manpower. At one time there were 281 agencies seeking aid from the American people for various causes. Through the National War Fund these have all been consolidated until now there are only 17 highly worthy agencies covering the entire field of service to our armed forces and united national relief included in the single drive.

Home Away From Home

U. S. O. the "home away from home" for millions of American sailors, coast guardsmen, and women in the service will receive approximately 55 percent of the funds raised in the National War Fund campaign in Hancock County and the nation. Other 16 agencies will divide the remaining 45 per cent upon a basis of budgeted needs. The national goal for all 17 agencies is \$200,000,000.

Over-subscription to the Hancock County War Chest will remain the credit of the county against future calls or quotas, according to a fixed policy of the National War Fund.

The National War Fund campaign will be the only one held for

HELLO, FOLKS!

Seaman and Mrs. W. E. Drake are the proud parents of a baby girl, born at De Ridder Louisiana on October 15th.

Seaman Drake is stationed at a U. S. Navy Base in Washington. He is a brother of Mrs. Martin Barz of Klemme. Mrs. Drake is a daughter of Mrs. Herman Bridges of Klemme and has been staying with her sister, Mrs. Paul Stille at De Ridder.

The new arrival has been named Annett Irene.

FAMILY GATHERING HELD AT IOWA FALLS SUNDAY

A dinner and get-together of the Blank families was held Sunday at the home of Mr. and Mrs. Ralph Blank at Iowa Falls.

Those who attended included Mr. and Mrs. T. Blank and daughter, Marie; Mr. and Mrs. Conrad Quandt of Klemme; Mrs. Agnes Ahrenkeil of Goodell, La. and Mrs. Taalkeus Ahrenkeil of California; Mr. and Mrs. Ernest Gerardi and daughter Gracka Maria of Wichita, Kansas; and Worthy Usher and family of Rowan.

Luella Lewis Enlists As A Cadet Nurse

Miss Luella Lewis, daughter of Mr. and Mrs. Verner Lewis, has enlisted as a Cadet Nurse.

Miss Lewis is receiving her training at the Methodist Hospital in Des Moines.

Such war related agencies before October 1944, with the exception of the American Red Cross.

A large display advertisement in this issue gives further details on the drive and also lists the various agencies included in the war fund.

For Our Fighting Men

"This is our war. Our men are in it, at the front or on their way. Our money is in it. War bonds war stamps, taxes. Our sacrifice is in it. rationing, scarcities, priorities," according to Chairman Hamilton as he discussed America's part in the conflict. "But we have not even begun to give. We can do more. We can help win the war sooner and with a minimum loss of life. We can give our fighters, our allies and their families the greatest weapon of them all—the will to win. I know every man and woman in Hancock county would be glad to do more, if we could be there with our boys and our allies," he said. "And we can do more through a prompt and generous gift."

YOUR MONEY OR HIS LIFE!

Los Angeles E U. S. Treasury Department

Annual Hancock County Farm Bureau Meeting Friday, Nov. 5

FRANCIS JOHNSON WILL BE SPEAKER AT ANNUAL F. B. MEETING

Francis Johnson, president of the Iowa Farm Bureau Federation will speak at the annual meeting of the Hancock County Farm Bureau on Friday evening, November 5th, according to V. A. Cook, Klemme, county president.

Mr. Johnson will explain many of the programs of the State and American Farm Bureau Federation. He has first hand information on both national and state legislative programs. He has appeared in Washington many times on issues affecting Hancock county farmers. Every Farm Bureau member should make it a point to hear what his organization is doing.

ELL TOWNSHIP 4-H GIRLS CLUB HAS NEW NAME

Jeroldine Goll Named President For The Coming Club Year

At a meeting of the Ell Township 4-H girls on Friday evening at the Chas Goll home, it was voted to change the name of the club to Ell Tip Toppers.

The following officers were elected for the new club year: president, Jeroldine Goll, vice-president, Maureen Goll, secretary, Alice Mae Anderson, treasurer, Adala Wille, reporter, Roberta Goll.

The new officers will meet soon with their leaders, Mrs. Emory Weaver and M. L. Weaver and the Farm Economist, Miss Hazel Grimes to plan the program for each meeting of the year.

Our Men In The Service

BARZ RIDES "TIN FISH" INTO MANY PORTS

U. S. S. Cod (224)
October 5, 1943

Dear Jergie:

I really haven't much to write about but thought I would let you know I haven't forgotten the old town. This place isn't so bad, I have seen worse, but will take that good old town in Iowa any day!

I have just spent a few days in a rest center for the submarine sailors. They have a hotel which the Navy has rented and is really nice. Being new there, it took us a while to find something to do. There was swimming, tennis, boating, horseback riding, and bicycling. We had a lot of fun rowing an old flat-bottom boat through the large ground swells from the ocean.

I have been collecting pictures of all the ports. I have quite a collection of them already. I suppose I will have quite a few when I get back and hope to have a few from Tokio... and hope that's not too far in the future!

News I don't know so guess I will sign off for tonight. Tell everyone hello and hope to be back soon.

Your friend,
Evert Barz, EM3-C

HANCOCK COUNTY OVER TOP IN THIRD BOND DRIVE

In a tabulation made this Wednesday morning, figures indicated that Hancock County had gone over the top by \$51,294.00 on the 3rd War Loan Bond Drive.

Hancock County's quota was set at \$751,000.00 and the final figure this morning showed that residents of the county had spent \$802,234.00 in buying bonds.

SCHOOL DISTRICTS RECEIVE TAX MONEY

Roy L. McMillan, treasurer of Hancock county, has sent the property tax collection apportionment for July, August and September to the school districts and corporations. The amount sent to schools totals \$106,566, and to corporations, \$17,889.

Total sum sent to the schools thus far this year total \$313,000 and to towns \$45,786.

MRS. ED. JACOBS HOSTESS TO U-DELT-EM CLUB

Mrs. Ed Jacobs entertained the U-Delt-Em bridge club at her home Thursday afternoon.

High score was won by Mr. Art Kudge, second by Mrs. P. M. Wilson, and third by Mrs. Geo. Lawhorn.

FIVE FEET

A two-months-old pig on the George Bakehouse farm near Sigourney has five feet. It has two perfect feet on one front leg. Mr. Bakehouse reports that the pig is as lively and active as the others.

NAVY WANTS FIFTY WOMEN FROM HANCOCK COUNTY

There is an urgent need for women in the Navy to release men for active combat so that the war may be more quickly won.

The Navy needs 91,000 women. Hancock County is called upon to provide fifty women for enlistment in the WAVES by Navy Day, Oct. 27th.

Applicants must be between the ages of 20 to 36, must have 2 years of high school or business school training. For officer training they must have had at least two years of college and the age limit is 20 to 49. Must be citizens of the United States.

Other details may be had by contacting Mrs. C. E. Barnes, General; Mrs. Ella Mae Foster, Britt; Mrs. C. R. Powers, Kanawha, or Mrs. Tabb, Corwith, anytime between now and October 27th.

Check the elevator throw-out or the corn picker to save corn in turning at ends and in changing wags.

SCHOOL WILL BE OPEN FOUR DAYS FOR REGISTERING FOR NEW BOOK FOUR

Here are some simple rules for you to follow in registering for War Ration Book Four.

All applicants must bring War Ration Book three with them.

Families may file a single application for all members if they are related by blood, marriage or adoption and who regularly live in the same household. Include those members who are temporarily away from home such as students, travelers, or hospital patients who are not away more than 60 days.

If you are registering for a group you must have all the Book Threes for each member you are registering. Be sure Book Three is properly filled out.

In addition to bringing Book 3 for each applicant, it is necessary that the one registering know the age of the ones he is registering.

Registration will take place in the corridor of the first floor of the Klemme School House. Registrants will please come to the Main West door and leave by the South door.

The dates and hours for registering:

Wed., Oct. 20 3:00 to 6:00 p. m.
Thurs., Oct. 21 3:00 to 6:00 p. m.
Friday, Oct. 22 3:00 to 9:00 p. m.
Saturday, Oct. 23, 9:00 a. m. until 12:00 o'clock, noon.

STAMP NO. 29 IN RATION BOOK 4 TO BE USED FOR PURCHASE OF SUGAR

Stamp No. 29 in your new ration book No. 4 will be used for buying sugar beginning Nov. 1, the office of price administration announced Thursday.

The new book will be distributed in a school house registration the last two weeks of this month.

Continuing the present consumption ration for another 2½ months, stamp 29 will be good for 5 pounds of sugar through Jan. 15, 1944.

Stamp 14 in ration book 1, good for 5 pounds since August 16, expires the 1st day of November, while stamps 15 and 16, which have been used for home canning sugar, expire on the last day of October.

DORCAS SOCIETY MEETS THIS THURSDAY

The Dorcas Society will meet at the Methodist Church parlors this Thursday afternoon. Ladies are requested to come prepared to quilt, sew rugs for rugs and stamp dish towels.

Mrs. Ben Coombs and Mrs. Ira Overholt are the hostesses.

"We Are Buying War Bonds—Are You?"

Pvt. Carl Funk, 26, Cincinnati, lost his right eye and sustained a fractured left knee in Sicily. He has been buying War Bonds regularly. He will return to civil life as soon as he is discharged from Halloran Hospital.

Pvt. Irwin Levinson, Baltimore, was struck by shrapnel in the left shoulder at Palermo. The fingers of his left hand are paralyzed. When his father asked if he needed anything, his son replied: "Buy War Bonds." His father bought \$1,500 worth.

Pvt. Thomas Dellarossa, Trenton, N. J., 18th Infantry Patrol, was wounded by shrapnel at El Guitlar, Africa, and now must wear a special brace for his left knee. He won the Purple Heart. He buys War Bonds regularly and urges you to.

Pvt. Donat Cartier, Derry, N. H., suffered a fracture of the leg above the knee in Sicily when struck by an 88 mm. shell. He was held prisoner for two days by the Germans, traveling in a tank. He is a regular purchaser of War Bonds.

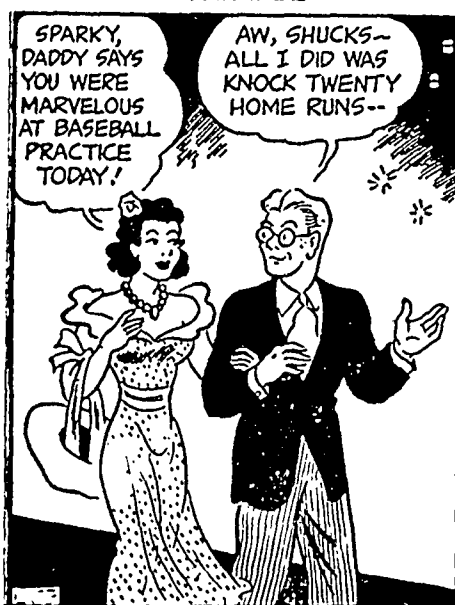

Pvt. William E. Morris, Long Beach, Cal., is above draft age but has seen three years of service. He lost his left leg below the knee in Tunisia. He wears the Purple Heart and Good Conduct Ribbon and continues his War Bond purchases.

We'll pay \$1.25 for fine goose feathers, for duck feathers, used feathers, up to \$2.00. Tail hair 65c, mane 20c. All quotes per lb. Farmers Store, Mitchell, S.D.

One thing a soldier is afraid is a display of emotion. That's why his slang so often sounds derogatory. For example, he refers to the silver eagles on the colonel's shoulder straps as "crazards." But when he speaks of his favorite cigarette, he says: "Cazels." They're first with men in the Army as well as with Sailors, Marines, and Coast Guardsmen. (According to actual sales records of service men's stores.) And though there are Post Office restrictions on packages to overseas American men, you can still send Camel's soldiers in the U. S., and to the Navy, Marines, and Coast Guard wherever they are.

KEEP YOUR HAIR

in place. Tame that unruly look. Add lustre. Keep hair well groomed with Moroline Hair Tonic. Large bottle 25c. Sold everywhere.

YOU WOMEN WHO SUFFER FROM HOT FLASHES

If you suffer from hot flashes, weak, nervous, cranky feelings, a bit blue at times--due to the functional "middle-age" period--peculiar to women--try Lydia E. Pinkham's Vegetable Compound to relieve such symptoms. Taken regularly--Pinkham's Compound helps build up resistance against such distress. It helps nature. Also a fine stomachic tonic. Follow label directions. PINKHAM'S VEGETABLE COMPOUND. LYDIA E. PINKHAM'S COMPANY.

Watch Your Kidneys

Help Them Cleanse the Blood of Harmful Body Waste. Your kidneys are constantly cleansing your blood. If they fail, the waste matter from the blood enters the system. This is the worst condition a person can be in. It is not act as Nature intended--all the waste matter is not removed. It is a poison the system and upset the body machinery. Symptoms may be nagging backache, perititis of the back, attacks of dizziness, getting up nights, swelling of the feet, under the eyes--a feeling of nervousness, anxiety and loss of sleep and strength. Other signs of kidney or bladder trouble are sometimes burning, itching, or too frequent urination. There should be no doubt that proper treatment is wiser than neglect. Doan's Pills. Doan's have been helping new friends for more than forty years. They have a nationwide reputation. Are recommended by grateful people in every country over. Ask your neighbor.

DOAN'S PILLS

HOUSEHOLD HINTS

A hotwater bottle placed in the clothespin bag when hanging out clothes will keep the hands warm in cold weather.

A dress snap sewed on the inside of a man's trouser cuff will make the job of letting down the cuffs for cleaning easy and will save resewing each time.

To add greatly to the convenience of your knitting or sewing bag, paste a piece of measuring tape across one of the handles. Most such handles will take a 12-inch strip.

An old hoe heated and straightened out, will make an excellent tool for edging flower beds, loosening grain in bins, chopping ice from the walk, chopping pumpkins for the hogs and many other uses.

Always try hot fat with a piece of bread before putting in croquettes.

Keep your refrigerator sweet and clean by washing it out with lukewarm water and borax mixture.

A cloth-wrapped brick is a handy item for your sewing room. Any work which must be held taut while being sewed can be pinned to the brick and thus anchored firmly.

When the wooden handle breaks off the monkey wrench, hammer a piece of pipe over the end tightly. Let it be somewhat longer than the original handle for greater leverage.

Here's a different frosting for white or yellow cake. To one-half cup crushed pineapple, add one cup crumbled macaroons, one-half teaspoon lemon juice, and a little confectioners' sugar to taste.

APOLOGISTS FOR WASTE

Mrs. Eleanor Roosevelt defends
waste behind the usual cry of "win
the war." Waste on the home
front isn't winning the war. One
of our troubles here at home is that
every mistake, every bit of bung-
ling, every item of useless extrava-
gance, and every move of waste,
is hiding behind that purpose
which is in every loyal heart—win
the war and get our boys home.
The great trouble with the reason-
ing of Mrs. Roosevelt, and others
of her mind, is that it is not found-
ed on safe or solid principles. The
waste of gasoline on her trip to
the South Pacific—the waste of
time of officers and men of the
army and navy who escorted and
guided her—the waste of cargo
space needed for bandages, for
medicine, for arms and for supplies
—these did not do a thing to win
the war or hasten its winning.
There is something that Eleanor
and her fellow waste-apologists
should remember:

Our fighting men can win
the war on the battlefronts
only by finding that as a nation
we have lost it in our lack of
economic stability—lost it in
natural resources, lost it in the
wasted manpower, lost it in a
burden of debt greater than
the world has ever seen.

We have a war on the home
front as well as abroad. That war
is to save our economy, save our
living standards and save our
Americanism—save them from the
wastrels.

Hancock County Board Proceedings

3RD ADJOURNED SEPTEMBER MEETING

Garner, Iowa, October 11, 1943
The Hancock County Board of
Supervisors met on Monday, Oct. 11,
with John Chambers, Penn Eckels and F. J.
Schoun, present.

COLONIAL

AGE SERVICE

HOME-GROWN PRODUCT

Through the use of lumber ob-
tained from trees on his own
ground, Ed Schultz of near Church-
town effected a saving of \$175 in
building a large poultry house. The
18x40x10 foot dimension building
was built at a cost of \$224.07. Two
hundred forty hens can be accom-
modate in the building. Three thou-
sand board feet of oak and base-
wood from "ripe trees on his place
were used in the building.

MOVES FROM FARM

Seventy-two years ago L. G.
Kinsinger of Grundy Center was
born on the farm from which he is
now moving for the first time. He
and Mrs. Kinsinger are moving to
a home to a home recently pur-
chased in Marshalltown. A son,
Bert, and his wife are moving to
the home farm. The house in which
Mr. Kinsinger was born is still on
the farm but it has been improved
and modern conveniences added.

SCHOOL NEWS

HIGH SCHOOL HONOR STUDENTS LISTED

The following students have a
grade of "B" or better in all their
daily subjects for the first 6 weeks
period
Marcelle Josten Lois Ann Lau
Peggy Ridder Ivan Blumer
Jeanne Trumbell Edw. Barz
Patricia Kudje Eunice Larsen
Corrine Merkel

BOND AND STAMP SALES

The past two weeks our scho
has sold \$104.95 in stamps and \$300
in War Bonds. We want to beat
this record in the next two weeks.
so don't forget to bring your mon-
ey next Friday.

JUNIOR CLASS WILL PUT ON PLAY OCT. 29

"The Scarecrow Creeps," Junior
class play, has been scheduled for
October 29th. It is a mystery com-
edy full of thrills and surprises.
The Senior Speech Class and the
remainder of the Junior Class are

working as production crews

MANY STUDENTS HAVE GOOD ATTENDANCE RECORD

The following students were nei-
ther absent or tardy during the
first six and a half weeks of
school

Dorothy Ellingson	Phillip Cook
Eileen Osborn	Areda Polsdoffer
Elizabeth Goll	Jeanne Trumbell
Bill Harson	Allen Anderson
Vareille Josten	Dean Jacobs
Ewald Grosshuesch	Pat Kudje
Betty Lacey	Marjorie Meanders
Lis Ann Lau	Terry Peck
Dean Roths	Wayne Schoenwetter
Eugene Beier	Eunice Larsen
Ruth Bell	LaVohn Schlawn
Delbert Bachman	Peggy Coobs
Marcedia Barz	

GOODSELL IS FIRST ON SHAM-ROCK B. B. SCHEDULE

The first basketball game will be
with Goodsell here November 19th.
This year the County Tourna-
ment will be held at Klemme from
January 26 to January 29. Klemme
has been the county champions for
the past two years.

Basket Ball Schedule

Nov 19 Goodsell here
Nov 23 Belmond there
Nov 30 Garner here
Dec 3 Hayfield there.
Dec 10 Goodsell there.
Dec 17 Kanawha here
Jan 4 Crystal Lake here
Jan 14 Kanawha there
Jan 18 Belmond there
Jan. 26-29 County Tournament.
Feb 8 Crystal Lake there.
Feb 15 Ventura there
Feb 18 Garner there
Feb 22 Meservey here
Feb. 25 Hayfield here.

Basketball practice is in now in
full swing. Verne Greiman is the
only one remaining from last year's
first team. Others who saw some
action with the first team last year
are Allen Lau, Edward Buntin-
bach, Ewald Grosshuesch, Herbert
Mueller, Ed Barz, Harlan Nueh-
ring and Ronald Brinkman.

HIGH SCHOOL PARTY HELD

The students were well rewarded
for the six weeks by the teachers
who invited us to the "Flunkers
Fling." The gym was decorated as
a school room, having pictures on
the wall. Of course there had to
be pictures of the teachers, but all
resemblance was purely coinciden-
tal.

We were entertained by a variety
of games, along with dancing.

THOUGHTS SO TRUE

Did it ever occur to you that the
best method of climbing the ladder
of success is to stay on the level?
Too many young people itch for
what they want without wanting
to seatch for it!
It's better to be a one-legged op-
timist than a centipede with a
grouch.
When you bury a hatchet, don't
leave the handle sticking up for a
marker.
False friends are like shadows.
They disappear in the dark.

Lunch was served to us in paper
bags which contained an apple and
a doughnut. Mr. Esbeck really
thought he was getting more than
his share when he was handed his
sack, but alas, just a lot of paper
apples!

In drawing the "Funkers Fling"
a close we gave a few of our
school yells and songs. And, inci-
dently, someone didn't seem to
think that we would have enough
to eat, for all of a sudden suckers
began to appear in the jaws of the
boys. And also the girls if they
would dance with them. The teach-
ers also enjoyed the suckers.

NEWS AROUND K. H. S.

We are getting a little variety
in American History this week as
we are reading "Evangeline" along
with our study of the Acadians.

The Advanced Home Economics
Class surely hope the muffins they
made for Mr. Esbeck had no bad
effects if for it does he may take
t out on our grades!

Thursday was a very quiet day
in school. The day before was re-
cord day and when some of the re-
port cards were read their readers
es lived then and there that some-
thing should have been done about
t. As a result Thursday was a
good day to get something done.

The other classes have all been
ndering what really goes on in
Speech Class when we start jump-
ing up and down and push each
other's head down, and walking up
and down the stairs with books on
our heads. Well, after all, we are
opposed to be dignified. That is as
good as any way to start.

In English we have been writing
'hemes on Aviation. Most of them
have been very interesting.

JUNIOR HIGH NEWS

We have enjoyed watching sev-
eral experiments that were per-
formed in Science classes. Harold
and Edward showed us how water
and air expand when heated. Rob-
ert proved that plants give off
moisture. Irene and Ruth showed
us which materials conduct and
which lose heat most rapidly.

Our first self-testing drill in ar-
ithmetic placed the Seventh grade
in the lead on our room chart. Both
grades rated a high average.

Co. Supt. Charles Whitney visit-
ed in our room last week.

Helen Pringnitz has taken the
lead for outside reading, having six
books to her credit so far.

Grade News

FIFTH AND SIXTH GRADES

The first six weeks ended Friday
and the Fifth grade has a perfect
attendance record for this period.
No one has been absent or tardy
during that time. There are nine
pupils in the Fifth grade.

The Sixth grade has completed
their study of the British Isles. We
have made several maps and in ad-
dition to this we have colored pic-
tures of the English flag and also a
boy and girl of that country. These
are now on display in our room.

THIRD AND FOURTH GRADE NEWS

The following pupils were nei-
ther absent nor tardy from the Third
and Fourth Grades for the first six
weeks of school:

Sharon Bridges
Billy Waddingham
Lu Verne Heginger
Jimmy Albertson
Elaine Neuberger
Maxine Barz
Beverly Sobek
Richard Tiggerman

We have had several visitors this
six week, but "Snoopy," although

here for only a short while before
school, caused the most excitement.
"Snoopy" is Larry Stille's pet rac-
coon.

FIRST AND SECOND GRADE NEWS NOTES

In language class we discussed
the Signs of Fall. This is the story
which we composed.

Signs Of Fall

The birds are flying south
The leaves are falling from the
trees.
The grass is turning brown
It is getting colder
We cut leaves from colored pap-
er. We made oak, maple, box elder,
willow, walnut and elm leaves.

Attendance Record

The following children had per-
fect attendance records for the first
six weeks of school.

First Grade

Graydon Barz
Lyle Heginger
Terry Koerner
Carole Ann Montgomery
Merlyn Olson

Second Grade

Lois Ann Jacobs
Ronald Karsjens
Dennis Ridder
Janice Swanson
Roger Terhufen
Melbourne Trampel
Thomas Waddingham

REGISTERED FOR KINDER-GARTEN CLASS

Kindergarten will begin October
25th. The following children are
registered for Kindergarten:

Robert Arnold
Robert Larson
Roger Bachman
Lois Heginger
David Waddingham
Jimmy Karsjens
Douglas Jones
Dennis Wilson
Warren Terhufen
Carol Bridges

A. J. KUDJE,
Secretary

Plenty of water in the proper
container in the furnace makes the
atmosphere in the house more
healthful.

WEATHER FORECASTER

A Remsen man, J. C. Day, has
predicted that Iowa will have a
long Indian Summer. Mr. Day bases
his predictions on the actions of
wild creatures. The fact that the
swallows, usually scheduled to
leave, leads Day to believe that
winter weather will be late in ar-
riving.

LET US SUPPLY BAKERY GOODS

OF ALL KINDS FOR YOUR PARTIES AND SPECIAL GATHERINGS

No matter what the occasion,
we want you to feel that we
are at your service, ready to
supply just what you want,
as you like it.

By placing your special
orders early we can give
you prompt delivery and
assure you relief from
the bother of preparing
and having baking ready
at the appointed time.

We Specialize In Baking
WEDDING CAKES

LEAVE SPECIAL ORDERS
WITH YOUR KLEMME

WEEKLY NEWS ANALYSIS

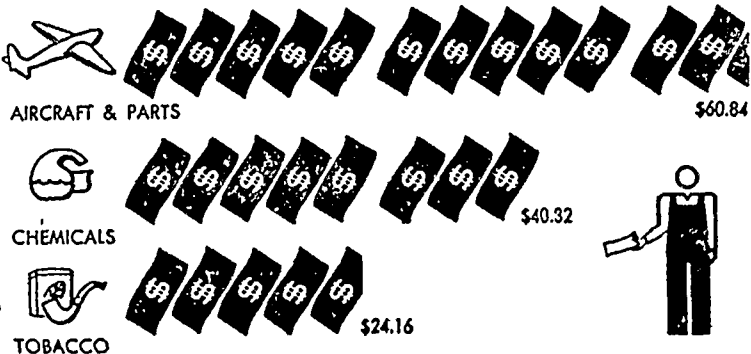

German Forces Hurlled Back to Rome As Yankees Take Italian Port City; Russian Troops Near Polish Border; Senate Studies Dad Draft Problems

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

TELEFACT

AVERAGE WEEKLY WAGES

(MANUFACTURING INDUSTRIES, MARCH 1943)

ITALY:

Take Big Base

The once beautiful port of Naples smoked in ruins as Lieut. Gen. Mark Clark's Fifth army clattered through its streets. To the north of the city, long German columns made their way toward Rome, 135 miles away, where they were expected to make their next stand in the hills.

Before giving up Naples, the Germans destroyed the elaborate docks and warehouses and other installations that had made the port one of Europe's finest. As a result, time will be required to reopen the port for Allied use in supplying the armies marching northward.

The German retreat at Naples also was influenced by Gen. Bernard Montgomery's flanking movement along the Adriatic sea coast to the East. By working its way northward, Montgomery's army had pushed behind the Germans, threatening to cut them off from the rear by crossing the mountains to the west.

WORLD AVIATION:

Seek U. S. Share

Returning from a 40,000-mile tour of the battle fronts, Senators James Mead, N. Y., Richard Russell, Ga., and Ralph Brewster, Maine, declared U. S. commercial aviation companies would be denied use of airports built in foreign countries by America.

The senators called upon congress to make provisions now for U. S. use of the airbases by including agreements in lend-lease assistance. The senators also declared that

Senators Russell, Brewster and Mead.

while the U. S. was supplying the Allies with 65 per cent of their oil, Great Britain was not fully exploiting her tremendous petroleum reserves in Persia. At the present rate of consumption, they said, our oil will be used up in 11 years.

Any attempt to reduce the importance of Gen. Douglas MacArthur's command in the South Pacific by placing him under the supreme direction of Lord Mountbatten would be bitterly resisted by Australian Prime Minister John Curtin, the senators said.

RUSSIA:

Near Poland

Russian troops drove within 100 miles of the old Polish border in the northern sector of the long front, while other Red forces assaulted prepared German positions on the west bank of the broad Dnieper river to the south.

Failing to hold their new line, the Germans would be pushed out of Estonia, Latvia and Lithuania, and they would lose substantial control of their Baltic sea route to Finland.

Stiffening German resistance and appearance of massed artillery along the west bank of the Dnieper, indicated that the Nazis were determined to make use of the broad river as one of their last natural defense lines along 750 miles. Russian crossings to the west bank in some sectors were met by prompt German counterattacks in an effort to prevent the organization of sizeable Red forces for continuation of their drive.

POST-WAR:

Study Peace Policy

Reportedly believing that other nations might take the Fulbright resolution as an indication of America's unlimited indulgence in world politics after the war, the senate foreign relations subcommittee moved to kill the bill.

The senate moved to write a bill of its own, broadly expressing America's post-war peace policy. It was thought that in so doing, support could be rallied for Sen. Arthur Vandenberg's provision assuring America of independence in determining her action in any program.

As chairman of the senate's foreign relations committee, Sen. Tom Connally led in the move to kill the Fulbright resolution. Connally has indicated America should await further development in world politics growing out of the war before committing itself to any course.

SOUTHWEST PACIFIC:

Fight to Last

Stubborn Japanese fought to the death as the Allies closed in on their base at Finschafen. But the Allies were able to bring superior forces to bear from the north, west and south, and the Japs lacked the numbers to shift to meet the attacks.

While the Allied air force continued to pound Jap bases throughout the entire Southwest Pacific area, U. S. airmen reported the appearance of a "super-Zero" enemy fighter plane. Not only can this new plane outdrive our P-38, it was said, but also affords the pilot better protection than the old Zero because of heavier armor.

Cavalry Rides Again

As a result of the mountainous terrain of Sicily and Italy, cavalry has come into its own again in this war.

Former cowboys and rodeo performers are astride the horses that are being ridden over rocky and craggy country where motor vehicles cannot be driven, to deliver food, water and other supplies to troops. Sometimes they escort mule packs.

Perched atop their mounts, the cavalrymen are often in position to detect machine gunners hidden under natural cover, and when they do, they pepper them with the small, yellow grenades.

WHEAT:

Canadian Purchases

With sales of wheat as feed running about one million bushels a day, the Commodity Credit corporation has gone into Canadian markets to bolster its stocks, recently estimated at 129 million bushels.

Total purchases from Canada have reached 30 million bushels, of which 22,500,000 bushels have been shipped into the country. Of the unshipped total, 3,500,000 bushels are waiting to be moved over water from northwestern ports.

Since July 1, CCC wheat sales principally for feed have approached 111,500,000 bushels.

MEXICO:

Settle Oil Claims

In final settlement for oil properties which it took away from American nationals in 1933, Mexico agreed to pay a total of \$29,137,700, of which \$5,141,709 represents interest at 3 per cent.

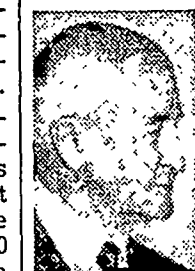

During negotiations for the settlement, the American nationals had claimed the seized properties had a valuation of hundreds of millions of dollars. But a commission of experts trimmed this claim to \$23,995,991.

Under terms of the agreement, the present balance of payments will be made in four annual installments.

U. S. WAR PLANTS:

13 Billion Stake

Speaking before a congressional committee, Secretary of Commerce Jesse Jones advocated the sale of the government's 13 billion dollars worth of war plants and other property to local interests after the ending of hostilities.

Jesse Jones

The government now controls 50 per cent of aluminum production; 92 per cent of magnesium; 10 per cent of steel; 100 per cent of synthetic rubber and high octane gasoline; 50 per cent of machine tools, and 90 per cent of aircraft. In addition, it owns 47,000 square miles of land, the area of six New England states.

TIRES:

Quota Reduced

Motorists will have to get along with fewer tires in October than in September. The Office of Price Administration has reduced the quota from 829,000 to 645,000 for this month.

Under the new ruling, only motorists who drive 601 or more miles per month can qualify for new tires. By another change, used tractor and other farm vehicle tires were removed from the ration list.

Washington, D. C.

TURKEYS AND THE ARMY

The army is beginning to wonder if it hasn't over-extended itself on the business of turkeys. It has ruled that civilians may not buy turkeys for their Thanksgiving or Christmas dinners—or for next Sunday's dinner, for that matter—until the army has acquired 12 million pounds for the armed forces overseas.

That sounded all right, until somebody in the quartermaster corps began figuring out what you could do with 12 million pounds of turkeys. For generous portions, you can figure that 100 pounds of undressed turkey will feed 100 men.

The number of men in the armed forces overseas, including army, navy, and marines, is around two million. Allow each man a pound of turkey for Thanksgiving and another for Christmas, and you reach the total of four million pounds.

But the amount reserved for this purpose is three times four million, or 12 million pounds.

When certain food experts in the quartermaster corps realized this, they started to do some fast telephoning. When last heard from, they still didn't know what two million men would do with 12 million pounds of turkey—except eat 'em.

NAZI PSYCHOLOGICAL WARFARE

Beware of false rumors about Germany. The Germans, masters of psychological warfare, are watching every opportunity to take advantage of American credulity. They know that Americans are optimistic by nature and that we are prone to believe any story about miraculous victories or fortunate events.

Apparently it was this method of psychological warfare which prompted the reports that Hitler had been deposed in favor of military authorities.

It has now been definitely established that no such event took place. State department officials now say flatly that the whole thing was a false report, from beginning to end. It was so generally reported, however, that they believe it must have been prompted by Germany. The motive in such a case would have been to make Americans rush to the conclusion that Germany was tottering and the war was not far from finished. This would have the effect of weakening our bond drives and similar efforts.

Note: The Nazi news report of Hitler's ousting came via Spain.

ARMY'S FAVORITE FOODS

Since the Truman committee's investigation of food waste in the army, the quartermaster corps has been as frugal as a Dutch housewife. Elaborate studies have been made of what the soldiers eat and what they leave on the plate, with the idea of cutting down the percentage of garbage.

After watching the eating habits of 16,000 soldiers at Chanute Field, Ill., the quartermaster corps gave each dish a rating, according to its popularity.

Roast chicken and apple pie rated 100. So did roast duck and roast ham. But creamed ham rated only 55. (QMC dietitian Mary I. Barber explains: "Not many men like messed up food. Artemus Ward said: 'When I eat hash, I like to know what I'm eating.'")

No matter what you may do to butter up spinach, it remains spinach and the soldiers gave it a rating of 41. It was just about the lowest of all.

NO TIRES FOR RUBBER CZAR

Col. Bradley Dewey, who succeeded Big Bill Jeffers as rubber director, says he wishes he could get his hands on a set of synthetic tires. He is now in charge of the program which promises to produce 30 million synthetic tires by the end of next year, but he is not able to try synthetic tires on his own car.

"I wish," says Colonel Dewey, "that OPA would let me have a set of the new tires. I'd like to try them out. I understand they skid less than natural rubber. Not that I drive at skidding speeds, mind you, but I'd like to see what they would do."

"Some of the taxi drivers out in Akron have new synthetic tires, and they swear by them. But I'd like to see what they would do for me."

Reason for Dewey's inability to get tires is that though he is in charge of the entire program, he is obliged to apply for tires through OPA, like any other citizen. And since his present tires are reasonably good, he can't get any new synthetic tires.

MERRY GO ROUND

A high, air-minded war department official says the length of the war depends on the weather this winter. If the weather is favorable for flying, the war in Europe might be over before next summer.

Brig. Gen. Glen C. Jamison, of the Thirteenth air force, South Pacific, pays high tribute to Negro engineers who built roads, airfields, and living quarters in the Solomons and New Hebrides, using native construction materials and thus saving shipping from U. S.

Paratrooper Over Italy

By Frank Horkness

(WNU Feature—Through special arrangement with The American Magazine.)

We jumped at midnight. For 30 minutes the jump door had been open, and the lieutenant, our jump master, had been standing there looking out into the moonlight and waiting for the red-light flash which meant to stand up and hook on chutes.

We had been flying a long time—much longer than actually needed to come from the African camp to Sicily. But, to throw the enemy off, we did not fly there directly.

Maybe there will never be such a night again. I've heard that 2,000 planes and 4,000 boats took part in the invasion, and I can believe it. The sky around us was filled with cargo transport planes, all loaded with paratroops, all heading for the same place, like a billion bees.

All of us were excited. For exactly one year and three days we'd been training for this, our first battle action. Three days before, we'd celebrated the anniversary by killing three beef cattle for dinner. And now the target was a few minutes ahead of us. We passed over the Sicilian coast and knew it wouldn't be long now.

The red light flashed. All of us stood up, fastened our chutes to the jump cable, and waited. Waited for what seemed hours for the green jump signal from the pilot. The plane was rocking from side to side, much worse than it ever did in the 15 practice jumps we'd made—I still don't know why.

Directly ahead and behind us we could see faintly glowing green lights—formation lights of planes ahead and behind.

Lieutenant Disappears.

The pilot's light suddenly flashed. Officers always jump first. The lieutenant yelled, "Let's go!" and leaped out into the moonlight. We never saw him again.

We followed him instantly. The plane emptied in ten seconds. I was the last to jump. The plane seemed to be going unusually fast. My chute snapped open with a terrific jerk, and my carbine disappeared. So the only weapon I had was a long trench knife.

I should have been able to see all the other chutes in our party, but I could only see one, and realized something had gone wrong. Plans called for us to be dropped at 600 feet, with the plane slowed down to almost stalling speed—about 100 miles an hour. This was so we would spend less vulnerable time floating down, and also so we would be close together when we hit.

As it turned out, we were dropped at full speed—almost 200 miles an hour—and from 1,500 feet. That's why I could see only one other chute. I kept my eyes glued on it and pulled at my shrouds to follow it.

I landed hard but safe in an orchard. The rest of the boys landed nearby. Comparing notes, we were convinced that we had been dropped in a comparatively strange country, nowhere near our target area. Actually, we were at least 50 miles off—some time I'd like to know why.

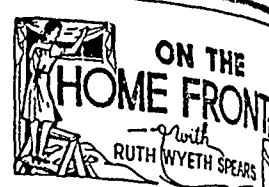

This was all orchard country, which seemed dotted with enemy troops, forcing us to move carefully. There was spasmodic firing everywhere, but we managed to avoid the enemy. We spotted the main road and headed for it. We had crept along it about 500 yards when we were challenged. It was another American, posted there in the bushes to lead anybody to a nearby farmhouse which was being used as an assembly point and first-aid station. We went in.

From prisoners we learned that we had landed a few miles from Avola, a coastal town which the British even then were attacking. There was a little hill about 200 yards from the farmhouse where, as soon as it got light, we could see the whole scene. I'll never forget it. British landings being made against airplane and artillery opposition. We could help those boys by hitting the enemy in the rear. That's what we did. Maybe it was a good thing we landed where we did. I think we did more valuable work than we would have done if we had been dropped right on the bull's eye.

From the hilltop, as far as I could see, British ships were lying just offshore, with lines of little boats moving back and forth, bringing in more British Tommies. They were getting plenty of enemy attention.

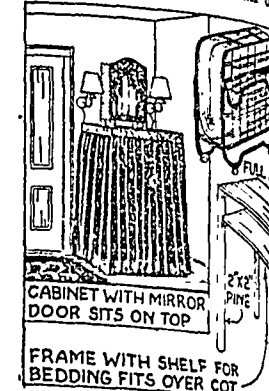

From the hills, Italian artillery was going full blast. Shells and bombs were bursting among the ships, but the little boats kept coming anyway.

It was about eight in the morning when we reached Avola and it took us until 2:30 in the afternoon to advance a little more than a mile toward the town square.

SOME people have a talent for making guests comfortable. They are not always the people with big houses and what might be called a spare room. Many homemakers today are graciously sharing limited space in a home or apartment because war conditions make her feel that is her contribution.

This sketch shows an ingenious frame under which a folding chair may be stored in a hall or closet.

out-of-the-way corner. The bed has a full skirted cover of trimmed in bands of tape. On top there's a medicine closet with feet by gluing spools in place. Cabinet gives a convenient for toilet articles and the door is well lighted with brackets connected with an outlet.

NOTE—This sketch is from Book the series prepared for readers and things for the home. It also sketches and directions for 31 other to make from odds and ends on inexpensive new materials. Boxes 15 cents. Send request for book rect to:

Latin America Has Far Outdone Us in Air

Commercial airlines have opened so rapidly in Latin America in the last two or three years they now have a total of 10 route miles and 750 stops, compared with 45,000 miles and 260 stops in the United States, which has about the population but only 26 per cent much land area.

GIVE YOUR COLD THE A

Open up that cold-clogged nose. The real prescription-type medicine that shrinks. Caution: Use only as directed. Be sure you demand Penetro-Nasal.

Bystander's Fury
Hell hath no fury like a combatant.—John A. Winant

Highest quality, translucent rubber perforated. Withstand repeated use. Fit all standard rubbering bottles. Slip on easily, without AT ALL DRUG STORES.

SNAPPY FACTS ABOUT RUBBER

Success of the Dutch in planting the quinine tree in Peru to Java helped encourage interest in the development of rubber plantations in the Far East in the 1870's.

With all the discouragement rubber and gasoline rationing, automobile registrations at the end of 1942 were only 5 per cent lower than in 1941, a record. Commercial vehicle registrations were down 5.5 per cent.

It is estimated that at the time there were between 1 million and 500 million rubber trees in the Amazon Valley and that less than 1 per cent have been tapped to date.

In war or peace

B.F. Goodrich

FIRST IN RUBBER

HIGHLIGHTS . . . in the week's news

WAVES: Members of the WAVES, the navy's woman auxiliary, will not be permitted to serve overseas, by a provision in a bill reported out by the senate naval affairs committee.

JEWIS: A separate force of Jewish soldiers may be established by Great Britain for service in Burma, it is announced from London. One or more divisions may be recruited in Palestine and the Near East.

MUSIC: Radio broadcasting stations can now get the benefit of recordings made by union musicians. By agreement the 14-month ban has been ended.

COWS: Reason for the drop in milk production, according to the secretary of the National Co-operative Pure Milk association, is that the cows "get tired" when excessively milked.

Banners for Record-Breaking Crops Will Honor Farmers in 112 Counties of Nation

Processors, Too
Be Awarded.
Achievement 'A's

"Victory depends as much on our ability to produce food as on our ability to manufacture guns, planes and ships."
—Franklin D. Roosevelt.

A presentation ceremony will be held for every honored plant as soon as possible after formal announcement of the award. The ceremonies will be simple but impressive. In appreciation of the essential role being played by seasonal processors in the "Food for Freedom" program, the army and navy will co-operate with WFA in making the presentations.

To protect the prestige of the "A" and the honor it represents, War Foods administration will exercise

CONSERVE

extreme caution in making the award. The procedure for plant nomination, however, is simple.

Any employee of the Food Distribution administration in Washington or in the field may propose a plant for consideration. Likewise, the nomination may be made by one of FDA's regional directors, or through the Washington branches of the WFA. An Awards board will consider every nomination and recommend final action to the director of food distribution.

Because of the short period of time many operators are in production, prompt attention will be given to every nomination.

The Consumer's Part.

Much as the breasts of farmers or factory workers will swell with pride when they see that "A" banner fluttering in the autumn breeze, they know it is but a symbol of the mighty effort that every American is making to win the war. Not only producers of food, but consumers too, have their part to play.

America's mighty home front forces are mobilizing during November in a nationwide campaign to help food fight for freedom. Ranking in importance with bonds, machinery, rubber, guns, tanks, ships and planes, food is a weapon of war that every civilian can turn against the enemy.

Rallying cry of the food army is the slogan: "Produce, Conserve, Share and Play Square!"

Citizens' groups in every community will advise the public of the meaning of these words, and of how each person can contribute to making the whole nation "food conscious." Four government agencies, the War Food administration, OPA, OWI and OCD, are co-operating to tell the food story. Briefly they explain each part of the program:

Produce and Conserve.

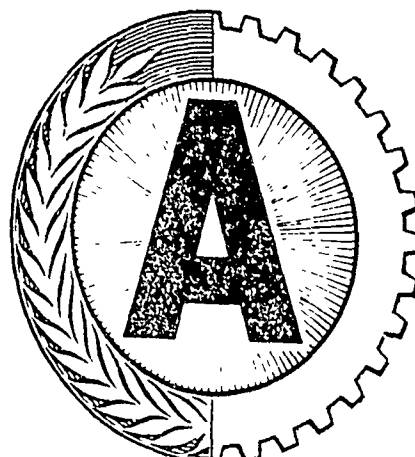

American farmers have done a remarkable job this year in again breaking food production records, and they plan to continue the good work in 1944 with the planting of 380 million acres. Helping them plant and harvest is something other civilians can do on the production line. Home gardens also aid in making more food, as does work in processing plants during the rush season.

Farmers themselves can help prevent waste of food before it goes to market, along with transportation companies and other handlers. The homemaker's job is to save food in the kitchen, and to can and preserve as much as possible. Everyone can try to eat the right foods, those that are nutritious and plentiful, so as to

SHARE

ACHIEVEMENT 'A' AWARD

stretch the available supply. Substitute when the items wanted are on the scarce list, even if it means changing life-long eating habits.

Another way to conserve is to buy and store vegetables that will keep well. This is particularly important in the case of white potatoes this year. The crop has been exceptionally large. Including both early and late potatoes, it is estimated that it will total more than 460 million bushels. Of this, 360 million bushels are late potatoes and are now being harvested. The late potato crop is 73 million bushels larger than the late crop of 1942, and the overall 1943 crop is 33 million bushels larger than the previous record crop of 1928, which totaled 427 million bushels. So it is plain that the farmers' response to the government's plea for increased production has been splendid. It is a great national asset to have this record crop of potatoes. It also presents problems of distribution which, if not efficiently handled, may result in the waste of, or the diversion from human consumption of a

PLAY SQUARE

large part of this bumper crop. Although the War Food administration, during the past summer, set aside 15 million dollars for the erection of additional storage for Irish potatoes and sweet potatoes, the 1943 crop will exceed by more than 50 million bushels, available approved farm and commercial storage.

Every consumer who has space in his cellar or other suitable place is urged to buy and store as many potatoes as he conveniently can, so that none of this supply of food will go to waste. Other vegetables, like onions and turnips that keep well, should also be put away in storage places. Apples and any other fruits that can be kept over the winter should also be stored.

Share Fairly.

All Americans share the food with the men in uniform in camps at home and on foreign battlefields, with the peoples of the other United Nations helping to win the war, and with the countries liberated from Axis oppression. Farmers help each other to grow as much as they can by sharing seed, machinery, fertilizer and manpower in order to make "short" supplies go farther. Cheerful, willing acceptance of rationing rules results in fair shares for all, and plenty of food for fitness and health.

Food is critical war material. The government asks each citizen to pledge himself to accept no rationed foods without giving up ration stamps, and to pay no more than top legal prices. When rationing rules and price ceilings are not observed, un-American "black markets" appear. Do without, if what you want can't be purchased fairly.

Record food production has been achieved for the past seven years, yet America still doesn't have enough to answer all the demands of war and also to fulfill the unusual wants of civilians with tremendously increased purchasing power. For the duration of the war and for several years after it ends, the farmer's problem is not going to be whether he can find a market for what he produces, but whether he can produce as much as he can sell. Ever-increasing demands will continue to exceed the supply.

Ballad for Americans:

If you could buy a spot where you could see
How Nature had been lavish in its art,
If you could buy a place where Liberty
Is ever dearest to the human heart...
If you could buy the road to happiness
With little homes that bordered on the lane,
It would not take a fool a second guess
To know that you would buy and buy again;

If you could buy contentment through the years
And love that grows from fine and decent things,
If you could buy an armistice from tears
And all the grief and woe that battle brings—
Oh, if you could, how quickly you'd respond,
And yet, what else is bought with every bond?

—DON WAHN

The Magic Lanterns: James Cagney blew in with "Johnny Come Lately," his debut as an impresario, and he needn't worry about quitting a good job. He is breezy and tough as the tramp reporter who Page Ones the town's stuffer goniffs into being better boys. Grace George and Ed McNamara are part of the assets. . . . Robert Donat, who is paid off in sighs where Sinatra collects shrieks, comes back in "The Adventures of Tartu," which is a stylish dish. He plays a British officer risking his precious neck in Czechoslovakia. The best place to view the tale is from the edge of your seat—as if you had any choice. Valerie Hobson is the girl. . . . Abbott and Costello go in for winter sports in "Hit the Ice," and being the kind of comics they are, you know what they hit it with. . . . Pola Negri, who was strictly a sad-faced sufferer in her heyday, comes back in a frilly item called "Hi Diddle Diddle," with Martha Scott, Adolphe Menjou and June Havoc. You'll laugh—how much being up to you. . . . Richard Dix vs. Jesse James is the theme of "The Kansan." This rambunctious Western, full of shoot-in' irons, straight whiskey and a trace of jive, is generally satisfactory.

Midtown Vignette: She is the young wife of a British naval officer. . . . We overheard her talking with a stranger at the fountain of a midtown drug store. . . . While she fed her baby a malted. . . . "They sent me over here to visit him a little while," she said. "He had never seen the baby." . . . She was a soap-and-water type of girl—very little makeup, and pretty. . . . The stranger asked about clothing rationing in England. . . . "I don't mind," she answered, "I've been wearing this skirt and blouse for two years every day." . . . As she started to go, the stranger pressed a ten-spot into her hand. . . . "Buy something for the baby," he said, "and yourself." . . . "Oh, thank you very much," was the reply, "now I may get a new blouse."

Manhattan Murai: It was in the Stork Club Sunday evening. . . . A youthful sailor without a rating or campaign ribbon was dancing with his little old mother. . . . We have never seen such a lovely portrait in all our sinful years. . . . No other couple on the floor seemed to be enjoying themselves as much as this boy and his proud mother. . . . She simply beamed—and so did the rest of us—taking it all in from the ring-side. . . . "Gosh," said a fellow, whose chest is crowded with decorations, "that sailor makes everybody in here look silly!" . . . The speaker was Lt. Bill Crawford, a grand guy himself, soon returning to the Pacific, where he helped bomb to splinters so many Jap ships.

Street Scenery: The gal cab driver at Madison and 40th manuring her nails. . . . The "A" cars slinking along side streets like rum-runners. . . . The new messenger gals at the Stock Exchange with NYSE embroidered on their jackets—and some of them very nyse. . . . The optician's shop on Madison Avenue, which describes its orb-glasses as giving patrons "Specs-Appeal." . . . The dog department in a store which advertises a dog soap as Shampooch.

Sounds in the Night: At the Stork: "He's carrying the torch for himself." . . . At La Conga: "Mussolini is no longer lying low—just lying." . . . Louise's Monte Carlo: "He has a head like a doorknob—any gal can turn it." . . . At Leone's: "What he doesn't know is certainly going to hurt him." . . . At the Mayan: "Absence makes the heart go wander."

Broadway Wiseguy: That poster slogan should be changed from "Your Country Needs You" to "You Need Your Country!"

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago,
Released by Western Newspaper Union.

Lesson for October 24

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

HONORING OUR PARENTS

LESSON TEXT—Exodus 20:12; Luke 2:48-51; Mark 7:6-13; John 19:25-27.
GOLDEN TEXT—Children, obey your parents in the Lord for this is right.—Ephesians 6:1.

Right relations between children and parents have much to do with the peace and prosperity of a community and a nation. Experience has demonstrated that to be true, but even more basic is the fact that it is in accord with the promise of God.

One of the bad breakdowns in modern life is that of proper honor and obedience to parents by children. In all too many homes God's order has been reversed and instead of honoring and obeying their parents, children (both young and old) have taken the place of "boss," and mother and father must obey if they want peace and rest.

The need for our lesson of today is both great and acute. The future happiness of hundreds of thousands of children and the present welfare of thousands of neglected and boss-ridden parents will depend on the intelligence and faithfulness with which this lesson is taught in our churches, and the honesty of heart with which we all receive its truth.

I. The Command and Promise

We are told by Paul that this is the "first commandment with promise" (Eph. 6:1-3). The Lord was not making a bargain with man, or seeking to draw out obedience by a prize, but there is obviously a great reward in the observing of this commandment.

Then, too, as the children of God (if we are such) through Jesus Christ, the first and most important consideration to come before us is, What is the mind and will of the Maker of us all regarding this matter of the relation between parents and children? His words are plain—we are to "honor" our fathers and our mothers.

The word "honor" carries with it a great many things, but perhaps the three outstanding elements are respect, obedience, and affection.

Our Lord Jesus Christ, who is the Saviour and then the Example of believers, presents a beautiful pattern of true obedience to this commandment.

II. Willing Obedience (Luke 2:48-51; John 19:25-27).

The fact that Jesus was God manifest in the flesh only enhanced His conduct. He who is divine presents an example of obedience and consideration both as boy and man which we do well to emulate.

1. As a Boy (Luke 2:48-51). The boy Jesus, increasing "in wisdom and stature, and in favor with God and man" (v. 52), had come to His twelfth year and with His parents had gone up to Jerusalem to celebrate the Passover.

There moved in His heart the conviction that He must now be about His Father's business—an altogether proper and commendable purpose, but one which resulted for the moment in separation from His parents. This was far more serious than a physical separation, for we read that they did not understand Him (v. 50).

Tragic indeed are the consequences of our failure to understand our children. Notice, however, that Jesus did not withdraw Himself from their watchful care, nor refuse to obey them even though they failed to understand Him. Equally tragic are the results of hasty and bitter separations brought about by the disobedience of children.

2. As a Man (John 19:25-27). The value of our lesson will be greatly reduced if we see only the responsibility of children while they are young. We are the children of our parents as long as we and they live.

One marvels at the carelessness and hardness of heart that will permit men and women who have time and money for everything else, to neglect their aged parents and even shunt them off into a public institution for care.

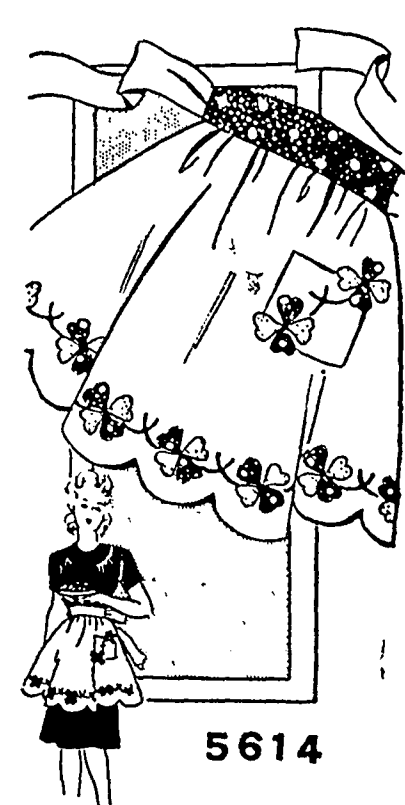

III. Hypocritical Disobedience (Mark 7:6-13).

Such an important commandment naturally held a high place in the thinking of the community. To violate it involved a measure of shame which men sought to avoid. So the Jews of Christ's day devised a scheme which made it possible for a man to appear to be very religious even as he deprived his parents of the honor and help to which they were entitled by the law of God.

The man who was so avicious that he did not wish to support his aged and needy parents could entirely evade that God-given responsibility by declaring that his property was "Corban," that is, dedicated by a vow to God. Thereafter no matter how great was the need of his parents they could receive nothing.

Thus do men make "the word of God of none effect" (v. 13) through their traditions. The method differs but the spirit persists even in our day.

Things to do

5614

AS PLEASING and gay as finding a real four-leaf clover—this pretty apron with the applique of green clover leaves. A bit more than half-a-yard of material will serve for the apron—scraps of light and dark dotted or figured green materials make the easily applique leaves. Use the paler green shade for the waistband. Use organdie for a "party" apron—muslin, percale or unbleached muslin for an everyday apron.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

To obtain Applique pattern and Apron pattern for the Four-Leaf Clover Apron (Pattern No. 5614) send 15 cents plus one cent to cover cost of postage, together with your name, address and pattern number to:

HOME NEEDLEWORK Chicago, 530 South Wells St.

Tobacco High in 1500; Professors Taught Its Use

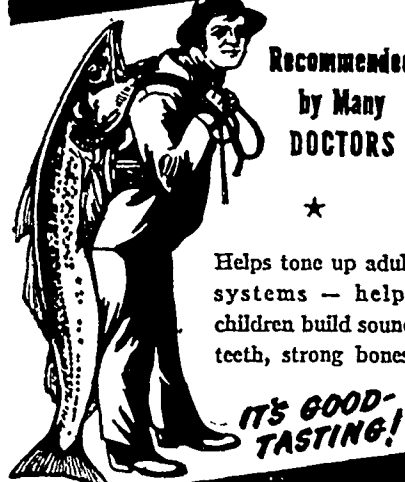

When tobacco was first introduced in England during the 16th century, it was literally worth its weight in gold—a pound of tobacco was commonly sold for an equal weight of silver and coins.

The art of smoking was also regarded most seriously, and it was considered a disgrace not to be able to inhale smoke through the nose. There were even professors of smoking who initiated beginners into the mysteries of inhaling and blowing smoke rings.

Weigh Ration Stamps
Now available is a new "ration stamp counter," a scale that enables a person to count loose stamps accurately in batches by weight from 40 to 490 times faster than individually by hand.

Post-War Autos Will Be Better, but Not 'Fantastic'

more efficient vehicles at lower initial cost. This will mean lighter cars, but not necessarily smaller.

(2) Radical changes will be slow in coming.

(3) Auto manufacturers are not willing to gamble their reputation on "futuristic" models which can't meet the hard test of public use.

(4) Plastic bodies and curved glass surfaces, in their present form, are unsatisfactory; the bodies have

none of the advantages of steel, while the plastic glass as now developed presents a dangerous handicap to clear vision.

(5) The next great mechanical advance in the industry will probably be the perfection of semi-automatic and automatic transmissions in a simple and inexpensive form. However, it is not expected to entirely replace the conventional hand shift system for several years.

These fantastic dreams of tearful rear-engine cars made of "super-materials with curved glass and plastic bodies, belong to the decade. That's the opinion of G. Roos, a vice president of Overland Motors.

Roos, who is credited with designing the hard-hitting Jeep, cited these as an "engineer's approach" to post-war automobile design: There will be a demand for

A NIGHT TO REMEMBER

Loretta Young and Brian Aherne

MERCHANT SEAMEN

Ernest Gerardi arrived Sunday from Wichita, Kansas, to spend a week's vacation visiting at the Conrad Quandt home. Mrs. Gerardi and daughter Gracka, who have spent the past few months here, will return to Wichita with him. Mr. Gerardi is employed at an aircraft plant at Wichita.

Rev and Mrs H. E. Harvey took their son Elwood to the Hampton Hospital last Friday morning. Elwood had his tonsils removed while there. Rev. and Mrs. Harvey spent the night with friends at Dumont and then brought Elwood home the next morning. He is making a good recovery from the operation.

Mr and Mrs. Todd Berlin, of San Antonio, Texas, came last week on their way to Rochester, Minnesota and visited at the George Lawhorn home. Mrs. Lawhorn accompanied them to Rochester where Mr. Berlin was going through the Mayo Clinic and would probably remain there for a major operation.

Hollywood's real thrillers challenge its cleverest movie sleuths. Film murders are always solved, but even the imaginative mystery workers, like the police, can only guess who killed actor Bacon. In The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

WHEN IT RAINS IT POURS

Bad luck has been following the Kenneth Duryee family of McIntire their two youngest sons lost their lives when the barn burned and they were trapped in the oat bin. A few days preceding the fire, another boy broke his arm. Last week, the parents took Loren, 10, to a doctor's office for treatment of a bone disease.

HALLOWE'EN PROGRAM

The teacher and pupils of Union No. 9 (Stone School) are preparing for a Hallowe'en Program to be held Thursday evening, Oct. 28 at 8:00 o'clock. Lunch will be served and the proceeds will go for school equipment. The public is invited to attend. School is located 6 miles east of Klemme. Miss Syble Perry teaches the school.

Mr. and Mrs. J. C. Thomas and son Jimmy, were Mason City visitors Monday afternoon.

Mr. and Mrs. Arthur Wellemeier spent the latter part of the week visiting with their son, Andrew and family at Springfield, Missouri.

Herman Paul drove to Des Moines Sunday and spent the day visiting with his daughter, Mrs. Eddie Epps and children.

Beverly and Leslie De Merritt, Jr., spent Saturday evening visiting with their grandparents, Mr. and Mrs. Wm. Ax.

Mr. and Mrs. Ben Coobs and Peggy, and Mrs. John Clements, were Mason City visitors Saturday evening.

Supt. Leo Esbeck was at Garner Monday evening to attend a meeting of the school superintendents of the county.

Mrs. T. W. Pavey and son of Albert Lea, Minnesota, were dinner guests at the W. F. Pavey home Sunday evening.

Mr. Howard Campbell of Sioux City began work Monday at the Jacobs Hardware Store. Mr. Campbell was recently given an honorable discharge from the Navy after about two years of service. Mrs. Campbell is employed as one of the teachers in the Klemme schools.

Marcia and John William Neuberger spent Sunday visiting with their grandparents, Mr. and Mrs. Wm. Ax.

Wm. Ax visited with his son and wife, Mr. and Mrs. Lloyd Ax at Mason City from Thursday until Sunday.

Mrs. Buford Meyer, of Mason City, came here the middle of last week and visited until over Sunday with her sister, Mrs. C. A. Larsen and family.

Mrs. Rosa Mitchell of Swea City came Saturday for a short visit in Klemme with relatives Mr. and Mrs. Wm. C. Keraus took her home Sunday.

Mrs. Ben Coobs and Mrs. Ira Overholt are the hostesses at the Dorcas Society meeting at the Methodist Church this Thursday afternoon.

The ladies of the Klemme Reformed Church packed and sent eleven Christmas Gift Boxes to the boys of their church who are overseas.

Miss Luella Lewis, who is taking nurses training at Des Moines, visited over the week end with her parents, Mr. and Mrs. Verner Lewis.

Mrs. Naska Bock returned home Friday from Mitchellville where she spent several days visiting at the home of her son-in-law and daughter, Mr. and Mrs. Lyle Burr and family.

Mr. and Mrs. Ernest Helps left Saturday for Morris, Illinois for a visit with Mrs. Helps' brothers and sisters and their families. The trip was made at this time as Mrs. Helps' brother, John Kleinmeier, was home on a furlough and a family gathering was being held while he was home.

Harlan, son of Rev. and Mrs. Harry Buss of Hudson, Iowa, was visiting with Klemme relatives last week. Harlan has enlisted in the Marines and expected to be called into service soon.

P. M. Wilson drove to Des Moines on business Friday and was accompanied back home by his son-in-law and daughter, Lt. (jg.) and Mrs. Robert Risser and son, Bobbie, who spent a few days visiting in Klemme at the parental P. M. Wilson home. Lt. Risser joined the U. S. Navy a couple of months ago and took his primary training in Florida. He has a leave until the first of November when he will be assigned to active duty. Mrs. Risser and Bobbie are remaining at their home in Des Moines.

Remember Me?

I'M THE GUY who looked at you from a USO poster a little over a year ago.

I'm the guy you forked over \$34,000,000 for —so that, through the USO, you could let me and all my buddies know that someone home still thought about us—still cared enough not to want us to miss out on any of the things we were in uniform fighting for.

A hot cup of coffee for example, when you come in all grimy and tuckered out from a little "business" trip...

A club house with easy chairs to melt into and desks to sit at and write home and a

dance floor and some decent girls to give us out here a little reminder of what it's still like back there.

You remember, don't you?

You probably dug deep for a lot of other things that year, too...for British War Relief, United China Relief, and so on. Well, this year it's going to be simpler for you. Because this year, seventeen war relief agencies have banded together into one great big campaign—the National War Fund. This time you are only asked to give *once* for all seventeen.

And take it from me, as one who ought to know, *that contribution you're going to make*

is one of the greatest things you can do to bring about victory. Not just because part of it's going to USO to do wonders for the morale of the fellows under arms, but because a good deal of it is going to help relieve distress at home through local agencies—as well as abroad, to help keep our allies in the fight. So when you're asked to give to the united campaign of the National War Fund and our community's own war fund this month, remember me. Every dollar you give helps me out in countless ways, and does its bit to bring me home sooner.

Give in a big way, will ya?

Give ONCE for ALL these

Seventy-Seven Day Pheasant Season Opens In North Iowa

SIX BIRDS A DAY
COCK COUNTY

Iowa Counties Open To
Thursday, October 28
Longest Open Season

most liberal pheasant season will open in 65 counties on Thursday, October 28, continuing 77 days in some counties, and 70 days in others. Hancock and Dubuque counties are in the group. The season is open from October 28 to Dec. 3, and in counties 6 birds may be taken, 1 of which may be a hen. In counties the season is from October 28 to November 7, 10 days in others. The daily bag is three cock birds, and no more than 6 may be taken.

possession limit on pheasants for the third day of the open season is 18 birds, of which 3 may be hens. Shooting hours are from 5 a. m. to 5 p. m. in all counties. In counties where shooting hours were changed this year on the list for the first time, they include Audubon, Jasper, and Shelby, and

2, 59 counties were open to pheasant shooting, the greatest ever opened up to that

pheasant census indicates extremely heavy population of birds in the best pheasant areas, but hunters this year in addition to having means of transportation and will have another hand in the extremely heavy cover of the pheasant

the greatest game population in the state in modern times. The Office of Price Administration has announced the price of \$1.38 per box for pheasants, effective Oct. 7, there are no pheasants had at any price.

Long Season Counties

Following counties will be open to pheasant shooting from October 28 to Dec. 3, with a bag limit of 6 birds, 1 of which may be a hen.

Adair, Winnebago, Kossuth, Cerro Gordo, Hamilton, Grundy, Black Hawk, Buchanan, Fayette, Plymouth, Buena Vista, Pocahontas, Franklin, Butler, Woodbury, Ida, Sac, Webster, Lyon, Osceola, Sioux, O'Brien, Clay, Mitchell, Howard, Winnebago, and Floyd.

Hungarian partridge season will be the same as in the 11 counties open to pheasant shooting from Nov. 12-14, both the exclusive bag limit and possession limits are 2 birds.

Following counties will be open to pheasant shooting from Nov. 28 to Dec. 7, with a bag limit of 3 cock birds:

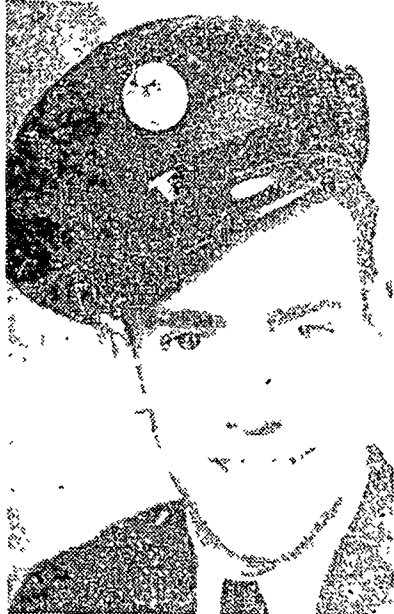

Adair, Crawford, Carroll, Audubon, Boone, Story, Marshall, Poweshiek, Iowa, Tama, Linn, Jones, Jackson, Clinton, Scott, Muscatine, Dubuque, Clayton, Allamakee, and Guthrie.

Short Season Counties

Following counties will be open to pheasant shooting from Nov. 28 to Nov. 7, with a bag limit of 3 cock birds:

Adair, Crawford, Carroll, Audubon, Boone, Story, Marshall, Poweshiek, Iowa, Tama, Linn, Jones, Jackson, Clinton, Scott, Muscatine, Dubuque, Clayton, Allamakee, and Guthrie.

SOLDIER, INJURED IN CRASH IS HONORABLY DISCHARGED

T. SGT. HARVEY MOURLAN

Technical Sgt. Harvey Mourlan, son of Mr. and Mrs. H. J. Mourlan, who reside on a farm six miles east of Klemme, has been given an honorable discharge from the U. S. Army because of injuries received in a plane crash some time ago.

T. Sgt. Mourlan enlisted in the air forces in December 17, 1941, and participated in action in the theatre of war, receiving medals for good conduct and also his silver wings.

T. Sgt. Mourlan was a patient for the past three months in the Barnes General Hospital at Vancouver, Washington. His discharge was dated as of Aug. 31st.

The above picture is through the courtesy of the Wright County Monitor at Clarion. The Mourlans are former Wright county residents and next spring will again live in that county on a farm 5 miles southwest of Belmond.

AMSTERDAM "BOOSTERS" HELD MEETING

Auxiliary members from Klemme who attended were Mrs. Ben Coobs, Mrs. J. C. Thomas, Mrs. Lydia Bock, Mrs. Martha Bredbenner, Mrs. W. F. Pavey.

Lunch was served after the entertainment and social hour.

LIBERTY "ROUGH RIDERS" HELD MEETING

The Liberty Rough Riders Boy 4-H Club met at School No. 8 on Thursday evening, October 21 with the Schaefer boys as hosts. Officers elected for 1944 were: Ronald Bredlow, president; Albert Kerr vice-president; Delwyn Stromer secretary; and Leon Griffen, treasurer.

LeRoy Bredlow was selected a leader, and Curtis Upmeyer, as the assistant leader.

Projects and programs were discussed by Paul Henderson, County Extension Director.

DID HIS PART

Larry Kuncie, whose father is in the service of his country from Jefferson, determined to sell his pet bantam rooster and hen, the proceeds to be donated during the present War Chest drive. Jack Carey, of the Carey Sale pavilion thought of a way for Larry to get more money out of his pets, and called for bids. A total of \$42.75 was soon bid and paid—all bidder refused to accept the chickens. Larry returned home with the money and the chickens. The next day the Jefferson War Chest chairman received \$43.00 from Larry.

Closing Dates Ahead!

KLEMMME STORES TO CLOSE ON ARMISTICE DAY

Ed. Thompson, president of the Klemme Civic Club, announces that all places of business in Klemme will observe Armistice Day, November 11th, by remaining closed all day.

This decision was made at a meeting of the Club last spring when closing dates were set for the year.

Other closing days ahead include Thanksgiving, Christmas and New Years Day.

THADA'S NEW GROCERY DEPARTMENT OPENING THIS SATURDAY

The new grocery department at the Thada's has been completed and the formal opening day is this week Saturday.

Free lunch will be served during the afternoon and evening.

The grocery department has undergone a complete change, and the new arrangement is the last word in grocery store modernization. The old type wall shelves and display cases have been replaced with the new type, broad, low shelving and display "islands." All has been enameled white.

New Dish Department

Although Thada's have carried a large line of dishes, they have not in the past been featured. However, in the new store arrangement a separate department now displays their large line of chinaware, glassware, pottery, dinner sets and novelty pieces.

Along with the opening of the new grocery department, Thada's are featuring a lot of good specials this week. Turn to their advertisement in this issue.

THIRD TIME

For the third time in the past 80 years, a child has been born in a Corydon family while the father was serving his country. Eighty years ago, the late Judge Evans was born while his father, Captain Hiram Evans, was serving at the front with General Grant in the Civil War. During World War I, James Evans Cooney, Jr., grandson of Judge Evans, was born while his father, Lieut. James D. Cooney, served here and overseas with the Army Air Corps. James Evans Cooney, Jr., was born on Sept. 26, 1943, while his father is serving overseas in World War II.

CHAMPIONS

Jack Hoffman of Ida county was the exhibitor of the grand champion 4-H baby beef at the Ak-Sar-Ben livestock show in Omaha recently. Darlene Hild of Plymouth county won the reserve grand championship on her Angus calf. Her brother, Warren, won the Short-horn breed championship. The Hild family also exhibited the champion county group of five baby calves.

WHISTLES ON SCHEDULE

The daily whistle signals discontinued to serve only as fire sirens or wartime "air raid" warnings have been resumed in Iowa Falls. Mayor F. M. Cottrell announced that the whistle would be blown again on their four-a-day schedule.

RATIONING CALENDAR

TIRES—Class A ration. Third inspection period through March 31, 1944. Class B ration. Third inspection period through October 31, 1944. Inspection through November 30. Commercial vehicles. Every 6 months, or every 5,000 miles, whichever occurs sooner.

Tire situation critical. Conserve present tires on wheels. GASOLINE—A coupons (new) for 3 gals. each, No. 8, valid through Nov. 21. All B and C coupons (new), now good for 2 gals. each. (Steel Plate License number and the state must be endorsed on face of each coupon immediately on receipt of book.)

FUEL OIL—Period No. 1 coupons (10 gals. per unit), new ration, valid through January 3, 1944.

SUGAR—Coupon No. 14, (5 lbs.) valid through October 31. Coupons Nos. 15 and 16 (5 lbs. each) valid through Oct. 31 for home canning purposes.

PROCESSED FOODS—X, Y, and Z blue stamps valid through November 20.

By FRANK WEBB

ON THE HOME FRONT

THE war is bringing many changes in the things we use and the things we do. Women as well as men are learning to handle tools. If a chair is lacking we make one. Perhaps you have made lawn chairs all with straight cuts of the hand saw. Have you ever stopped

to realize that it is almost as easy to cut curves with a compass saw? Curves add comfort as well as beauty and a tufted cushion distributes the weight so that springs are not missed so much. The curved pieces of the charming chair sketched here are shown at the left. You can see how easy they are to cut out of odds and ends of one-inch lumber that you may have on hand. The reinforcing pieces are all straight cuts.

NOTE—Mrs. Spears has prepared an actual size pattern for all the curved sections of this chair. Complete dimensions and directions for the chair construction and for making the tufted cushion, with list of materials included. This is pattern No. 265 and costs 15 cents. Send your order to:

MRS. RUTH WYETH SPEARS
Bedford Hills New York
Drawer 10
Enclose 15 cents for Pattern No. 265.

AS PURE AS MONEY CAN BUY

None faster. None surer. None safer. St. Joseph Aspirin—world's largest seller. You can't buy aspirin that can do more for you, so why ever pay more? Demand genuine, pure St. Joseph Aspirin.

MOTHER-IN-LAW CHEERS LONG SOUGHT RELIEF!

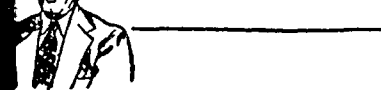

Had Been "Irregular" for Years!

Have you often despaired of finding normal regularity? Then by all means, read this untold letter:

"Many long years, my mother-in-law suffered from common constipation, but got no lasting relief. Upon the advice of a friend, she tried KELLOGG'S ALL-BRAN. She felt like a new woman. She says, 'I wanted to tell the world how your product helped me.' The Poline Balm, 734 East 100th St., Chicago, N. Y."

Have do scientists explain the "magic" of KELLOGG'S ALL-BRAN's relief? Simply this: ALL-BRAN is one of Nature's most effective sources of "fascinating" elements—lack of which is a common cause of constipation! These elements help the body's colonic flora fluff up and lighten the colonic wastes for easy, natural elimination. KELLOGG'S ALL-BRAN doesn't work by "pulling"—or by "sweeping you out." It is a gentle-acting, "regulating" food! If this is your trouble eat KELLOGG'S ALL-BRAN regularly. Drink plenty of water! See if you don't find the welcome relief you've hoped for! Insist on genuine ALL-BRAN, made only by Kellogg's in Battle Creek.

SNAPPY FACTS ABOUT RUBBER

South America supplied 65 per cent of the world's rubber needs in 1890, while in 1922 only about 6 per cent came from that section. Far East plantation development accounts for the drop in the demand for Amazon Valley rubber.

Synthetic rubber is defined as a man-made combination of molecules that form a substance having the chief characteristics of crude rubber.

In 1938 the total of American-controlled rubber plantations was about 260,000 acres, mostly in the Far East. These plantations produced 40,000 tons annually, or about 8 per cent of U. S. imports.

FIRST IN RUBBER

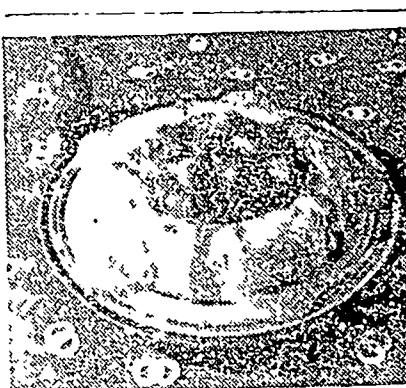

HOUSEHOLD MEMOS... by Lynn Chambers

Lynn Chambers' Point-Saving Menus
Melon Ball Cocktail
*Roast Leg of Lamb with Pear-Mint Jelly Garnish
Roast Potatoes Gravy
Green Peas Rolls
Lettuce with French Dressing
Apricot Whip Cookies
Beverage
*Recipe Given

Creamed Lamb and Peas:
3 cups cooked, diced lamb
1 medium onion, sliced
3 tablespoons butter
2 cups leftover gravy
½ teaspoon Worcestershire sauce
Salt and pepper to taste
½ cup cooked peas
3 green pepper rings, cut in half
6 slices pineapple
Sauté sliced onion in butter until tender, add gravy and season with Worcestershire sauce. Add meat and peas. Cook slowly until heated through, add salt and pepper. Unmold noodle ring and fill center with lamb. Garnish with green pepper rings and pineapple which has been slightly sautéed in fat.

If there is no gravy left from the meat, add 4 tablespoons flour to the butter or substitute in which the onion is cooked, stirring until lightly

Leftover lamb can be appetizingly served in a noodle ring which does a splendid job of extending the meat. Peas and the remainder of the gravy can go into this ring along with the cubed pieces of lamb.

browned. Add 2 cups of water in which a bouillon cube has been dissolved. Cook, stirring constantly until thickened and smooth.

The last of the lamb can be used effectively in a salad bowl just in case there's still some of it left. Extend the meat smartly with fruits that are compatible:

Lamb Salad Bowl.
(Serves 6)
2½ cups diced, cold lamb
2 cups diced celery
½ cup chopped green pepper
6 slices red apple
1 cup mayonnaise
1 tablespoon chopped mint
Place diced lamb in center of bowl. Arrange diced celery in a circle around the lamb; repeat using chopped green pepper. Cut apple in half; core and slice crosswise. Place the slices around edge of salad bowl, peel side up, and extending about an eighth of an inch over the side of the bowl. Serve with mayonnaise to which has been added chopped mint.

Lamb is inexpensive in both points and money as compared with other cuts of meat. Curry is a natural seasoning for it:

Lamb Curry Pie.
(Serves 6)
2 pounds lamb, shoulder or breast
1 onion, diced
1 tablespoon fat
3 cups hot water
¼ teaspoon thyme
2½ teaspoons salt
2 tablespoons flour
1 teaspoon curry powder
¼ cup water
3 cups cooked rice
Cut lamb into inch-length pieces. Brown lamb and onion in hot fat. Add water, thyme and salt. Simmer 1½ hours or until meat is tender. Combine flour and curry powder; add cold water and mix to a smooth paste; add to lamb. Line greased baking dish on sides and bottom with rice, pressing rice firmly into place. Fill center with lamb mixture and bake in a moderate oven (350 degrees) 20 minutes.

Rice may be omitted, and the top covered with baking powder biscuit dough. This should be baked in a hot oven for 15 to 20 minutes.

Are you having a time stretching meats? Write to Miss Lynn Chambers for practical help, at Western Newspaper Union, 210 South Desplaines Street, Chicago, Ill. Don't forget to enclose a stamped, self-addressed envelope for your reply.

The Once Over by H.L. Phillips

DEVELOPMENT OF A DIRECTIVE
It all began with the following:
Little Boy Blue, come blow your horn;
The cows are in the meadow,
The sheep are in the corn;
Where's the boy who looks after the sheep?
He is under the haystack fast asleep.

Then an average letter writer took it up:
Dear Little Boy Blue:

Just a few lines to remind you about blowing your horn. I notice that the cows are in the meadow, also that the sheep are in the corn. I am looking into the case of the boy who is supposed to look after the sheep. Any information you could give me regarding the story of his slumbering under a haystack on my time will be appreciated.

Very truly yours . . .

Ultimately a Washington bureaucrat took over:

Gentlemen: In accordance with an act of congress passed June 6, 1943, we have conducted an extensive inquiry into the need for an adequate signal system in meadows and adjacent territories. The whole matter of stabilizing practices in these areas is being processed with a view to attaining the objectives as stated in the mandate of July 7.

Considering the matter in the over-all and global aspect, it is the conclusion of our policy committee, following repeated hearings, that the following steps are necessary to restore confidence and maintain morale:

- 1—Immediate stimulating of the entire horn-blowing project.
- 2—A directive with reference to the proper number of blasts to be blown when the cows are in the meadow.
- 3—A signal system requiring a signal easily distinguishable from the former when the sheep are reported in the corn.
- 4—An intermediate or "blue" when the livestock has left; and a "red" signal in case where the sheep and cows have left the meadow and corn but may return.
- 5—Authorization for a complete study of the whole farm situation, and a checkup of the bugle crisis, with possible freezing of bugle calls at April levels in accordance with the so-called "Little Haystack" formula.
- 6—A congressional inquiry to ascertain the number of meadows in the country, the square miles of corn patches and the wandering habits of sheep and cattle.
- 7—A census to determine how many boys in the country are under a mandate to look after sheep.
- 8—An appropriation of \$5,000,000 to provide adequate handling of the haystack matter, to assure an adequate distribution of horns and to take all necessary steps to integrate, codify and co-ordinate all authorized operations.

For the purpose of keeping our files accurate, will you inform us of your correct name? It appears on our records as L. Boice Blow, Little B. Bloo, and L. Little Boybluh.

Very respectfully yours,
U. S. Cow, Sheep & Haystack Administration,
Washington, D. C.

LAMENT ON A DOUBLE DOSE OF LOVE

I find that I'm thrown with a whiz and a whee,
To an evening of romance—an amorous spree,
Consisting of love lost, of love-in-the-gain,
Of love unrequited, of love-on-the-wane,
Of love that is tragic, of love that is gay,
Of love of last winter, of love of today.
I'm lost in love's tortures, love's virtues, love's sins,
The moment a new double feature begins!

—RICHARD AVEDON.

Chester Bowles of OPA is dropping lawyers and putting trained business men into important OPA posts. He has an idea, quite absurd of course in these times, that it might be wise to have vital things done by people who know what they are talking about and who don't do much talking anyhow.

Mr. Straus who has bought a New York radio station for \$1,250,000, says that the commercial angle will be "unimportant" and we think he could make his station one of the great ones with the general public by merely announcing that under no circumstances will it ever broadcast a laxative ad.

GOOD . . . NIGHT

The guest who says, "I must be off, it's late—say, what time is it?" Is apt to make the farewell last much longer than the visit.

—PHILIP LAZARUS.

Elmer Twitchell wonders if Vice President Wallace will ever want "freedom of wanting a microphone"?

All-Out Arlene says she hopes the post-war world will bring back breakfast in bed.

If you know a Navy man, don't ever call him a "gob"—sailors consider the name an insult. You can get on the right side of him though if you offer him a Camel—or better yet, send him a carton. Camels are the favorite cigarette with men in the Navy (Army, Marines, Coast Guard, too, for that matter) based on actual sales records from the service men's stores. And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines and Coast Guard wherever they are.—Adv.

WHAT DO YOU THINK
ABOUT IT?

What do you think about bomb-
ing Germany out of the war?

If you care to speculate you will
be interested in knowing that the
20 largest cities of Germany contain
about 21 per cent of the popu-
lation. The cities in this group
range from Chemnitz with 350,734
to Berlin with over four millions.

C ventry in England, was de-
stroyed with 250 tons of bombs
Londn in over a period of 3 months
was badly shaken with 6,600 tons.

Hamburg, in Germany, with a
population of 1,675,703, was shat-
tered and made into a mess of ruins
by the allies who dumped 10,000
tons of bombs on the city.

The conclusions are that 100,000
tons of bombs would disintegrate
most of the twenty largest cities in
the reich

And Hitler said "Germany can-
not be bombed." But it has, and
how!

FAMOUS PARTNER

Bob Maron, of Grinnell, now in the Navy was a happy young man when he found it possible to dance with Paulette Goddard at the Stage Door Canteen in San Francisco. Bob was sitting on the steps of the stage listening to the orchestra when Miss Goddard was introduced to the servicemen. He summoned enough courage to ask her to dance with him and was accepted.

BETTER IOWA

GARDENS

VICTORY GARDENS

Prepare now to reach your straw beds. The mulch should be applied just to the ground, freezes solid and before the temperature dips below 15 degrees. Frost buds are injured or killed by lower temperatures. Use clean wheat or oats straw and shake it out with a fork to remove all seeds before hauling it to the straw bed. Cover the bed to a depth of 3 to 4 inches.

Soybean straw is satisfactory but it will pack more than oats or wheat straw. Cornstalks are better than nothing for the purpose, but are too coarse to give good protection. Leaves are not satisfactory for they pack and smother out the plants.

Where red raspberries often winterkill it pays to down the canes and cover them with 2 or 3 inches of soil spaded from between the rows.

Plants growing in heavy soils often are nearly heaved out by alternate freezing and thawing of the soil during the late winter and early spring. This can be prevented by applying a mulch around the plants in the fall.

In Northern Iowa the Concord grape, and in the central and southern Iowa the more tender varieties such as Agawam, Brighton and Delaware, can be protected from winter injury by laying them down in the late fall and covering with 2 or 3 inches of soil. This is possible only when the plants are fairly young.

Bryonberries, yungberries and loganberries must be winter protected if they are to produce a crop next year. These are southern types of blackberries and are not adapted to Iowa's climate. They should be laid down and covered with several inches of soil just before freezing weather.

Mechanical protectors are superior to washes, paints and the like for protection of young apple trees against damage. Hardware cloth of one-third or one-fourth inch mesh is best but is expensive and hard to get in wartime. Common screen wire is good, will not last more than 3 years. Wood veneer protectors are satisfactory. Good results also can be obtained by using building paper or larger magazines. Do not use tar paper for this purpose.

Increasing production of vegetables often is not so much a matter of increasing the size of the garden as it is the application of correct methods. For example, the making of successive sowings to provide an abundant supply of vegetables until frost is a practice that should be followed universally. It is well to note that many Iowa gardeners who made their last planting of an early variety of sweet corn on July 1 enjoyed roasting ears well into October.

Close and intense cropping in the vegetable garden requires soil that

is considerably more fertile than the soil suited to field crops. This points to the fact that application of organic manures every year or two are necessary for production and good quality in vegetables.

Parsnips, salsify, cabbage, and horse-radish are vegetables that will stand freezing. Potatoes turn sweet at low temperatures and a temperature close to 40 degrees is desirable. Potatoes are not too satisfactory for pit or mound storage. The danger of the temperature in outside temporary storage getting too low for potatoes is considerable.

It isn't advisable to maintain a farm garden in the same area for more than 5 years. A better plan is that of maintaining two garden areas, and plant one to garden crops while the other is seeded to soybeans as a green manure crop. The next year the planting is reversed, with the ground which has grown green manure going into garden crops. This plan helps keep up production of quality vegetables.

If a garden must be on an area for 2 or more years in succession the garden plan should be saved and used as a guide for rotating the plantings the following year.

Slopes that are to be planted to garden crops next spring should be plowed on the contour. Even though the area is small, water will run off the area and the soil will wash. Garden crops, more than others, need the fertility and moisture that can be conserved by performing all tillage operations on the contour.

It is advisable to store celery separate from other vegetables because it absorbs the flavor of such vegetables as turnips and cabbage. Celery can be stored in a cool basement room. The plants should be lifted with the soil attached to the roots and packed tightly in an upright position in tubs or boxes. The roots should be kept moist but water must not get on the foliage because it causes rot.

CELEBRATE REMODELING

The basement of the Catholic church in Clermont had been used only for storage until August when the men of St. Peter's parish started work of remodeling. Celotex was put on the ceiling, the wall were painted and the coal room was made into a kitchen. The work was finished in time for the annual fall festival. The next week the ladies of the church were guests of the men at a fish supper.

SAVES EQUIPMENT

Leaves blown against the hot exhaust pipe of a machine operating a corn picker burst into flames. Oscar Block, of near Hospers, saved the machinery by shutting off the tractor and putting out the flames by throwing dirt on the burning leaves. The heat had melted the solder around the large gas tank and might have caused an explosion if Block had not been fortunate in extinguishing the blaze in time. Mr. Block suffered a few minor burns.

When the moisture content of corn is down to 25 per cent or less, storage in well-ventilated cribs can be started.

Around Iowa

PARTIAL LOSS

A recently filled silo on the H. O. Chambers farm near Corwith burst and ensilage scattered over the ground. The brick silo was 18 ft across and 50 feet high. Chambers reported that he thought part of the ensilage could be salvaged.

OLD SUBJECT

Lucille Simmons, now principal of schools at Garwin, reported that her father formerly pastor of the Waverly Baptist church, celebrated his 90th birthday by preaching a sermon he had used 35 years previously.

EXPENSIVE CHICKENS

It cost R. E. Kher, Newton, Illinois, \$600 for killing three prairie chickens, according to the Clinton Herald. A justice court fine was set at \$200 for each bird killed.

FIFTY-THREE

Mrs. Louis F. Weaver of Garner didn't quite come up to the "Heinz 57 Varieties" but she came close to it with her victory garden this year. Mrs. Weaver's garden had 53 varieties of vegetables, herbs and fruits. Mrs. Weaver reports that she had corn on the cob from her garden on October 1, also green beans, lettuce and radishes.

GOOD TRIP

Mrs. Sara L. Hall of near Chicago recently visited friends in Montezuma, making the entire trip by bicycle. She made the 436 1/2 mile trip to Montezuma in 10 days. On the way she stopped various places to visit friends. One day she traveled 60 miles, and the best speed she made was 30 miles per hour as she traveled down one hill.

GOLDEN DELICIOUS

Forest Fulwider, Anamosa, had on display a branch from a Golden Delicious apple tree on his place measuring 30 inches and contained 29 apples.

GOOD CROP

Leland Roberts of near Knoxville has a field of corn that he reports will yield an average of 112 bushels per acre.

In culling hens where some are to be left as breeders, remove all of those with gray eyes or with irregular-shaped pupils in the eyes, for that is one of the indications of fowl leukosis — commonly called range paralysis.

The average cost of feed for the 36,000 cows tested in Iowa dairy herd improvement associations last year was \$74.82. For this she returned her owner \$162.81. The return above feed cost was the highest on record.

WEEKLY NEWS ANALYSIS

Allied Armies Meet Stiff Resistance From Nazi's Defense Line in Italy; Japs Flee Solomon, New Guinea Bases; More Taxes Sought to Pay War Costs

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)
Released by Western Newspaper Union

U. S. troops stalk carefully through battered Italian town on march to Rome. Doughboys are on lookout for snipers.

ITALY:

Fight for Rome

Beating forward to Rome, Allied armies ran into what appeared to be the Germans first stiff defense line across southern Italy.

In taking up their new positions, the Germans entrenched themselves on the north bank of the Volturno river on the western coast, and along the open, narrow plain on the eastern coast. Between the two coasts, their troops dug into the rugged mountains.

In all the line ran 125 miles across Italy. Allied Generals Montgomery and Clark brought up reinforcements for the first thrust at the enemy's new positions, while U. S. and British airmen pounded German supply routes leading to the front.

Observers kept one eye cocked on the Balkans, where German and British units were fighting for small islands in the Aegean sea, from which an invasion fleet moving into Greece or Jugo-Slavia could be bombed.

SOUTHWEST PACIFIC:

Jap Posts Crumble

The Japanese position in the Solomons and New Guinea is slowly crumbling. With the Allies holding the advantage in sea and air strength, the Japs have found it increasingly difficult to supply their distant outposts, and latest in the group to be abandoned was Kolombangara in the Solomons.

Unable to use big cargo or naval vessels because they would become easy prey for the superior Allied sea and air forces, the Japs are continuing to rely on barges for supplying their advanced bases, and, as in the case of Kolombangara, evacuating men. Operated at night, these barges are hidden along the seashores by day.

In New Guinea, the Allies beat back light patrols guarding the approaches to Madang, Jap air and shipping base on the northeast coast. The Allies were skirting the enemy's main defenses in a wide, circling movement, to fall on the base from the rear in much the same pattern as their conquests of Lae and Finschafen.

PEACE AIMS:

Three Faiths Agree

Identical peace aims have been enunciated by representatives of the three great faiths of the United States in a seven-point declaration. After months of study, the Federal Council of Churches of Christ in America, speaking for the Protestants, Catholics and Jews, issued a seven-point postwar program.

Salient points are:

1. A just peace based upon recognition that "not only individuals, but nations, states and international society are subject to the sovereignty of God and the moral law;" 2. States must repudiate racial, religious or other discrimination; 3. Safeguards for all peoples, large and small; 4. Equal educational opportunities and political equality for minorities.
5. Guarantee of faithful fulfillment of international obligations; to provide collective security by limitation of armaments; to compel arbitration of disputes.
6. International economic collaboration "to assist all states to provide an adequate standard of living for their citizens."
7. Security of the family and participation of labor in decisions affecting its welfare.

PHILIPPINES:

Immediate Independence

To combat Japanese propaganda designed to obtain the support of the Filipinos in the war against the U. S., congress has received a bill to grant the Philippine Islands their independence as soon as possible rather than in 1946.

Following introduction of the bill, President Roosevelt recommended that action be taken on the proposal, with provisions for economic freedom, postwar rehabilitation with U. S. help, and military security through U. S.-Filipino co-operation.

In attempting to consolidate their hold over the Philippines, the Japs have been dinnning the natives that the U. S. is insincere in its promise of granting them independence.

TAXES:

More Sought

Declaring that the American people are able to pay for at least 50 per cent of war expenses through taxes, Stabilization Director Fred M. Vinson urged a reluctant congress to approve the government's program for 10½ billion dollars of new levies.

The program calls for higher income and corporation taxes, and in-

Fred M. Vinson (left) and Rep. Robert Doughton.

creased rates on tobacco, liquor, amusements and luxuries of all kinds. The program also was to slap new levies on candy, chewing gum, soft drinks, greeting cards and other items.

Present taxes are paying for about 38 per cent of war expenses, and the additional 10½ billion dollars would bring the figure up to almost 50 per cent. In his statement to congress, Vinson declared that higher taxes also will serve to prevent inflation.

The government also proposed increased social security taxes for higher unemployment payments and temporary disability and hospital benefits.

DRAFT:

New Regulations

Although the senate killed Sen. Burton Wheeler's bill to postpone the induction of fathers until January 1, it moved toward providing stricter utilization of other manpower.

Through adoption of a substitute bill, the senate voted: 1. Occupational deferments would be limited to pre-war fathers, unless employers could prove indispensability of single or childless married men; 2. All deferments would be subject to review by the appeal board within the district where the employer was located; 3. A board would be appointed to study lowering present physical standards to make use of 4F's.

In the senate bill which went to the house for consideration, allowances to service men's wives were increased to \$50 and to \$30 for the first child, and \$20 for each additional child.

KELLY-NASH:

Team Broken

Death came to Patrick ("Pat") Nash in his 81st year, breaking up the political combination of Kelly-Nash, for 10 years the principal power of Illinois' Democratic party.

Chiefly through their close organization of 10 of Chicago's West Side wards, Kelly and Nash could carry Cook county by 300,000 votes at every election. Although the late Gov. Henry Horner broke their hold on the state in 1936, he made peace with them in 1939, and since then their power lay unquestioned.

Nash mixed politics with business. As he rose up the political ladder through 50 years, he kept his sewerage business, at one time drawing 14 million dollars in contracts from the sanitary district.

Boss of his party, it was Nash who chose former Sanitary District Engineer E. J. Jelly to succeed Mayor Anton Cermak after the latter's death in 1933, thus creating the famous Kelly-Nash combination.

FARM:

Higher Meat Goals

Because stocks have outgrown feed supplies, the War Food administration will call upon farmers to market three million head of cattle in 1944 which they might otherwise keep for milking, breeding or fattening.

In all, the WFA will work for an increase of two billion pounds of meat over this year, to bring total production to 30½ billion pounds. But because military, lend-lease and other government agencies will ask for 25 per cent more meat next year, civilian rations are not expected to be raised.

Because of the feed situation, WFA will ask for a 17 per cent cut in hog production.

Restrict Feed Sales

In a further effort to bring meat production in line with feed supplies, the Commodity Credit Corporation prohibited sale of its wheat stocks for feed for fattening hogs over 200 pounds or building cattle beyond fair to good finish.

CCC also stipulated that feed mixers purchasing CCC wheat must sell their product only for dairy cows and hens.

With weekly wheat sales averaging 10 million bushels, CCC stocks stood at 123,013,000 bushels. As of September 25, sales approximated 119,298,000 bushels. Of the 23,721,000 bushels of wheat purchased from Canada, CCC reported virtually all delivered.

RUSSIA:

Crack Dnieper

Storming the Dnieper river at three points, Red troops cracked the Nazis' last strong natural defense line in Russia, and the enemy struggled valiantly to check the new drive before it could gain momentum.

Principal breach in the Dnieper front was 50 miles north of Kiev, where the Reds poured reinforcements and supplies onto the west bank after gaining an initial foothold. The Nazis' problem was to keep the Russians from building up a force strong enough to drive forward and then swing back and take Kiev from the rear.

In the north, the Reds recaptured the important rail junction of Nevel, a main artery leading to Leningrad from the south, with lines branching off into Poland to the west.

MOSCOW:

New Mission

Whatever has been passing in the brain of Joseph Stalin might become known to U. S. and British statesmen when they gather in Moscow for conferences with the Russians on present and postwar questions.

Mysterious Russia's mysterious man has already laid claim to parts of Latvia, Estonia and Lithuania, eastern Poland and sections of Rumania. Courted by Germany for an armistice, he has told the Germans they can have peace with him provided they chuck the Nazis.

To hold Russia in the war against Germany, and yet work out means of satisfying her territorial demands without impairing U. S. and British interests, is the problem confronting Allied statesmen. Leading the American delegation at the conference will be Secretary of State Cordell Hull and the new U. S. ambassador to Russia, Banker W. Averell Harriman.

EUROPE:

Sufficient Food

Germany's conquest of Europe early in World War II has assured her of sufficient food to carry on the conflict. At present, German rations are three times higher than they were at the close of the last war.

Besides being able to draw on all of Europe for food, Germany's own 1943 production was at top levels. Bread and cereal crops were said to be one-third higher this year than last.

Washington, D. C.

BRITAIN VS. RUSSIA

One thing which distressed the Flying Senators on their round-the-world inspection was the intense rivalry between the British and Russians in the Near East.

The senators reported that around the Gulf of Persia, where the Russians take delivery on U. S. lend-lease airplanes, the British local commander at first refused to let the Russians set up a local lend-lease receiving agency. The Gulf of Persia long has been coveted by land-lord Russia as a means of reaching the sea. British opposition presumably was based on this.

Finally the British government in London ruled that the Russians could send an airplane mission to the Gulf of Persia, but even then the local British commander, according to the senators, delayed and tried to block the plan.

Now, however, the Russians are established at the head of the Gulf and work in close co-operation with U. S. officials. To save manpower, the U. S. army uses skinned natives to assemble airplanes under the supervision of sergeants and doughboys. Then the planes are turned over to the Russians for inspection. In test flights, the Russians cruise all over the Gulf of Persia area, obviously have ample opportunity to map out the terrain.

The Russian base is commanded by a live-wire young general who gets along well with the Americans but is eyed with some suspicion by the British.

The senators also reported that when the British were a bit starchy about letting the Russians use the airport at Teheran, capital of Iran, farther north, the Russian army sent in a regiment one night and, without further argument, took over the airport. Since then the British have had to ask the Russians for permission to use it.

These are a few of the delicate problems facing the Allies in this suspicious, balance-of-power section of the Near East, where, according to the senators, the chief topic of conversation is the political tug-of-war between Russia and Britain.

PATRIOTIC U. S. HENS

The hens of America are really doing all right by Uncle Sam. Their war effort is producing more eggs than the country has ever seen. Though we are sending 10 billion eggs overseas, 50 billion more remain for our frying pans.

This total of 60 billion eggs is an all-time high. Even the domestic 50 billion is an all-time high. Passed around to every man, woman and child, it means 346 eggs apiece for the year, or about one a day. This is a lot better than the average.

At the moment, eggs are "tight" in the market, because this is the moulting season, when laying always falls off. But eggs will increase again when the hens resume full-time production, also when the egg-drying business falls off.

This is a new and unexpected turn of events. The tremendously expanded egg-drying business was expected to take a full 20 per cent of our egg crop, but now the estimates are dropping fast. Reason is the British and Russians, after two years of dried egg diet, are getting tired of them. They are politely telling the combined food board and lend lease, "Don't pass those dried eggs around any more."

The dried egg business used a modest 10 million pounds before the war, mostly for cake flour and confectionery purposes. But the submarines have made shipping space so tight that space is not available for shell eggs, and the dried egg business has shot up to a capacity of about 400 million pounds.

Some of this capacity is now idle, because of Allied distaste for the product, so more fresh eggs will come onto the U. S. market.

ARMY ADVISES HOUSEWIVES

The quartermaster corps feeds so many thousands of mothers' sons that it now dares to tell those mothers how to prepare a roast of beef. Experiments in army camps show that if you cook a roast at relatively low temperatures, you will have 20 per cent more roast at the end. Cooking at high temperatures shrinks the meat, and dries up the juices.

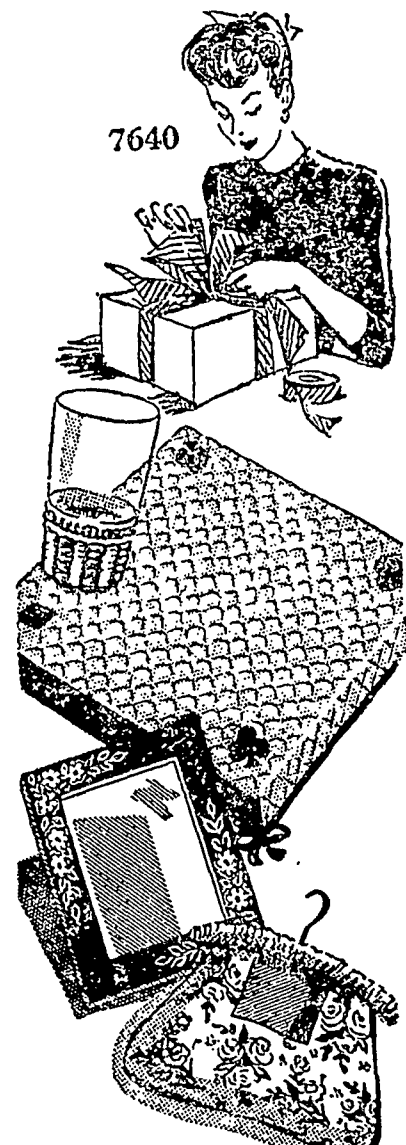

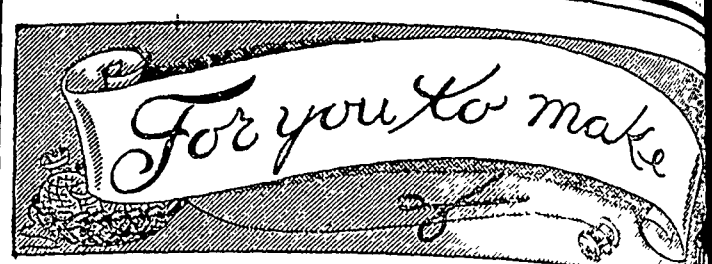

According to QMC, the desirable range of temperature is 315 to 350 degrees Fahrenheit. Cooking an eight pound roast at this temperature will require 4 hours and 10 minutes.

In other words, it takes more time than at a higher temperature (at 400 degrees, it takes only 3 hours), but you save the juices, save vitamins, and will have more roast to slice.

WAR CHAFF

Officials estimate that if Russia gets out of the war, Germany will be able to double or triple the number of fighter planes which now oppose Allied bombers from England. Many Flying Fortress pilots are not big six-footers, but little fellows who have to stuff a cushion behind themselves in the driver's seat.

Experts who know Italy say there are 1,400 railroad bridges in that country, destruction of which from the air would cripple German troop movements completely.

IT'S not only fun, it's patriotic to make your gifts this year. So out with needle, crochet hook, paste pot and paint . . . make this exciting bridge-table cover, mirror frame, or ingenious hanger with pocket for belts and gadgets

Instructions 7640 contain directions for 12 articles; pattern parts where necessary.

ASK ME ANOTHER?

A General Quiz

The Questions

1. At the narrowest part of the Bering strait, how far is the coast of Alaska from the coast of Siberia?
2. Which of the following is not a book of the New Testament: Judges, Matthew, Luke?
3. How many signers of the Declaration of Independence became President of the United States?
4. Trinitrotoluene is commonly known as what?
5. What is the name of the island upon which Haiti is located?
6. Who is the new king of Bulgaria?

The Answers

1. Fifty-six miles.
2. Judges.
3. Two—Thomas Jefferson and John Adams.
4. TNT.
5. Hispaniola.
6. Simeon II.

IN THE ARMY

they say:

"DOG SHOW" for foot inspection
"HALF-CATS" for tractor trucks
"WITH ONION" for anything very good
"CAMEL" for the favorite cigarette with men in the Army

HIGHLIGHTS . . . in the week's news

GENERAL: So suddenly did the British Eighth army land in Italy near Termoli that a detachment was able to capture the German commander of the area in bed.

ART: Rome's great art treasures are being taken from palaces and museums by the Nazis and are being shipped to Germany, as Allied troops approach the city.

RELIGION: Delegates to the 54th triennial convention of the Protestant Episcopal church, meeting in Cleveland recently, authorized procedure moving towards eventual "organic unity" with the Presbyterian church.

MENINGITIS: The new wonder drug penicillin may be the answer to meningitis.

Iowa's average yield for the 1943 soybean crop is estimated to be 20 bushels an acre for the 1,965,000 acres grown.

RETURN VISIT

David Brier Smith, age 84, left Marion in 1890 to go to Kansas. Last week he returned to Marion for a visit, the first since he left. He learned that many friends had passed away some 20, 30, or 40 years ago. He also found out that the Daniels hotel, where he had desired to stay, had been abandoned years ago.

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. to

Mrs. P. M. Wilson was visiting with friends at Clarion Tuesday.

Mrs. E. J. Schneider left Tuesday for Merville, Iowa, for a visit with relatives for a few days.

Mr and Mrs. Levi Klotzbach drove to Kanawha Sunday for a visit at the Leslie Smock home.

Mrs. Asa Arnold of Traer came the latter part of the week for a few days visit at the F. A. Arnold home.

Mr. and Mrs. Ernest Helps returned Friday from Morris, Illinois, where they spent about a week visiting with relatives and friends.

Dean Merkel, freshman at Waldorf College, Forest City, spent the week end in Klemme visiting with his parents, Mr and Mrs Alfred Merkel.

Mrs. Jess Gregory and son, and Mrs. George Rule returned to their home at Dow City after visiting for a few weeks at the home of Mr. and Mrs. Gerald Koerner.

Dr and Mrs R. R. Raney of Wesley were visiting with Klemme friends Tuesday evening. Dr Raney practiced veterinary medicine in Klemme several years ago.

Mrs. E. G. Schaeffer, of Forest City, wife of Capt. Schaeffer, former Klemme dentist, came Tuesday to spend a few days visiting with Klemme friends.

Dinner guests at the home of Mr. and Mrs. Louis Griffen Sunday were Carl Wille and family; Mrs. Clara Barz, Avis and Allen, and Mr. and Mrs. John Einhuis and daughters.

Mrs. Herman Paul and mother, Grandma Suckow, returned Friday from Milwaukee, Wisconsin, where they had visited for a couple of weeks at the Lawrence Schaefer home.

R. A. Jorgenson was at Garner Monday afternoon where he visited with brother, John Jorgenson of Rapid City, South Dakota, who was at Garner for a brief visit and looking after business.

Mr and Mrs. Herman Thiemann have moved from their farm to the house which they recently purchased in Klemme, the place where the Reuben Lemke family resided for the past couple of years.

Mrs. A. H. Dulmes of Grundy Center, wife of Capt. Dulmes, former Klemme physician, now serving with the U. S. Army in North Africa, came Monday afternoon for a visit until Sunday with old Klemme friends.

Dinner guests at the home of Mr and Mrs. Wayne Pavey at Webster City Sunday were: Mr. and Mrs. Benn Coobs and Peggy; Mrs. John Clements, Mr and Mrs W. F. Pavey, and Verner Lewis and family.

Elwyn Jacobs, freshman at Simpson College, Indianola, spent the week end in Klemme visiting with his parents, Mr. and Mrs. Ed. Jacobs. Elwyn plays on the first team at Simpson College as tackle on football squad. He says he likes the game.

Mr. and Mrs. R. A. Jorgenson were dinner guests Sunday at the Lyle Liebendorfer home at Forest City. Other guests at the Liebendorfer home were Mr. and Mrs. Joe Liebendorfer and son, Dick, and Mrs. Bessie Starboard of Hampton, and Grandma Liebendorfer of Pawnee City, Nebraska.

Mr. and Mrs. Ernest Gerardi and daughter Gracka Maria, left for their home at Wichita, Kansas, Friday night after a visit at the Conrad Quandt home and with other relatives in this community. Mr Gerardi is employed at an air-craft factory.

FARM SOLD

J. S. Sundt, of Tucson, Arizona, purchased the Craig estate farm near Rembrandt recently. The land had never been cultivated but has been used in the past for pasture. Mr. Sundt paid \$95 an acre for the property.

TIRE RUNS AWAY

A heavy spare tire became loosened from its place on the rear of the truck belonging to Ernest Mitchell of Brooklyn and started out on its own to see the world. It rolled across a sidewalk in Grinnell, narrowly missing a woman and small boy, into the driveway of the H. Gerard home. Its travels were ended when it crashed into the rear of the Gerard car. The car can be easily repaired and no other damage was incurred.

THOUGHTFUL

Nick Neiers of Cascade made final arrangements recently for sending 260 cartons of cigarettes to local boys in the armed services. Mr. Neiers spent considerable time getting together the list of names of boys serving their country. The cigarettes will reach the boys before Christmas.

CENTURY OLD

Mrs. Rosa Babcock, now living with her grand-daughter at Armstrong, recently celebrated her one hundredth birthday. She has one sister, Mrs. Lucy Freeman of Lisbon, North Dakota, now 98 years old, and a brother, C. M. Ryan of Newberg, 91.

LONGTIME SUBSCRIBER

James Davis, Sr., of Cascade formed the Pioneer-Advertiser while removing his subscription that the paper had been given his family for 67 years. His paper in 1876.

Boys And Girls Have Chance To Help In War Effort

RED CROSS DRIVE BEGINS MONDAY, NOV. 8

Junior Red Cross enrollment gets under way in the city of Hancock County on Monday, Nov. 8th. On that day it is the duty of the Junior Red Cross to see that school boys and girls go over the top 100% in the drive. The contribution of each child is what ever the school child can give.

The Junior Red Cross is composed of 10,000 young people in America. It is the largest youth group in the U. S. A. The organization was founded in the days of World War I to help the "Service men" in the United States.

The Hancock County senior citizens have always had an excellent record in membership and in the Junior Red Cross are expected to do as well.

During the membership drive of hand work of materials for comfort and recreation of our soldiers will be handed to the Junior Red Cross groups to be used during the year.

Home nursing, sewing, and other work offered as a work challenge to the school members of Junior Red Cross.

For boys and girls, everyone can help the Junior Red Cross.

Our Men In The Service

BOB KIMBALL WILL GRADUATE FROM NAVAL SCHOOL

"Bob" Kimball, son of Mr. and Mrs. Walter Kimball of Boone, formerly of Klemme, will graduate from the Navy "boot camp," at Farragut Idaho, on November 20, according to a card received by his sister, Miss Nadine Kimball, Klemme. Bob expects to get home on a furlough about Thanksgiving.

His address is as follows: Robert L. Kimball, A. S. Co. 832-45, Regt 5, U. S. N. T. S., Camp Scott, Farragut, Idaho.

DONALD SCHAEFER WILL GRADUATE NOV. 11

Donald, son of Mr. and Mrs. Roy Schaefer of Klemme will graduate from "boot training" in the U. S. Navy on November 11th at Farragut, Idaho. He expects to be home on a furlough by November 14th.

Sunday evening Donald called his sister, Mrs. Emory Weaver, by long distance telephone to tell her he would be home November 14.

Mr. and Mrs. Roy Schaefer have three sons in the service, all being in the Navy. They are Merel, Calvin and Donald.

THADA'S OPENING DAY WAS A REAL SUCCESS

Despite the disagreeable weather Saturday, Thada's opening of their new grocery department was a grand success, and there was a large crowd at the store all day and evening.

Ed Thompson said it was the biggest business day that the store has had in over six years.

Free hot coffee and cookies were served throughout the afternoon and evening.

LIBERTY F. B. ELECTS 1944 OFFICERS

Frank Bredlow was elected Director for Liberty Township Farm Bureau for 1944 at a meeting held October 26th. H. A. Greiman is the new chairman, and Mrs. Richard Brouwer will be the new Secretary.

Short reports were given by County Home Economist, Hazel Grimes, and County Extension Director, Paul Henderson.

Two schools taught by Miss Jeroldene Goll and Miss Upmeyer had charge of the social program.

Home Project Meetings Get Under Way In County

MRS. ALBERT ETCHEN WILL BE HOSTESS TO HOME PROJECT LEADERS, NOV. 5

Some Meetings Of Home Project Training Schools Held

The Garfield and Concord Home Project leaders met on Tuesday, November 2nd at the home of Mrs. O. N. Johnson. They discussed the first phase of their 1943 home project program, "Meeting Family Food Problems". The discussion was led by Miss Hazel Grimes, the County Extension Home Economist.

Neighborhood leaders who attended the meeting took the information and materials back to their neighbors.

Goals Set For The Year

Three goals toward which farm families will work during the coming year are:

To produce and conserve enough of the right kind of food for family needs; to know what foods to eat for best health and to prevent food wastes.

These goals imply proteins, fats and sugar.

Will Meet At Etchen Home

On Friday, November 5, the Avery and Twin Lake leaders will meet at the home of Mrs. Albert Etchen, southwest of Klemme, to discuss the same problems.

Tuesday, November 9, Magor and Boone leaders will meet at the home of Mrs. Geo. Newcomb.

Wednesday, November 10, Madison and Ellington leaders meet at the home of Mrs. Herman Gerner.

Thursday, November 11, Birmingham and Crystal leaders will meet at the home of Mrs. Fred Bentele.

Wednesday, November 17, Ell and Liberty leaders will meet at the home of Mrs. Aaron Stromer.

Thursday, November 18, Amsterdam and Erin leaders will meet at the home of Mrs. O. W. Friedow.

Friday November 19, Britt and Ortel leaders will meet at the home of Mrs. Forest Eckels.

Keep on Backing the Attack with your purchases of WAR BONDS. Give War Bonds for Christmas.

Annual Farm Bureau Meeting Scheduled For November 5

JUNIOR CLASS PLAY DREW A CAPACITY CROWD

Mystery Comedy Kept Audience In Suspense Until Final Act

On Friday, October 29, 1943 the Junior Class of Klemme High School presented a three-act mystery-comedy by Jay Tobias, "The Scare-crow Creeps". It was directed by Mrs. H. N. Campbell.

The performance was attended by an overflow crowd and offered many thrills, chills and moments of suspense.

The action took place in Gage Manor, a gloomy old mansion, on a dark stormy October evening. The story concerned the finding of the Carita diamond, a valuable jewel supposedly hidden in this old house.

Roderick Gage, the master, had been accused of a great wrong for thirty years, and on this night it is discovered that it was not he, but his butler, Adam Throgg, who had been guilty all these years. By the use of a phantom scarecrow, Roderick was able to scare the entire cast, and trick Adam into confessing the crime.

Although the play offered many scenes of horror and tension, relief was provided by the comical dialogue of Maudie, the maid, and T. A., a negro houseboy, plus the efforts of all other members of the cast. Members of the Speech class made up production crews.

The cast was as follows:

Adam Throgg	Laurice Lemke
Maudie Hobbs	Iva Christie
Roderick Gage, Ewald Grosshuesch	
Annabelle Gage	Marjorie Hartbeck
Perry Gage	Edward Barr
Kenneth Gage	Ed Buntinbach

PROMINENT MAN SECURED AS SPEAKER FOR ANNUAL F. B. MEETING

All Farmers Are Invited To Attend This Meeting

V. A. Cook, of Klemme, president of the Hancock County Farm Bureau announces that the County Board has secured Francis Johnson, President of the Iowa Farm Bureau Federation as the speaker for the annual meeting to be held at the Garner High School on Friday evening, November 5th. Mr. Johnson will discuss a number of "hot" subjects of special interest to the farmers of Hancock county, and all farmers are urged to come and hear Mr. Johnson's talk.

The regular business meeting will start at 8.30 p. m. There will be committee reports, election of officers and voting directors, and approval of the county resolutions.

Every member and friend of the farmer should attend.

Lunch will be served following the meeting.

Miss Amelia Gage	Patricia Kudje
Norma Gage	Mabel Sterba
The Scarecrow	Elwood Harvey

Game Storage Permits Free

Successful Hunter Stores His Game In A Locker Plant

Each year a large number of prosecutions are made for illegal storage of wild game. Often at the hearings the plea is made that "I didn't know there was a time limit on possession of game that was legally taken."

The game possession law is one of the earliest game laws and has been enforced throughout the United States for a long time. In recent years the establishment of cold storage lockers in almost every community has made the strict enforcement of this law more necessary than ever before. With a shortage of domestic meat and the extended game season, plus a heavy game population, the need for understanding how game may legally be stored is more important than ever. In cooperation with the Cold Storage Locker Association, the State Conservation Commission is making every effort to assist hunters in the legal storage of their game, and at the same time every effort is being made to prevent illegal storage.

Under the statutes all game must be disposed of within 10 days after the close of the season, however, by permission of the Conservation Commission, game, except waterfowl, may be held until June 30 the following year. Permits may be issued to hold migratory waterfowl 45 days beyond the close of the season.

To store game beyond 10 days after the season's close, simply ask the locker operator for an application blank, fill it out, and mail it to the State Conservation Commission, 10th and Mulberry, Des Moines (8), Iowa. All locker plants have been supplied with permit applications. They cannot, however, grant the permit. It is issued directly from the State Conservation Commission office with no charge.

Game held in lockers may at no time exceed the legal possession limit, and permits will be granted for each license under which game was taken.

HELLO, FOLKS!

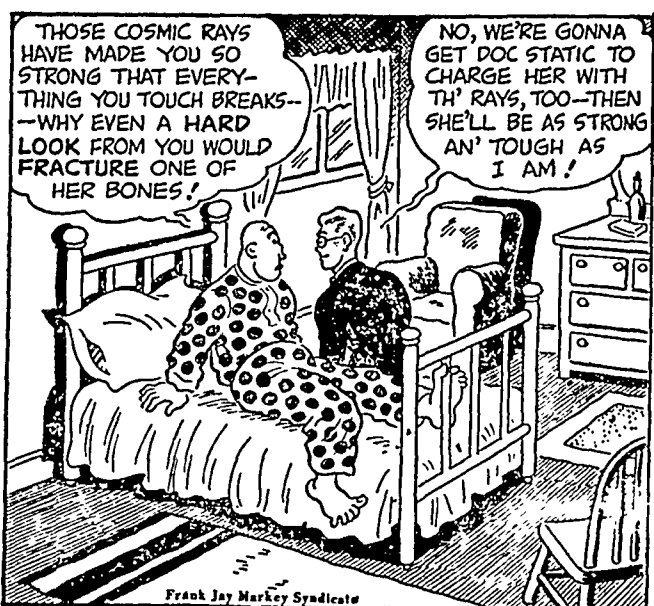

Mr. and Mrs. Taus Harms are the parents of a baby daughter born to them on Thursday, October 28, 1943. The little girl has been named Darlene Lucille.

Mr. Harms is employed at the Ray Veldhouse farm northwest of Klemme.

Household Hints

To avoid losing a handkerchief, place it under a bed pillow, or sew a pocket on one side of the pillow case.

Spaghetti, macaroni, noodles, rice, are high in carbohydrates and should be counted with the cereals and breads, not as vegetables, when planning and balancing your menus.

When your shoes are wet, crumple newspaper and pack in the shoes. This will absorb the moisture and also help keep the shoes in shape. Do not place too near the fire.

To sprinkle clothes for ironing, use a clean whisk broom or a bottle with a perforated top.

When washing fails to remove stains on your oven try using ammonia. Saturate a cloth pad, place it over the stain, and let it stand. After about two hours, you can wipe away most or all of the stain. Wash the oven thoroughly with soap suds after using ammonia.

CLASSIFIED DEPARTMENT

Auctioneering School

BE INDEPENDENT
I teach auctioneering. Students make from \$25.00 to \$500.00 per day. Class open now. Write for terms. COL. J. B. ROBERTSON, Auctioneer, 809 Court St., Sioux City, Iowa.

Reduction in Moisture Prepares Grass for Silage

Farmers in recent years have
proved that grass silage keeps
satisfactorily and makes excellent
feed for all types of livestock, but
most of the silage has been made
by using molasses or phosphoric
acid as a preservative. Ohio State
university agronomists say grass
silage will keep well without pre-
servatives if the silo really is air-
tight and if the forage contains be-
tween 60 and 70 per cent of moisture
when placed in the silo.

Standing grass or legumes contain
more moisture than 70 per cent so
they should be allowed to wilt after
cutting if the material is to be made
into silage without using a preserva-
tive. Usually the moisture content
must be brought down from the origi-
nal content about 78 per cent to a
safe 68 per cent. The removal also
makes the grass at least 10 per cent
lighter to handle.

Silage is preserved by the forma-
tion of acids that are derived from
the fermentation of sugars in the
plants. Removing part of the water
from a plant does not increase the
total amount of sugar present but
it does increase the proportion of
sugar to total weight after part of
the water has been evaporated.

Leakage from the bottom or sides
of a silo is likely to occur if silage
contains more than 70 per cent of
moisture, and the liquid which is
lost contains an important amount
of nutrients. Forage which is prop-
erly wilted will not lose liquids by
leakage.

Rabbits Can Be Controlled If They Damage Crops

Rabbits may sometimes invade
home gardens and cause serious
damage, as they return day after
day to feed on the carefully tended
crops. If weeds, grass, and brush
are near the garden, these animals
are likely to cause some damage.

A good wire fence around the gar-
den will keep these animals out, but
it is expensive. Furthermore the
wire for such a fence is not avail-
able to a gardener at present.

In the country, or in suburban dis-
tricts where shooting is safe, a gun
may easily be used to control rab-
bits if the law allows this where rab-
bits are damaging crops. Rabbits
are most active from twilight until
early morning.

Repellents are not often effective,
since strong chemicals of this sort
damage the plants. Nicotine sulfate
may reduce rabbit injury, but it
must be sprayed on the plants every
few days, and after every rain.

Simple box traps, baited with ap-
ple or carrot, are probably the best
means for rabbit control. Several
of these placed in the garden near
the borders where the animals en-
ter, will enable the gardener to put
a stop to their damage.

Rogue Raspberry Mosaic

When symptoms of red raspberry
mosaic are most easily detected ag-
riculturists advise growers to take
advantage of it and start roguing
all diseased plants immediately.
Although this virus disease is most
serious on black raspberries, it can
also be very destructive to red and
purple varieties. The best control
measure is the removal of all plants
showing the symptoms.

You can identify red raspberry
mosaic by large irregular green blis-
ters or swellings on the leaves,
surrounded by yellowish green tis-
sue. Diseased plants are stunted
and the leaves have a dark green
and yellow speckled appearance.
New growth is shorter than that of
healthy plants, and fruits of dis-
eased plants are usually dry, seedy
and tasteless.

When roguing, remove and de-
stroy not only the young shoots show-
ing the symptoms, but also the en-
tire mother plant from which the
shoots grow.

Fortunes Told on Ox-Bones

The Bronze age Chinese predict-
ed future events or tried to learn
the outcome of their plans by con-
sulting their ancestors. To do so
they inscribed a question on the
shoulder bone of an ox or on a piece
of tortoise-shell. Then they applied
heat to the other side of the bone.
This produced a crack upon the
face. The direction in which the
crack ran was believed to indicate
a positive or negative answer to
the query. It is due to this practice
of divination, known as scapulimancy,
that we know as much as we
do about the Shang people at An-
yang, because great piles of used
oracle bones have been discovered
and translated. Thus we know what
the Shang people worried about,
and what was foremost in their
minds. The Black Pottery people
also practiced scapulimancy in a
primitive form.

Counsel Women in Plants

The field of personnel adminis-
tration in industry was virtually closed
to women prior to the war, but today
production heads find it necessary to
adjust policy and practice when em-
ployees in slacks replace workers
in overalls. The women's counselor,
between the actual job supervisor
and the executive personnel officer,
is charged with the duty of fostering
good employer-employee relation-
ships. Successful accomplishment of
the counselor's functions will lessen
the resentment of foremen and male
employees against women as co-
workers and will aid the woman in
adjusting herself to factory life.

Two Ways Used to Figure Cargo Capacity of Ship

To understand news of shipbuild-
ing or of ship losses in the war, the
difference between gross and dead-
weight tonnage must be clearly un-
derstood, according to the National
Council of American Shipbuilders.

Those who calculate the tonnage
of a ship in the two most widely
used measures—the gross tonnage
used by the British and the dead-
weight tonnage used in this country
—do not get the same answer.

Using the British yardstick, a
Liberty ship is rated at 7,100 gross
tons. American measurement will
rate at about 10,800 deadweight tons.

To understand what ship tonnages
mean, you must first learn that nei-
ther gross nor deadweight tons re-
fers to the actual weight of a ship.
They are attempts to measure its
capacity to carry cargo.

In arriving at the deadweight of
a ship you measure the volume of
water it displaces, fully loaded with
its crew and supplies, and subtract
from that figure the combined
weight of the ship's hull, machinery
and all of its equipment. That gives
the weight of the cargo in the ship,
plus crew and supplies—the dead-
weight tonnage, which is expressed
in tons of 2,240 pounds.

Gross tons are really not tons at
all. That is, they are not measures
of weight or mass, but the cubic
content such as a bushel of corn.

Ancient Incas Developed Terrace Tillage in Peru

Terrace tillage in Peru during the
time of the Incas was practiced on
steep mountainsides as well as on
gentle slopes of valley floors. A
terrace usually had three parts—a
wall and two layers of earth behind
it. A bed of coarse stones and
clay was overlaid with fine top soil.
Terraces ranged from 8 feet to 14
feet in height; from 8 feet to 15
feet in width. Banks of 20 to 30 ter-
races were common. Some of more
than 50 "steps" lifted their topmost
gardens to the height of the Washing-
ton monument.

So closely were the stones of the
"risers" fitted that a knife edge
could not be inserted in the seams.
Even the eye was hard put to see
the joinings. How the work was done
is still a riddle. Llamas may have
lugged the stones and soil where
needed.

Water was channeled down the
mountainsides in acequias, some
several miles long. Erosion was
carefully prevented. Small gutters
led from one terrace level to another.
Shower baths were possible in the
irrigation streams spurring from
level to level.

Ancient Peru's land-starved farm-
ers put their backs as well as their
hearts into agriculture. They hon-
ored their dead with decorative tombs
rather than with decorative tombs.

Goldenrod Native

Gold, color of riches and cheer,
clothes the roadsides and hills each
fall—gold symbolic of harvest time,
gold of ripened grain, gold of fat
pumpkins, gold of the sugar bush
in autumn, and gold of goldenrod
bordering the hedgerows and en-
hancing the waste places.

Unlike so many of the roadside
flowers, goldenrod is not an "escape
from old gardens" nor "introduced
from Europe." It is true American.
We have more than a hundred spe-
cies. It is the state flower of Ala-
bama, Nebraska and Kentucky. One
species, the Canada goldenrod, the
tallest and most colorful type of the
North country, is found in every
state except California, but it is rare
west of the Mississippi. In Colo-
rado this goldenrod is a choice gar-
den plant. California has only eight
species, as compared with New
York's thirty, and so there it is
much used by gardeners for back-
ground plantings. A favorite species
is called Orojo-de-Liebre.

Leap Year

Leap year generally, but not al-
ways, occurs at four-year inter-
vals. The true astronomical year,
however, is 365 days, five hours, 48
minutes and 46 seconds, while the
calendar year is an even 365 days.
This means that for each calendar
year that is observed there is a sur-
plus of nearly six hours in the astro-
nomical year. This is absorbed by
adding one day to the calendar at
four-year intervals. But this, then,
gives the average calendar year a
length of 11 minutes and 14 seconds
in excess of the true astronomical
year. To make the necessary ad-
justments in the calendar the last
year of each century is a leap year
only when the number of the cen-
tury is divisible by four (1600, 2000,
etc.) and the years which are mul-
tiples of 400 are observed as com-
mon, and not leap years.

Ton Fills 100 Feet

More than nine decades ago, all
maritime countries agreed that in
translating the cubic content of a
ship into tons of cargo capacity,
they would figure that one ton of
cargo would fill 100 cubic feet in the
ship. So by dividing the number of
cubic feet by 100, they determined
its capacity in gross tons.

In reading news of shipbuilding
programs or of shipping losses in
the war, the difference between
gross and deadweight tons must al-
ways be kept in mind. Lloyds of
London invariably uses the gross
ton measuring stick, while Ameri-
cans prefer deadweight tons as a
more exact yardstick of cargo
capacity.

Lack Cellar? Dig Storage Pit to Get Same Results

Families that lack a good storage
cellar, either under a building or
outdoors, can get satisfactory results
with one of several types of storage
pits. To make a pit, select a well-
drained place in the garden or some
place convenient to the kitchen.

The pit may be of any convenient
size, but it is more satisfactory to
make several small pits rather than
one large one. When a storage pit
is once opened, it is best to remove
all the contents at once; hence, the
advantage of small pits. It is best
to store small quantities of all root
crops in each pit. It will then be
necessary to open only one pit to get
a supply of all vegetables.

A convenient size is one that will
hold two to three bushels. To make
a pit of this size, dig out six or
eight inches of soil from an area
three to four feet in diameter. Lay
three or four inches of dry straw or
cornstalks in the bottom and pile
the vegetables in a cone. Cover the
pile with a layer of straw or corn-
stalks, and over this place a layer
of dirt three inches deep. As winter
approaches, increase the dirt cover-
ing until it is about six inches deep,
and in areas where the winter is
very cold, make the dirt 10 to 12
inches deep.

For ventilation, leave a small
opening at the top allowing the straw
covering to come through the dirt.
Cover this opening with two pieces
of board nailed together at two
edges and weight this down with
two stones.

Dig a shallow trench around the
pit so that it will drain off rain
water.

Strive to Create Standard Products in South America

Scientists and engineers through-
out the Americas are now engaged
in the important task of setting up
inter-American standards for ma-
chinery, electrical products and
many other items.

Lasting benefits to inter-American
trade and industry will accrue from
this work, which has been stimulated
by the war.

The war has focused attention on
varying hemisphere standards.
Rails suited for one country cannot
be used in another, because of a
1-32 inch difference. Use of badly
needed vegetable oils has been
slowed by inadequate grading stand-
ards.

Water meters made in one coun-
try sometimes do not meet speci-
fications in another. A woman who
moves from one region to another
might not be able to use her elec-
tric iron.

For many years, scientists in the
United States, through industrial
groups and government agencies,
have been eliminating such discrep-
ancies within the United States. Now
a spontaneous interest in standards
is reported in the other Americas.

Buried for Duration

Former occupants of a street of
houses in a North Queensland, Aus-
tralia, town, who buried valuables
when they were forced to evacuate,
won't be able to reclaim them until
the war is over. Four inches of con-
crete now covers the place where cutlery,
crystal, silver, paintings and
other household treasures were
hidden. The concrete was laid by
United States army authorities, who
were unaware of the buried prop-
erty; they took over the whole street
and converted it into an army hos-
pital and recreation rooms. Ramps
have been built to join the houses
along one side of the street, which
is reserved for the surgical and
medical section. Patients are
wheeled along ramps through the
houses as they are wheeled through
wards in a hospital.

Handshaking

The instinct of self-preservation
planted in the heart of primitive
man a distrust of his fellowmen.
The need of defending themselves
caused men in early times to go
armed. A man who proved himself
to be unarmed, therefore, was prov-
ing his trust and confidence, and a
savage who wished to demonstrate
his friendship for another would
trust out his empty right hand in
greeting. In response to this ges-
ture the other man would extend his
fighting arm, showing that he, too,
had no concealed weapons. The
clasp betokened mutual understand-
ing and was the origin of the hand-
shake.

Do Job Right

When doing necessary repainting
for the preservation of property,
property owners are reminded by a
paint authority that it costs no more
to select harmonious and pleasing
colors than it does to apply only
dark or unattractive tints. In fact,
say color authorities, failure to use
the most attractive colors may be
an actual loss, for the factors of
better lighting and improved morale
may be thus sacrificed without any
compensating gains.

Increase Visibility

Walls in some parts of a large
industrial plant in Indiana are painted
gray in graduated tones, starting
with a dark shade at the bottom of
the wall and proceeding upward pro-
gressively lighter to the ceiling, with
the purpose of concentrating the in-
tensity of the light from above. Dif-
ferent colors are used for the end
walls. Some are painted blue and
others pale yellow.

Insulation of poultry houses to
keep the temperature between 40
and 60 degrees will add many eggs
during the winter, say poultrymen
at Iowa State College. They sug-
gest a straw loft overhead and
ground corncocks, sawdust or com-
mercial material may be used for
wall fills.

Iowa poultry processing plants
have a shortage of manpower. To
aid in the handling of the huge
poultry crop, farmers need to mar-
ket their poultry throughout the
week instead of only on Saturday.

The hemp crop is uneven this
year, partly because of fertility and
partly because of the weather. It
needs a rich, well drained soil.
shatter badly.

HORSE AND BUGGY DAYS

Horse and buggy days are
revived by the Eldora Green
Colonial. Since the OPA has ruled that
deliveries by truck will not be
lowered, the greenhouse has
its patrons that daily delivery

LOST GASOLINE

Two thousand gallons of gasoline were lost when the gasoline truck driven by Archie Tabert crashed into a concrete bridge near Pocahontas. The accident was caused when two synthetic rubber tires blew out. The two front compartments of the tank were jammed, causing the gas to escape. The tank capacity is 4,050 gallons.

HOUSE

BETTER IOWA

GARDENS

The 1944 garden should be started this fall. Every gardener who is able to prepare the garden area this fall should do so. By plowing or spading the ground in the fall, probably he will find he can plant potatoes, peas and other cool-season crops several weeks earlier in the spring — and that means higher yields.

Fall plowing improves the physical condition of heavy soils, relieves the pressure of spring work, makes it possible to trap water and snow in the furrows, and makes conditions favorable for decay of organic matter turned under.

Manure or compost should be applied to the garden before the soil is turned. Wait until spring to apply chemical fertilizers. There is time to fall plow or spade the garden so long as the ground remains unfrozen and bare of snow.

Vegetable seed may keep its ability to grow for 1 to 10 years, depending on the kind. Parsnip seed usually is good for only 1 year, bean and pea seed may be good for 3 years, and onions 10 years after they were produced.

Left over vegetable seed should be stored in a cool, dry place, such as cans or jars that allow a small amount of ventilation. Most left-over seed, when handled in this way, will retain fairly strong germinating ability.

Chives and parsley may be lifted and planted in 6-inch pots to grow indoors in a sunny window for use during the winter.

Midwest gardens will have a different Victory Garden fertilizer in 1944. The formula will be 4-12-4 instead of the 3-8-7 formula which was used this year. The change is "all to the good" because the fertilizer will be higher in nitrogen and phosphate. Nitrogen fertilizers such as sulfate of ammonia and ammonium nitrate may be available next year. Nitrogen fertilizers are valuable because they stimulate growth of leafy vegetables.

Windows in the vegetable storage room should be covered to keep out the light.

Scarcity and high prices of fruit have caused many gardeners to consider producing their own. Those who have fruit plants will wish to manage them properly to increase yields. Bulletins on tree fruits and small fruits can be obtained from the Iowa State College Agricultural Extension Service, Ames, Iowa.

Around Iowa

HELPED HIMSELF

The only consolation that Burton Bolton of Waverly gets from the fact that someone took some potatoes from his patch is that the thief had to dig the potatoes himself. Someone dug three rows of potatoes from the Bolton garden.

SCRAP

William Paige, living near Elkhart, recently sold a junk dealer, Clarence Maggart, 18 tons of heavy scrap iron.

RESOURCEFUL

Dewey Combs of Clarinda has put an old automobile engine to work as a stationary power plant. He uses the engine in fanning the dust and screening from newly-combined alfalfa seed.

HARMLESS

The Joe Ziegmann family of near Odebolt was a little perturbed when it found a strange instrument incased in red cloth and a large broken balloon. It was later discovered that the instrument was a weather instrument released from the Omaha weather station, at 11:45 a. m. one morning and found at 4:00 p. m. the same day by Bernard Ziegmann. The finders will be paid \$1 for recovering the instrument.

FREAK LIGHTING

A bolt of lightning struck a tree near the Carroll Chapman home in Nora Springs. A piece of bark about eight feet long was torn off the tree and thrown across the street a distance of about 100 feet. The bark struck and broke a storm window on the house belonging to Mrs. C. D. Moody.

IT'S HER STORY

Curley Simons, now in the navy, was indirect cause of a black eye for his wife Mrs. Simons, of Emmetsburg, bent down to look into a lower section of a wall case when her left eye came in contact with the corner of a frame containing a picture of her husband which stood in front of the case. A slight cut under the eye and a bruise which became "black" resulted.

TUMBLER

Caught on a tumbling rod of an elevator while cribbing corn, Ira Hinspeter of Marcus suffered severe injuries. Mr. Hinspeter was thrown to the ground and his clothing torn from his body.

SHORT SNORTER

A second short snorter has been located in Indianola by Mrs. Fred Peck. A short snorter is a dollar bill that has signatures of persons who have crossed the ocean by air. The bill contained the names of eleven persons. A jeweler's magnifying glass was necessary to bring out all the names.

OLD NEIGHBORS

Fifty years ago, Herman Keel and Leonard Steiff drove to Concord, then the county seat of Hancock county, and obtained their marriage licenses. Mr. and Mrs. H. Keel were married on October 16, 1893, and Mr. and Mrs. Leonard Steiff were married on Oct. 12, 1893. The two couples began housekeeping on adjoining farms, with only a barbed wire fence between the two farms. This October the two couples celebrated their golden wedding anniversaries. Six years ago, the Keels moved to Forest City and the Steiffs plan to move about November 1 to Forest City.

WALKS INTO CAR

Mrs. Paul Rees of Hamburg got out of her car in front of her home and started across the street, walking into the side of a car driven by George Gray. Mrs. Rees was knocked to the ground, receiving a dislocated right knee and cuts on her forehead. As he was driving slowly at the time Mr. Gray was held blameless.

TAXES OLD AND NEW

T. V. Hart of Knoxville found a tax receipt dated Nov. 11, 1853 in the amount of \$336 for taxes on 60 acres of land in Marion county. The receipt was issued to W. D. Everett, administrator of the Jessie Hegwood estate. The land is now held by several people. The 1942 tax on a 5-acre parcel of the original 60 acres amounted to \$20.50. In 1853 the taxes were divided into various funds—\$1.60 for the county fund, 32 cents for the special fund, 32 cents for the school fund and 64 cents for roads.

HAVE MICE? TRAPS ARE

BEST CONTROL METHOD
An increase in the number of mice in the house is common at this time of year. They destroy and contaminate food supplies, chew on matches and insulation of wiring, build up nests of newspapers and other litter, and in general make a nuisance and hazard of themselves. Harold Gunderson, Iowa State extension entomologist, considers using the common snap trap, with a variety of baits, as the best control measure. Poisoning is not recommended for household use because of the danger to children and pets.

Bacon rind, apple, cheese, bread, peanuts, peanut butter and cotton all make acceptable baits. A dozen or more traps should be used if the infestation is heavy. The bait should be fastened securely to the trigger, and the traps should be placed close to the wall.

Basement floors and walls should be sprayed thoroughly with household fly spray after the mice have been eradicated. This is a precaution against fleas, which commonly infest mice.

It makes little difference what the source of protein is or dairy cows or growing lambs as long as the feed is palatable and enough is provided to take care of the growing of production needs.

HOG PRICES CAN BE EXPECTED TO SLIP DOWNWARD

Hancock County farmers will probably find it profitable to market their hogs now if they are of marketable finish and weigh 190 pounds or over, says County Extension Director Paul Henderson.

There is a narrow spread between the ceiling and the support prices of hogs—\$1 at Chicago—and once prices start to slip, they may hit the support price with a sudden bump, according to Francis Kutish, Iowa State College farm economist. Hog runs are heaviest in late November, December and January, and it is during this period that the price of all hogs regardless of quality, are apt to sell at the price-support price.

While the government expects to hold hog prices up to the support level through heavy purchases of pork, that move will be of little help if slaughtering plants find their yards flooded with heavy hogs far beyond their slaughtering capacity. If such a situation develops some procedure for insuring an orderly flow of hogs to market will become imperative.

Kutish predicts the time that hogs will stay near ceiling levels is rapidly drawing to a close. Wise farmers will probably top their hog droves and send all those over 190 pounds to market. Packers can handle such hogs more easily now before the heavy runs come. Once hog prices start to slip, they are not likely to regain their present levels until next February, he believes.

PREDICT CIVILIAN SUPPLIES NO LARGER IN 1944 THAN 1943

Total civilian food supplies next year are likely to exceed those of 1943 and may even be somewhat smaller. This is the report Miss Dorothy Simmons, extension home management specialist, brings to farmers from the National Outlook Conference in Washington, D. C.

Greater requirements for non-civilian groups probably will more than offset increases in food production. For 1944 as a whole, it now looks as if there will continue to be plenty of cereals and as much chickens, eggs, fresh fruits and vegetables, potatoes, dry edible beans and peas as this year.

Food fats and oil supplies should remain about as much as civilians have had under rationing in recent months. But there probably will be less meat and less dairy products.

In looking ahead, Miss Simmons points out the economists are assuming average weather. They anticipate more land in food crops and good management of feed supplies. They assume, too, that military and lend-lease requirements will be at least as great in 1944 as they have been this year.

PROTECT SOME FLOWERS BULBS BY USING MULCH

Bulbs of flowers such as tulips, narcissus, crocus, and Star of Bethlehem, which are planted in the fall, are quite hardy. However, a protecting mulch of straw or strawy manure may be beneficial, especially during an open winter.

L. C. Greve, Iowa State College extension horticulturist, recommends that the mulch be applied late, after the ground is frozen. The mulch must be loosened early in the spring and lifted when growth appears.

Crowding too many pigs into a tight shed encourages outbreaks of influenza. It's better to use an open front shed with deep, dry bedding.

Feeder calves or older cattle require rest after they are brought to the farm before being turned into a corn field or put on feed. They need feed and shelter for several days before the feeding schedule begins.

WEEKLY NEWS ANALYSIS

Formal Declaration of War by Italians Adds Impetus to Allied Drive on Rome; Heaviest Air Raids Blast Nazi Plants; Action Increases in Southwest Pacific

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

FORTRESS EUROPE: Hit From All Sides

Even as Allied forces crossed the swollen Volturno river under the cover of heavy artillery fire in southern Italy, hundreds of Flying Fortresses escorted by speedy Thunderbolt fighters delivered a hard blow at the Nazis' huge roller-bearing plant in Schweinfurt, Germany.

In crossing the Volturno, Allied forces chose to span the narrow river at its eastern point, where they began working northward toward the mountains overlooking the communication lines used by the Nazis to supply their embattled legions.

While the Germans held to the west flank of the river, they were brought under increasing pressure of Allied fire from land and sea. Hovering offshore, U. S. and British warships pumped big shells into German positions inland.

In blasting Schweinfurt's roller-bearing plant, a record number of 60 Flying Fortresses were reported missing. More than 100 of fighter planes upon which the Nazis are depending to check Allied air raids, were brought down by the raiders.

Italy Now on Own

Allied consideration toward Italy will be greatly influenced by the degree of assistance she lends British and U. S. armies in the war against Germany.

When Badoglio declared war on the Nazis, the Allies accepted his Italian government as a partner on the strength of its ability to help beat back the Germans and thus spare U. S. and British lives.

It was made clear, however, that Badoglio's regime, as it now is, would not be accepted as a political partner; and the Allies would only give Italy political recognition upon the formation of a liberal democratic government.

Because of Italy's weakened industrial and agricultural position, it was presumed that some sort of assistance, possibly through lend-lease, would have to be given her to equip and maintain her for fighting.

SUBSIDIES:

To Dairy Farmers

To offset the increased cost of feed, the government will pay subsidies ranging from 30 to 50 cents per hundredweight on whole milk sales, and from 4 to 6 cents a pound on butterfat.

Based on increased feed costs, the different rates were fixed to assist farmers who have to purchase more feed than formerly, with maximum payments going to farmers in drought counties where feed crops suffered damage.

Subsidies will be paid after farmers submit such satisfactory evidence as creamery statements as to the amount of milk or butterfat sold to their AAA county committee. In all, 3½ million dairy farmers are expected to qualify under the 60-million-dollar program.

The whole subsidy question appeared to be headed for a thorough going over again, with the house banking and currency committee advising congress to allow subsidy payments to producers only, and not to reduce retail food costs.

RUSSIA:

Battle Rages

The great battle for the Dnieper river raged.

With Russian forces across the river at several points, German troops fought desperately to prevent their organization for full scale encircling attacks, which would trap the Nazi armies from the rear.

Far to the south of the 750-mile front the Reds assaulted Nazi positions protecting their forces in the Crimea. Since the Germans held shortened defense lines in this sector, any Russian breakthrough would compel them to fall back to the Dnieper river and thus extend their battle front, or else trap at least 100,000 Nazis.

Standing behind prepared positions, the Germans bitterly resisted the Reds' repeated attacks on their northern lines guarding the Baltic states and old Poland.

SOUTHWEST PACIFIC: Strike Jap Air Posts

Now that Allied ground forces have driven the Japs from most of their Southwest Pacific outposts, Gen. Douglas MacArthur's command is concentrating on the elimination of all enemy air bases which might be

Gen. MacArthur: Blasts Rabaul.

used to harass further drives to the north toward the Philippines.

For this task, imaginative General MacArthur is using large air fleets. Hundreds of Liberator and Mitchell bombers poured 350 tons of bombs on Rabaul, leaving that important Japanese supply depot for their entire Southwest Pacific front, smoking in ruins.

After Rabaul, General MacArthur's bombers trained their sights on remaining Jap air bases in the Solomons, and with U. S. fighters, attacked the main airdromes from which the enemy has been raiding Allied posts to the south.

Southwest China Periled

Trying to seal off the back door of China, three strong Japanese columns drove toward Yunnan province's capital of Kunming.

The Japs attacked along the Burma road, which leads into China at the point of the enemy's new attack. Chinese forces bitterly resisted the Japs' drive, with the aid of the 14th U. S. air force, which pounded the invaders' gas and oil dumps and military installations.

With the Japs dominating much of the eastern coast of China, key to the entrance of the country lies in the southwestern section, known as Yunnan province. This section assumes important significance with talk of Allied plans of driving into China from Burma.

LABOR:

Lewis Back in AFL

John L. Lewis' United Mine Workers were welcomed back into the American Federation of Labor at its 63rd annual convention in Boston, with formal re-entrance delayed

William Green: For Lewis.

until settlement of disputes between certain AFL unions and the UMW's District 50, which organized in their fields.

Once ridiculed by Lewis as an "Old Lady," AFL President William Green swallowed his pride and, pleading for unity in labor, led the fight for the UMW's re-admission against opposition from the floor of the convention, mustered by the Progressive Miners Union, which stayed in the AFL when the UMW bolted it in 1935.

Re-entrance of Lewis' 700,000 miners into the AFL will boost the organization's total membership well over the seven-million mark.

Confederate General's Widow Aids Uncle Sam

Widow of the famous Confederate general of the Civil war, Mrs. Helen Dortch Longstreet is learning riveting in Georgia so that she might take her place in a production line to help Uncle Sam win World War II.

Refusing to disclose her age, gray-haired Mrs. Longstreet resides in a trailer camp outside of Marietta, Ga., and reports for instruction each morning in slacks.

Since the general's death in 1904, Mrs. Longstreet has worked as a newspaper reporter, postmistress in Gainesville, Ga., and an employee in the veterans bureau in Washington, D. C.

INDIA:

Famine Relief

To relieve famine conditions which reached their worst peak in Bengal province, the central government of India placed a ban on the export of all grain from the stricken country.

At the same time, officials said every effort was being made to obtain more shipping for importation of food. However, it was said that India's famine was of such proportion that imports alone could not entirely appease the hunger.

Worst conditions existed in Bengal province, where scarcity of rice was aggravated by the high prices being asked for the staple despite the low level of the populace's income.

Government purchase of the entire rice crop and resale was seen as partial solution to the famine problem.

RECOVERY:

Would Use Old Models

In order to speed reconversion to civilian goods after the war, War Production board officials have suggested manufacture of 1942 models with tools already available.

If plans were made for the production of new models, in the automobile industry for instance, WPB officials said at least 18 months might be required for retooling.

WPB could enforce manufacture of 1942 models, it was said, if it retained its control over the allotment of materials. Such control would be lifted when industries would be on the way toward development of new models during the ordinary course of production.

SALARIES:

U. S.'s Highest

Highest salaried official in the U. S. in 1941 was Hollywood executive Louis B. Mayer, who drew \$949,765 from Loew's, Inc. Second highest was C. G. Swelbilus, who received \$631,809 from the management and engineering firm of the Dixwell corporation.

Third highest was Eugene Grace, who was paid \$537,724 by the Bethlehem Steel corporation. Movie stars were high on the list of the top-salaried. Claudette Colbert drew \$390,000 from Paramount and Twentieth Century Fox; Ginger Rogers received \$355,000 from RKO and Twentieth Century, and Charles Boyer was paid \$350,000 from Paramount, Universal and Warner.

On the basis of tax rates applying to 1941 rates, \$654,554 would be paid on a million dollar salary; \$307,084 on \$500,000, and \$108,174 on \$200,000.

Movie stars were high on the list of the top-salaried. Claudette Colbert drew \$390,000 from Paramount and Twentieth Century Fox; Ginger Rogers received \$355,000 from RKO and Twentieth Century, and Charles Boyer was paid \$350,000 from Paramount, Universal and Warner.

POSTWAR:

Peace Plans

To prevent future aggression and to preserve the peace of the world, a senate subcommittee proposed that the United States act through constitutional processes to join with free and sovereign nations in the establishment and maintenance of international authority.

The subcommittee's proposal was considered as a likely compromise between advocates of broad participation in international plans for preserving world peace, and advocates of limited participation, who have insisted on U. S. freedom to decide her action on any particular measure for maintaining order.

The subcommittee's proposal was little different from the Fulbright resolution adopted by the house, calling for the "... creation of appropriate international machinery with power adequate to establish and maintain a just and lasting peace and as favoring participation of the U. S. therein through its constitutional processes."

LIVING COSTS:

Up 6%

It costs about 6 per cent more to live this year than last, according to a survey released by the department of commerce. In the first six months of the year living expenses rose about 7 per cent above 1942, but in July a decline was recorded for the first time since the war began. By August the level dropped to slightly less than 6 per cent over last year. A slight rise during the autumn and winter months will not affect the overall picture.

Washington, D. C.

AXIS MORALE IS CRACKING

Military reports that have leaked out of Germany in the past two or three weeks indicate quite definitely that Nazi morale is cracking. These reports, through channels which cannot be revealed, were quite definite even before Propaganda Minister Goebbels delivered his give-away speech warning that saboteurs on the home front would be beheaded.

Reports also are definite that the German army no longer has the reserves, no longer has the fighting backbone for a long war. Resentment against Hitler boils beneath the surface in the German army. German soldiers will keep on fighting, and are toughly trained, desperately hitting adversaries. But their heart isn't in it anymore.

All these factors, plus powerful wallows by the Allies, have created an atmosphere in which anything might happen. It is an atmosphere not unlike that which existed in the autumn of 1918. There are those in high places who think the war in Europe might be over anytime this winter, depending entirely on Nazi morale.

But in Asia the war is moving at a snail's pace. In Burma, though the rains are already over, nothing has happened. Many observers think that nothing will happen until late this winter, and that the real drive through Burma toward South China will be reserved for a year from now—the fall of 1944.

WILL ROGERS IN LONDON

Congressman Will Rogers of California, son of the cowboy humorist, came back from London singing the praises of American-British co-operation in England.

American troops, which he described as the new "Army of Occupation," live off the fat of the land and are treated royally by the British. There is nothing too good for them. Only trouble is they occasionally take a girl away from a British Tommy.

Will's father was a frequent visitor in London, and everyone remembered him. So it was like old home week for the young congressman from California.

BRITISH IDLE OIL

Maine's eagle-eyed Senator Brewster met Gen. B. B. Somervell, chief of the army's service forces on the Pacific island of Fiji, immediately tackled him on the dynamite-laden, all-important question of why the U.S.A. was supplying nearly 70 per cent of all Allied oil, though we have only 25 per cent of the world's oil reserves.

"Right around the Persian Gulf," reminded Senator Brewster, "the British have oil refineries and limitless quantities of oil. Why don't we get more oil out of the Near East instead of hauling it all the way from Texas?"

"We are rushing refining equipment to Arabia as quickly as we can," replied General Somervell.

"Yes," countered the senator from Maine, "but why use precious shipping space carting refining equipment half way around the world when the British already have a refinery at the Gulf of Persia. The manager of the Anglo-Persian oil company told us that his refinery could produce 60 per cent more oil. Why not put it to work instead of exhausting our own oil reserves?"

"Furthermore," Brewster continued, "the crude oil from Persian wells is so good that it can be pumped right into ships as bunker oil without refining. If we don't get busy and use it, we'll wake up after the war to find the United States with no oil left, and dependent on the British Empire."

CABOOSE SLEEPERS

Cornfed Senator Ed Johnson of Colorado got his start as a railroad telegrapher, still proudly carries a union card. So he was well qualified to preside over the War Mobilization committee when A. F. Whitney, president of the Brotherhood of Railroad Trainmen, testified on manpower and other railroad problems.

Whitney objected to the policy of some railroads in refusing to let train crews sleep in idle cabooses. Trainmen away from home frequently can't get hotel accommodations, but railroad officials argue that it is unsanitary and also dangerous for them to sleep in "cabs," which sometimes have to be switched.

"When I was a working trainman, we always lived in our cabooses," Whitney said, "not because rooms were not available at hotels, but because it was more convenient."

"Many's the time I have slept in cabooses myself," reminisced Johnson.

MERRY-GO-ROUND

American doughboys in Iran have found a good way to dodge U. S. military police and get out of camp at night. They take advantage of the Mohammedan custom of veiling their women, and slip on a full-length, cover-all veil which Iranian women wear from head to toe. Military police have been instructed to protect Iranian women and prevent all flirting, so they don't dare stop a veiled figure to ask her (or him) to lower the veil, and see whether an American doughboy is behind it.

Destruction of Hamburg

By Walter Taub

(WNU Feature—Through special arrangement with Collier's Weekly)

Four hundred refugees from Hamburg are now in Sweden, eyewitnesses of the greatest havoc that ever smote any human settlement. The first attack on Hamburg was delivered on the night of July 24. The attack was concentrated against anti-aircraft batteries, with excellent results. Most of the batteries were silenced in a few minutes.

Then, say these eyewitnesses, came an absolute novelty in the history of bombing—bearing witness to the scientific care devoted to planning the attack. Special reconnaissance planes appeared over the city, picking out certain industrially important sections with green flares dropped by parachutes.

These flares hovered like bunches of grapes in the air and aided the bombers coming in afterward to drop their explosives in a square around the section thus marked, so that buildings for whole blocks collapsed and all roads and communications between that section and the remainder of the city were choked off.

This was not done to prevent the inhabitants from getting out, but to hinder the transfer of firemen and fire-fighting apparatus from other sections in the effort to save war-important buildings and their contents.

When communications were thus closed, there began a rain of incendiaries that spread fires over such a large area that practically the whole section was drowned in flames. The work of air defense on this and the following nights was enormously hampered by this simple but effective means which, as far as I know, was applied here for the first time.

'Dazzling Paper' Dropped.

Mrs. Anna Johansson, a refugee in Malmoe, refers also to "sheets of paper, black on one side and dazzling silver on the other, dropped by thousands from the bombers." Twenty-five other Hamburg Swedes attest to the correctness of her statement. Air-defense searchlight beams were reflected all ways from these sheets, thus being prevented from reaching the raiding aircraft with full intensity and making the job of locating them much more difficult.

The first assault was directed at the inner town. The free port, covering an area of more than 3,500 acres, naturally was not spared during this 90-minute attack, but not until the next raid on Sunday, a day later, was the most devastating blow directed at this pride of Hamburg.

That Sunday, Hamburg displayed an unusual appearance. Even in the forenoon, giant clouds of smoke and dust enveloped the whole town, darkening the sky.

Then the sirens screamed, and a big formation of American bombers reduced to ashes the continent's biggest shipyards.

These were the plants of Blohm and Voss, Vulkanwerft and Howaldts-werft—where the biggest steamers are built, repaired and docked.

Monday night, during the fresh British attack, the big gas plant in the harbor section received a direct hit. That terrible explosion deprived the city of gas.

RAF Keeps Promise.

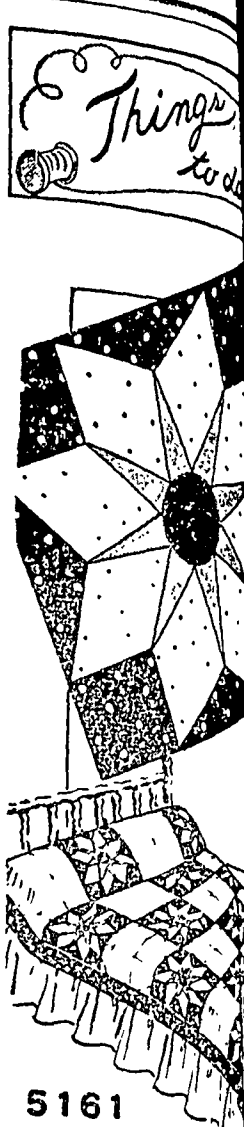

That evening, none among Hamburg's 1,700,000 inhabitants was willing to retire to bed, for the RAF had dropped leaflets promising a repetition of Sunday's raid on Tuesday. Hamburgers, from whom Hitler was once compelled to admit he had received the most "no" votes, always listen to the British radio and they know, therefore, that "the British keep their promises."

On Tuesday morning at 11:30, the few remaining sirens screamed. The attack began at 12:30. The raid lasted only half an hour, but it sufficed to convert Hamburg into a veritable sea of fire. With the central mains destroyed, hundreds of thousands of those leaving the shelters would have given a fortune for a glass of water. The heat was unbearable, in a wind storm like a typhoon. The giant bonfire resulted in a rapid consumption of oxygen. Terrible fire storms resulted in areas where a few minutes earlier complete calm had prevailed.

Wednesday morning, the city like a mass of fire lay in ruins and ashes. Sections housing 300,000 people were razed to the ground.

The main railroad station, Saint Georg, was a terrible sight on Wednesday, with charred railroad cars on sidings and unrecognizably smashed automobiles.

A Swedish girl saw people blazing into water—but the phosphorus burned there equally well. Lime was strewn on the corpses scattered about the streets, and the odor of death lay heavy over the whole town.

Sunflower Quilt

THE "Sunflower" is one of the easiest of the quilt kits to make—the diamond-shaped blocks are easy to cut and a block up quickly. Use brown, black, yellow, calicoes, grass-green, leaf-green cottons. Do the blocks, each 14 inches square, plain blocks.

To obtain cutting patterns, piecing and finishing directions of all materials specified, send in coins, your name and address to pattern number HOME NEEDLEWORK 530 South Wells St.

Do you know the new regular on packages sent to men in service?

Here they are. We send packages to soldiers where in the U. S., although are now Post Office restricted packages to overseas Army, and you can send packages in the Navy, Coast Guard, Marines, wherever they are, when you send that package home, remember—the gifts the service always appreciates. And the favorite men in the Army, Navy, Guard, and Marines is (based on actual sales records) Post Exchanges and Canteens. So stop in at your local today—and mail him a care. Camels.—Adv.

Relief At Last For Your Cough

Tell your druggist for a bottle of Creomulsion with the understanding you must like the results quickly allays the cough or you to have your money back. CREOMULSION for Coughs, Chest Colds, Bronchitis.

Soldier Benedicts One-third of the men in the army today are married.

SNAPPY FACTS ABOUT RUBBER

In the 45 years between 1849 and 1934, the output of rubber produced by the Far East plantations jumped from half a ton to 98 per cent of the world's supply—1,000,000 tons. The first official record, that for 1899, shows that four tons of rubber were produced from 4000 acres under cultivation.

The greatest enemies to the life of natural rubber are sunlight, heat, oils, greases and solvents. The ultra-violet rays of the sun penetrate the surface of rubber, causing it to oxidize; heat causes deterioration, and oils develop sweats and softening, making the rubber more susceptible to damage.

The war on rubber

FIRST IN RUBBER

HIGHLIGHTS . . . in the week's news

BASEBALL: It is reasonably certain that major league baseball will continue to be played in the 1944 season, club presidents agree. There are between 30 and 40 players in the two leagues who have been rejected by the armed forces on physical grounds, and several others are over 38. With this nucleus, it is expected that satisfactory teams can be organized.

CHECKS: A million checks every working day, or 300 million a year, will soon be the rate of issue of the federal government, according to W. A. Julian, treasurer of the government. He explained that payments to families of service men account for the huge number of small checks. Expenditures are now running around seven and a half billion dollars a month, he said.

Plow Is NOT the Enemy of the Farmer, Says a Noted Agronomist, Who Replies to That Charge in a Recently Published Book

SCOTT WATSON
Western Newspaper Union.

Plow the arch-villain tragedy of soil erosion American agricultural billion dollars a year the loss of precious phosphorus and potash nation's farms? Or is mankind's traditional? Will the plow become an obsolete and a museum piece, continue to be one of main reliances?

ns, especially farmers, learned to "revere the who read the book "Plow" written by Edward H. and published recently by city of Oklahoma Press, articles in the newspaper upon that book, no doubt led when Mr. Faulkner that the plow was an enemy than a friend of agriculture. But the old saying about "two sides to every question" proved true again, for no authority than Dr. William H. Albrecht, head of the soils department of the University of Minnesota, comes forward to defend and to offer a rebuttal to Mr. Faulkner's charges against it. He acknowledges that the silt loam soil areas in the United States have, in the past, been too much. As a result, rainfall in these regions has washed away priceless soil. But he says, "to plow or not to plow cannot be answered 'yes' or 'no' as it is safe to make hasty decisions in any other respect dealing with this subject. The whole question lies in the climatic conditions of the particular region involved."

eed to plow less on some land, conversely, we need more—and deeper—on other. asserts Dr. Albrecht. He adds to learn that the degree of soil development according to climatic conditions are factors in determining how important the plow

man's Folly," Mr. Faulkner says that the moldboard plow is the least satisfactory implement for the preparation of the land for the production of crops. The truth is that no one has ever advanced a scientific argument for plowing. Moreover, he says the plow is responsible for soil erosion, the sour soils, the floods, the lowering water table, the vanishing wild life, the and impervious soil surface that have harassed Americans for a generation.

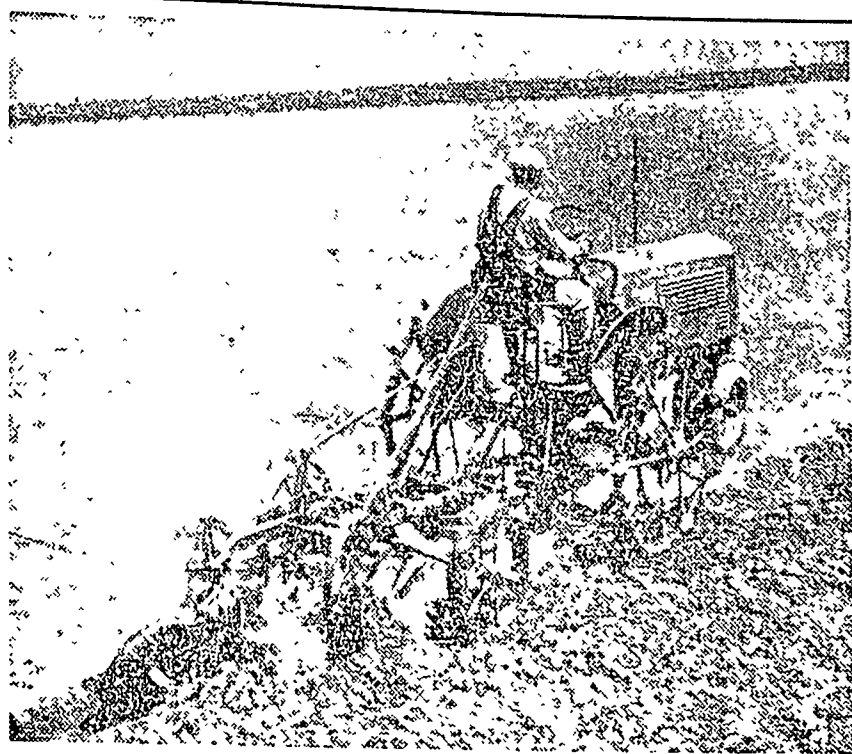

ere the University of Minnesota disagrees. He holds that the average farmer is a scientific answer to the question "Why plow?" the men of science can provide plenty of valid reasons for doing so. High on his list is the fact that this supplies the soil with oxygen which helps transform its chemical components into usable plant food.

Aerating the Soil. A microbiologist will testify that plowing aerates the soil," he says. As a consequence of the plow, there is new life in the soil and of the stirring by the moldboard, there is new life.

soil is a factory in which carbon is expended. Tons of carbon are burned to form carbon dioxide. Sulphur is oxidized into sulphuric acid. Ammonia is changed into nitric acid. Other similar combustions are taking place.

acres corn field under maximum plowing activity in July burns up about as much carbon as the engine in running a 40-horsepower automobile in order to form carbon dioxide. Can anyone deny the value of air for such a performance? Surely no one would close his eyes by refusing to plow and destroy such crop producing

burning business in the soil. The oxygen from the air goes on, if the plant nutrients in chemical combination with carbon are to be released for use by other plants that are growing. Were this performance not being in the soil, life on the earth would soon become extinct. The productive power would be expended. As a result, the

Plowing scenes such as this will not soon vanish from the American scene, says a noted agronomist who refutes the charges in a recently published book that the plow is the enemy of agriculture.

soil could offer nothing and no growth could occur."

Plowing has the further scientific value of helping the soil supply a larger amount of soluble nitrogen for growing crops than would otherwise be available, according to Dr. Albrecht. Studies of the nitrate supply in soil planted to corn forcefully support this finding.

Tests were made on three adjoining plots planted to corn. One plot was unplowed. The second was plowed. The third was both plowed and cultivated. The soluble nitrogen supply in the plot that was plowed and cultivated was at least 30 per cent greater than in the unplowed tract. In the plowed tract it was between 25 and 30 per cent greater.

"Crop yields correspond to the level of these nitrate supplies," says Dr. Albrecht. "The farmer may not know that these higher levels of nitrate are responsible for his improved crop yield. Nor may he understand that they are the result of his making the soil 'turn turtle' with his plow. He simply plows ahead of the corn to get a better crop. His inability to point out the underlying scientific channels through which the effects of plowing are transmitted to the crop, does not put the plow into bad repute in his eyes."

"Surely the hundreds of thousands of corn producers will not suddenly discard so ancient an implement merely because they cannot call to

DR. WILLIAM A. ALBRECHT

their aid scientific evidence, when someone concludes for them that the plow is the cause of increased erosion and other devastation that is so easily associated with it."

Villains of Erosion.

To Mr. Faulkner's charge that plowing is solely responsible for erosion, Dr. Albrecht counters with the assertion that the real villains are continuous cropping and the steady removal of plant food elements year after year without any effort to replenish the soil's resources of nitrogen, phosphorus and potash.

"It is true that plowing and cropping a soil year after year bring with them declining crop yields," he says. "For these one might readily pounce upon the plow as the culprit in the case. But the fact is that declining crop yields have other causes than merely the plowing operation. They cannot be explained away by the simple belief that 'the explosive separation of the soil mass wrecks all capillary connections temporarily'; and that 'the organic matter sandwiched in further ex-

tends the period of sterility of the soil due to dryness.' Crops are not declining or failing because plowing is drying out the soil."

"The forces that turn plowed land into bare, eroded fields are not the moldboard plow and the horses or tractor that pull it. They are the continued removal of soil fertility with little or no return of needed plant foods. Plowing is not the cause of the depletion of the fertility supply. Depletion occurs because of the fertility removed when the crop is hauled off to market. The plow is not the exploiter; rather it is the farmer. The plow is merely the tool that facilitates his exploitation at a faster rate and over more acres than before the plow was given him. The plow has helped him feed many of us too far removed from the land to appreciate its exploitation."

In urging that the plow be junked as an agricultural implement, Mr. Faulkner's book advocated the use of the disc harrow as a means of producing more and better crops, because it would incorporate crop residues, green manures and organic matter into the top soil. To this suggestion Dr. Albrecht had the following to say:

"The author of 'Plowman's Folly' condemns the plow because it inverts completely the upper portion of the soil profile. In its place, however, he advocates the use of the disk harrow which carries out a similar process, differing only in degree."

To Mr. Faulkner's contention that crop residues or organic matter from plants allowed to grow of their own accord should be incorporated into the top soil without the addition of manure, lime or other fertilizers, Dr. Albrecht replies:

"Such a proposal does not take into account differences in vegetation in type or quality. Weeds or forest trees as ancient as the sequoias are taken on a par in the 'Plowman's Folly' thesis with legumes as soil rejuvenating agencies. The author cites 'every wooded country' as a perfect example of soil maintenance, but neglects to mention the low level of fertility and the difficulty involved in maintaining life."

Mr. Faulkner's belief, that the prevalence of wild life on the western plains was due to the fact that this region was unplowed, comes in for some critical analysis, also. Dr. Albrecht points out that the unplowed wooded areas of New England which our Puritan ancestors first settled, supported only a few wild turkeys and squirrels.

In further refutation of the contention in "Plowman's Folly" that "principles which are valid in the forest are valid in the field," Dr. Albrecht asserts:

"In view of the fact that the soils differ as widely as they do under forest and under prairie, we surely cannot subscribe to the belief that all 'principles valid for the forest are valid for the fields.'"

Summarizing his views on the entire subject, Dr. Albrecht concludes: "The indictment of the plow by the book 'Plowman's Folly' will not stand against the facts of science nor the judgment of experienced farmers. This publication will fall far short of helping us to realize that 'the Garden of Eden, almost literally, lies under our feet almost anywhere on earth we care to step,' provided we allow vegetation to grow and we cling to the disk harrow as a means of turning it over rather than to the moldboard plow."

Plowing Is Useful in Keeping Up Fertility of Old Forest Lands

ceive every possible help to encourage rapid release of the essential mineral nutrients from the meager stock of organic matter within them. Such soils will produce a woody vegetation—whether tree or farm crop—unless they are plowed and stirred to increase the rate of decomposition within the soil of residues of plant generations gone before, or are treated by fertility boosters in the form of chemical fertilizers and other manures."

The Private Papers
Of a Cub Reporter:

The Cafe Society Uptown proprietor, who is so proud of the murals there, said to Mike Romanoff: "Prince, who did the decoration of your restaurant on the coast?" "Decorated?" replied Mike. "I am the decoration!"

"Yes, I know that," was the retort delightful, "but who did the interior that pales into insignificance when you are not around to give it a glow?"

Betty Smith, whose first novel, "A Tree Grows in Brooklyn," is a best seller, will soon be a grandmaw, and she's practically a girl herself. Last Laff Dep't: A West Coast biggie withdrew his 25 per cent interest in "Laugh Time," the hit, at the last moment. The show is making nothing but money.

When Mountbatten was in Washington recently they say he had a session with Admiral King, who graciously said: "If there is anything you want, you may have it. Just name it." The Admiral, of course, was speaking of ships, etc. . . . Mountbatten replied: "There's just one request. I hope you will grant me a favor." "What is it?" asked Admiral King. "I would like," said his Lordship, "a top button from your tunic." . . . King seemed puzzled. Mountbatten continued: "You see, I have General Arnold's wings and General Marshall's top button, and I am certain that with yours we will have good luck. Nothing, sir, can then happen to us."

"Salt Lake City, Utah, Oct. 3: Walter Winchell, New York City: Thought probably the politicians in Washington who are endeavoring to speak for the young men of America would be interested in the following resolution: Whereas: We the Utah State Junior Chamber of Commerce represent a cross section of the young married men of draft age in Utah. And Whereas we fully realize our responsibilities to our country in this time of war.

"And Whereas: Acts and statements made by misinformed persons have created the false impression that draft age fathers wish special consideration from the selective service system on a dependency basis notwithstanding military requirements. Be it resolved: By the Utah State Junior Chamber of Commerce, in State Board meeting assembled this third day of October, 1943, that we urge the defeat of all legislation which attempts to defer heads of families on the basis of dependency only and reaffirm the fact that we have been and are ready and willing to answer the call to arms if and when we are summoned.—Pres., Provo Jr. C. of C., Provo, Utah."

Now that children no longer automatically become American citizens when their parents are naturalized, the 11-year-old daughter of Gerhart Seger, former member of the Reichstag, was up before the immigration and naturalization examiner . . . The child, who has lived most of her 11 years in the U. S., was asked the usual questions: "Have you ever been a member of the German-American Bund?" "Do you favor anarchy?" et cetera. The child looked a little confused for a moment and then, smiling, said: "Oh, a quiz program!" . . . Whereupon the examiner stamped her papers and replied: "You don't want to become an American—you are one!"

The Eyebrow Raiser of the Week:

Common Sense magazine's editor appeals for subscriptions from Americans to "repair any damage" we may do to Tokyo and Berlin . . . Editor A. M. Bingham says a group of vigorous thinkers and famous writers will contribute articles to that end. They include: Pearl Buck, Stuart Chase, Thomas Mann, Quincy Howe, Lin Yu-tang and John Haynes Holmes. "Tokyo may soon be destroyed," says Mr. Bingham. "The world's third largest city will not be pocked with areas of destruction like stone and steel-built London and Berlin. It will be literally gutted and 7,000,000 human beings will be homeless. To rebuild Tokyo, however, and Berlin and Essen . . . will require real statesmanship and an application of genuine democracy. Are you ready to help do it, or shall we crucify democracy on the cross of hate?"

We just want to know one thing before we send in our check . . . What kind of monument will mark the spot in Tokyo where our fliers were beheaded?

Next to the war, the problems of the nation's "Harlems" are uppermost in the President's mind. And some of the Washington big guns, who consider it a small problem, will soon find it one of their own largest headaches . . . England will accept the Beveridge Plan after the war . . . One for Ripley While they are commonplace in Good Housekeeping, Ladies' Home Journal and the Satepost, etc., True Confessions mag does not allow articles about suicides or divorces between its covers.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for November 7

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

THE SACREDNESS OF HUMAN LIFE

LESSON TEXT—Exodus 20 13; Matthew 5 21-26, 30-45
GOLDEN TEXT—Whosoever hateth his brother is a murderer.—I John 3 15.

Human life is sacred—and there is a very important reason why that is true. It is not because of any law of man, but finds its foundation in the fact that God created man in His own likeness and image. Because that is true, no man has any right to take the life of another for any cause except at the direct command of God. Only by the orderly process of law for the protection of society and in accordance with the Word of God may there be any such action by man toward man.

Both of these truths are declared in Scripture in God's covenant with Noah (Gen 9:5, 6), which was made possibly a thousand years before the Ten Commandments were given to Moses.

One cannot deny that human life is held rather cheaply in many places today. War helps to create that attitude on the part of nations which makes them count boys and girls, yes, mere babies, as "war material."

But not only in war is life carelessly destroyed. We decry the "slaughter of innocents" on the highway, unnecessary death in industry, yes, even in the home.

I. The Prohibition of Murder (Exod. 20:13)

The word "kill" in this commandment is one which means a violent and unauthorized taking of life, and is therefore more properly translated "murder."

Not all killing is murder. A man may kill another entirely accidentally, or he may be the duly constituted legal officer carrying out the law of the land in taking the life of one who has forfeited his right to live because he has slain another.

There is also the right of self-defense, be it individual or collective as in war. But these are the only exceptions; let us not attempt to justify any other.

Murder is more prevalent than most of us suppose. Some years ago we were told that there was a murder every forty minutes in our land. With the general increase of crime, and of drunkenness (which so often incites murder), the current figures would probably show an increase.

Do not forget the deaths, the destruction of life, by avoidable automobile accidents. Some of these were really murder because the one responsible drove with defective brakes, dangerous tires, or while he was intoxicated. Add to these the deaths in industry caused by failure to provide proper safeguards or healthy working conditions, and by the exploitation of child labor, and we say that we should cry aloud, "Thou shalt do no murder."

II. The Provocation to Murder (Matt. 5:21, 22)

Murder finds its provoking cause in the heart of man. Our Lord was concerned about correcting the desires rather than to apprehend the offender after the act had been committed. It is the better way, and the more effective one.

In this matter of murder, Jesus cut right through the outward aspects of the matter and pointed out that an angry hatred in the heart is the root of all murder. If we hate, we have murder in our hearts. Circumstances may hinder its fulfillment, but the danger is always there until we remove the cause.

Just being angry—calling our brother "raca" (the modern equivalent of which is "nobody there"), and calling him "thou fool," which classifies him as "morally worthless"—these are the three dreadful downward steps to murder. And they begin in anger.

May God help those of us who have strong feelings that we may not yield them to the devil in such anger against our brother!

III. The Prevention of Murder (Matt. 5:23-26, 38-45)

Prevention with God means more than putting up a barrier to keep us from killing. He deals with the heart, and thus puts the whole life right. It is not even a question of how we may feel against our brother. If he has sinned against us we are to do all we can to win him. He may be unreasonable, grasping, and unfair. However, the spirit that will win him is not that of retaliation or sullen submission to the inevitable, but rather a free and willing going even beyond what is required.

It is clear from other scriptures that our Lord does not mean that wicked and unscrupulous men are to be permitted to defraud and destroy God's people. At the same time, we must be careful not to explain away the heart of our Lord's interpretation of this great commandment.

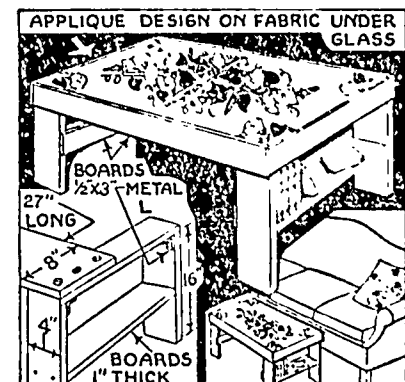

We who believe in Christ are to be in deed as well as word the sons of our heavenly Father (v. 45), loving not only those who are kind to us, but even our enemies.

ON THE HOME FRONT

With RUTH WYETH SPEARS

IT ALL started with a bright idea for making a painted coffee table out of odds and ends of lumber. The sketch gives dimensions and shows the simple construction used to make the frame reinforced by useful shelves at the ends. So far the table was substantial but crude and that is where the lady with the needle came in.

The table was to be painted cream color and then waxed. She bought a yard of slightly darker

tan sateen and appliqued a design of blue and red morning glories with green leaves on it. This was placed over the top of the table and tacked around the edge. A piece of glass was cut to fit and the finishing boards were then screwed around the sides. Any interesting fabric could be used under the glass of the table top, or bright flower prints or a map would give a good effect.

NOTE—Mrs. Spears has prepared a sheet—17 by 22 inches—giving complete dimensions and detailed directions for cutting and assembling this table; also list of exact amounts of material needed. The inexperienced person can follow these directions with the assurance of perfect results. Send 15 cents for Pattern No. 254 to:

This Rookie Hadn't Heard Of Any Ruminant Admirals

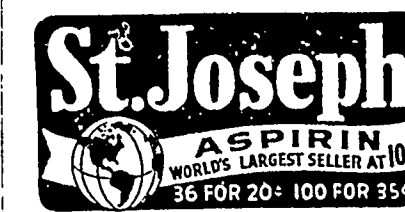

A young candidate for the navy was being put through a general knowledge test by a board of admirals.

"What kind of animals eat grass?" one of them asked.

The candidate fidgeted and stared out of the window, but said nothing. The question was repeated but he still remained dumb.

"Surely," said one of the examiners, kindly, "you can answer a simple question like that? I will repeat it. What kind of animals eat grass?"

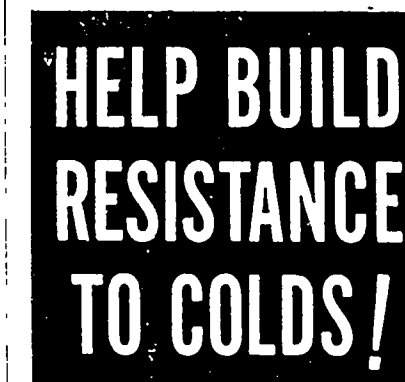

"Animals!" gasped the boy. "Why, I thought you were saying 'admirals.'"

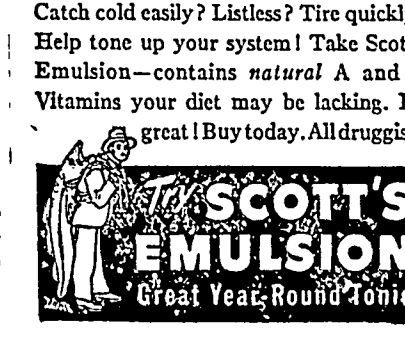

Height of Dust Storms
Dust storms have been recorded as reaching to a height of three miles in the United States.

Advice To Mothers

Don't compel your baby to take nourishment through a hard, stiff nipple. Baby's refusal to take a sufficient quantity of food may be traceable to this unnatural effort. The Faultless No. 10 Wonder Nipple of highest quality translucent rubber is soft, pliable and resilient. It provides for effortless feeding. Triple-perforated. Ships on bottle easily and anchors firmly. Fits all standard narrow mouth nursing bottles. Withstands repeated sterilizing. 3 for 18c at all drug stores.—Adv.

Take good-tasting tonic many doctors recommend
Catch cold easily? Listless? Tire quickly? Help tone up your system! Take Scott's Emulsion—contains natural A and D Vitamins your diet may be lacking. It's a great! Buy today. All druggists.

The Klemme Cooperative Grain Company installed a new electric moisture testing machine Monday. Where formerly it took from 20 minutes to a half hour to test a sample of grain for moisture content, the task can now be done in one or two minutes. It is a nice improvement to their equipment.

LEPPO WESSELS SUFFERS FRACTURE OF ARM

Mrs Leppo Wessels was at Clarion last week assisting her husband with his bowling alley business.

Mr Wessels has a fractured arm, which handicaps him in looking after his business. Mr. Wessels injured his arm several weeks ago while doing some carpentering at Klemme, and about two weeks ago the arm gave him considerable discomfort and it was then that an examination revealed a fracture at the elbow and the bone was set by a physician. He is now getting along quite well.

HARVEST 47 ACRES OF CORN IN ONLY FIVE HOURS

Mayor Irla Langlitz and Harvey Boller of Goodell solicited equipment and labor and went to the Paul Kemp farm Saturday to husk corn.

Seven power huskers, 20 tractors and 35 men went into the field of 47 acres at 8 a. m. and by 1 p. m. the corn was all cribbed. Several women were on hand and helped Mrs Kemp serve a delicious dinner.

Mr Kemp is a patient in the Colonial hospital in Rochester, Minn., recovering from a major stomach operation.

U-DELT-EM BRIDGE CLUB MET THURSDAY

Mrs R. A Jorgenson was hostess to the U-Delt-Em bridge club last Thursday afternoon.

Out of town guests were Mrs. A. H Dulmes of Grundy Center; Mrs. Asa Arnold of Traer; Mrs Albert Kingery of Seneca and Mrs. Earl Schaffer of Forest City.

High score was won by Mrs. Kingery, second high by Mrs. Fred J Arnold, and third high by Mrs. George Lawhorn.

A light lunch was served by the hostess after the games.

RAINBOW IN NORTH

Storm Lake residents are wondering what significance a rainbow in the north might have. One day recently a rainbow was discovered at 1:30 p. m. At first it was thought that it was a daylight Northern light effect but investigation disclosed that it was caused by the sun in the south shining through the rain.

Klemme and Vicinity

DRS. COLBY & HAYDEN, DEN- TISTS, FOREST CITY, IOWA. OF- FICE PHONE 374, RES. 169. to

R. A. Jorgenson was at Britt on business Friday forenoon.

Mr. and Mrs. Ira Overholt were Mason City visitors Friday after- noon.

Mr. and Mrs. H. D. Ramsay and children were dinner guests with friends at Webster City, Sunday.

Mrs. Gretchen Schlawin is re- ported to be very ill at this writ- ing.

Grandma Caroline Schlawin is visiting with her son, Rhine and family on the farm near Hayfield.

Elmer and Paul Wessels visited Sunday with their mother, Mrs. L. Wessels here.

Mrs. Alfred Merkel and Mrs Peter Merkel were visiting friends at Rockwell last Thursday.

Mrs. A. H. Dulmes returned to Grundy Center Sunday after visit- ing for a week with old Klemme friends.

Mr and Mrs. Walter Merkel and family of Des Moines were visitors at the homes of Mrs Peter Merkel and Frank Sandry Sunday.

Mrs. Benn Coobs and daughter, Peggy, and son Melvin; Mrs John Clements and Mrs J C Thomas were Forest City visitors today.

Mrs. Lepo Wessels was a din- ner guest at the home of Mr and Mrs. Ira Overholt Saturday even- ing. Pheasant was enjoyed.

Dr and Mrs L. R. Parsons and Miss Agnes Eli of Belmond were dinner guests Sunday at the home of Dr. and Mrs. W. F. Missman.

The several Schoenewetter fami- lies of this community were enter- tained to dinner Sunday at the home of Mr. and Mrs Henry Lude- ke near Meservey.

Mrs. Fred Wesendorf of Buffalo Center came Monday for a visit at the home of her son-in-law and daughter, Mr and Mrs. Donald Neuberger and family.

Mrs. Gerald Koerner, Mrs. John Clements, Mrs. Lee Ridder, Mrs Elmer Beier and Mrs. Glen Brid- ges were Mason City visitors Mon- day.

Mr and Mrs. Otto Smid arrived in Klemme Saturday from San Francisco, California where Mr Smid has been working in a ship yard for several months.

Supt. and Mrs. A. L. Kingery of the Seneca Consolidated School, visited with Klemme friends last Thursday and Friday. The Seneca School had a corn-picking vacation last week.

Mr and Mrs George Wesles and children, Raymond, Richard, Donald, Robert, Marlyn and Phyll- is, of Kansas, were visitors at the Lepo Wessels home Sunday after- noon.

Mrs Edna Thada was a dinner guest Thursday evening at a din- ner and bridge party given by Mrs Fern Peck Katter and Mrs. Nell Hanson at Garner. Cards were played after the dinner.

The Times received a card last Thursday from Capt. Glen Bowles which gave his A. P. O. number. This would indicate that our form- er high school coach is slated for over-seas duty.

Pvt. and Mrs. Alvin Bachman arrived home for a few days fur- lough. Pvt. Bachman expects to go over seas soon and Mrs. Bachman will return to her home in Kana- wha when he leaves for camp.

Mr. and Mrs. Herman Coobs and Mr. and Mrs. Trenkler of McGreg- or, and Mr. and Mrs. Wayne Pavey and daughter Carol Ann of Web- ster City, were guests at the Benn Coobs and Wallace Pavey homes Sunday.

Mr. and Mrs. Art Kudje, accom- panied by Mrs. A. H. Dulmes of Grundy Center, and Mrs Earl G Schaefer of Forest City, drove to Wesley Thursday evening where they enjoyed dinner at the home of Dr. and Mrs. R. R. Raney.

Buy another War Bond today.

The following item was intend- ed for last week but got mislaid: Mr. and Mrs. Dale Scheli returned Sunday evening after spending the week end in Des Moines visiting with Mrs. Scheli's sister who is in the hospital there.

Norman Lau, A. M. 2-c arrived Saturday from the naval base at Norfolk, Virginia for a short visit over Sunday with his parents Mr. and Mrs. August Lau in Liberty township. Norman left for Water- loo, Monday, where he will visit with his sister before returning to Norfolk.

Pvt. Melvin Coobs arrived home Tuesday morning from camp to en- joy a few days furlough visiting with his parents, Mr. and Mrs Benn Coobs. Melvin is being transferred to an army school at Lake Forest, Illinois where he will receive special training.

Mr and Mrs R. A. Jorgenson were dinner guests Sunday at the Joe Liebendorfer home at Hamp- ton. Other guests were Mr. and Mrs Lyle Liebendorfer of Forest City; Grandma Liebendorfer of Pawnee City, Nebraska, and Mrs. A. H. Dulmes of Grundy Center.

Cpl Bernard Onerheim arrived in Klemme Tuesday for a couple of days visit with Klemme friends. Cpl Onerheim is stationed at Camp Butner, North Carolina and is a member of the army band. He was an instructor in the Klemme high school before entering the army about a year ago.

Solved at last England's 900- year-old murder mystery. A thun- der-storm and a Nazi bomb turn up an 11th century corpus delicti and reveal how Britain's first un- derground used commando tactics to purge ruthless King Sweyn. In The American Weekly, the maga- zine distributed with next week's Sunday Chicago Herald-American.

Mr and Mrs E. F. Jacobs and son Dean, Mr and Mrs Leo Es- Beck, and Miss Audrey Mau, drove to Indianola Saturday to take in the Simpson College home-coming and to see the Simpson - Cornell football game that Simpson won by the score of 13-0. Elwyn Jacobs plays right tackle on the Simpson team. He came to Klemme with his parents to spend Sunday here.

MINERAL

- **EVERY HOG RAISER SHOULD USE MINERAL.** But we know that many farmers have wasted money buying mineral from agents who add large commissions to their prices.

FELCO MINERAL IS MADE HERE AT HOME by your local elevator, using scientifically tested formulas and only the best quality in- gredients.

FELCO MINERAL IS NOT A MEDICINE and will not cure everything. It will keep the hogs in condition and will furnish the things need- ed for their growth and health. We think that is all that is re- quired of a mineral.

November Is Christmas Mailing Month This Year, Says Day

DEPARTMENT ASKS TO MAIL PARCELS THIS YEAR

Post Office Facilities Burdened By Limit Already

of the annual flood of gifts and cards on time, a serious problem, "will be a problem this year --- an impossibility --- unless mailings are made November," Postmaster Day warned today.

Post office facilities are allocated to the limit with mail and personnel, and Service has sent more than one thousand experienced employees into the Army and Navy Postmaster General Frank stated and further said, "solution to the Christmas problem is. MAIL IN NOVEMBER."

Mark your parcels, "Do Not Mail Until Christmas" That is the way to avoid disappointment. Christmas Day not only is a day for the members of the armed forces are still in this country.

so the only way to avoid delay of a Christmas emblem in the transportation and services. If the public will by mailing their Christmas parcels DURING NOVEMBER, can handle a small volume of last-minute mailings, up to December 10; can do that and avoid any delay only if November is Christmas Mailing Month," Mr. Walker.

Officials pointed out that the time of mail now is far ahead of previous records, that parcels by the hundreds have been sent to war service and air lines have only about a few planes as they once

than two hundred thousand temporary employees are employed to help with the holiday postal rush. This extra employees will be women and high school girls who are unable to work long hours usually re-

IT'S WINTER UP HERE IN NORTH IOWA

North Iowa's beautiful fall weather came to a sudden halt when rain Saturday turned to wet snow, which soon melted Sunday a light cold rain fell that turned again into snow during the night and Monday the ground was covered with 4 inches of wet, heavy snow and temperatures began to drop downward to 22 degrees above zero Tuesday morning.

However, this part of the state is lucky. From Forest City, west and north, roads were blocked, as well as along the western part of the state as far south as Omaha. Snowplows were called into service in all of that area. Roads were all open in this part of the state.

Farmers are anxious for more good weather in order to finish corn picking. Quite a few fields of soy beans are yet to be combined.

MRS. CLARENCE LEMKE IS HOSTESS AT PARTY

Mrs. Clarence Lemke was hostess at an afternoon bridge party at her home west of Klemme last Friday afternoon.

Mrs. Martin Barz won the high score, Mrs. Verle Keraus of Garner, second high.

Mrs. Lemke served a nice lunch at the close of the games.

quired and whose work will be relatively slow.

To deliver the Christmas mails on time, therefore, it is necessary that mailings be spread out over a longer period so that available transportation equipment and postal personnel can be used during more weeks. It will be utterly impossible to make the deliveries by Christmas if mailers wait until the last three weeks before the holiday, as in normal years.

Postmaster General Walker observed that his warning is not an attempt to tell the public what to do, it is only an advance notification of what will happen if they mail late. He feels that the public is entitled to the facts, and that when they know them, they will decide to MAIL IN NOVEMBER.

BONDS OVER AMERICA

On the fringe of West Virginia's Bethany College is an old white frame house, the home of Alexander Campbell a century ago. Son of a Presbyterian, he founded the Disciples of Christ.

Back the Attack With War Bonds

H. Trotter, chief Nazi labor recruiter in Belgium has just said: "The church in its protest against labor deportations is taking a political action which has nothing in common with religion."

Melvin Peterson, Clear Lake, Died At Iowa City Hospital

SERVICES HELD FOR HUSBAND OF FORMER KLEMME GIRL

A number of the Swanson relatives from this community were at Clear Lake last Thursday afternoon to attend the funeral services of Melvin C. Peterson, 25, who died at an Iowa City hospital last week Monday morning after an extended illness. Funeral services were held Wednesday afternoon with Rev. Thomas B. Collins conducting. Interment was in the Clear Lake cemetery.

Mr. Peterson was born at Clear Lake, Jan. 19, 1918, and grew to manhood there and attended the Clear Lake schools. He is survived by his wife, the former Miss Ethel Swanson of Klemme; his mother, Mrs. Sena Peterson; and three more distant relatives.

CARD OF THANKS

We wish to thank everyone for the cards, letters, beautiful flowers, and the many acts of kindness shown us during the illness and death of our beloved husband and son.

Mrs. Ethel Peterson, Mrs. Sena Peterson 1tp

OBSERVED 92ND BIRTHDAY TUESDAY, NOV. 9TH

Grandma Schroeder was ninety-two years old Tuesday, November 9th.

She is making her home with her daughter-in-law, Lena Schroeder in Klemme. They will soon move into Grandma Schroeder's own home, and Grandma is anxiously looking forward to that time. For a lady of her advanced years, she is in remarkably good health and has a keen mind.

Grandma received a variety of cards and gifts for her birthday, and many ladies called on her during the afternoon.

WILL BE INDUCTED INTO THE SERVICES NOV. 19TH

The following boys went to Camp Dodge for physical examinations on October 28th, passed and will report back on November 19: Clarence W. Haxton, Britt; and John C. Risvold, Corwith, both for the army.

The following of the Call were taken into the Navy (Will report back in 7 days):

Carold V. Brager, Garner; Ransel F. Nelson, Crystal Lake; Paul L. Presnall, Klemme.

Robert E. Muhm, Kanawha, was taken into the Marines.

KLEMME STORES TO CLOSE ALL DAY, NOVEMBER 11

Klemme business places will be closed all day, Thursday, November 11th in observance of Armistice Day.

The next closing day on the calendar for Klemme business places is Thanksgiving Day, Nov. 25th.

METHODIST LADIES WILL HOLD ANNUAL BAZAAR NOV. 8

Will Also Serve Chicken Supper To Public Beginning At 5:15 P. M.

The Methodist ladies will hold their annual bazaar and chicken supper on Thursday, November 18.

The bazaar selling begins at 2:30 p. m. and serving of the supper begins at 5:15 p. m. The supper is 50 cents and 35 cents per plate.

The public is invited to attend both the bazaar and the supper.

HEAR YE! HEAR YE!

An Olde Folks Concerte both Sacred and Profane together with other amazing and entertaining features will be presented by ye most extraordinary galaxie of ye local talents ever assembled in ye village of Klemme to be held in ye edifice of learning ye sixteenth day of ye month of November, yere of our Lord MCMXLIII. Ye doors will be opened at candle lyte and ye sounding of ye music, directed by Miss Fyllis Sherrill, will begin at 8:00 P. M. by ye clock. Nay admission for ye concerte.

KLEMME LADY HONORED AT PARTY AT GARNER HOME

Mrs. Verle Keraus, of Garner, entertained a group of ladies at three tables of bridge at her home Saturday afternoon in honor of Mrs. Keith Albertson of Klemme. Mrs. Albertson was presented with a variety of gifts.

At bridge, Mrs. Ed Bunterbach won the high score, Mrs. Clarence Lemke, second, and Mrs. Orville Bridges, low score.

Mrs. Keraus served a nice lunch later in the afternoon.

HUNGARIAN PARTRIDGE SEASON OPENS NOV. 12

The Hungarian partridge season opens at noon November 12 and closes at 5:00 p. m. November 14 in O'Brien, Sioux, Lyon, Osceola, Dickinson, Emmet, Kossuth, Wnebago, Worth, Palo Alto, and Clay counties. Shooting begins at noon and closes at 5:00 p. m. The bag limit and possession limit are two birds.

Add Another Name To War Fund Subscribers

In preparing the list of names for War Fund Contributions, the committee overlooked one name: Otis Whitcher, who contributed \$5 to the cause.

If any other names were missed please notify J. C. Thomas, chairman, or call the Times office.

STORES TO CLOSE WEDNESDAY NIGHTS

Klemme stores will not be open on Wednesday nights after Nov. 10 during the winter months. However, the stores will be open on Saturday nights as usual.

Our Men In The Service

GRANGE WILL FLY FAST P-40 FIGHTER PLANES

At the Army Air Field, Victoria, Texas November 3, 1943

Dear Ray,

Sorry, but I have written sooner. I have the same excuse, busy. Well, the upper class graduate this morning. That really made me eager for graduation too. We have only 31 more days to go.

I start flying the P-40 sometime this week. That's a pretty good ship too. Hope I can handle it all right.

We haven't flown the last two days due to bad weather. The rest has been appreciated too. We finished ground school today, so from now on out it will be flying all day long.

I had my first night of night flying here last Thursday.

There are all kinds of ducks and geese down here now. You kind of have to look out for them too, when you fly.

Had a letter from Dad. He said that he got six pheasants the first day with seven shells. Guess he's still as good a shot as ever. I hope that I can get home in time for some hunting.

Mom is coming down for graduation.

Keep 'Em Flying.
"Dode,"
(Dorance S. Grange)

KLEMME SOLDIER WINS GOOD CONDUCT AWARD

Sgt. Homer C. Schoenwetter, son of Mr. and Mrs. George Schoenwetter of Liberty township, was presented with the Good Conduct Award at Kirtland Field, Albuquerque, New Mexico, where he is an aviation mechanic in the U. S. Army Air Forces.

Sgt. Schoenwetter won the coveted award for demonstration of good conduct, character and for exemplary performance of duty during the past year.

Cook Elected F. B. President

COUNTY FARM BUREAU HOLDS ANNUAL MEETING

The Hancock County Annual meeting was held Friday evening, November 5, at the Garner High School.

Francis Johnson, President of the Iowa Farm Bureau Federation, was the speaker of the evening. Donald Groves, District Fieldman, gave a brief report.

F. C. Missal and R. J. Felt were the audience in connection with the music was furnished by Lou Bethke and Patty Phillips. They played two piano duets. Duane Majorettes, Doris Zeisler and Rose Ann Reinig gave a performance.

Results of the election were as follows: President, V. A. Cook; Vice President, O. N. Johnson; Secretary, C. A. Bird; Treasurer, G. J. Ulrich; Voting Director, V. A. Cook; Home Project Chairman, Mrs. Harold Oxley.

SQUIRREL SEASON CLOSING NOVEMBER 15

One of Iowa's most successful squirrel seasons closes November 15, and in spite of heavy hunting, the carry over for next year breeding stock appears to be large. Squirrels may be held in possession without permit until November 25. Hunters wishing to retain squirrels longer than this period may secure a free permit to do so by writing the State Conservation Commission, 10th & Mulberry, Des Moines 8, Iowa.

When you have company or take a trip, that's news. Phone 12.

WAYNE CHAMBERS SAYS IT'S A SMALL WORLD

Pfc. Wayne Chambers, son of C. Sup and Mrs. John Chambers, writes in a letter of October 29 from Ft. Belvoir, Va. "Spoke of addies, I had another one happen yesterday while peeling potatoes. (Yes, K. P.) I was startled to see in the bag of onion 'Markham & Engstler Garner Iowa.' A small world after all." Garner Leader.

Armistice Day Program

LEGION COMMUNITY HALL

Thursday, Nov. 11, 1943

- Invocation (Promptly at 11:00 o'clock) Allan Barz
- "Dedication," Robt. Franz Song by the Glee Club
- Armistice Day Address Rev. Harold R. Knight
- Pastor of the U. B. Church, Goodell, Iowa
- "Our Grand Old Flag," Song Girls Sextette
- "Give A Prayer For The Boys Over There" Sextette
- "God Bless America," Song by the Audience
- March of The Colors Ewald Grosshuesch

—V—

The Klemme High School will attend in a body and march to the Hall lead by the High School Band.

THE PUBLIC IS INVITED TO ATTEND

LATE FALL RETARDS DUCK FLIGHT

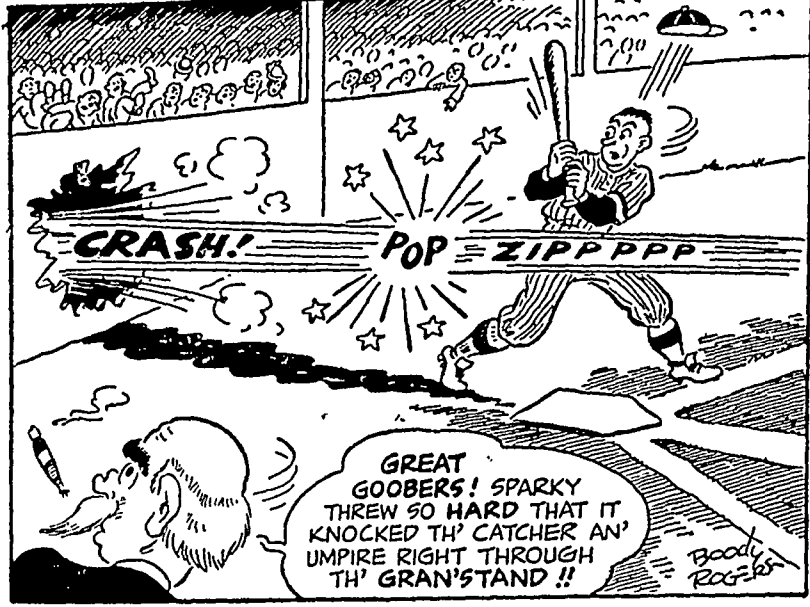

Picture Of Two Hunters "Jump-Shooting" Ducks

Iowans are wondering where the millions of ducks promised by Canadian surveys are hiding, and the answer is given by Ducks Unlimited. The bulk of the so-called big ducks is, as this is written, still in Canada. The explanation for the late flight is the unusually late fall. There are many mallards in the Iowa lakes region now, and they are beginning to feed in the cornfields, where there is an abundance of waste shelled corn left by the mechanical corn pickers. Early duck shooting, particularly for blue-winged teal, was excellent in some areas and, as usual, poor in others. The late migration and the best hunting are yet to come. However, the heavy snows and storms in the north Saturday and Sunday are now bringing the big ducks in and a number of local hunters have had good shooting the past few days. Some are mixing pheasant hunting with duck shooting around Klemme the past few days.

SNAPPY FACTS ABOUT RUBBER

To maintain the nation's essential motor transportation system, the American rubber tire industry will be called upon to make 30 million synthetic passenger car tires in 1944. The synthetic rubber program is being geared to permit such an output without hindering the military needs for rubber.

More than 65 per cent of the war materials reaching factories in Michigan travel on rubber-tired trucks, and 67 per cent of the finished products move out by truck. Proof that our national economy is closely bound with rubber.

Kidneys Must Work Well

For You To Feel Well 24 hours every day, 7 days every week, never stopping, the kidneys clear waste matter from the blood.

If more people were aware of how the kidneys must constantly remove waste plus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer aching back, aches, headaches, dizziness, swelling, pains, getting up at night, swelling, etc. Why not try Doan's Pills? You will be using a medicine recommended by country over. Doan's Pills help in the removal of the poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

DOAN'S PILLS

PATTERNS

SEWING CIRCLE

Circle Yoked Frock

“Cunning for words” is the way you’ll feel about this crocheted frock, once it is made and on your small daughter! To add the ric-rac perky and all, as a finishing touch!

Pattern No. 1867 is designed for sizes 1, 2, 3, 4 and 5 years. First a flash, then a crack, then a wish of shell, finally the echo plunging back from the drear Sicilian hills.

The rate of firing increased, and another officer, American, said: “They must be on it now.”

We saw fires quite near. I asked an officer when the Luftwaffe had been over this harbor. He replied: “Constantly.”

Our destroyer had picked up four German aviators from the water the night before and brought them in. They had been on a life raft 90 hours. A British lieutenant, naked to the waist and with shaggy black beard, said: “They were pretty pooped. We almost choked one of them over.”

Later the Germans were brought on the deck of the destroyer, and shown the prodigious display of warships steaming past. One German said: “I don’t believe it. It can’t be true.” He had swallowed whole the Nazi propaganda that the British Mediterranean fleet had been sunk.

Eisenhower wanted to visit Sicily as soon as possible after the invasion, for several reasons: to confer with Hewitt, Patton and his other officers, to see for himself how things were going, and particularly to salute the Canadians who were associated with the British and Americans in a big-scale operation for the first time.

He stood on the deck and watched the shore flow along beside us and in conversation he constantly stressed the Allied nature of this tremendous operation, expressing his appreciation in the warmest terms of the “exquisite” co-ordination achieved by all. He talked about how Cunningham, Alexander and Tedder, each working perfectly on his own sphere, assembled the whole machine into action with consummate efficiency while he was only “Chairman of the Board.”

Before this, I’d met Eisenhower two or three times, attended several of his press conferences, and been extremely impressed by this officer (only a lieutenant colonel a couple of years ago) who was now in supreme charge of one of the greatest, most complex operations in military history.

Friendly and Direct.

He is a solidly built man of medium height, with sandy hair, big forehead and freckled face. He has one of the widest, most mobile grins imaginable. His manner is direct, simple, friendly.

You get the sense from him that he’s very sure of himself and knows his own worth. But his informality and his modesty are intensely genuine. He’s the least stuffy, shirking general I ever met. All his colleagues admire his enormous tact. He had never had concrete battle experience in the field till last November, yet found himself appointed superior to veterans like Alexander and Montgomery.

But he quickly proved himself a real strategist with the final victory in Tunisia. Now he has won not only the respect of his subordinates but this affection. Though he likes to call himself chairman of the board, he is much more than that. He is a perfect co-ordinator, capable of vigorous, decisive action. He is very shrewd, as anyone can tell on listening to his conversation, despite his tremendous modesty. He tries to keep in the background as much as possible, always stresses his responsibility to Washington and London, and even refuses to let correspondents dateline anything as from “General Eisenhower’s Headquarters.” He insists they use the term “Allied Headquarters.”

Eisenhower went to the Philippines with MacArthur in February, 1935. He returned to the United States in January, 1940. He was certain war was coming, but thought it would strike us from Europe first.

‘Alarmist Ike.’

Friends kidded him, called him “Alarmist Ike.” He went to work in the Third Army at San Antonio. From there he was called to Washington, after Pearl Harbor.

Eisenhower is as sound as can be on the essential strategy of war and speaks from experience of the comparative danger from the Germans and the Japanese. He knows we must beat Germany first for the most elemental reasons, and he is absolutely firm for Anglo-American solidarity.

Eisenhower in Sicily

By John Gunther

(WNU Feature—Through special arrangement with Collier’s Weekly)

I went ashore on Sicily with General Eisenhower. The first landings had taken place only 48 hours before, others were still going on. We had little information as to the progress of the fighting, but soon it became clear that the war was very close.

An American cruiser was about a mile offshore. It began to bark. First a flash, then a crack, then a wish of shell, finally the echo plunging back from the drear Sicilian hills.

The rate of firing increased, and another officer, American, said: “They must be on it now.”

We saw fires quite near. I asked an officer when the Luftwaffe had been over this harbor. He replied: “Constantly.”

Our destroyer had picked up four German aviators from the water the night before and brought them in. They had been on a life raft 90 hours. A British lieutenant, naked to the waist and with shaggy black beard, said: “They were pretty pooped. We almost choked one of them over.”

Later the Germans were brought on the deck of the destroyer, and shown the prodigious display of warships steaming past. One German said: “I don’t believe it. It can’t be true.” He had swallowed whole the Nazi propaganda that the British Mediterranean fleet had been sunk.

Eisenhower wanted to visit Sicily as soon as possible after the invasion, for several reasons: to confer with Hewitt, Patton and his other officers, to see for himself how things were going, and particularly to salute the Canadians who were associated with the British and Americans in a big-scale operation for the first time.

He stood on the deck and watched the shore flow along beside us and in conversation he constantly stressed the Allied nature of this tremendous operation, expressing his appreciation in the warmest terms of the “exquisite” co-ordination achieved by all. He talked about how Cunningham, Alexander and Tedder, each working perfectly on his own sphere, assembled the whole machine into action with consummate efficiency while he was only “Chairman of the Board.”

Before this, I’d met Eisenhower two or three times, attended several of his press conferences, and been extremely impressed by this officer (only a lieutenant colonel a couple of years ago) who was now in supreme charge of one of the greatest, most complex operations in military history.

Friendly and Direct.

Eisenhower is as sound as can be on the essential strategy of war and speaks from experience of the comparative danger from the Germans and the Japanese. He knows we must beat Germany first for the most elemental reasons, and he is absolutely firm for Anglo-American solidarity.

Notes of an Innocent Bystander:

The Magic Lanterns: Mary Martin, already topping the newest stage hit, “Venus,” presides over a daffy dilly on the screen called “True to Life.” . . . “Phantom of the Opera” gives you more opera than phantom this time, with Nelson Eddy, Susanna Foster and Jane Farrar pouring it on vocally. Claude Rains is the head skulker, but his chills run second to the trills. . . . “Behind the Rising Sun” is grim stuff about the war against the Japs. Its barbarities were authenticated by Correspondent James Young, who lived among the beheaders for years. Margo and Don Douglas are the pair who stir up the Japs’ furies.

The Dials: The AFL urged NBC to muzzle Kaltenborn because of his severe jabs at labor unions. The network, however, permits him to continue expressing his opinions freely, even if they irk you or me. . . . The best answer to any oral attack, as the AFL probably will agree, is not suppression, but facts. When civil liberties go down the drain so will labor’s. . . . We thawt only columnists took bows for scoops. But every hour, via its radio offerings, the N. Y. Times announced its beat in reporting that Italy would declare war on Germany. . . . Fred Waring likes to hurl numbers around on his show—how many performers, etc. He announced 176 piano keys for a selection. How many piccolo holes? . . . Jack Benny’s new corps of writers caught his style admirably on Jack’s first out and added a little more lunacy. . . . The other night a band came on the air unaccompanied by that claquey hand-clapping and synthetic cheering. Or could I have just dreamed that?

Memos of a Midnighter: MGM has junked “They Were Expendable,” a best seller! . . . Jockey Nick Wall and his wife have reconciled after a long sep. . . . Insiders think that if Durocher is dropped as Dodgers’ pilot—his successor may be the gent who once said: “Is Brooklyn still in the National League?”—Bill Terry. . . . “Lassie,” the dog star of the film by that name at the Music Hall, is a him—real name is Pal. The owner sold him for \$10. . . . After seeing the preview in H’wood he came out muttering: “I’ve thrown away a fortune!” . . . Garbo has given in to Ernest Pascal’s pleading to go to London and star in Shaw’s “St. Joan.”

From the Irish Echo: “Premier De Valera of Eire succeeded, after considerable time and effort, in making Hitler pay for the restoration of a synagogue in Dublin which had been destroyed by Nazi airmen when they bombed the city a couple of years ago. Mr. De Valera acted in fulfillment of a promise to the Jews of Eire that their lives and property would be protected by the government against the acts of any enemy of the country.”

Quotation Marksmanship: A. Murray: She’s the only one I know who always seems to rhumba into a room. . . . Mere: Beauty is the first present nature gives to woman and the first it takes away. . . . Denham: Ambition is like love—impatient both of delays and rivals. . . . Moore: Playful blushes that seem but luminous escapes of thought. . . . E. Cunico: Hitler’s One-World—Unanimosity. . . . H. Klurfeld: Duce gave Italy roads, but the Allies are giving it hot and cold running Nazis. . . . E. Gilligan: The village went to sleep—window by window. . . . H. Brown: She balanced her dignity on the tip of her nose. . . . Confucius: If you lose your temper, you’ve lost the argument. . . . Anon’s definition of intoxicated: To feel sophisticated and not be able to pronounce it.

Private White House polls show Wallace has twice the support for the vice presidency as the combined vote of all his opponents, including J. Byrnes, P. McNutt, Mr. Justice Douglas and J. Winant. . . . A Capitol correspondent is in a jam with colleagues for supposedly making remarks to their wives. . . . The Stork Club has gone high-toned. Last night its guests included America’s famous poet, Joseph Auslander, and Assistant Secretary of State Adolf A. Berle Jr., and his wife. . . . In the film, “Spitfire,” the late Leslie Howard (who perished in a plane) says: “What’s the use of inventing planes? They only kill people!” . . . L.H.R. of the Times records this nifty: “Washington is a place where everyone is welcome but no one is missed.”

His chums enjoy relating this about lovable Barney Baruch, whose counsel is often sought by statesmen. . . . Baruch is hard of hearing and wears a device which is connected with some dry batteries concealed in a coat pocket. These batteries are hard to get nowadays—so when Baruch is buttonholled by a bore or some time-waster, he reaches into his pocket and disconnects the batteries by merely pushing the “Off” button. . . . The bore keeps raving away, but Baruch doesn’t hear a thing.

THOSE SIXTEEN POINT BLUES

Butter! Ah, what memories! It is now Churned Gold, Yellow Wealth, the Golden Memory of Yesterday and the Bright Hope of Tomorrow, but we remember when it was just Butter.

Once we spoke of it as a routine foodstuff; now we speak of it as the pirates of old once spoke of buried pieces of eight.

Once we merely went to the grocery store and said, “Two pounds of your best butter”—just like that—and got it! No back talk, no arguments, no raised eyebrows. Once we wrote “Butter” on the grocery list and thought no more about it. We didn’t associate it with prestige, influence, pressure, points or politicians.

There was a time when we even ordered butter over the telephone and met with no derisive laughter. Now if we order it over the telephone our wires will be tapped by FBI, OPA and the neighbors.

Yesterday it was one thing to be found in the icebox at all times, pristine, cold and gleaming like a brick of gold. Today we keep it in the bank.

We can remember when people put the butter dish right out in plain view on the table WITH VISITORS PRESENT!

Once upon a time the waiter made it a point to slip three more butter patties on your restaurant table the moment the original patties began to disappear; now if a waiter could get three patties of butter he would eat them himself.

Do you recall the time when the fellow who cooked up an oyster stew used to slip four or five slabs of butter into it without batting an eye?

Once butter came direct from the cow. Now it has to make all the intermediate stops at OPA stations, federal commissions, global war councils and miscellaneous gatherings of Washington lawyers.

You don’t get butter from a cow any more; you get it from an administrator.

Butter, lovely butter, what a problem you’ve turned out to be!

Once mom slapped big slabs of it on the porterhouse—(Porterhouse: a choice cut of steak; see beef.—Webster Unabridged). She even put it on fish. And, boy, do you remember how she would stick a quarter of a pound of it into a baked potato! Today it’s a prison offense.

She even read recipes which said, “Add four heaping tablespoons of creamy butter” and FOLLOWED INSTRUCTIONS! (Without a thought about penalties, too).

She fried the eggs in butter, put real butter on buttered toast and applied it to Junior’s finger for a bad burn. (Never suspecting the day would come when it might bring the police wagon.)

And now SIXTEEN POINTS!

That can’t be anything connected with butter. It’s a FOOTBALL SCORE, AIN’T IT?

Oh Yeah! (“If I had an opponent of real military size I could calculate approximately where he would attack. But if one has before him military idiots one cannot even guess.”—Adolf Hitler one year ago.)

Those military idiots—Ach, it’s so hard to fight An enemy who isn’t smart And never looks quite bright!

In full retreat and out of breath, My “blitz” transformed to “blot,” I have this one consoling thought—They are such Idiots!

Vanishing Americanisms “Here’s a dime; get yourself something to eat.”

“Shut it off, quick! The tank’s full.”

“I’ll take the 75-cent dinner.”

“Go out and buy me two or three five-cent good magazines.”

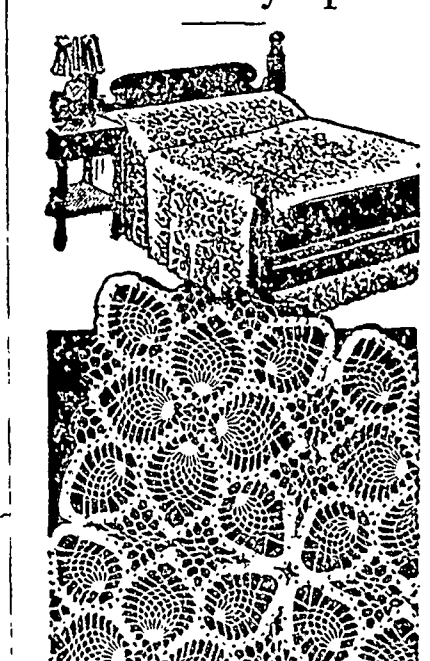

“Let’s look over the meat specialties first.”

“Our forefathers did without sugar until the 13th century, without coal until the 14th, without butter until the 15th and without tea, coffee or soap until the 17th. What was it you were complaining about?”—From the OPA Newsletter.

We were, since you ask, complaining about the waste of paper and ink.

Hollywood is making a picture based on Samson’s life, “Victory Through Hair Power,” it is said.

Pineapple Squares Make Lacy Spread

No. 7438

YOUR home should definitely express you! And there’s no lovelier way of showing your sense of beauty than by making this lacy crocheted spread. The pineapple design, gracefully arranged in squares, lends itself equally well to cloth or smaller accessory.

Pattern 7438 contains instructions for square, illustrations of stitches, materials needed.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Songs Canned

Since 1928, the Archives of American Folk Song in the Library of Congress have made and preserved recordings of more than 25,000 old songs created by and characteristic of various cultural groups of this country, among them being cowboys, “hillbillies,” Indians, Creoles and Negroes.

NOTHING CAN DO MORE FOR YOU

In the entire field of aspirin than St. Joseph Aspirin. None faster, none safer. The world’s largest seller at 10c. Also sold in economy sizes—36 tablets, 20c, 100 tablets, 35c. Demand St. Joseph Aspirin.

From an old French word “mes” derived from the Latin word “misus” meaning a course at a meal, comes the Army’s name “mess” for its breakfast, dinner and supper. Favorite meal with the soldier is chicken dinner—his favorite cigarette, Camel. (Based on actual sales records from service men’s own stores.) A carton of Camels, by the way, is a gift that’s always welcome. And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.

Like muffins?

You’ll love these tempting “Honey Muffins”!

All-Bran “Honey Muffins”
3 tablespoons shortening
1/2 cup honey
1 egg
1/2 cup butter-milk
1 cup Kellogg’s All-Bran
1 cup flour
1 teaspoon baking powder
1/2 teaspoon salt
1/2 teaspoon soda
Blend shortening and honey. Add egg and beat until creamy. Add milk and All-Bran, let soak until mixture is thickened. Sift dry ingredients together; add to first mixture, stirring only until flour disappears. Fill greased muffin pans 2/3 full and bake in a medium-hot oven (350° F.) about 25 minutes.

Crisp! Delicious! Nutritious! Remember, KELLOGG’S ALL-BRAN is a rich natural storehouse of “protective” elements—protein, the B vitamins, phosphorus, calcium, iron. Make them with Kellogg’s ALL-BRAN

Ink Spots
And Spatters

By Jergie

WIN THE FLIGHT COMES IN

While you crouch in the blind
As the ducks come in,
And you hear the dog's low whine,
When icy fingers, thrill on thrill,
Tingle your spine,
You mentally hoard your precious
shells
When winged wings swish by;
That for the flock to come
In range
Against the morn's pink sky.
After the blocks have brought
them in
It's right you might recall
Your buddy—the guy in uniform.
Who won't be there this fall.

THE MEANEST MAN EVEN FOUND

The meanest man, who
sometime in the future will sit in
the same seat with the chap who
told the band man's pennies and
pushed the old lady's wheelchair
over the river bank, is the prank-
ster who inserted an ad in a Minne-
apolis newspaper recently saying
that an individual at a certain ad-
dress had 50 boxes of shotgun
shells for sale. As a result of this
ad a city riot squad was called out
to handle the estimated 4,000 dis-
appointed hunters who filled the
streets and blocked street car traf-
fic at the address given.

ARCHER GETS DUCK; GAME WARDEN GETS HIS BOW

A Sioux City Iowan recently lost
his prize bow and arrows and was
fined a \$13.60 fine because he
was too skillful an archer. The
Iowan was arrested in Nebraska by
Nebraska conservation officers for
shorting at and killing a teal 150
feet away, out of season. The bow
was confiscated by the game warden
and the school fund was rich-
ened by \$13.60.

L. W. WESENBERG NEW COUNCILMAN AT GOODELL

L. W. Wesenberg was elected
councilman at Goodell, and Nels
Chesvig was appointed as manag-
er of the Community Hall at a
meeting of the Goodell town coun-
cil.

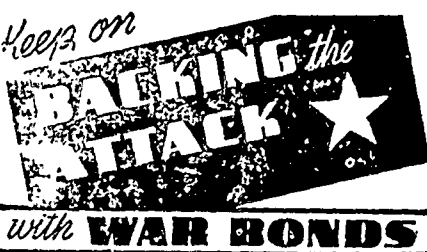

These two appointments were
made to fill the vacancies caused
by the death of A. N. Ahrenkeil on
October 6th. Mr. Ahrenkeil was a
member of the town council and
also managed the community hall
for the town of Goodell.

BOARD REVIEWED CLAIMS

The Hancock County Board of
Social Welfare held its regular
monthly meeting at the courthouse
last Thursday afternoon and re-
viewed claims for old age assist-
ance and widow's pensions.

After January 1, 1944, the new
social welfare law becomes opera-
tive and widow's pensions will be
administered by the Board.

Wedding Stationery printed and
sold at The Times Office.

Soybean Good Food When Green or Fully Matured

Soybeans may be used as food
either in the immature or mature
state. They are ready to be used
as a green vegetable as soon as the
pods have filled out but while they
are still green. The immature soy-
bean is always green no matter what
the color of the dry seed is to be.
They are in season in Illinois from
about the middle of August until the
last of September.

The beans can be cooked either
in the pod and shelled later, and
they can be shelled and then cooked.
Shelling is made easier by pouring
boiling water over the pods, and al-
lowing them to stand five minutes
and then cooling with cold water.
Mature soybeans are usually soaked
before they are cooked. An impor-
tant point to remember in cooking
either the immature or the mature
soybeans is that they should be
cooked until tender, not soft. When
done they have a nut-like texture and
are not soft or mushy.

Soybean products are of interest
and value in planning menus and in
keeping them nutritious and well
balanced. Some of these are soy-
bean milk, soy curd, toasted salted
soys, soy sauce and bean sprouts.
Then there are soybean grits, which
may be cooked like the various cereal
grits and are used commercially
in soy crackers.

Refined soybean oil is used in
some salad oils, margarines and
shortenings. Finally, there is the
flour of either high or low fat con-
tent, which is usually used in com-
bination with wheat flour for yeast
bread, muffins, cookies, griddle
cakes, and as a thickening agent in
sauces and soups.

Play Has Part in Child's Education and Development

Play is a necessary part of the
development and education of every
child. For wholesome constructive
play children need toys; they need
a place to play; they need play-
mates; and they need sympathetic
adults. In time of war, it takes
thought and careful planning by par-
ents to see that the children's needs
are met as well as conditions will
allow.

Good toys are toys with which
the child can do things; playthings that
are just looked at are of little value.
Many of the best toys are used
by children of widely differing ages.
Blocks and sand and painting ma-
terials, for example, are used in a
simple way by the toddler but their
use continues all through childhood.

It is good for a family to have
some of these toys that interest chil-
dren of different ages. They help to
keep the family together. They in-
terest the children of the neighbor-
hood and pave the way for compan-
ionship among children of different
ages as well as those of the same
age—companionships, which mean
much in the development of chil-
dren.

Grubs Hatch in Sod

White grubs, which work on a
three-year rotation themselves, do
the most damage the year following
the one in which the adult beetles
emerge. They can ruin stands of
timothy and other grasses, kill
nursery stock, strawberry plants,
and damage potatoes and truck
crops by feeding on the roots. Mod-
ern agriculture has not effectively
controlled this pest. Eggs are laid
largely in grass sods, and when
crops are planted on sod plowed un-
der the next year, the crop roots are
attacked by the grubs. The
grubs do not severely damage leg-
ume or mixed hay or pasture plant-
ings, so that the improvement of
hayland and pasture tends to con-
trol the insects. They can not
thrive in wet or clay soils, but do
their damage in the drier, better-
drained lands.

Bailey Marches Elephant

In 1815 a New York state farmer,
Hackaliah Bailey, bought an African
elephant from his seafaring brother.
Marching "Old Bet" from town to
town by night and exhibiting her
by day, Bailey made a small for-
tune. He built a statue and a hotel
at Somers, N. Y., in memory of
his pachyderm.

P. T. Barnum, a young Connecti-
cut clerk, closely watched the career
of "Old Bet." By 1843 Barnum was
well on his way to the remarkable
showmanship that was to add many
distinctive touches to the American
spangleland. Jumbo and General
Tom Thumb were Barnum suc-
cesses now part of circus legend.
His "Greatest Show on Earth" dates
from 1870. He opened a new circus
era in 1872, by putting his show on
railroad cars.

First American Circus

There were circuses long before
the Circus Maximus of Julius Caesar.
For centuries they consisted of
chariot racing and feats of horse-
manship. Only after reaching the
young American republic in 1792 did
the change begin. In that year John
Bill Ricketts opened America's first
circus under a permanent roof in
Philadelphia. Setting a pace to in-
spire P. T. Barnum and later mas-
ters of circus promotion, Ricketts
marked April 22, 1793, a red-letter
day, for on that day President
George Washington attended the
show. Ricketts' house was packed
for weeks thereafter. By 1797 he
had built a circus theater in New
York and had exhibited as far north
as Albany. New circuses were es-
tablished in other cities.

stored, says L. C. Grove, extension
specialist of Iowa State College.

Hancock County Board Proceedings

5TH ADJOURNED SEPTEMBER MEETING

Garner, Iowa, November 2, 1943
The Hancock County, Iowa, Board of
Supervisors met in session on above date with
F. J. Schoun, Penn Eckels and John Cham-
bers, present.

The minutes of the last meeting were
read and approved as read.
On motion and second the bond of Mary
M. Gahan, Deputy County Superintendent is
approved.

On motion and second the application of
August Schnath for a loan from the Perma-
nent School Fund of Iowa is approved.
In the matter of the establishment of D.
D. No. 137, a sub district of D. D. No. 1 and
2, Hancock County, Iowa, petitioned for by
Frank J. A. Hejlik
Engineer to investigate and make a report
on October 11, 1943, and said Engineer has
now filed his report stating that he has
surveyed the lands of the petitioner and the
lands in the water shed of said proposed
and in his opinion the proposed establish-
ment as prayed in the petition will be con-
ducive to public health and welfare and will
be of greater benefit than the cost thereof
and recommends that said D. D. No. 137 be
established.

BE IT THEREFORE RESOLVED by the
Board of Supervisors of Hancock County,
Iowa, acting on behalf of D. D. No. 137,
that the report of the Engineer be approved
as a tentative plan and shall come on for
further hearing at the Court house in Gar-
ner, Iowa, at 1:30 o'clock P. M. on Decem-
ber 20, 1943.

The County Auditor be and he is hereby
directed to cause notice of hearing to be
published in the Britt News Tribune, a
newspaper of general circulation published
at Britt, Iowa, advising all owners, occu-
pants, lienholders, and encumbrancers of
record in the district of the pendency and
prayer of the petition, the favorable report
of the Engineer thereon, the approval of
the Board of supervisors as a tentative plan,
that same may be amended before final ac-
tion thereon, the date and hour of the hear-
ing thereon, and that all claims for damages
and objections to said establishment must be
filed in writing with the County Auditor at
or before the hour set for hearing thereon.
The foregoing resolution was offered and
its adoption, was seconded by Supervisor
Chambers, whereupon the chairman placed
the motion of its adoption and upon roll call
the vote thereon is F. J. Schoun, John
Chambers and Penn Eckels, Aye, Nays—none.
In the matter of Tax Sale certificate No.
1385 whereas the sum of \$145.40 in payment
has been made of the delinquent tax due on
said certificate and said sum has been accepted in
full payment of delinquent tax and penalti-
es on certificate No. 1385

BE IT THEREFORE RESOLVED by the Board
of Supervisors of Hancock County, Iowa, that
the County Treasurer be and he is hereby
directed to accept the sum of \$145.40 in
full payment of the delinquent tax due on
said certificate No. 1385 as shown in the
minutes of Tax Sale of January 7th, 1935,
from the holder of certificate No. 1385.
WHEREAS Hancock County, Iowa, holds
title to lots one and two, Block 27, Ander-
son's 2nd addition to the Town of Britt,
Iowa, and

WHEREAS, Milton L. Smith and Fern
F. Smith of Britt Hancock County, Iowa,
have offered the sum of \$150.00 to reim-
burse Hancock County, Iowa, for taxes de-
linquent and it is deemed for the best in-
terest of the taxpayers of Hancock County,
Iowa, that said offer be accepted.

BE IT THEREFORE RESOLVED by the
Board of Supervisors of Hancock County,
Iowa, that lots one and two, Block 27, Ander-
son's 2nd addition to the town of Britt,
Iowa, be and the same are hereby ordered
deeded by Quit Claim deed to Milton L.
Smith and Fern F. Smith of Britt Hancock
County, Iowa, and Chairman F. J. Schoun
be and he is hereby authorized to execute
said deed in behalf of Hancock County, Iowa.
The foregoing resolution was offered and
read by Supervisor Eckels who moved its
adoption, was seconded by Supervisor
Chambers, whereupon the Chairman placed
the motion of its adoption and upon roll
call the vote thereon is F. J. Schoun, Penn
Eckels and John Chambers, Aye, Nays—
none. The Chairman declared the resolu-
tion duly adopted.

BE IT RESOLVED that the claims here-
after set out be allowed in amounts desig-
nated thereon and the County Auditor be
and he is hereby authorized to draw war-
rants therefor on the several funds of
Hancock County, Iowa, in payment of such
claims in amount set opposite each claim.

MATERIALS

- FOR -

rm Buildings

Uncle Sam says: "More chickens and eggs
e." So let's work together in an effort to
more chickens to produce more eggs.

We are doing everything possible to get
material with which to build more farm
ings, so as to increase food production.

At present we have a fair stock of materi-
r farm buildings. But there is a lot of ma-
l moving out of our yards. So if you plan
ong any building on the farm, we would
est you place your order with us as soon as
ible, while material is available.

If you need a Brooder House, place your
r now so our carpenters can build it during
Winter.

Klemme, Iowa

Around Iowa

ELEPHANT TRUNK

E E Carr of Mt Ay, has purchased the semi-trailer with a 22-foot stock body used in transporting Baby Mine when she was owned by Iowa children. A tractor was included in the sale. The inscription on the trailer reads, "Iowa Children's Elephant Baby Mine & Dandy."

POTATO CROP

E. K. Martens, of Conroy, will be eating plenty of potatoes this winter. His one-fifth-acre patch yielded 85 bushels of big potatoes. This would mean an average of 425 bushels per acre. Mr. Martens has on display potatoes weighing 2 1/2 and 2 3/4 pounds each, all free from scab and disease. The potatoes were grown on ground that has produced potatoes for the past five years.

UNDER CULTIVATION

A quarter section of land in Boone county owned by R. M. Gillespie, of Goldfield, and his son-in-law, Dr. Yarbough, is being plowed

for the first time this fall. The land is being tilled before the plowing is started. The land has been owned by the Gillespie family many years, the possession dating from the present owner's great grandfather.

RETURN TO THIS COUNTRY

After many years in Addis Ababa, Ethiopia, Mr. and Mrs. Duncan Herry, son, Billie, and daughter, Mary Ann, recently returned to this country. Mr. Henry was a teacher of agriculture in the far east. Duncan and son, Billie, were prisoners for many months, being confined as spy suspects. Mary Ann will make her home at the Gilbert Henry home in Nevada, where she will attend school.

DOUBLE TROUBLE

Mrs. Emil Welter of Livermore returned home suffering from two minor accidents after visiting her sister in Des Moines. She stubbed a toe of her right foot. A physician pronounced it broken. Mrs. Welter also ran a crochet hook through her hand. A physician was called to remove the hook.

RUSHING BUSINESS

Longer hunting season and the shortage of shells has made a rushing business for dealers able to obtain a supply of shells. One Waverly merchant advertised that he would have on sale between three and three and a half cases of shotgun shells one morning -- with a limit of ten to a customer. Within an hour's time, the 1,500 or 1,600 shells were sold, with about 150 customers taken care of during the hour.

HONORED

Thomas J. Durant, superintendent of the Sumner school for 35 years, was honored recently. A new Sumner high school athletic field has been named the Thomas J. Durant field. H. K. Bennett of Des Moines, regional supervisor of the state department of public instruction, delivered the principal address at the dedication ceremony.

SAVES SELF

David, the 18-month-old son of Mr. and Mrs. Harold Cronin of Decorah, was missed by his mother one afternoon while he was playing outside. She finally located the small boy clinging to a rock in a creek into which he had fallen. David was taken to the hospital and treated for shock and exposure but was released the next day apparently recovered from his experience.

GODFATHERS

Michael Jacob (Mike) Herway of Indianapolis has 30 godfathers. All pilots of the 377th fighter squadron stationed at Mitchell Field, New York. Mike's father, First Lieut. Loran Herway, is a member of the squadron. As young Herway was the first baby in the squadron, they sent him a \$30 war bond. Michael Jacob was born October 5, 1943.

SILK HOSE

A pair of silk hose, a very rare item in this country, was received by Mrs. Edith Graves of Indianapolis last week. Her daughter, Lieut. Lucinda Graves, Red Cross nurse with United States forces, sent them from Sicily. The hose were short-lived, however, as Mrs. Graves stepped upon a stick, which snagged a hole in both, the first time she wore them.

1858

A fruit jar made in 1858 is now in the possession of Mrs. John Thompson of Milo. Mrs. Thompson does not remember how the jar came to be in her possession but believes it might have come with some things from her mother. The jar has been used for canning purposes and was last used for canning sauerkraut. Mrs. Thompson reports that she is going to keep the jar filled with rice or powdered sugar in her kitchen cupboards. The jar is straight-sided with no shoulders, although a regular Mason jar lid fits perfectly.

TAX SCHOOL PLANNED

The fourth annual three-day tax school will be conducted in mid-January by the Iowa State Bar Association, it was announced by its committee on taxation which gauged expected attendance at more than 600 lawyers. Subjects to be covered include excess profits, wage stabilization, tax procedure, family partnerships, and federal estate inheritance taxes.

Slender Hands Unnecessary For Fine Work, Army Says

The old idea that long, slender hands are necessarily the "finest" type, capable of doing the most delicate work, is "simply a lot of bunk," according to the flight surgeon of the world's largest bombardier school.

Basis for his statement is the examination, during the first year of operations at this huge home of the "Hell From Heaven Men," of thousands of bombardier cadets.

Because his is a job requiring split second accuracy, perfect timing and complete precision, the bombardier must have hands capable of work as delicate as that of a watchmaker, as deft as those of the finest artist. With his hands the bombardier must manipulate the complex mechanism of the famous U. S. bombsight in the few short seconds that his bombing plane is "on course," with the target reflected on the cross-hairs of the eyepiece. He must do this without a quiver or a tremor. In actual combat, he must keep steady in spite of enemy anti-aircraft fire, in spite of attacking enemy fighter planes. The action of his hands must be quick, skillful and certain.

"The idea that long, slender hands are the more skillful is based entirely on appearances, not on results," the flight surgeon at this bombardier school declared. "Here at this training center for Uncle Sam's bombardiers, where students must prove themselves not only proficient, but actually better than average, we have discovered through constant research that bombardier's hands run to all sizes and shapes, and that the physical proportions of hands have little, if anything, to do with their efficiency."

Army Mess Officer Plans To Get Most From Food

Housewives could take a lesson in making the most of their rations from an army mess officer. A mess officer's tricks to make a little go a long way are innumerable. For instance, bones are boiled three days to get a stock from which very tasty gravy and seasoning for soups and vegetables can be made.

When canned goods are used, the cans are placed in boiling water to be taken out and opened as used. This way, not an extra can is used. Fresh vegetables are used except in the case of corn and peas.

All excess fat is trimmed and rendered to be used as cooking fats and for frying. Even the lower part of a chicken's legs and the upper part of its neck are used. They are put in with the bones to boil. A very large part of the bone boils down to a very rich broth. A little of this rich broth goes a long way as a substitute for meat.

Now and then, soldiers receive a steak for their dinner. This is due to careful management by the post meat cutters. The army doesn't purchase any particular cuts of meat, they acquire the whole carcass. The plate (breast part) and shanks are used in braised beef. Chuck is used for meat balls, to go with spaghetti, and for meat loaf. And of course the better cuts are used in the standard manner.

Starts Oil Flowing

To start oil flowing from a well in hard, dense formations usually necessitates a shot of nitroglycerin or some other explosive. Charges of this chemical varying from 5 to 1,000 quarts are lowered into the well and set off by a time bomb or small charge of dynamite. When the nitroglycerin goes off, it loosens up the formation at the bottom of the well, and promotes a more rapid flow of oil.

If the flow of an old well in a limestone area slows down, a chemical—muriatic acid—is pumped into the formation. It increases the porosity of the limestone, and the oil runs out more freely.

Reflect Light

The two terms, fluorescent and phosphorescent, both of which are descriptive of types of luminous coatings which are being used in increasing volume in meeting war needs, are sometimes confused. It is pointed out that both terms represent the ability of certain substances to transform some form of invisible energy into visible light. The results are indistinguishable to the eye, but between them there is one important difference. "Fluorescence" lasts only while the exciting energy source or ultra-violet "black light" is present; "phosphorescence" continues after the light has been removed.

New Uses for Old Drapes

Laundry and save the upper parts of window draperies that have worn out at the bottom. There is often enough good material left from a pair of draperies, to make a jumper dress for a little girl or trousers for a boy, depending upon the type of fabric. If not suitable for apparel, the well-washed fabric can be used for pillow coverings, table runners, or other household decorations.

Keep Properties Up

"Paint is one of the essentials for keeping properties in a sound and livable condition," says the Federal Housing administration. FHA officials point out that one of the important ways for home owners to guard against undue deterioration of properties is by seeing that necessary painting jobs are not neglected.

IOWA RATIONING CALENDAR

TIRES—Class A ration. Third inspection period through March 31, 1944. Class B ration. 1st inspection period through February 28. Class C ration of Bulk coupons. Fourth inspection through November 30. Commercial vehicles. Every 6 months, or every 5,000 miles, whichever occurs sooner.

Tire situation critical. Conserve present tires on wheels.

GASOLINE—A coupons (new) for 3 gals. each. No. 8, valid through Nov. 21. All B and C coupons (new), now good for 2 gals. each. (Steel Plate License number and the state must be endorsed on face of each coupon immediately on receipt of book.)

FUEL OIL—Period No. 1 coupons (10 gals. per unit) new ration, valid through January 2, 1944. Period No. 2 good Nov. 30 through February 8, 1944. Period 3 good November 30 through Mar. 14, 1944.

SUGAR—Coupon No. 20. Book Four (5 lbs.) valid through Jan. 15, 1944.

PROCESSED FOODS—No. 1 ration stamps. Book Two. Valid through Nov. 29. A, B and C ration stamps. Book 4. Valid through Dec. 20.

MEATS—T, Cheese, Canned Fish—G brown stamp. Book Three. Valid through Dec. 11. Brown stamp. Book Three. Valid through Dec. 4. J brown stamp good Nov. 7 through Dec. 4. K brown stamp good Nov. 14 through Dec. 4. L brown stamp. Book 3, valid Nov. 21 through Jan. 1, 1944.

FOR YOUR PROTECTION—Book 12 (which may also be used as a ration book) should be filed out and placed in the holder for applying for B ration stamps. Book No. 18 (1 pair) valid indefinitely.

NO. 1 Ration Stamp (1 pair) Book 2, valid Nov. 7. Expiration date to be announced later. (Stamps may be exchanged among members of the family living under the same roof. LOOSE STAMPS are NOT valid.)

LATE APPLICANTS FOR W. R. Ration Book Four: Apply in person at your local Board and present War Ration Book 3.

Simon-Pure

Using one slang term to define another, Simon-pure means the "real McCoy"—or the genuine article. It comes from the play of Mrs. Susanna Centlivre, English beauty and writer of the 18th century. Simon Pure, a "quaking Philadelphia preacher," set off for London armed with introduction to Obadiah Prim, a guardian of young Anne Lovely, who possesses gold as well as charm. The nefarious Colonel Feignwell maneuvers to obtain the introduction and presents himself to the heiress, winning her hand. When the real Simon Pure presents himself, the masquerader denounces him as an imposter. Virtue triumphs, as is usual in the storybook world, and Simon is revealed as his own true self. Thus his name has de-secrated as a synonym for genuine.

Laundering Wool

Whether a sweater shrinks, stretches or stays in shape during laundering depends to a great extent on the blend of fibers, the method used in making the fibers into thread or yarn and the construction of the garment. Some fibers are weakened by moisture and are easily stretched or torn when wet, some mat or felt unless handled with unusual care and cause shrinkage.

Wool is stronger when dry than when wet, and hard rubbing, wringing or twisting, even continuous agitation in a washer, may cause the fibers to mat and the garment to shrink. On the other hand, if the yarn used has been made with a loose twist, the weight of the garment when wet may cause it to stretch and lose its shape unless handled carefully.

Trade Dollars

The trade dollar was brought into existence to meet the competition of the Mexican silver dollar and, more particularly, to satisfy a demand from the Pacific coast for a coin for use in commercial transactions with the Orient. These coins, which were made slightly heavier than the Mexican dollar, contained 378 troy grains of silver and 42 troy grains of alloy. The coins issued under the Act of February 12, 1873, were legal tender to the amount of \$5, but those issued under the Act of July 22, 1876, possessed no legal tender power. A total of 35,965,924 trade dollars was coined before the depreciation in value caused the government to withdraw them from circulation in 1887.

FAMILY FOOD PROBLEMS DISCUSSED AT HOME PROJECT MEETINGS

One of the family food problems which is receiving attention at the Home Project meetings is ways to save time in meal preparation and still prepare nutritious, appetizing well balanced meals.

A bulletin entitled, "Shortcuts in Meal Preparation", which is being distributed to each woman offers many practical suggestions.

If government and private concerns can get the boats and freight cars, they will import as much as 200 to 300 million bushels of grain this fall and winter to feed livestock and poultry. Most of this grain will go to the east and the west coasts, in the southeast and in other localities where feed supplies are short.

KEEP ON
Backing the Attack
WITH
WAR BONDS

BETTER IOWA GARDENS

There will not be enough garden tools to supply the demand in 1944 and we will need to give those we have the best of care to make them last as long as possible. Tools should be protected against rust this winter. Rust can do more damage in winter, when tools are not in use, than in summer.

Collect all tools and clean them thoroughly. Scour all metal parts with emery cloth or steel wool and sharpen hoes and spades with a file. Then coat the metal parts of the tools with motor oil or crank case oil, using a brush or rag. Wood handles can be protected by rubbing with floor wax. Wheel hoes should be cleaned, oiled and stored.

Tools should be hung up rather than stacked in a corner. Tools can be hung on pairs of nails in the wall. Rakes, hoes and other long-handled tools should be hung upside down to prevent warping.

Any broken tool handles should be replaced this fall, and broken metal parts should be taken to a welder for repairs. Clean spraying equipment thoroughly, inside and out. Take the nozzles apart and clean them. Oil the sprayer pump and store without screwing on the cap. The duster should be cleaned, too, and the duster pump should be lubricated with graphite.

Check all garden supplies and make sure that the unused seeds are stored in a dry, cool place. There will be adequate supplies of most seeds to meet demands in 1944, even though more gardeners will join the Yanks with hoe and spade in 1944. The U. S. Department of Agriculture estimates that the commercial pack of vegetables will be 5 to 10 percent smaller than in 1943. This reduction will likely be met by more new gardeners and larger and better gardens grown by those who grew vegetables in 1943. Wherever possible, town and city gardens should be not less than 30 by 50 feet or 1,500 square feet in size.

From gardeners in areas subject to dry weather, and especially gardeners in southwestern and western Iowa should make plans this fall to catch water for the garden area. Snow fences erected in a northwest-southeast direction across the garden will catch considerable snow. Additional water added to the subsoil in this way will help produce better vegetables in 1944.

FOR EDUCATION

"In times like these," comments Jesse M. Parker, state schools superintendent, "the responsibility for training the youth of the nation to become good citizens, remains and should be carried out with a crusade's zeal to insure the future welfare of America. We must gird our lives with the whole armor of truth and justice, foster a stronger belief in the righteousness of our cause, and continue to advance with a clear vision of our duty to youth, to the nation it will soon govern and to the God of our fathers whom we all revere."

Fight Our Country's Battles, Sing Marines; Combat Correspondents Tell How They Do It

Neck Scribe Ack-Ack, Waist-Gun

Following story was written by Sgt. Harry Bolser, Louisville, Marine Corps combat correspondent.

Now that I wiped beads of sweat from my brow a few minutes later I was told that I would be in a United States bomber on a mission into Japanese territory. I was nervous, I quit my type-writing and gathered up my flight log two hours before the designated time I was walking from one wall map to another, the operations hut of the 1st Marine Division on Guadalcanal to which I was assigned. Near midnight when a corvette came across the room: "Lieutenant, here's the marine sergeant talking to you." The senior army officer, slightly out of the temples, crossed the room and extended his hand. "Jerry," he said in an informal manner. "Glad to see you with us. You'll work waist gun."

Once and felt a lump form in my throat. My fingers squeezed

Lieutenant Crume explained to me that the crew decides before each bombing hop whether they will go down in their parachutes or make a forced landing.

Will Land in Water.

The decision that night was that if we get hit we would try to make a water landing. I concurred in the decision.

Jerry said he felt we would have a better chance to survive if we made a water landing and remained together in the rubber boat with which our bomber was equipped. He explained that the jungle surrounding the target was practically impenetrable. We would stand little chance to survive if we parachuted into the wilderness.

I listened intently to the discussion, but all the time I was saying to myself, "These guys think of the most pleasant topics."

Suddenly the chatter was smothered by the crack of one plane motor backfiring as it was started. In a few minutes we were deafened by the noise of all four motors.

Lieutenant Crume poked me and shouted in my ear: "All aboard."

I followed the crew as they crawled through the belly door. I was the last aboard. The others crowded forward. I found myself standing on the catwalk between the bomb racks. They were loaded to

crossed. We were caught between two Jap searchlights.

The co-pilot yelled: "They've got us in the lights."

I looked out the window just as another shell burst to our starboard side. The Jap searchlights blinded me and I jumped back, certain that I had been seen. A second later I felt silly.

Enemy anti-aircraft fire was bursting all around us. It was my first trip aboard a heavy bomber on a night mission. Yes, I was a little scared.

"Bombs away," Lieutenant Crume yelled.

I leaned out the window and looked down as Jerry banked the plane. The sky was illuminated by the searchlights and the anti-aircraft fire. It seemed only seconds before the first cluster of bombs landed squarely in a Jap bivouac area.

The Louisville bombardier's eye was keen that night. Bomb after bomb landed on the target.

Perfect Pasting.

I was unmindful of the shells bursting around our plane as I poked my head out of the window. The temptation to watch those bombs as they hit was too great. A feeling of pride engulfed me as each cluster found its mark. Here I was in the air watching a Louisville boy pasting the Japs. And he was doing a perfect job.

As Lieutenant Crume cut loose with the last clusters I could see huge fires burning below.

We didn't lose any time leaving the target after our bombs had been spent. Several miles away from the scene the Japs were still sending up anti-aircraft fire. But we had escaped. Later I learned from the rear gunner that two anti-aircraft shells burst just under the tail of our B-24.

Most of the crew slept on the return trip. When we landed long after dawn that morning, I gave Lieutenant Crume a lusty pat on the back and said: "You can bomb for my money."

And as we walked into the medical dispensary near the squadron's operations hut, I said: "Lieutenant, I don't suppose a marine has ever admitted the army is hot, but I want to say you boys have plenty on the ball."

I left Lieutenant Crume a few seconds later. I know he and his crew are still giving the Japs hell in the midst of the new Allied offensive in the Solomon Islands.

his jungle cemetery under blue tropical skies, these marines who the supreme sacrifice find peace. Comrades in arms bow their heads as the chaplain reads the funeral rite. (Official Marine Corps photo.)

on a lighted cigarette. I in a circle and picked out a table chair in front of a desk. The corporal who had introduced me to the pilot apparently had detected a change in the color of my face, because he chuckled and said, "You can concur by studying tonight's

and nothing, but I certainly appreciate his humor. A few minutes later I was shaking hands with the crew members of the big four-motored bomber. I was the co-pilot, bombardier, navigator, and four other gunners.

From 'Old Kentucky.'

of the gunners inquired: "You from, Sarge?" When I said, "Kentucky," the diminutive bombardier shoved his head out and said: "Boy, give me that's where I'm from, too. Louisville's my home."

so again, I was shaking the hand of the bombardier, Second Lieutenant W. Crume, U. S. Army, Louisville. We eased away from the group, sat on the steps of the operations hut and talked of mutual acquaintances back in Louisville. We boarded the truck for the

we rumbled along the bumpy road toward Henderson Field, where the plane awaited us. Lieutenant Crume assured me Jerry was an expert pilot and that he would bring me safely.

What about the Jap ack-ack, I asked. "There's not much Jerry can do about that. We can only hope the Japs don't get us in their searchlights tonight."

After 45 minutes we were to take Jerry to me, Lieutenant Crume said. "Bolser, we have a fine group of boys in our outfit. They're regulars. And you can see how they feel about this thing. There are only a few things they give a damn about. One is bombing hell out of the Japs, and the other is getting back over as quickly as possible. Jerry addressed the group. "I'll be this morning!" he said. "Will we bail out or stay here and make a water land-

ing. Jerry called back to prepare the waist guns. The other waist gunner and I opened the windows. I fed the ammunition belt into the gun and charged it. It was ready for action as I poked it through the window. The temperature at our height was so cold that my fingers were stiff by the time I had adjusted my gun.

A few seconds later I got the scare of my life. To the right of the plane a ball of fire burst. At the same time came Jerry's voice: "We're just about over the target."

I caught myself shying away as a second burst of fire came nearer our plane. Jerry didn't have to tell me. The Japs were spewing anti-aircraft shells up at us.

Two lights split the sky and

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute of Chicago. Released by Western Newspaper Union.

Lesson for November 14

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

THE SANCTITY OF THE HOME

LESSON TEXT—Exodus 20 14; Matthew 5 27-30, Mark 10 2-12. GOLDEN TEXT—"Blessed are the pure in heart. For they shall see God."—Matthew 5 8.

As the divinely appointed center of man's life, the home holds a place of such importance that it is the special target of Satan's offensive. That has always been true, but it seems that in recent years the onslaught against the home has been intensified.

Books, plays, movies, magazines, all contribute their filthy efforts to break down all sense of moral responsibility. Sex is magnified, and not in any useful or normal sense, but rather for the stimulating of unholy desires and purposes, the breaking down of Christian standards of living, and the ultimate prostitution of the most sacred of all human relationships to the lowest level of which animals might well be ashamed.

All this means that this lesson should be taught with a holy boldness and plainness which will make it effective for God in our homes.

We do not like to talk about adultery and related sins. We must speak with care and tact, but perhaps the time has come for some straightforward dealing with an unpleasant situation.

I. Protect the Purity of the Home (Exod. 20 14, Matt. 5 27-30).

Any violation of the divine plan for the marriage of one man and one woman, in loving communion for the founding and maintenance of the home, is a direct violation of the law of God.

It is also a violation of the law of man. It brings serious results in the destruction of the home, and in the ruin of individual life—physical, moral and spiritual.

The words of Jesus broaden the interpretation of the commandment to cover all sexual impurity in thought, word, or deed.

We are to be firm and definite in our dealing with this temptation to moral uncleanness even though it be as painful as tearing out an eye or losing a hand. The command here is not necessarily to be interpreted literally. Tearing out an eye will not help if there is lust in the heart. The point is, go to the root of the matter, and get rid of it even if it hurts. Most of us are far too easy on our sinful impulses. We dally with them when we should destroy them.

II. Recognize Marriage as a Divine Institution (Mark 10:2-8).

The Pharisees, who had devised some ingenious schemes for getting rid of an undesired wife, wanted to get Jesus involved in the question. They put him up against Moses who had allowed divorce.

Jesus made it clear that this was not in accord with God's plan and only took place because of their sinful hardness of heart.

As a proper background for the discussion of divorce He set up the divine origin of marriage. He made it clear that marriage was ordained by God, and that it involves a holy union of two individuals which makes them one.

All those who look forward to marriage should realize that it is not a casual thing, or a merely temporary legal contract. It is a union for life—be it for better or worse, in sickness or health, in prosperity or adversity. All who are married should highly regard their sacred vows.

The high place of marriage in Christian teaching dignifies that relationship and denies the misleading and destructive theories of men.

III. Follow God's Law on Divorce (Mark 10 9-12).

Failure to observe God's law in these matters may involve a person in the guilt of gross sin. This passage and others teach that divorce is to be permitted on the one ground of adultery (Matt 5 32).

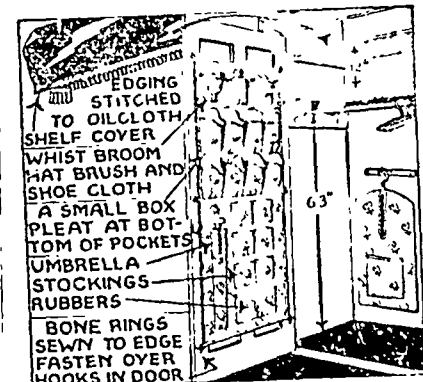

Divorce and remarriage other than on grounds permitted by God involves the parties in the sin of adultery. Men may make laws based on the civil contract of marriage which provide differently, but man cannot remove marriage from its place as a divine institution, nor can he add to or take away from God's law concerning it.

Aware, as we are, of the laxness of some branches of the church in such matters, and the almost entire lack of standards in the world, we cannot but present the plain teachings of our Lord and urge every reader to follow the commandment of God's Word.

There can be no question that divorce is a major evil in our day. Statistics are positively shocking, but they are cold and quickly forgotten. But who can fail to see, and who can forget, the awful woe brought into American home life by divorce.

Bad as it is, the awful effect on parents is nothing compared to the nervous, moral and spiritual shock which comes to children in broken homes. And that problem is everywhere.

Closet Accessories to Make as Gifts That Are Useful and Also Different

cloth with prepared edging as a finish. The dimensions in the sketch will give you ideas for remodeling your own closet.

NOTE There is no further need to be without enough closet space. Mrs. Spears has prepared a sheet of 22 inches containing step-by-step illustrations and directions for making the most unique and efficient closet you ever saw. There are a dozen or more places in almost every house where this type of closet may be built, in any size and depth from twelve inches or more. Send for Pattern No. 256 to:

had already fought for five days on Vangunu island, when we rushed north to join in the battle of Bairoko Harbor. We were ordered to take cover."

The story of the squad's last 25 minutes was disclosed, at a rear base camp, by Corp. William J. Esch. He told Staff Sgt. Samuel Esch, marine combat correspondent.

driving ahead. So we kept at it, and my squad got within 25 yards of the top, when all hell broke loose.

"Corporal Strauss was hit bad, through the chest. We picked up his tripod and ammunition and kept on."

"We almost made it. Only five feet to go, when Thornburg, an ammunition carrier, and Shipp, who was bringing up the gun, were hit. Thornburg was killed outright."

"Hacker grabbed up the machine gun, and stuck it behind the cover of

a banyan tree. We turned to give Shipp first aid. I was reaching into my pocket for the morphine, when a sniper's bullet pierced my helmet, but it only scratched my head.

"I still wasn't sure whether or not I'd been hit, but there I was, still on my feet, so I pushed up to the top of the hill with Hacker, and we got the gun in position, and fired a belt of ammunition before things quieted down. Then we got word back on our situation."

back on our situation."

County Went Over The Top In Recent War Fund Campaign

TOWNSHIP LEADS ALL WITH TOTAL OF 15 SUBSCRIBED

Towns In The County Went Well Over Their Quotas

Rock countians subscribed a total of \$17,474.16 in the recent War Fund drive, going substantially over the \$15,000 county quota, according to figures released late Saturday. Dr. C. V. Hamilton, chairman of the Hancock County War Fund drive, said that not all of the money raised was sent in to the National War Fund at this time, but the balance will be held to apply on future drives. In towns and townships that went over their quotas, the balance will be applied toward their drive for next year.

Towns Exceed Quotas

Amounts subscribed in the various towns are as follows, the quota for each town being in parentheses:

Adams (\$475)	\$584.61
Bellevue (\$175)	\$182.25
Berkeley (\$1500)	\$1,829.06
Bethesda (\$1700)	\$1,923.00
Boonville (\$400)	\$595.00
Central Lake (\$250)	\$310.00
Clawson (\$650)	\$883.50
Clinton (\$250)	\$269.50

All Leads All Townships

People of Ell township really stepped up their pocket books for the drive and stepped way ahead of the other fifteen townships of the county with a subscription of \$982.00. The quota for each township was \$600.

Amounts raised in the various townships were as follows:

Aberdam	\$716.34
Adams	\$570.55
Adams	\$855.15
Adams (incomplete)	\$250.00
Adams (incomplete)	\$265.65
Adams	\$678.25
Adams	\$712.05
Adams	\$982.00
Adams	\$801.00
Adams	\$622.00
Adams	\$800.50
Adams	\$799.00
Adams	\$586.50
Adams	\$871.75
Adams	\$672.00
Adams Lake	\$714.50

Anyone who was missed in the drive and would like to make a contribution, he may send it to Dr. C. V. Hamilton, Garner, or to V. D. Britt.

In connection with the very successful drive, Dr. Hamilton extended appreciation for the cooperation given by the workers and newspapers of the county.

MENTS CELEBRATED THEIR WEDDING ANNIVERSARY LAST SUNDAY

Mr. and Mrs. Wallace Pavey and daughter, Mrs. John Clements were guests at the Jim Pavey home at Adams, Sunday where Mr. and Mrs. E. M. Pavey, parents of Jim Wallace celebrated their 60th wedding anniversary with a big party.

LE OF HOUSEHOLD GOODS SATURDAY

Mrs. Ethel Swanson Peterson is this week using the columns of the Times to advertise her sale of household goods.

The sale will be held at the Community Hall Saturday afternoon of this week.

Read Mrs. Peterson's advertisement for further details.

CHRISTMAS SEALS GO IN MAIL MONDAY A. M.

All of the Christmas Seal sales material will be mailed out Saturday, all over the United States, so that on Monday morning everyone should receive their packet of Christmas Seals.

Mrs. Martha Bredbenner, local chairman, announces that she has again made arrangements to have a box at Lau Bros. Store where you can deposit your envelopes as soon as possible.

Buy Christmas Seals and put one on every letter and package you mail out between now and Christmas. It not only adds a cheerful decoration to your mail, but aids in the fight against tuberculosis.

Hancock county has at this time eight patients who are being helped by your purchase of Christmas Seals.

Canada and Mexico are also using the same stamp this year.

YOU ARE FREE TO BUY THANKSGIVING TURKEY

People of Iowa are assured that the traditional turkey will be available for the Thanksgiving dinner, but prices will be somewhat higher, says Ralph Baker, poultry marketing specialist at Iowa State College. Iowa's crop of about 1,800,000 birds is given as reason for the statement.

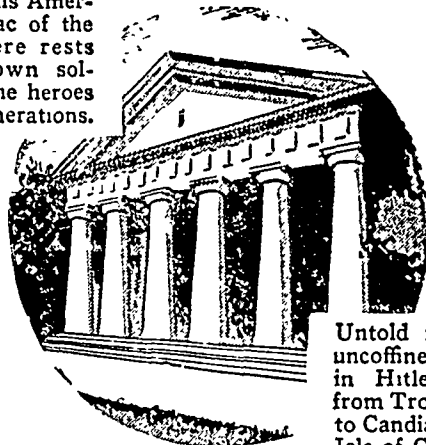

Recently revised turkey price ceilings should result in Iowa producers receiving about 3 cents per pound more for turkeys than last year. Most young hen turkeys will probably bring the producer around 34 1/2 cents and most young toms 30 to 32 cents on a live basis.

Consumer prices on dressed young hen turkeys will undoubtedly range from 47 to 52 cents; while young dressed toms will cost Mrs. Housewife from 42 to 52 cents, depending on size and quality. Prices for drawn turkeys will be 8 to 10 cents higher.

Turkey raisers are now free to sell their birds to anyone they wish, Baker says. The embargo on sale of turkeys to civilians was suspended Oct. 25, at which time the army requirements for fighting men overseas were completely filled and commitments assured the needs of those at home.

BONDS OVER AMERICA

Untold millions sleep uncoffined, unknelt in Hitler graveyards from Tromso, Norway, to Candia on the Greek Isle of Crete, men and women like ourselves who sought only to make the world a better place.

Goodell High School Will Open Cage Season Against Shamrocks

FIRST BASKET BALL GAME OF THE SEASON FRIDAY NIGHT

Goodell High School basketball team, ancient Shamrock rivals will open the basketball season here on Friday night of this week, November 19th.

This promises to be a good game as anything can happen when the Shamrocks and Goodell get together on the basketball floor and most often these two teams have won a nip and tuck battle in the last minute of play.

All but Greiman of last year's powerful Shamrock team graduated last spring, and Coach Esbeck will have an entirely new combination of players this year.

Two games will be played. The grade school game will begin at 7:00 p. m., while the high school game will get under way at 8:00 o'clock.

Superintendent Is Coach

For the first time in the history of Klemme High School athletics, the Shamrocks this year did not have a regular coach, because of the war it was not possible for the school board to locate a capable man for the job.

However, Supt. Leo Esbeck has taken over the regular coaching of the Shamrocks, and from all reports from the "side-line" coaches and fans, he is doing a good job of it.

Before coming to Klemme, Supt. Esbeck coached the Andrew, Iowa high school basketball squad thru fourteen successful seasons.

Although the ranks of the Shamrocks were depleted by graduation last spring, Supt. Esbeck hopes to build up a team that should win a good share of the Class B games during the season, and may even throw a scare into some of the Class A teams on the schedule.

MRS. ARTHUR KUDJE ENTERTAINED BRIDGE CLUB

Mrs. Arthur Kudje entertained the members of the U-Delt-Em club at her home Thursday afternoon. The high score in bridge was won by Mrs. R. A. J. rgenson; second high, Mrs. C. G. Waterman and 3rd high by Mrs. Edna Thada.

MRS. SUMNER TRUMBELL HOSTESS AT PARTY

Mrs. Sumner Trumbell entertained a number of ladies at her home last Wednesday afternoon at bridge, which was followed by a lunch.

Mrs. Verle Keraus of Garner won high score; Mrs. E. C. Buntentbach, second high, and Mrs. Keith Albertson, low score.

Eastern Star Will Put On Work In Initiatory Degree

A pot luck supper at 6:30 o'clock next Tuesday evening, November 23, will precede work in the initiatory degree of the Eastern Star at Garner. All Klemme members are urged to be present.

NEW SHAMROCK COACH

SUPT. LEO ESBECK

PURCHASED HALF BLOCK IN KLEMMME

John Chambers has purchased the former John Grutzmacher residence and four lots in the south part of town from Mrs. Paul M. Gruesemer of Garner.

On one of the vacant lots west of the present house, Mr. Chambers has excavated a basement and will move a house in from the country to place on that lot.

He expects to do some remodeling of the present house whenever conditions warrant.

Mr. and Mrs. Chambers expect to move to town later.

Purchased House In Klemme

Mr. and Mrs. Harvey E. Barz completed a deal the latter part of the week whereby they purchased the late D. D. Ross house, located just west of the Methodist church. The Barz family have resided in the house for some time.

Mrs. Dick Swalve recently purchased the Mrs. Mart Bachman residence on East Main Street, where she has been residing for several months. We understand that she plans to do some remodeling later.

MEETING HELD AT METHODIST CHURCH ARMISTICE DAY

The Study Group, Mission Defenders of the Methodist Church, combined World Community Day with their regular monthly meeting on Armistice Day at the church.

Mrs. John Chambers led the devotions and Mrs. Elmer Arnold had the lesson on "The Caste System."

Eighteen members were present and home-made coffee cake, cookies and ginger-bread with coffee or tea was served.

KLEMMME STORES WILL BE CLOSED TURKEY DAY

Klemme business places will observe Thanksgiving Day by remaining closed all day, Thursday, Nov. 25th.

Bear this in mind and do your Thanksgiving shopping the day before.

Our Men In The Service

FORMER TIMES PRINTER IS AWARDED IN ITALY

Corporal Otho Keraus, who is with the U. S. Army in Italy has been awarded the good conduct medal according to word received by his parents, Mr. and Mrs. W. C. Keraus.

The citation said he merited this honor because "He has demonstrated his fidelity through faithful and exact performance of duty. He has shown his efficiency through capacity to produce the desired results. His behavior has been such as to deserve emulation."

FORMER KLEMMME YOUTH JOINS MERCHANT MARINE

Wayne Herd, former Klemme young man, and son of Mrs. Henry Herd, recently enlisted in the U. S. Merchant Marines, and is now stationed in Florida.

Wayne's address is: Wayne Stanley Herd, Division 236, U. S. M., S. T. S., Vinoy Park Hotel, St. Petersburg, Florida.

STENUS HARMS TO HOLD PUBLIC SALE NOV. 26

Stenus Harms is this week advertising a Public Sale to be held at the farm 7 miles east and 1 mile north of Klemme, on Friday, Nov. 26th.

Mr. Harms is quitting farming and will move to Klemme, having purchased the Walter Kimball property in the north east part of town.

Mr. Harms will dispose of a lot of good farm machinery, 7 head of horses, 43 head of cattle, 65 head of hogs, 13 bred ewes, hay and feed. Turn to his advertisement in this issue for complete listing.

Two Klemme Couples Married Past Week

LITTLE BROWN CHURCH ATTRACTED ONE COUPLE

Carpenter - Hummel Ceremony Held At Des Moines Church

Two Klemme couples exchanged marriage vows during the past week, both ceremonies being held in other towns.

On Wednesday afternoon the famous Little Brown Church near Nashua, Iowa, was the scene of a marriage ceremony when Miss Bernadine Swangler of Britt became the bride of Luther Schmidt of near Klemme.

Mr. Schmidt, who was recently given an honorable discharge from the U. S. Army after about a year's service, and his bride will reside in the Albert Schmidt house in the north part of town.

A reception and dance was held at the Klemme Community Hall on Tuesday night in honor of the newlyweds.

The U. B. Church at Des Moines was the setting for an Armistice Day wedding ceremony when Gertrude Johnson - Carpenter became the bride of Dwight Hummel, both of Klemme.

The ceremony was performed by Rev. Herben, former pastor of the Goodell U. B. Church at 4:30 p. m.

The contracting couple was attended at the altar by Miss Jacqueline Kudje, niece of the bride, as bridesmaid, and Hugh Hummel, brother of the groom, was best man.

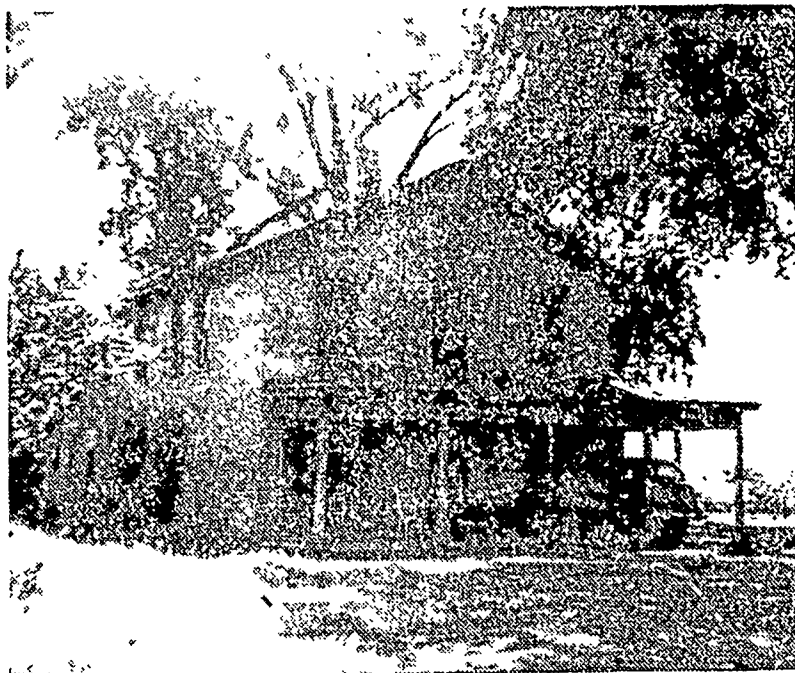

The bride wore a royal blue suit with black accessories.

After spending a ten day honeymoon the couple will return here to reside in their home south of the school house.

Until recently Mrs. Hummel was employed as assistant at the local post office, which position she held for the past two years.

Mr. Hummel has been employed for several years by the Hancock County Co-operative Oil Association as their tank truck salesman in the Klemme district.

Restoration Of Gov. Lucas' Home Begun

Picture Of The Home Of Iowa's First Territorial Governor

Emergency restoration of Plum Grove, the home of Iowa's first territorial governor at Iowa City, has been started. When woodwork, which are walnut, will be brought back to their ornament by the State Conservation Commission.

Plum Grove, acquired by the state in 1941, was built in 1844 by Governor Robert Lucas, who lived there until his death February 7, 1853. The governor named his Iowa City home Plum Grove because of the dense plum thickets which surrounded it. The grounds surrounding the house will be restored as nearly as possible to their original state with wild plums, white oaks, wild roses, white lilacs, and Hemerocallis predominating the plantings.

The immediate improvements for which the legislative interim committee has allocated \$3,225 will include only those items which must be done at once to protect this historical building from further disintegration.

Later the brick work will be restored to its warm rose color by the removal of the burnt amber paint which now covers it. Eventually the floors, which are oak, and the interior doors and completed after the war, it will be administered as a historic monsignial beauty. Every room had a fireplace. These have been blocked off for over a half century. They, too, will be restored. The most outstanding detail in this house, which is representative of a frugal and pioneer period in our state's growth, is the solid walnut staircase which leads to the second floor.

Upon the completion of the restoration, Plum Grove will be furnished with the furniture from the home of Iowa's Civil War governor, Samuel J. Kirkwood.

Ink Spots
And Spatters

By Jergle

SO YOU THINK YOU
HAVE TROUBLES?

While you are thinking about your troubles today, wondering where you can get the strength to carry them, try this: Put them all in a bag, throw into an empty room and close the door. It will not easy, but you can do it.

Now let your thoughts pick up some threads of long ago, think back to the year 1621. Let the site be in a little clearing on that old "stern and rockbound coast" that is in New England. Glancing about your mind's eye will see perhaps a dozen or so very crude houses, even more crude, indeed than those which gave shelter to little Abraham Lincoln, or Andrew Jackson, or your own pioneer forefathers, for these of our earliest builders were not trained woodsmen nor clever axemen.

You shiver as you look out over the tidal flats of the bay, for it is cold. You can see no ship resting at anchor there to take you back to friends and loved ones in a home 3,000 long, weary miles away.

Then beyond the little clearing, on a hill, are little mounds of earth, new graves; as many graves as there are living people in the little settlement around you. They are the toll of but one single winter, no family had been spared a trip up that little hill. And, another cold winter is upon you, for it is early December.

In the woods behind you, ranging how far you do not know, are unknown thousands of primitive red savages. Thus far they have been friendly. How long they will be friends, is not a comfortable thought.

A man steps out of one of the crude houses and posts a piece of paper on the door of the largest building. You join the little group as its message is read aloud. This is what it says:

"It is ordered that the 11th day of December throughout this jurisdiction shall be set apart for a day of Thanks giving to Almighty God for His great and victorious services to our dear native country, for the comfortable and seasonable supplying us with moderate showers, and His mercy in drawing His afflicting hand from us."

That was the first Thanksgiving proclamation of William Bradford, Governor, at Plymouth in 1621.

Now you leave the past and return to the present. Now you can again think of your own troubles locked up in that empty room. Go open the door again and pick up your bag of troubles where you left them. What your troubles now weigh only you can say. Our own pack of troubles has suddenly become very light. We are living in the year of 1943, and despite the war, we have a great deal to be thankful for on this Thanksgiving day!

NOT A GOOD DIET

A hog on the John Dotseth farm of Frankville township, Winneshiek county, ate concrete. Dotseth was building a new hog house and the animal started eating some of the concrete that dropped at the edges of the building. Now Dotseth reports that he has lost one of his good spring pigs.

Hancock County Board Proceedings

REGULAR NOVEMBER MEETING

Garner, Iowa, November 8, 1943
The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn Eckels and John Chambers present.

The minutes of the last meeting were read and approved as read. In the matter of a hearing on the cleanup to grade of the open ditches of D. D. No. 14 Hancock County, Iowa, petitioned for by J. H. Corzine, et al. This being the 8th day of November, 1943, a date heretofore set for a hearing on the petition of J. H. Corzine, et al. for cleanup to grade of the open ditches in D. D. No. 14, Hancock County, Iowa, and the report of the Engineer thereon, the hour for said hearing having arrived, the proof of publication of notice of said hearing being on file and the Board being fully advised, said hearing was held as scheduled.

The petition and the report of the Engineer and all objections on file were read by the Auditor. Thereafter all proponents for the cleanup and all objectors were granted an oral hearing.

The matter of inclusion of lands benefited by construction of D. D. No. 14, Hancock County, Iowa, and not now included in the original classification of said district was discussed as well as the reclassification of said district in accordance with the command in section 7562, Code of Iowa, 1939 and amendments thereto.

After hearing all objectors and proponents, Chairman F. J. Schoun presented the matter of proceeding with the cleanup as petitioned provided District No. 14 be reclassified in accordance with section 7562, Code of Iowa, 1939 and amendments thereto and additional lands receiving benefit and not in the original classification be added. No objection was raised to this proposition. The Board now being fully advised.

THEREFORE BE IT RESOLVED by the Board of Supervisors of Hancock County, Iowa, acting for and in behalf of D. D. No. 14 that the prayer of the petitioners be granted, the reports, plans and recommendations of the Engineer as amended be approved, and the repairs petitioned for be ordered made and established according to plans, specifications and recommendations of the Engineer as amended.

BE IT FURTHER RESOLVED that the County Auditor be and he is hereby directed to give notice by publication of once each week for five consecutive weeks in the Garner Leader-A-Signal, newspaper published in Garner, Iowa, of the time and place of letting the approximate amount of work to be done, the time for commencement and completion thereof, that bids will be received on the entire job and bidders will be required to deposit a certified check on some Iowa bank with the County Auditor as required by law.

BE IT FURTHER RESOLVED that said letting shall be held before the Board at the Courthouse in Garner, Iowa, at 1:30 P. M. on December 6, 1943. Sealed bids shall be filed with the County Auditor on or before the hour set for letting. The Board reserves the right to waive technicalities and to reject any or all bids.

BE IT FURTHER RESOLVED that Wm. Henschen be and he is hereby appointed a commissioner to classify additional lands to be included in Hancock County D. D. No. 14 where said lands receive a benefit by reason of construction of said district and are not included in the original classification of said district. Said commissioner is hereby ordered to file his report on or before the 9th day of January 1944, setting out the percentages of assessment on the main and laterals in said district.

BE IT FURTHER RESOLVED that D. D. No. 14 Hancock County, Iowa, be and the same is hereby ordered reclassified in accordance with section 7562, Code of Iowa, 1939, and amendments thereto, setting out the percentages of benefits on the main ditch and the laterals hereof against the tracts and highways and railroads in the district.

BE IT FURTHER RESOLVED that Wm. Henschen, C. A. Frisbie, and H. Armstrong be and they are hereby appointed commissioners to reclassify portion the benefits as commanded in section 7562, Code of Iowa, 1939, and amendments thereto. Said commissioners to file their report on or before the 9th day of January 1944, setting out the percentages of assessment on the main and laterals in said district.

On motion and second the Board adjourned to November 22, 1943, at 9:00 o'clock A. M.
ATTTEST

REUNION

E. O. Stafford and his son, Erwin Stafford, recently met for the first time in 42 years. The elder Stafford has lived in Washington state for many years and had heard of the marriage of his son, the birth of grandchildren and more recently a great grandchild. Erwin Stafford, now 44, has been living near Decorah. The two did not recognize each other when they first met.

FURNACE REPAIRS

Rely on us to keep your furnace in good shape. Genuine repair parts for Green Colonial furnaces are still available promptly.

NEW FURNACES?

If your furnace is beyond use or repair you can still buy a new Green Colonial. Your installation will have to be made in time, but a Green Colonial furnace is WORTH waiting for. Ask us about it.

RIGHT TEMPERATURE FOR POTATOES IS IMPORTANT

A thermometer hung in the basement room where the potato crop is stored may play an important part in bringing the potatoes through the winter with a minimum of spoilage, says C. L. Fitch, vegetable crops specialist at Iowa State College. The ideal temperature for potato storage is 37 to 40 degrees. This temperature, and prevention of drafts across the room, prevent loss of much moisture from the potatoes. Fitch states that loss of moisture is an important cause of spoilage.

The basement room which is entirely apart from the furnace room is a good potato storage place from the standpoint of temperature but is not as desirable as the outside cave.

Potatoes should be kept in a layer of not more than 1 to 2 feet depth on the floor. Keeping the room dark by covering the windows helps prevent spoilage. Should spoilage develop, the potatoes should be sorted.

KNOCK-OUT BLOW

A pheasant crashed through the windshield of the Oscar Woods automobile as they were traveling west of Northwood, knocking Mrs. Woods unconscious. The lay's glasses were broken and she was scratched on her head, but has now fully recovered from her injuries.

STATEMENT OF THE OWNERSHIP, Management, Circulation, Etc., Required by the Acts of Congress of August 24, 1912, and March 3, 1933

Of the Klemme Times published weekly at Klemme, Iowa, for October 1943.

STATE OF IOWA,
County of Hancock, ss.

I, Before me, a Notary Public in and for the State and county aforesaid, personally appeared R. A. Jorgenson, who, having been duly sworn according to law, deposes and says that he is the Editor and Owner of the Klemme Times and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, as amended by the Act of March 3, 1933, embodied in Section 537, Postal Laws and Regulations, to wit:

1 That the names and addresses of the publisher, editor, managing editor, and business managers are
R. A. Jorgenson Klemme, Iowa,
Klemme, Iowa

2 That the owner is R. A. Jorgenson, Klemme, Iowa

3 That the known bondholders, mortgagees and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages or other securities are None.

R. A. JORGENSEN, Editor & Owner
Sworn to and subscribed before me this 16th day of November, 1943
(SEAL) C. G. Waterman,
Notary Public

BELMOND SUGAR PLANT TO PROCESS SOY BEANS
A construction company is now at work converting the sugar beet mill at Belmont into a soy bean plant for General Mills of Minneapolis.
Total food production for the year ending June 30, 1944, is expected to be the largest in the nation's history. Iowa State College economist point out

TAMINA
It cars have it. Fighting men have it. Doing the world's best jobs, they have to have stamina—lots of it!
Must be big and strong... big enough to carry sixty tons; strong enough to stand the tug of the locomotive, like links in a chain to pull thousands of the other cars of long wartime freight trains. And up under this treatment, year after year, takes stamina—plenty of it!
Strength is built into all types of railroad equipment. Loading is a tough business... stamina without stint required to provide the rail transportation necessitated by the war.

ROCK ISLAND, because of its stamina, is now speeding its pace of the men and materials of war; and when final day comes, a rugged ROCK ISLAND will be ready to serve the increased transportation needs of our greater America.

Yesterday—and today—so tomorrow ROCK ISLAND'S purpose is to provide the finest in transportation.

BUILD NATURAL STAMINA • BUY MORE WAR BONDS

Around Iowa

VISITS ENGLAND
Allen Kline, Benton county farmer, is making a trip to England at the request of OWI, to make public addresses in different parts of the British Isles. He represents American agriculture in the OWI excursion, which will include their prominent Americans.

SAVES TIME
Ben Grammas of Grundy Center has in past years had a name for himself as a speedy hand on a husker. This year he is making better time by using a two-row machine. To save crib room he has been shelling and selling his surplus corn as fast as he picks it. Each afternoon and part of the night he fills a 1,500 bushel crib, the next morning he shells it and takes it to the elevator. One day after the corn is husked, it is in a processing plant in Cedar Rapids.

NO FUN
Lamoni boys didn't think it was as much fun to put a tractor wheel back into place as it was to remove it. Halfway through the night the boys were looking for something to do. They were tired of leaning against the wheel of a local business house. A lion was called for and the boy started rolling the wheel down the street and had found a suitable location for it when some boys told them said, "All right boys, now let's take it back." The night marshal had seen the boys and then superintended the job of replacing the wheel.

PERFORMER
Harry Avery, Rock Island station agent in Emmetsburg and his co-actor Bob Dyson, have taught Blackie, Avery's pet dog some new tricks. They have fixed an agent's cap Blackie's head size, which they put on her. Blackie will lean on top of a high counter stool, with her hat rakishly cocked on one side. She will then accept a cigarette, which is placed in her mouth. At another command she will dance for her audience. Blackie has refused to make a habit of cigarettes.

NEW SCHEDULES
The ODT ruling that milk deliveries may be made only every other day had at least one delivery horse baffled for a time. John Arnhalt of New Hampton changed his schedule as requested, but his horse Mac could not understand the reason for a day of rest. When it was necessary to reroute the delivery schedule, Mac tried to get Arnhalt

FOR THANKSGIVING DINNERS...

to go the old way. After another day of rest and back on the route, Mac made the new route without an error.

SUIT STOPPED
A \$20,000 insurance suit against an insurance firm by Mrs. Patrick J. Ryan of Corning, was stopped when Mr. Ryan appeared on the scene. Mr. Ryan disappeared in 1932 and had not been heard from since that time. He was located by the insurance company working in Great Bend, Kansas. He had made no attempt to hide his identity in all that time.

CATCHES UP ON WORK
Ralph Railsback of Osceola put a sign in his shoe repair shop window stating, "Closed to Catch up on Work." Work has been coming in so fast that Mr. Railsback was unable to take care of all of it. He will now open the shop a short time in the morning and late afternoon until further notice.

HUNTER
Age does not keep Joseph Schneberger, 85, of Calmar, from continuing his favorite sport—hunting. Last week he accompanied his son Hugo Schneberger of Iowa City, on a pheasant hunting trip. The elder man bagged his limit with a 10 gauge shotgun.

NOVEL IDEA
Many firms have shown pictures of service men and women in their store windows, but it was up to Mr. Colon, manager of the Colonial theater in Hamburg to put them in to sound films and showing a group each week. The new feature is very popular with home folks.

WAR CASUALTY
Cigar smokers of Lake Mills are turning to pipes due to the shortage of cigars. For the first time in over 60 years, the Stensrud Drug store in Lake Mills was recently out of cigar stocks.

FREEZING APT TO RUIN CREAM SEPARATOR BOWL

Freezing of separator bowls is a hazard that comes with cold weather. A bowl left standing overnight with water in it may be broken, or parts such as discs may be bent and the bowl thrown out of balance so that it no longer does a good job.

Discs may operate improperly because of ice particles forming between them. By the time the ice particles are melted by the warm milk, the obstruction has caused clots of cream to form. The resulting clogging of the narrow spaces between discs forces cream out of the separator with the warm milk.

A. W. Rudnick, Iowa State College extension dairy industry specialist, says that the clogging from ice can be prevented by running some warm water through the separator before the milk is turned on. If hot water is used, and the bowl is not free from milk when the water is poured in, the curd may be cooked on the inside of the bowl. This curd, when cooked, may cause clogging, hence it is important to use warm water.

KLEMME LOCALS

Mr and Mrs Hugh Hummel of Liberty township, were visiting in Des Moines last Thursday.

Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, and Mrs. C. E. Kluckhohn were Mason City visitors today, Wednesday.

Mr and Mrs Fred J. Arnold entertained to a pheasant and roast mallard duck dinner Sunday. Dr. and Mrs. C. B. Tice of Mason City and Mrs. C. A. Arnold and Miss Minnie Lenz of Klemme.

Geo. Dodd, who has been employed the past few years at the E. J. Arnold farm, is now employed by Mitchell Bock east of Klemme. The Dodd family moved to the Bock farm Monday.

HELLO, FOLKS!

Mr and Mrs Ira Overholt are grand parents again as they received word last Friday night from their son, John Overholt and wife of Farmington, Pa., that a baby son had arrived at their house and was ready to carry on the Overholt banner.

LOST
LOST—TWO DAVENPORT PILLOWS Monday while moving from the E. J. Arnold farm to the Mitchell Bock farm. Finder please notify Mrs. Geo. Dodd, Klemme, Route 1, or phone 151-F28. Itc.

SOME FERTILIZERS ARE NOT VERY PLENTIFUL

There'll Probably Be Enough Nitrogen And Phosphate But Not Potash

Prospects for production of as much 18 and 20 percent superphosphate as Iowa farmers are likely to demand in 1943 appear good in spite of labor shortages and transportation difficulties. That report comes from fertilizer manufacturers, according to B. J. Furkins, of the Agronomy Department at Iowa State College. It is unlikely that any treble superphosphate will be available.

Indications are that there will be sufficient nitrogen to meet all demands both for mixed fertilizers and for side and top dressing. Increased production of nitrogen fertilizers will be mainly in the form of ammonia and ammonium nitrate. All of the ammonia and some of the ammonium nitrate will be used in mixed fertilizer. More of the ammonium nitrate, a substantial quantity of nitrate of soda, both synthetic and Chilean, and in some areas, cyanamid and cal-nitro, will be available for side and top dressing.

Potash Exported

A shortage in potash supplies seems certain. Although production of potash is at an all-time peak, heavier demand for industrial and chemical uses and allocation of some potash to Great Britain and Canada indicate that the supply of potash for use as fertilizer will be somewhat smaller than the quantity used in 1942-43. Although the shortage should not be serious every farmer who uses potash fertilizers should plan to use them where they will be of most benefit. Furkins points out that farmers who wish to obtain commercial fertilizers are asked to obtain the fertilizers according to wartime regulations which are administered by their County USDA War Boards.

"A" Crops First

Field crops designated as "A" crops which have first call on available fertilizers, include hemp, hybrid corn for production of seed, sweet corn for processing, and cabbage, carrots, tomatoes and a number of other vegetables. Other crops on which fertilizer may be used are designated as "B" crops. Wartime regulations also have set 4-12-4 as the approved grade of Victory Garden fertilizer for the Midwest states in 1944.

FINGERS MISSING

Fingers were at a premium in Val one day recently. Mrs. Fred Hawley lost the middle finger of her left hand in a corn elevator, when she went to tell her husband about a neighbor, William Bennett, losing his finger in a corn picker earlier in the day. Ray McAndrews lost a finger when his hand became caught in a corn elevator.

WEEKLY NEWS ANALYSIS

Allies Prepare Heavy Blows in Italy; Jugo-Slav Guerrillas Threaten Nazis Despite Outbreaks of Factional War; New Cattle Subsidy Plan Is Announced

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Riding in jeep, Gen. Dwight Eisenhower (left) and Lieut. Gen. Mark Clark pause during front line tour to chat with British soldiers on Bren gun carrier.

EUROPE: Prepare Attack in Italy

Lieut. Gen. Mark Clark's Fifth army edged into position for a grand assault upon the Germans' new defenses along the 2,500-foot high Masicco ridge in southern Italy, while the Nazis prepared to meet the charge by massing artillery and mortars on the front.

On the Adriatic side of the battle-line to the east, Gen. Bernard Montgomery's Eighth army also drew up into position for the next big blow by crossing the short Trigno river at several points.

Meanwhile there were indications that the Germans might be planning a strong counter-offensive of their own somewhere in central Italy. Allied reconnaissance reported the steady flow of Nazi troops and materiel from the north toward the battle zone. No such counter-offensive was expected, however, unless the Germans' defense weakened Allied attackers and drew them into open country where Tank Specialist Erwin Rommel could maneuver armor.

Nazis Fight Guerrillas

Pesky guerrilla activity in Jugo-Slavia commanded the attention of the Germans, with Marshal Rommel dispatching strong mechanized forces to quell the armed bands disrupting communications and destroying industrial plants.

But the effectiveness of Jugo-Slav guerrillas was threatened by another outbreak of factional dissension between the forces of King Peter's government and the new so-called "freedom army" of Tito Broz, which fought independently.

While the two political organizations reportedly have been harassing the Germans from one end of Yugoslavia to the other, they also have been accusing one another of collaborating with the Nazis. Broz' faction sentenced 17 persons to death for such collaboration, including a former Jugo-Slav general.

In attempting to wipe out the two guerrilla armies, the German armored columns drove into the hilly country to which Jugo-Slav riflemen retire for cover.

TAXES:

Plan 2 Billion More

Opposed to any form of sales tax, the house ways and means committee was prepared to report a new tax bill for congressional approval, yielding only two billion dollars of revenue instead of the 10½ billion dollars asked by the treasury.

Of the two billion dollars, 600 million would be raised by new liquor taxes. Levies on spirits would be boosted to \$10 a gallon, on beer to \$8 per barrel, and on wine from five cents to \$1 a gallon.

Other revenue would be obtained by increasing postal rates to three cents on local mail, air-mail to 10 cents an ounce, money orders 10 to 37 cents, insured mail 10 to 70 cents, and COD mail 24 cents to \$2.40. General admissions would be raised to three cents for every 10 cents; electric light bulbs and tubes would be taxed to 15 per cent of the retail price, and there would be a levy of 20 per cent of the charge on bowling, and \$20 per billiard table.

If a sales tax were enacted, the CIO had warned that it would demand wage increases to cover additional purchase costs.

HIGHLIGHTS . . . in the week's news

ORE: Low-grade mines producing metals other than iron and copper were ordered closed down by the War Production board. Officials explain that production of several vital metals has outstripped the need. Premium prices to some mine owners were withdrawn, and imports of some ores banned. Hardest hit are "war baby" mines yielding bauxite, lead, chrome and molybdenum.

FRUIT: The air lines will haul fresh fruit in quantity after the war, predicts Sigmund Janas, president of Colonial Airlines. He believes that this swift transportation will eliminate the need of heavy packing and icing.

NORMANDIE: The former French luxury liner, the Normandie, has been completely refitted and turned over to the navy.

VETS: Schooling Asked

Following recommendations of a committee of educators, President Roosevelt asked congress to appropriate one billion dollars for schooling of vets with six months service after the war.

Any qualified man or woman would be eligible for one year of study in a college or other educational institution, with the government paying the tuition and \$50 living expenses for every single person. A married man would receive \$75, with \$10 extra for each child.

For persons with special aptitudes, it was proposed that the government finance their education up to three years. States would be in control of the program, certifying vets for assistance. About 8 per cent of the personnel of the armed services would take advantage of the educational opportunity, it was said.

People Make News

Decorated for meritorious service as a gunner in a bombing raid over France, Capt. Clark Gable returned to the U. S. with 50,000 feet of colored film of army combat missions over enemy territory. Gable was to return to Hollywood to touch up the pictures.

Gable

One of the youngest gobs ever to see action with the U. S. fleet, Walter ("Fuzzy") Cadwalader was discharged from service when his true age was discovered to be 15. Young Cadwalader had gone off to the wars at 14.

Cadwalader

RUSSIA:

Reds Tighten Noose

German armies fought desperately to draw themselves from the noose Russia's surging forces were attempting to pull tight in the great bend of the Dnieper river.

To the south, the Reds spilled over the flat steppes west of fallen Melitopol, and raced to thwart Germany's withdrawal of its forces from the Crimea.

Action along the whole southern front centered around the Russians' attempts to surround and smash the German armies threatened with encirclement from the rear, and the Nazis' desperate efforts to hold off the Reds with heavy counter-attacks while the bulk of their troops dropped back to the west, on the edge of the 1941 European border.

FOOD:

Margarine Tax

Because of growing opposition from the dairy bloc, a stiff fight loomed in congress over the proposal to eliminate federal taxes and restrictions on margarine.

While more consumption of whole milk was advocated, with "good" margarine substituted for butter, Representative August Andresen (Minn.) declared additional feed would supply sufficient milk for all purposes.

Consultant to the food and drug administration, Dr. A. J. Carlson of the University of Chicago, stated that present "good" margarine has nutritional values equal to butter, and tax laws strike at the poorer classes in most need of adequate nutrition. When the margarine tax was first enacted, he said, there was occasional fraud in the sale of the product and there was less information on nutrition.

Because cottonseed oil is an ingredient of margarine, there were charges that the congressional cotton bloc was interested in repealing the tax and restrictions.

INSURANCE:

Monopoly Question

With the controversy of whether or not the insurance business constitutes a monopoly brought up again with the Supreme court scheduled to pass on the question, Attorney General Francis Biddle urged congress to defeat a bill designed to exempt insurance companies from provisions of the anti-trust laws.

Atty. Gen. Biddle

Under terms of the bill, the anti-trust laws would not be construed as regulating insurance, or as impairing state regulation of that business.

"It would establish a dangerous precedent," Biddle said, "under which other groups of special interests might apply for and receive immunity from the anti-trust laws; thus by a process of attrition, whitening away the gains made toward preserving and strengthening the system of free enterprise."

LIFT BLACKOUT:

Coasts Affected

Coastal cities can turn their lights on again. The war and navy departments have withdrawn the order requiring a partial blackout along the waterfronts, to prevent our ships being silhouetted against the sky. Such clearly outlined ships were an easy target for prowling submarines.

Because the submarine peril is much reduced, the military officials believe the blackout no longer necessary, it was announced. The order was effective November 1.

Washington, D. C.

RUSSIAN RELATIONS IMPROVE

The diplomatic grapevine reports that inter-Allied relations with Russia are going pretty well now. This is certainly true on the surface, and while some irritations have occurred below the surface, both sides have shown a real tendency to try to get along.

Most serious sub-surface irritation was over the Mediterranean Council, through which Russia, the United States and Britain were to confer regarding Italy, North Africa and the Balkans.

The Russians, snubbed earlier in the summer regarding preliminary Italian armistice terms, took the Mediterranean Council seriously and appointed as their representative Andrei Vishinski, the famous prosecutor in the Russian purge trials. This was the equivalent of sending the most outstanding member of the U. S. Supreme court or the leading lawyer of England.

Vishinski is a man of national stature, capable of making Mediterranean decisions without consulting Moscow. But to represent the United States on the Mediterranean Council, Secretary Hull sent Ed Wilson, U. S. ambassador to Panama. Wilson is a thorough-going, competent diplomat who can handle any routine job and handle it well. But almost no one outside diplomacy or Panama has heard of him. He has no national stature and he cannot act on his own.

Immediately it developed that Wilson was to act as a glorified messenger and report everything back to Washington. The British representative was to do the same. In other words, Churchill and Roosevelt were to make the decisions, and the much publicized Mediterranean Council was to be a mere reporting agency.

This immediately roused Russian wrath. They had welcomed the Council, appointed a top man. So for a moment they considered withdrawing. However, for the sake of Allied harmony, they stayed on and are giving the Mediterranean Council a trial.

POOR 'PA' WATSON

Toughest job White House Secretary Maj. Gen. Edwin ("Pa") Watson of the White House secretariat has to tackle each day is keeping the President's appointment schedule on time.

Frequently FDR will sit talking to an old friend for 15 or 20 minutes over the allotted time, and that snarls the White House schedule for the rest of the day.

This is hard on the general's nervous system, especially when bigwigs from the war or navy departments are waiting to discuss military matters. On such occasions Watson is not above bargaining in and breaking up the conference.

The other day when the President's old friend, Governor Bob Kerr of Oklahoma, was overstaying his time—through no fault of his own—Watson walked in and began to parade nervously about the room.

"Well, here's the undertaker, Mr. President," grinned Kerr, catching the hint. "If one of your callers gets so he doesn't move, 'Pa' will move him."

Roosevelt laughingly motioned Watson to a chair.

"Sit down and talk to me for awhile, general," he said. "We're having a very interesting conversation."

With a sigh, Watson took a chair.

BACK TO NORMALCY

Industry's eagerness to get back to peacetime operation is seen in the deluge of mail received by the chemical division of WPB. Theme of every letter is: Unlace the straightjacket and give us a chance to expand.

This pressure hits the chemical division more than any other because of the tight control which that division has exercised over the industry, and also because of the tremendous future of plastics and other developments in the chemical field.

Controls are so tight that no materials may be bought or sold without clearance with WPB, and in the course of getting clearance, the applicant must state a lot of intimate facts about his business, including buying price, selling price, profit, and inventories.

The real meaning of the complaint is that the industry is not worried about paper work so much as it is worried about limitation on profits. Under government control, prices are held down by the fact that sales are limited to war needs, but when this restriction is removed, the demand for chemical materials will be terrific, and profits will go through the ceiling.

CAPITAL CHAFF

◀ The Argentine government had already retracted its ban on the Jewish press even before President Roosevelt denounced the ban.

◀ Foreign Economic administration, which does a lot of business with Latin America, is worried over the fact that its initials, FEA, mean "ugly" in Spanish.

◀ There's a new breath of life in state department press conferences since Ed Stettinius took charge.

◀ Jesse Jones hasn't held a press conference for more than a year.

The Private Papers Of a Cub Reporter:

Not long ago I lost a friend. . . Ben Bernie died. . . Many people liked Ben Bernie. Because Ben Bernie liked many people. . . Ben had more than acting talent. . . The fact is—the easy good nature known to millions of Americans was not an act. . . A human being himself, he really loved his fellowmen.

Ben Bernie's life was an example of the opportunity America offers a son of poor immigrant parents. And his death is an example of the devotion these Americans have for their country.

Ben was warned by his doctors that his bond drive engagements and his many, many appearances at Army camps and war plants were too much for his strength. . . But Ben kept on. . . And he died.

How much his bit helped cannot, of course, be measured. . . But this we know. He continued in the fight against the orders of Government authorities, his doctors and the entreaties of his family. . . And now his effort is ended. . . Because over and beyond the call of duty, Ben Bernie tried to give his country more than he had.

Our "feud" with Ben Bernie started in 1931. . . The sponsor of the cigarette firm for which I rode the Magic Carpet (with orchestras from all over the world) suggested that the show needed some humor. . . I borrowed an old stunt that worked so well with Mark Hellinger with whom I "feuded". . . Phoning Ben at the College Inn in Chicago, I told him that on the next broadcast I was going to read a telegram from him. . . It was for the orchestra leader (Duchin) and it said: "Just heard first broadcast with Winchell. You were wonderful! Can get you \$5,000 at State-Lake Theater with Winchell and \$10,000 WITHOUT him!" . . . I told Ben I would then tell one on him—and from that date on—every man for himself! . . . Swell, he said, go ahead. . . And you know the rest. . . Anyway, that's how it started.

Robert Ley, the Nazi party's problem drunk, got sober enough the other day to have a good scare. He began to sort of realize that it's getting down toward the pay-off, and things aren't looking too good for him. . . To save his skin he tossed the Nazi master race theory into the ashcan. . . That was just campaign stuff, he scoffed, and shouldn't be taken seriously. We're all good fellows together, he orated, and we're just loving everybody to pieces. . . It happens that Lush Ley is head of the Nazis' labor dept., and from where he sits he can get a worse set of d.t.s. than he ever collected from schnapps. . . He knows that there are 12,000,000 prisoners of labor in the Reich, and 12,000,000 able-bodied enemies represent a lot of hell when the time comes to raise it.

The big weakness of Ley's scheme is that the soldiers are going to bring in their own accusations. . . They saw the Nazi idea at work in Italy, frinstance. . . Farnsworth Folwell and John Lardner reported the butcheries of the ex-master race at Cajazzo, and if that crime isn't avenged, then victory will lack something. . . This wasn't war. It was massacre for Nazi pleasure. . . The Nazis evacuated the town, then sneaked back and slaughtered whole families, women and children included—especially women and children. . . As Lardner points out, it lacked even the excuse of a lynching frenzy. It was methodical. It was more than two miles over hilly country between them and the victims' homes. . . The Huns marched the distance because they enjoyed killing the helpless. It was a crime so incredibly horrible that Folwell didn't dare broadcast it until he checked and double-checked it.

An acquaintance would have you believe he went into a restaurant which advertised: "We Serve Everything!" and heard a drunk tease the manager with: "Everything, eh? Well, bring me an elephant steak!" . . . The manager countered: "Very well—how many in your party?" . . . "One, me!" said the lusher. "Sorry," was the tactful retort, "we can't kill a whole elephant for just one customer!" . . . The beer shortage will be ended soon. An important midwest brewer has a new patented formula and process, and will accept all orders starting December 1. . . Quiz Kid Joel Kupperman will do a second film for Republic Pictures—at \$3,000 per week. His first for Universal got \$2,000. The contract will eventually get him 5 Gs per.

In the early Summer of '41, the U. S. Army General Staff informed the State Dept of the desperate state of U. S. preparedness. There were many conferences between Gen. Marshall and Ass't Sec'y of State Berle in the grayest possible time. . . Shortly after one of these meetings a Senator called upon Berle. . . "What possible excuse is there for selling gasoline to Japan?" he demanded. . . "Confidentially, Senator," said Mr. Berle, "the chips are down in the East. We're not selling gas now—we're buying time!"

"Business is— When the youngster applied his first job his mother asked him. After various questions prospective employer asked: "Are you truthful, my boy?" Before the lad could answer mother spoke for him. "Yes, he is," she said. "Of course, he understands that business is business."

Something Wrong Wife—That boy of ours gets more you every day. Husband (meekly)—Really? You he been up to now?

Most Likely "And when I sing every claps their hands" "Over their cars?"

Nowadays, where there's more they're often jaytalkers play with fire.

She Swapped Mary—You mean "I promised me faithfully that I wouldn't give away that secret told you. But now it's all out the town!"

Mabel—I didn't give it away exchanged it for others.

Here and There The bride had finished dishes at her hubby's, then started to "But for one thing, I'd go home stay with mother," she said. "What's that one thing?" demanded her husband. "Mother's coming here to live us. She's left father!"

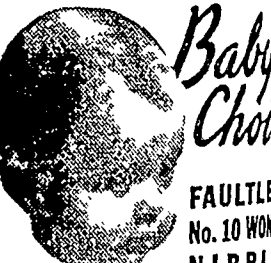

May Be Hollow "I've kept my head above water so far." "Didn't you know wood floats?"

How To Relieve Bronchitis

Creomulsion relieves promptly cause it goes right to the seat of trouble to help loosen and germ laden phlegm, and soothe to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to send a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you to have your money back.

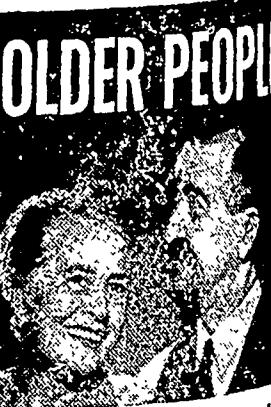

CREOMULSION for Coughs, Chest Colds, Bronchitis

When the soldier talks about "the skipper" he means his captain the head of his company. That's just what the title "captain" means. It comes from the Latin word "caput" meaning "head." Another leader high in the Army man's favor is Camel cigarettes—they're first choice with men the Army. (Based on actual records from service men's stores.) When you're sending post from home, keep in mind the carton of Camel cigarettes is always welcome. And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.

Highest quality, translucent rubber, perforated withstand repeated washing. Fit all standard narrow mouth feeding bottles. Ship on easily, no breakage. AT ALL DRUG STORES, 3 for 10¢

Newspaper Letters Some years ago, when it cost cents to send a letter by mail, some people sent newspapers instead, at a much lower rate, and underlined words to form messages.

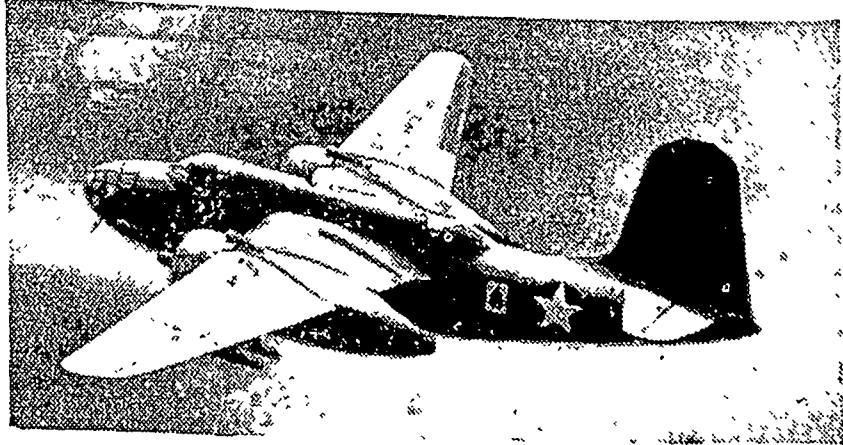

Try Great Tonic Many Doctors Recommend See how good-tasting Scott's Emulsion helps tone up your system; helps build up stamina and resistance against colds if there is a dietary deficiency of A & D Vitamins. It's easy! Simply take Scott's daily throughout the year. It's great! Buy at your druggist's today!

American Battle Planes Must Be World's Best, Is Pledge of Designers and Manufacturers

Air Superiority of Constantly Improved Machines

HAVOC—One of the latest of the nation's battle planes is the Douglas "Havoc" fighter-bomber, a two-motored ship.

test of battle—the only test of the performance of aircraft—has by now revealed a number of box scores which reveal the pattern of achievement of American combat planes.

Every theater of operations, every airman and American have met the challenge of the enemy and outwitted them by never worse than two to one in favor," said Gen. Henry H. H. "All types of our fighter planes have shot the skies the best interceptors in the world and Japan have put them down." This has been true since January, 1942, when our planes outnumbered on practically all

much of this favorable fight-to is attributable to the training, versatility and courage of our pilots, a good part is due to the mechanical superiority of our planes. Constant improvement is the watchword. Even production schedules must be our aircraft must be the able, say army and navy air officers.

is a summary of the chief planes which have run up scores in our favor from a just released by the Office of Information:

Fighters.

The liquid-cooled engines are most fighting models because of slender shape of a liquid-engine is more adaptable to fighter design. It allows vision, and has a smaller area for the same horsepower. It will be noted that in the where 2,000 horsepower was an air-cooled engine was the same is true of the navy's F4U (Corsair) and the new F6F Hellcat. The navy liquid-cooled engines.

navy's fighter program is an airplane carrier carries planes, bombers and fighters of these fighters are to protect the other planes carrier itself. Fighters also land bases. In the South army P-38's are doing this job along with navy fighters. opinion of the material combat the Curtiss P-40, or War-as reached the limit of its potential possibilities. It has through numerous type, the most basic being the when the engine was changed Allison to Merlin.

ugh the latest model P-39 and general performance been improved, the P-39 has the climb-deficiency of the is being supplanted by a model now under construction, low drag wing and a two-Allison supercharged engine will make it an efficient plane altitude up to 38,000 or 40,000 the greatest efficiency of the models has been below 15,000 like the P-39, the new plane equipped with cannon.

Low Altitude Fighter. ough superior to the P-40 and the original P-51 or Mustang only a low and medium fighter. Now in production w P-51 with a highly super engine, similar to the Merlin ne in the newest Spitfires. Its ance is reported as even bet that famous ship's. The engine gives the plane the high ing (up to 40,000 feet) and the speed (well over 400 miles r) of any fighter in existence. A-36 (Invader), the fighter version of the P-51, has seen service in the Mediterranean t, and its best features are incorporated in the new P-51, will replace both the A-36 and P-51.

latest model of the Lockheed Lightning is a fast, powerful that has been given greatly ed horsepower in its Allison, improved pilot's vision, and ed intercooling for better altitude performance. It out- ms the Zero and later Jap s at all altitudes. P-38 has always possessed the ility that is coming increas- o characterize all combat air- It has excelled at low-altitude g, high-altitude fighting, and particularly long-range bomber Its distinctive silhouette, ts twin tail booms, has been ver four major fighting fronts. newest fighter at present in

combat, the P-47 or Thunderbolt, has been currently rolling up a score of approximately four to one in its contests with Messerschmitts and high-flying Focke-Wulfs over England, France and the Low Countries. Armed with eight .50 caliber machine-guns, and heavily armor-plated, it is capable of flying over 400 miles an hour and of reaching an altitude of 40,000 feet.

High Scorer for Navy.

The Grumman Wildcat or F4F, a navy fighter, with Pratt & Whitney Twin Wasp air-cooled engine and with folding wings for compact stowage on aircraft carriers, has run up many high scores in Mediterranean. Although the F4F will continue to be manufactured for use on auxiliary carriers and for training, it is now being supplemented by a new plane, the Grumman F6F (Hellcat).

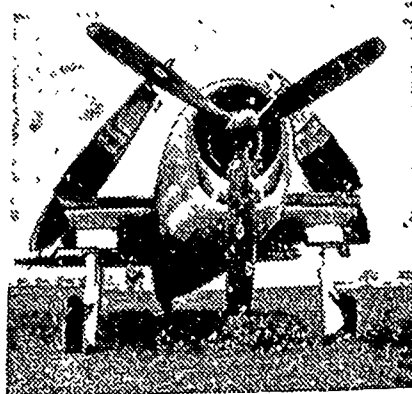

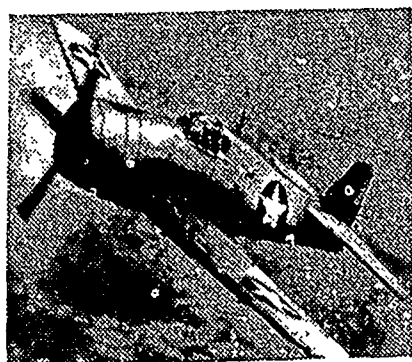

This newest member of the navy's fighter family is described by the navy as "an answer to the prayers of our pilots."

A big brother of the famous Grumman Wildcat, the Hellcat has better range, speed, climb, maneuverability and altitude. It has a 2,000 horsepower engine as compared with the Wildcat's 1,200. It has a low wing, improved armor, and a new flexible type gasoline tank which is an improvement over the ordinary puncture-proof type. It carries .50 caliber machine guns.

The Corsair or F4U also has a 2,000 horsepower Pratt & Whitney engine and is easily distinguishable by its inverted gull wing. The Corsair has until recently been the chief navy fighter in the South Pacific. Now Hellcats are beginning to join it in large numbers.

Heavy, Four-Engine Bombers.

The newest models of both the Boeing B-17 (Flying Fortress) and the Consolidated B-24 (Liberator) bombers are equipped with new defensive armament in the form of nose turrets with machine gun installations. External bomb-racks can increase the potential bomb capacity of the B-17 to 17,600 pounds. Nevertheless, this plane has a smaller bomb capacity at long range than the B-24. The most accurate comparison, perhaps, is to say that lead-

HELLCAT—Successor to the famous Grumman "Wildcat" is the new "Hellcat." It has folding wings, as shown in the picture below, so that it will take up a minimum of space on the deck of a carrier. The Hellcat is a standard fighter now in both the U. S. and British navies. It has more power and climbs faster than the Wildcat.

ed with 2,800 gallons of gasoline the B-17 can carry 6,000 pounds of bombs (the usual load carried over targets in western Europe), whereas the B-24, with 2,900 gallons, can carry 8,000 pounds of bombs. Consequently the B-17 is being concentrated in the western European theater and the B-24 is being used chiefly elsewhere—in the Middle East, in India, China and Australia—for longer range operations. B-24's have made

round-trip flights up to 2,600 miles; the raid on the Ploesti oil fields in Rumania from bases in Egypt, the raid on the Messerschmitt works at Wiener-Neustadt, and raids in the Pacific on Wake, Paramushiru and Surabaya. The B-24 is used by the navy under the designation PB4Y-1. Medium, Light and Dive Bombers.

New models of the two-engine Tokyo raider, the North American B-25 (Mitchell), are equipped with heavier armament and possess increased speed and range. The B-25 is the chief medium bomber in the present program, production of the Martin B-26 (Marauder) being tapered off. B-25's, powered with Wright Cyclone engines, are flying on 11 fronts, are used by both army and navy for anti-submarine patrol service, and have scored particular successes with skip-bombing.

The Douglas A-20 (Havoc) is the principal light army bomber in the program until the totally new, advanced light bomber mentioned above comes into production. The newest Havoc, used by the army for low-level bombing, is fitted with a power turret and with armament for ground strafing.

The A-24, army version of the Douglas SBD (Dauntless) dive-bomber, is now being produced in decreasing numbers, chiefly for training purposes.

Grumman Avenger.

The Grumman Avenger, the navy's carrier-based torpedo-bomber, has completely supplanted the Douglas TBD (Devastator). It carries machine guns as well as torpedo or bombs, and has destroyed many Japanese vessels in the Pacific.

Chief among the navy's patrol bombers are three flying boats and two land planes. The land planes are the Consolidated PB4Y-1 and the Vega PV-1. The flying boats are the Consolidated PBV (Catalina), Consolidated PB2Y (Coronado), and Martin PBM (Mariner). All three flying boats are used for transport purposes as well as for patrol and bombing operations. The two-engine PBV, the oldest, slowest and smallest, the ship which first spotted the Jap forces on the Aleutians, is still being built, still dive-bombing and strafing enemy shipping and rescuing pilots who have been downed at sea. The four-engine PB2Y has double the horsepower of the PBV. The PBM does good work in anti-submarine coastal patrol and long-range reconnaissance. Not even the newest navy flying boats have speeds much above 200 miles an hour, but all are required to be able to land in a choppy sea.

The Vega PV-1 (a navy adaptation of the twin-engine Vega B-34 "Ventura" bomber) is the navy's chief land-based anti-submarine patrol plane. It carries depth charges or a torpedo, is heavily armored, and is now often used in preference to flying boats in anti-submarine operations because of its greater speed.

The Consolidated PB4Y-1 is a four-engine land-based bomber and, as previously mentioned, is used for long-range bombing missions and for anti-submarine patrol work.

Design and Technical Improvements. Aeronautical engineering demands experimentation with numerous designs in order to obtain several high-performance aircraft of the required types.

But on the other hand, the constant improvements being made on models already in use, and the continuing addition of totally new air-planes to our forces, slow down the rate of production.

Nevertheless, even at this stage in the war, when clear-cut air superiority over the enemy has been achieved, there is no assurance that the planes which have achieved it are superior to planes which the enemy may produce tomorrow. Changes in strategic and tactical problems, too, and changes of terrain over which fighting takes place, bring with them new demands for aircraft design and equipment. Even planes which have run up high box-scores must be constantly improved and replaced. The make-up of our air fleet has never been static, and is not to become so.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for November 21

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

HONESTY IN ALL THINGS

LESSON TEXT—Exodus 20 15; Leviticus 19 11, 13; Luke 19 1-10, 45, 46.
GOLDEN TEXT—Thou shalt not steal.—Exodus 20 15.

Honesty seems to be so obviously right that one might expect it always and everywhere—if bitter experience had not indicated the opposite to be true.

As a matter of fact, dishonesty has become so common that a person who is strictly honest is a bit of a novelty. Some even think he is peculiar.

Under such circumstances the Christian needs to be vigilant lest he also accommodate his own ideas of honesty and begin to justify little evasions rather than being absolutely upright.

The teaching of Scripture on this matter is very plain.

I. Honesty and Fair Dealing (Exod. 20 15, Lev. 19:11, 13).

The very commandment against stealing implies that men have a right to that which they have made, earned, or saved. If no one had property rights there could be no stealing. Some of our modern isms deny such rights, but their reasoning is clearly not biblical or Christian.

"Thou shalt not steal" forbids every kind of theft, and the passages from Leviticus indicate that this includes more than robbery or ordinary stealing.

It relates to every kind of false dealing with another, such as oppression or the withholding of just wages. That, too, is stealing in God's sight.

Perhaps we ought to be more specific and apply the truth to our own day. Stealing includes such things as looting on one's job, "borrowing" money from the cash drawer, taking goods from the stock with which one is working, stealing another man's sermon and preaching it as one's own, "lifting" material out of another man's book without credit, contracting debts which one can never pay, using false weights and measures, adulterating food or other material, "watering" milk for sale, selling worthless stock, dodging taxes or lying to the tax assessor, or using a slug instead of a nickel in the telephone to escape proper payment.

One might add gambling (which is taking another man's property by skill or by chance), making an unduly large profit on the labor of another, making money out of the sorrows and failures of others, etc. To be honest means to be fair—and that has broad implications.

II. Honesty and Restoration (Luke 19 1-10).

The reality and thoroughness of Zacchaeus' conversion was indicated by his willingness to restore all the money he had unjustly (but legally, note that!) taken from his fellow citizens—and that in fourfold measure.

Insofar as it is possible to do so, the honest person will make right any known injustice. To be right with God must mean that we are to be right with men. The testimony of many Christians could be presented to show that they have only entered upon real peace and usefulness as they have made consistent effort to right every wrong, to pay every debt.

Often such actions open opportunities for Christian testimony and point others to the redemption in Christ, which makes a man live right as well as talk right.

III. Honesty and Religion (Luke 19 45, 46).

One might think it unnecessary to urge honesty upon religious folk. They ought to be honest. But here we see in sharp contrast to the quick honesty and restitution of Zacchaeus, the stubborn disobedience and dishonesty of the priests in the temple. Jesus had already cleansed the temple of the traffic in money-changing and the sale of animals for sacrifice practiced there (see John 2:13-17). On that occasion He rebuked them because they made His Father's house "a house of merchandise."

Had they known the change of heart of a converted Zacchaeus they would have heeded His admonition. But they did not believe in Christ and went on with their ungodly desecration of the temple area until it became "a den of thieves" (v. 46). What happened so long ago needs application to our present day. So apt is the quotation from the "Lesson Commentary" which we have used before that we repeat it now.

Speaking of "the goings on in our own churches" the writer says, "Is a church honest when it assumes obligations that it cannot meet, and is then forced to use all sorts of questionable means to raise money for the benefit of the church? Is a church honest when it turns a building consecrated to the worship of God into a restaurant or a theater, is a church honest that turns its pulpit into a lecture platform for the discussion of current events or the review of popular books or plays?"

For you to make

Large-Sized Vestee

THE older woman sometimes has difficulty in finding instructions to make a smart crocheted sleeveless vestee. This one was especially designed for sizes 38-40 and 42. It is comfortable, well-fitted and can be worn in the house in our winter heat-ratified rooms

ASK ME ANOTHER?

A General Quiz

The Questions

1. What river flows through three European capitals?
2. What is a quern?
3. What are the national colors of Mexico?
4. In diplomatic service which is the highest rank, ambassador, minister or consul?
5. Which two countries of South America do not touch Brazil?
6. If you are served pomme de terre in a French restaurant you would be eating what?
7. How many presidents of the United States have been army generals?
8. The marquis of Queensbury was Britain's most famous patron of what?

The Answers

1. The Danube flows through Vienna, Budapest and Belgrade.
2. A small hand mill for grinding spices.
3. Green, white and red.
4. Ambassador.
5. Ecuador and Chile.
6. Potatoes.
7. Seven—Washington, Jackson, W. H. Harrison, Taylor, Grant, Hayes and Garfield.
8. Boxing.

and is equally comfortable for out-of-door wear under a heavy coat. Make it of wool sport yarn in American Beauty, navy blue, brown or dark green.

For complete crocheting instructions for the Larger Woman's Vestee (Pattern No. 5619) sizes include 38-40 and 42, send 16 cents in coins, your name and address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

HOME NEEDLEWORK

530 South Wells St. Chicago.

That Should Be Fast Enough to Suit Anyone

An excited woman stalked into the dry goods store and threw a faded apron upon the counter. "Look at this!" she cried. "Just look at this!"

"I am looking at it," said the young lady behind the counter. "What about it?"

"What about it?" shouted the woman, "what about it? Why when you sold me that apron you said that its color was fast. And what happened? Why the color came out at the very first washing!"

The girl looked at the woman in surprise.

"Well," she remarked, "that certainly was fast!"

DRS. COLBY & HAYDEN, DEN-TISTS, FOREST CITY, IOWA. OF-FICE PHONE 374, RES. 189. to

C. A. Frisbie of Garner, was in Klemme on business, Friday.

Mr and Mrs. Mitchell Bock were dinner guests Sunday at the home of Mrs Naska Bock.

J M Neuberger of near Ventura is at Excelsior Springs for his health.

Mrs. Bertha Schlei spent Thurs-day afternoon visiting with Mrs. Lippo Wessel.

Mr. and Mrs. Wm. Meyer of near Miller were visiting in Klemme en Saturday evening.

Mr. and Mrs. Albert Priebe were Masen City visitors Friday after-noon.

Mrs Lena Schroeder and Grand-ma Schroeder moved into Grand-ma Schroeder's house Monday.

Armistice Day was guest day at the Klemme schools and many mothers visited the school in the several grades.

Mr. and Mrs. Pete Wilson enjoy-ed Sunday dinner with Mr. Wil-son's brother-in-law and sister, Mr and Mrs Tom Brooks at Belmont

Mrs Benn Coobs went to Cedar Falls Sunday and spent the day with the Harry Buss family on the farm.

Mrs Sumner Trumbell left for Waterloo last Friday on the bus to visit with her sister there until Thursday of this week

Pvt. and Mrs. Francis Pearson of Oregon are here enjoying a fifteen day furlough visiting at the paren-tal John Lass and Carl Pearson homes.

There was a large crowd out at the Community Hall Armistice eve-ning for the Legion and Auxiliary annual party. All enjoyed a fine time.

Mrs. Ed. Schaefer returned home last week from Nora Springs where she visited for the past six weeks with her son-in-law and daughter, Mr and Mrs Harold Ridder.

Seaman Keith Stille 1-c got a 10-day extension on his furlough, so now he nac visit here until Nov 22nd before returning to San Diego, California, where he is stationed

Mr and Mrs Otto Lemke, John Lemke, and Mrs Daisy Lemke drove to Goodell Thursday evening to help W. F Beier celebrate his birthday anniversary.

Mr. and Mrs. W F Pavey and daughter, Mrs John Clements; Mrs Benn Coobs and Mrs Lyle Wilcox were Mason City visitors Friday afternoon.

Miss Thelma Chambers, high school teacher at Britt, spent the week end visiting with her parents Mr and Mrs J A Chambers south of Klemme

Carl Pearson and family, Pvt and Mrs Francis Pearson, and Mr and Mrs John Lass were supper guests Wednesday evening at the home of Mrs. Peter Merkel

The Klemme Legion will hold their annual Feather Party at the Community Hall this week Friday evening. The public is invited to attend.

Mrs C. A Larsen returned home Monday from the Mercy hospital where she went last week for an operation. Mrs. Larsen is making a good recovery.

Mr. and Mrs Ira Overholt enter-tained to dinner Sunday Mr. and Mrs. C. G. Waterman and daughter Mrs. Lyle Wilcox, and Mr and Mrs R. A. Jorgenson.

Mrs. Elmer Arnold and daughter Evelyn, visited with Mrs. C. A. Lar-sen and Mrs. Lester Newberger at the Mercy hospital at Mason City, Saturday.

Mr. and Mrs. Keith Albertson were called to Estherville Tuesday by the death of the former's grand-mother, Mrs. Helen Pullen, 83, who died Monday. Mrs. Pullen was the widow of the former Sheriff Pull-en.

A. Buy another War Bond today.

Local Happenings

Klemme and Vicinity

Mrs. Evert Barz entertained the following at her home to dinner on Sunday: Mr. and Mrs. Geo. Born; Mr. and Mrs. Geo. Thiemann; and Mrs. Clara Barz, Avis and Allen.

Word has been received here of the death of Mrs. Mort Palmby, age 78, at Vernon Center, Minne-sota last Thursday. Mrs. Palmby was well known in this communi-ty.

Mrs. Elizabeth Smid and daugh-ter, Mrs Edward Rall expect to leave Sunday for their new home at Hanover, Illinois A moving van is expected to arrive Friday to take their household goods to Hanover.

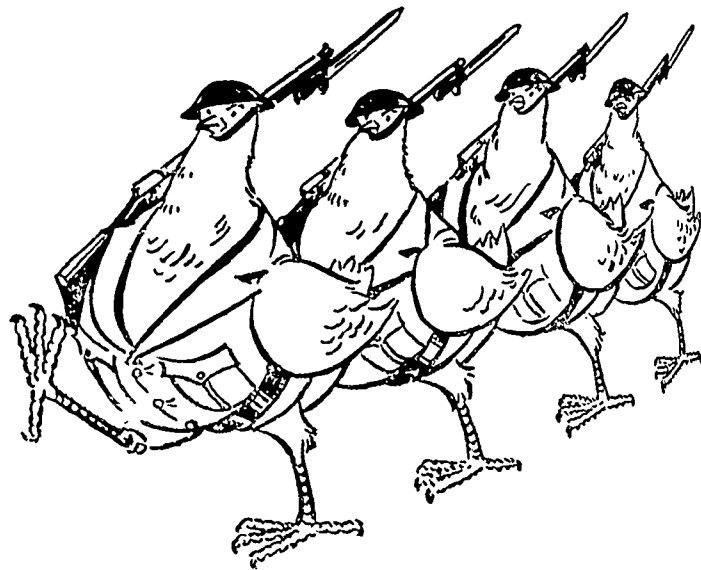

Everybody is invited to the Ba-zaar at the Methodist Church this week Thursday, Nov. 18 The ba-zaar selling begins at 2 30 p m. and serving of the chicken supper be-gins at 5 30 p m The supper is 50 cents and 35 cents.

Mrs Martha Bredbenner, Mrs. J A Chambers, Mrs. E. J. Schnei-der, Mrs Henry Ostendorf, Mrs. Monroe Graber and Mrs. R. A. Jor-genson attended a luncheon and meeting of the Christmas Seal workers held at Garner, Saturday.

THRILL TO THEM

Mr and Mrs A O Sones of An-amcsa enjoyed their first plane ride going from Indianapolis to Chicago recently Mr. Sones is 85 and Mrs. Sones is 81.

Your Chickens Have Become

A First Line of Defense!

GIVE THE HENS A HOUSE

A warm, dry, well-ventilated CHICKEN HOUSE is one of the best guarantees of profitable returns from your flock. You can build a good chicken house very inexpensively. We have the materials and the carpenters to do the work. At the present high prices of eggs you cannot afford to have your hens in an old, damp, poorly-ventilated hen house.

Come in and look over our plans for Poultry Houses. We have one for your requirements.

The nickname of Pvt. Milton Lieberman, 27, of Brooklyn, is "Clark Gable." He was wounded in Sicily last August and has been at Halloran since October. Every payday \$12.50 is taken out for War Bonds Lieberman is buying. How many do you buy?

New York Washington Wire:

Alfred George Robert, who was Governor of Martinique, is honored guest of the U. S. Navy suite at the luxurious Normandy in San Juan, Puerto Rico. He let a free ride to France on a ship. The Berlin radio follows traitor Robert Best's pasts with this: "Mr. Best is for himself and does not represent the opinions of this station." During Sec'y Knox's tour of (on his return via the South Atlantic by plane) he learned the had never been initiated over water. Playing Father Nepomuceno, Mr. Knox then initiated them by giving a drink for both. It was chicken soup mixed with orange

Magic Lanterns: There was an unfurling, so this space can devote to flickers good enough some fresh orchids. The hit you hardest was "Hollywood—the City that Stopped Time." The finest all-around cut of Hollywood—"The Watch on the Rhine," an improvement on the old version. The most laden—"For Whom the Bell Tolls"—G. Cooper and I. Berg, to the tiniest bits, including and guns. None of the cinematic golden gals and youths were which gives you an idea. The laughingest film of recent was "The More the Merrier." The most disappointing was Crosby's "Dixie" and Hope's "Face It," high-priced jobs looked marked down. The that promised most and delivered was "The Adventures of Tom Sawyer" which mixed England's best Hollywood's corniest. The import was "Top Man," a case for young Donald O'Connor and a roomful of bands-in-jive and jive. Jump the yarn, is no jump, since it lies flat, you can revel in song and dance pieces.

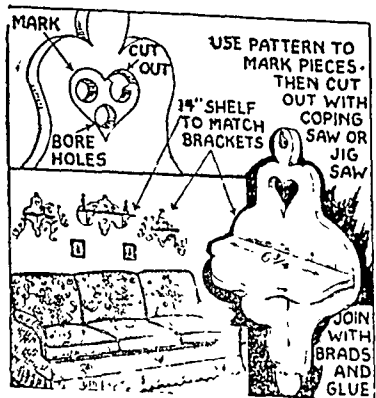

Dials: Edward Murrow and Le Sueur, who rarely sugarcoat their broadcasts, sent word that each is approaching its 1918 birthday. And Howard K. Smith from Switzerland that the jails are loaded with sassy who are beginning to tell the goons to go hell themselves. Tojo, the dog-faced boy, tongue as follows: "The enemy who was defeated at the beginning, in fear of the richness of conquered territory, trying to help our nation." Translated: "Here they come, boys, and they're good." You know who's good? The telepathic marvel, takes words right out of your mouth, before you can mouth them. He's probably dictating this right now by telepathy. America's song tastes range from ditties in "Oklahoma" to the "Pistol Packin' Mama," which has a new name for "It Ain't Gonna Be Long."

New York Melodrama: Years ago a madway showman befriended a man. When The Young suddenly acquired a job on the radio to which he invited guest—the man who once befriended asked him to put his wife on the air. "Don't be silly," was the retort, "your wife is a has-been." "Names for my show!" was the demand. Seven years ago, and she has carried a grudge all that time. Now it looks as though all even things. The Young was recently inducted into the hall of fame. And the fellow who befriended him—and was turned down in favor—is now a big shot of the radio. He has requested Our services. Owwww!

Station Marksmanship: Nina Putnam: Men are as transparent as cellophane and as hard to love, once you get rapped up in them. Thorne Smith: A voice as low as his intentions. Vincent: So few of us really know what we do is rearrange our deck chairs. Margaret Case Harter: Money is what you'd get beautifully without if only other people weren't so crazy about it. Swift: Censure is the tax a man pays to the public for being smart. Sir Robert Walpole: A rude—a lively sense of future. Evelyn M. Campbell: Face had been nicely chipped granite.

Palm Beach realtor reports of the leases there have been up. Fred Allen's latest That he resumes in December the same sponsor.

Radio: The safest kind of thing, Raymond G. Swing points out, is that which terminates the strategy. This strategy, he said, is to be secret to be any good. So a demagogue or a newspaper second front soap-boxer starts the war to please himself, he is from authoritative squelches high command preferring to let have rather than tip its mitt to the enemy. Those hecklers need as much courage as it takes to get a duck in a rain barrel, it served.

GREAT-GRANDMOTHER loved to collect bric-a-brac and so do we. She also liked the graceful green of a trailing vine. Because of this there was a vogue in her day for what-nots and wall brackets. Each sea shell, each figurine, each tiny animal of porcelain or pottery had its bit of sentiment. Woodworkers, both amateur and professional, leaned towards the sentimental, and hearts were a favorite theme for their cut-out designs.

This sketch shows a set of these quaint wall brackets in a living room of today. They will delight the host of modern amateur woodworkers who are rigging up work benches and wondering what they can make. This 14-inch shelf with matching side brackets fills a large wall space in a most attractive way, making a perfect setting for many small treasures.

NOTE—Mrs. Spears has prepared a full size pattern for all the pieces of this shelf and the two side brackets with a complete list of materials and directions for making. Patterns are 15 cents. Ask for Pattern No. 263.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

ASK ME ANOTHER?

A quiz with answers offering information on various subjects

The Questions

1. What is the Quirinal?
2. How many deadly sins are listed?
3. What does blood plasma look like, as used by the Red Cross in the care of the wounded?
4. Who wrote the lines: "He prayeth best who loveth best all things both great and small"?
5. How long is a kilometer?
6. How many children did Johann Sebastian Bach have?
7. In the Bible, what two words follow, "I will lift up mine eyes unto the hills from whence cometh my help"?
8. How many feet does the natural bridge of Virginia span?
9. The Ptolemies were the ruling family of what country?
10. What is the difference between amphibious and amphibian operations in this war?

The Answers

1. One of the seven hills of Rome.
2. Seven: Pride, anger, lust, envy, covetousness, gluttony, and sloth.

Hothouse Lambs Hard to Raise; Expensive Delicacy

Sheep born in the fall and early winter, when sold in the suckling stage between two and four months of age, are known as hothouse lambs, says Pathfinder. The animals not only have to be raised with special care, but they constitute only one in about every 25,000 sheep slaughtered here annually.

Consequently, their meat is a rare and expensive delicacy and most of it is purchased by fine restaurants and other luxury trade.

Suspense a Misfortune

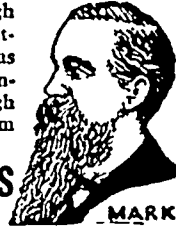

Suspense, the only insupportable misfortune of life.—Lord Bolingbroke.

TOO BAD

We can't make enough Smith Bros. Cough Drops to satisfy everybody, because our output is war-reduced—so please buy only as many as you really need. Through three generations and five wars, Smith Bros. Cough Drops have given soothing relief from coughs due to colds. Sull only 5¢.

BLACK OR MENTHOL—5¢

The Rubber Shortage is behind us but the Tire Shortage is still here!

Less than two years ago America faced a frightening situation as any country at war ever faced. Unless something was done, and done quickly, we would soon be without rubber.

And without rubber, no plane could fly, no tank could move, no ship could sail, no truck could roll, people could not get to work, materials could not move to and from plants.

That was the situation the Government and the rubber companies had to lick inside of two years if America was to stay in the war.

Did the "impossible" really happen?

Let's see what you think. Right now, there is nearly enough rubber to meet our essential needs.

Today, this threat to American victory is merely an unpleasant memory, because Government, the Rubber Director, and a group of industries—rubber, petroleum, chemical, alcohol—working together, compressed into less than two years a job that would normally have taken a dozen years. But...

Because the public saw huge synthetic rubber plants set up almost over night, and heard that synthetic rubber was in large-scale production, they figured the tire headache was almost over.

Now—a warning!

This is the situation today—the rubber supply crisis is past, but the long predicted and anticipated tire shortage is with us.

Why is this so, when thousands of tons of Government synthetic rubber are now being made?

Why is this so, when the rubber industry is producing a tremendous tonnage of rubber products and more airplane and truck tires than ever before?

Because, as the Baruch Committee foresaw—the fact that few tires could be made until we had our synthetic rubber supply well on the way, resulted in millions of tires going out of service without replacement—and those remaining have less mileage in them. Inventories of prewar tires are gone.

Because our military needs are way beyond anyone's anticipations.

Because the rubber companies must use a lot of their manpower and machines to make bullet-sealing gas tanks and hundreds of other rubber products for war, in addition to tires.

Because half of today's requirements are for heavy-duty, large-size truck, bus, combat, artillery, and airplane tires, requiring many, many times the labor and materials of peacetime needs... and finally...

Because the manpower shortage hangs over the tire industry as it does over all industry, and there are just too few hands for the job.

Straight from the shoulder

These problems will be licked when our enemies are licked. Meanwhile, we want to tell you frankly

that unless you, and all tire-owners continue to make the preservation of tires a vital personal problem... our home-front transportation will break down and slow up the war production of America.

The way out is for you to conserve the tires you've got—stretch their life in every way you can.

How to make tires last longer

Do no unnecessary driving.

Live up to the government regulation—don't exceed 35 miles an hour.

Keep your tires inflated up to recommended pressure, and check them every week.

Avoid hitting holes in the road, or bruising your tires on curbs or stones. Don't start or stop suddenly. Slow down for sharp corners.

See that your wheels and axles are in line.

Switch your tires from wheel to wheel every five thousand miles, and have them inspected regularly for removal of foreign objects and repair of cuts.

And—most important of all—recap your tires as soon as they become smooth.

Though not all civilians will be able to get synthetic rubber tires in the near future, you may be one of those who will. Therefore, you should know... and remember... these facts:

FACTS ABOUT PASSENGER CAR TIRES

The synthetic rubber tire is not yet an improvement but it will keep your car rolling through the emergency.

In many respects, the new synthetic rubber tires are an unknown quantity.

How they would behave at the phenomenally high speeds of prewar days is purely academic. The patriotic citizen knows that high speeds wear out his treads far faster than the recommended speed of 35 miles per hour, and drives accordingly.

Under-inflation, driving over rough roads, and other abuses are bad for all tires—but today's evidence is that synthetic tires will stand less of these abuses than the tires you have been used to.

But, since these tires will be rationed to you in trust for the nation, it will be your duty to take every possible care of them, and to prevent misuse and abuse.

As we gain more experience with synthetic rubber tires, more and more things will become known about them, and the public will be kept informed.

If you use synthetic rubber tires, be sure they are properly installed. They should be put into the tire, then inflated, deflated, and inflated again. And they should never be mounted on rusty rims.

FACTS ABOUT TRUCK AND BUS TIRES

On truck and bus tires, particularly in over-the-road, inter-city service, the situation is less satisfactory.

Truck and bus tires are operated under more severe conditions than passenger car tires. They are heavier, thicker—generate more heat. They are all too frequently overloaded, must travel on any kind of highway their work requires.

Again we'll be perfectly frank about it: synthetic truck and bus tires now built will not stand all the abuse that the prewar tire would take, especially overloading. Progress is being made every day—but overloading which damaged a prewar tire can ruin today's synthetic rubber tire.

The Tire Industry is bending every effort to solve the serious problems of furnishing satisfactory and sufficient tires to the truck and bus field.

But a serious threat still exists to our most vital transportation.

So remember this—while the treads of present truck and bus tires are vitally important, the carcasses of these tires have a value to our truck operators, and to the nation, that is beyond price. Unless these tires are made to last and last, there is almost certain to be a breakdown of truck service.

Every one of these tires must be recapped the very minute it needs it—before any damage is done to the carcass. Speeds must be cut down, especially on hot roads. Overloads must be eliminated. Proper inflation is a necessity.

Operators, garage men, drivers, all have a heavy responsibility that they cannot now avoid. These are straightforward statements. The warning must not go unheeded. A new tire warranty recognizes these conditions, but the real job is conservation!

A new warranty—

With conditions as they are, and synthetic rubber in its present stage of development, a new tire warranty has become necessary and has been adopted. It applies to all tires. Under its terms, injuries such as bruises, body breaks, cuts, snags, and heat failures, as well as tread wear are not subject to adjustment consideration.

Nor are injuries or failures which result from improper tire care or misuse or abuse. This includes failure as a result of overload, excess speed, improper inflation, or other non-defective conditions. Or when tires are used on rims not conforming to Tire and Rim Association Standards.

Remember—the tire industry, the Rubber Director, everyone is working together with all their energy, as they have from the outset, to keep America's wheels turning.

Do your part—take care of the tires you've got now!

MEETS WITH SELF

Lawrence Brennan of Emmets-
burg has an easy time meeting
with various other chairmen of
boards when requested. Brennan is
chairman of the Palo Alto county
AAA committee, Palo Alto USDA
war board and the county salvage
board. He sometimes receives a
letter from the USDA war board
state chairman instructing him to
meet with the county salvage
chairman and the county AAA
chairman and "enlist their support"
in some project. Or one of the other
state chairmen will request him
to meet with the other two chair-
men.

NAMED CREEK

A 122 foot bridge was built ac-
ross a creek in Alaska by men
from Iowa, with Edgar Bitters of
Iowa Falls in charge of the job. A
sign has been posted at the bridge
reading "Bitters Creek Bridge---
In Honor of Edgar and His Voice---
It Stood Up Well". The blue print
used in building the bridge has
been signed by all the men on the
job and decorated with a duplicate
of the sign as well as another read-
ing, "Whitehorse---400 miles". This
was given to Mr. Bitters.

SNOW HOUSE

Some of the turkeys that were

trapped underneath snow on the
Ray Dorr farm near LeMars were
safe from freezing. While attempt-
ing to free the birds from deep
snow drifts, the men found a num-
ber of the turkeys safely hidden in
a drift. The men doing the rescue
work made an air hole for the
birds and left them until others in
more dangerous places could be re-
scued. Later the turkeys were re-
moved from their snow house,
which had kept them warm for the
day or two they were trapped.

EXCITING MOMENTS

Some Sheldon residents know
what it is like to be stalled in an
automobile on train tracks with a
train about due. Miss Leone De-
Graaf, accompanied by Mr. and
Mrs. Bert Wright, were on the way
to the depot to catch a train, when
the car stalled on the tracks. Mrs.
Wright went to the depot for assis-
tance before the train reached the
place. Officials were able to signal
the train to a stop before it reached
the car, then the auto was pushed
off the tracks without damage.

STRANGE PLACE

As result of an accident, two
former schoolmates met after not
having seen each other for 49 years.
Recently Miss Edna Hiller of De-
corah was on her way to Calmar to
visit a sister. Enroute, the auto-
mobile overturned on the high-
way. Mrs. Agnes Coughlin Roca
now of Minneapolis was in a car
following the overturned auto and
stopped to give aid. Miss Hiller and
Mrs. Rosa attended school together
in Decorah in 1894.

"WAR MONEY"

Clinton "Butch" Jordan, three-
year-old son of Mr. and Mrs. A. B.
Jordan of Richland found a fifty
dollar war bond in front of his
home one day recently. "Butch"
didn't tear it up as a lot of young-
sters might have but took it to
his mother. When asked how he
knew it was valuable, the boy's
reply was, "I know war money".

LOST CURTAINS

As curtains are one of the hard-
est articles to buy at the present
time, Mr. and Mrs. Darwin Stuffle-
beam of Waverly are hoping that
some one will return the eight pair
they recently lost. The Stuffle-
beams were moving some of their
household articles to Rockford
when the box containing the cur-
tains fell from the car.

IMPORTANT ITEMS

Shells are now becoming such an
important item in the minds of
hunters that reports have been
given of various thefts of the
articles. Herb Allen of Estherville
recently reported that a glass had
been broken in his car and some-
one had "borrowed" a box and a
half of shells. The car was parked
near Swan Lake.

DO YOU OWN FOREIGN HOLDINGS?

Citizens of Klemme who own
any property in foreign countries
were notified by Postmaster John
N. Day today that they must file
reports of their foreign holdings
with the Treasury Department be-
fore December 1. The notice was
given by means of a poster placed
on display in the post offices.

Postmaster Day points out that
it is necessary for the government
to have as complete information as
possible on the American stake ab-
road to assist the military authori-
ties and the civilian governments
on the fighting fronts and to bring
about sound solutions of the post-
war problems.

Report forms known as TFR-500
may be obtained through commer-
cial banks, or from the nearest
Federal Reserve Bank, the post-
master states. Penalties are provid-
ed for those who willfully fail to
file reports.

CREAM KEPT TOO LONG IS OF POORER QUALITY

Frequent delivery of cream is an
important step in keeping up qual-
ity. A. W. Rudnick, Iowa State Col-
lege extension dairy industry spe-
cialist, says that cream kept more
than 3 days will not grade premium
and if the producer waits more
than 4 days before delivering, he
need not be surprised if his cream
is second-grade. Flavors develop in
cream which is kept too long and
taint the butter which is made from it.

Even cream which is delivered
promptly may be less desirable be-
cause of silage favors. It is ad-
visable to feed silage after milking
rather than before or during the
milking period. If silage is fed from
bunks, the dairyman should judge
the amount fed so that each cow
will get no more than 20-25 pounds
per cow fed twice daily, or 40 to
50 pounds in all.

Miscellaneous flavors in cream
during the winter may be prevent-
ed by opening the barn whenever
weather permits and allowing it to
air out thoroughly. Cleanliness
should be practiced at all times.

churches are cordially invited.

TEMPERATURE IMPORTANT TO HOUSE PLANT BLOOM

Temperature is very important
in controlling bloom of house
plants. L. C. Grove, Iowa State Col-
lege extension horticulturist, states
that experiments indicate most
flowering pot plants form their
buds at 65 degrees Fahrenheit tem-
peratures often will not develop
bloom.

The daytime temperature can be
raised to 70 degrees when it is
known that the plants have set
their buds. No food is manufactur-
ed by the plant leaves in the ab-
sence of light, and the temperature
of the room may be allowed to
drop to 55 to 60 degrees during the
night.

Tying bundles of straw

FRANK SCHULZ FATHER DIED AT STEWART, ILLINOIS

Funeral Services Held At Garner Thursday Afternoon

Funeral services were held at Bohns Funeral Home at Garner Thursday afternoon for Mr August Schultz, 85, former Hancock county farmer.

Following is the obituary: August Schultz was born in Germany on December 12, 1858. While yet a young man, he came to the United States to make his home.

After some time here, he journeyed back to the land of his birth to make his former sweetheart his bride. He and his wife returned to America to settle and establish their home. They located in Hancock county, Iowa. Here Mr and Mrs Schultz followed the work of farming for many years in the Hayfield community.

He retired from farming about 15 years ago and came to Garner to live. In his declining years he went to Stewart, Illinois, where he made his home with his daughter Mrs. Gerd Johnson. It was there that the end came early Sunday morning, November 14, 1943. He passed away in his sleep, which reminds us that death is only a sleep.

In earlier years, he became a member of the German Lutheran Church.

Mr. Schulz is survived by four sons and three daughters, namely: Gustav of Hayfield, Frank, Klemme, Leonard and George of Garner, Mrs. Chas. St. ate, Rockford, Wis., Gerd Johnson, Stewart, Ill. and Mrs. Mary Yates of Hilltop, Arkansas. His wife preceded him to that great beyond many years ago.

During the services Rev. H. F. Harvey and Mrs. C. C. Kilgore of Klemme sang "Face to Face," and "One Sweetly Sorrow Thought." Mrs. Matt Smith accompanied at the piano.

Burial was made in the Concord Cemetery south of Garner.

LEONARD LAU EMPLOYED IN KAISER SHIP YARDS

The following letter from Leonard Lau, of Van Couver, Washington was received Saturday. Lau was formerly employed as a cabinet-maker at the Northern Lumber Co. here:

Dear Jergic: I can say that we're enjoying your paper much more than the Klemme readers themselves—maybe because the distance makes us more eager for our hometown newspaper.

At present I am employed at the Kaiser Shipbuildings yards as general carpenter, to my delight to be counted as one of the 35,000 workers who are at full steam to reach the goal of (*) carriers before 1944 approaches, after having started with the first carrier last January. We have a contract to build (*) carriers that will be completed by January 1945.

Greetings to all of you folks in Leonard Lau and family Klemme.

As ever, Editor's Note: We have censored that part of Mr. Lau's letter marked (*), as we believe that comes under vital war information and is not ready for publication.

ELL AND LIBERTY TOWNSHIP TRAINING SCHOOL HELD

Nineteen Home Project Neighborhood leaders and co-operators met at the home of Mrs. Aaron Stromer on November 17 for their first training school in this year's program. The discussion on "Family Food Problems" was conducted by Miss Hazel Grimes.

Mrs. Louis Weaver, Ell township chairman, and Mrs. Erwin M. H. Liberty township chairman, made plans with the group for their second meeting which will be held at Mrs. Louis Weaver's home on December 14. The subject of the lesson will be "Money Management."

MRS. BUNTENBACH HOSTESS AT AFTERNOON BRIDGE

Mrs. Ed Buntenbach entertained a group of ladies at her home last Wednesday afternoon. Bridge was played at three tables and Mrs. H. D. Ram-ay won the high score. Second and third high scores were won by Mrs. Art Kudje and Mrs. P. M. Wilson, respectively. Mrs. Buntenbach served a lovely lunch after play.

Home Movies Shown

Sunday evening Mr. and Mrs. V. A. Stromer and family visited at the Carl Swanson home northeast of town. Mr. and Mrs. Earle Smith and Jo Ann, and Mr. and Mrs. Gideon Wittenberg and Mary Ann were also present. The evening was spent with the showing of home movies by Mr. Stromer. At a late hour a delicious lunch was served by Mrs. Swanson.

MRS. ETHEL PETERSON HAD GOOD SALE SATURDAY

The sale of household goods advertised by Mrs. Ethel Peterson in The Times last week was very successful.

The sale was held at the Community Building Saturday beginning at 2:00 o'clock.

Most of the furniture and household goods were nearly new and brought top prices.

ELL 4-H TIP TOPPERS HELD MEETING AT WEAVER'S

The Ell 4-H Tip Topper officers with their leaders, Mrs. Emory Weaver and Miss Bernice Weaver, met at the L. F. Weaver home on Thursday evening, November 18th, to plan the year's program.

Miss Hazel Grimes was present to assist them. At the conclusion of the meeting lunch was served by Miss Weaver and her mother.

MRS. GEO. LAWHORN HOSTESS AT BRIDGE PARTY

Mrs. George Lawhorn was hostess to the U-Delt-Em bridge club at her home Friday afternoon.

The three highest scores were won by Mrs. Art Kudje, Mrs. P. M. Wilson and Mrs. C. G. Waterman, in that order.

PARTY HELD FOR MRS. WALTER LEMKE

Mrs. Walter Lemke was honored at the J. C. Thomas home by a group of ladies at a party Monday afternoon.

Mrs. Lemke was presented with gifts and refreshments were served by the hostess.

The Lemke family will move to a farm near Ventura soon.

FINAL TAX INSTALLMENT DUE DECEMBER 15

Mr. E. H. Birmingham, Collector of Internal Revenue, desires to call the attention of taxpayers, especially those engaged in farming, to the fact that the final installment of estimated tax for the calendar year 1943 must be paid not later than December 15, 1943.

Examination of some of the reports now being received in Mr. Birmingham's office discloses that many of the taxpayers engaged in farming are forwarding their reports with checks or only one-half of the tax. Taxpayers following this procedure will, of course, receive credit for only what they pay, with the possibility that a penalty for failure to pay an installment within the prescribed time may be assessed in connection with the final return to be filed for the calendar year 1943, due in March 1944.

More than 3 million acres of disease-resistant grain sorghums, or a type which could be combined, grew this year from South Dakota to Texas.

Further stiff taxes are essential to help check inflation, says Edward Allen, Iowa State College economist.

THANKS, EVERYBODY!
for your patience and good will extended to us during the past year.
We wish you a real happy Thanksgiving Day!
Mr. and Mrs. Conrad Quandt
Quandt's CAFE

Thanksgiving Is Here Again!

The going may have been rather rough since last Thanksgiving, but the most of us have many things to be thankful for, and it is our hope that you have had your share of good things.

One of the big things we have to be thankful for is our old friends and the new ones we have made since last Thanksgiving Day.

WEEKLY NEWS ANALYSIS

Both Parties Study Election Trends; Higher Wage Scale Ends Coal Strike; Permit System May Regulate Marketing As Hog Shipments Flood Packing Plants

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Admiral William Halsey, left, and Gen. Douglas MacArthur map latest Allied war plans in South Pacific. Vice Admiral A. S. Carpenter is pictured behind General MacArthur.

HOGS:

Heavy Receipts

With hog shipments flooding packing centers and many slaughterers reported shifting receipts to less congested yards, there were rumors that the government may impose a permit system to regulate marketing.

During a recent three-day period, packers received 574,000 hogs, almost 40,000 over the record October peak of the previous week. With packers in possession of from three to ten days' supplies, 250 to 270 pounds brought \$14.40 in the Chicago yards, with weights below 180 pounds dropping from 15 cents to \$1 under the \$13.75 "floor."

Although the government had worked out a permit system for marketing last year, it did not apply it when heavy runs leveled off. According to experts, preference would be given to bigger hogs if the permit system were to be applied now.

Meat Production

Meat production for 1944 will total 24 billion pounds, the Bureau of Agricultural Economics reported, but increased government needs will cut civilian allocations.

More than 96 million hogs will be slaughtered in 1944, the BAE said, or three million more than this year. Because of smaller spring pig crops, however, next fall's marketings should drop below current levels.

Despite record slaughtering in 1943, cattle on farms should number about 80 million head January 1. Because of the feed situation, total cattle fed should slide below 1943 levels in the corn belt and other areas, BAE said.

Because of a shortage of ewes and labor, the 1944 lamb crop should be one to two million head smaller than this year, with slaughter also dropping. Butchering of sheep at 1943 levels would seriously deplete supplies by 1945.

ELECTIONS:

GOP Trend

With the election of Republican Simeon S. Willis as governor of Kentucky, the GOP swept through all recent elections to strengthen indications of a swing in the political pendulum.

In New York, Republican Joe R. Hanley amassed a majority of 348,000 votes to win the lieutenant-governorship from Democrat Lieut. Gen. William N. Haskell. Should Governor Tom Dewey decide to make the presidential race in 1944, Party-man Hanley will fill his shoes.

Governor of New Jersey during World War I, Republican Walter Edge ran up a majority of 128,000 votes to win the office again during World War II, besting labor-backed Democrat Vincent Murphy.

Republicans maintained their 62-year control of Philadelphia with the election of Republican Bernard Samuel for mayor over White House favorite and Democrat William Bullitt by 64,000 votes.

Said GOP National Chairman Harrison Spangler: "The light of the New Deal has flickered out." Retorted Democratic National Chairman Frank C. Walker: "I read no national trend whatsoever in . . . the . . . results."

HIGHLIGHTS . . . in the week's news

ENTERPRISE: A Michigan farmer, Frank Barron of Delta county, had about given up hope of raising anything on an eight-acre patch that lay under water until midsummer. His county agent suggested that Canadian purple top rutabagas might mature before frost. Barron sowed two crops and has harvested five tons to the acre, worth \$70 at \$14 a ton.

REFRIGERATORS: New refrigerators again may be made about the middle of next year, Office of Civilian Requirements officials say, after considering results of a survey showing the serious need in millions of homes. There is a demand right now for five million refrigerators and four million washing machines. Only about a million of each will be manufactured at best next year.

Record Debt for U. S.

As of October 31, the direct federal debt of the U. S. stood at approximately 165 billion dollars. Broken down, that represents a debt of \$1,203 for every person in the country or \$5,000 per family, on the basis of four members. Interest rates have fallen to an all-time low of less than 2 per cent, however.

The present debt contrasts with the one of 55 billion which existed before the war, when the interest rate averaged 2½ per cent. Following World War I, the public debt reached 26½ billion dollars, with over 4 per cent interest.

The present 165 billion dollar debt does not include over 4 billion dollars of government guaranteed obligations.

MANPOWER:

Define Essential Industry

At least 75 per cent of a company's business must be essential for employees to be frozen into their jobs under War Manpower commission regulations.

In plants with essential as well as nonessential production, only workers employed on the essential manufacturing can be frozen into their positions.

Workers frozen in essential industry cannot transfer to other jobs without obtaining release from their employers, unless they can offer evidence that their skills are not being fully utilized in their occupations, or they are not being employed full time.

RUSSIA:

Near Rumania

As German forces retreated in the southern Ukraine, they were only 100 miles from the prewar Rumanian border, while in the north, they fell back to within 45 miles of the old Latvian boundary.

Krivoi Rog remained the focal point in the southern Ukraine, with the Germans fighting bitterly to hold open an escape corridor for their troops threatened with encirclement in the great bend of the Dnieper river. With the Germans holding at Krivoi Rog, it appeared as though they were successful in moving most of their forces from the trap.

Along the Black sea coast further south, Russian troops continued to pour over the bleak, barren Nogaik plains, with German forces streaming westward toward the Rumanian border. As a result of recent movements, the battle front in Russia ran in almost a straight line from north to south, with the huge Dnieper river bulge eliminated.

EUROPE:

Food Plentiful

With 1½ billion bushels of bread cereals harvested and dairy herds at high levels, Europe's food stocks appear adequate for the next year on the basis of reports of European newspapers and Swedish correspondents. Only pig and poultry supplies are smaller.

Because of the efficiency of Germany's rationing system, it was said, food will not contribute to any collapse of the Nazi home front. Increased production of vegetable oils are supplementing the Germans' diet. On the other hand, Russia faces serious food shortages this winter, with conditions approaching famine in some areas.

Should the war in Europe end suddenly, big difficulty in feeding the populace would arise in moving the food from the farms to the cities, where plants made idle by cessation of war production would create severe problems of unemployment.

INSIDE JAPAN:

Morale High

Intensive propaganda has had its effect in Japan, with its 90 million people firm in their conviction that theirs is a holy war to smash the white man's economic domination of Asia.

Early victories after Pearl Harbor heightened Japanese enthusiasm, and although overburdened transportation facilities have aggravated the general food shortage with black markets thriving, travelers say that the usually frugal populace has accepted added privations as one of the necessities of war.

Financed by paper money issuance, Japan's war industries are booming, with everybody from employer to worker prospering. Coolie wages alone have risen from about 34 cents to \$2.30 a day. The Japs are heavy war bond buyers.

As head of the Japanese religion, Emperor Hirohito still commands awesome loyalty of the people, with Premier Tojo cleverly playing upon this reverence to mobilize the state.

Rumors of an early peace resulting from the Moscow conference, and victories on the Russian and Italian fronts, caused declines in so-called war stocks, including railroads, and an upturn in peace stocks on the New York and other markets. Steel, rubber, aircraft, and distilling issues dropped one to two points, as did many low grade rail stocks.

High class rails and many utilities marked up small gains. In commodities, wheat broke one to two cents a bushel, but recovered later.

Washington, D. C.

KEY ECONOMIST OUT

Handsome, platinum-haired Ed Stettinius, acting secretary of state, telephoned "Assistant President" Jimmy Byrnes, asked that he call a meeting of the War Mobilization cabinet to consider cancellation of war contracts where foreign countries are involved. Already various war contracts are being cancelled, and some of the cancellations, especially those involving the purchase of metals, mean breaking commitments to foreign governments.

Byrnes agreed, called the meeting. On the morning set Stettinius phoned again.

"We've got to call off the War Mobilization cabinet meeting," he said.

"Why?" asked the puzzled Byrnes. "Feis has resigned," replied Stettinius. "He's the expert on foreign war contracts." He was referring to Herbert Feis, economic adviser to the secretary of state.

"Well, can't you come to the meeting and present your views to the cabinet?" suggested Byrnes. "No," replied Stettinius, "Feis is the only man who knows anything about the subject."

The special cabinet session was postponed.

Note: Herbert Feis, related by marriage to the late President Garfield, is a distinguished liberal economist appointed by Secretary of State Stimson under Hoover. His resignation was handed to Hull shortly after the resignation of Sumner Welles, at which time Hull began to sweep out liberals. When newspapers revealed this clean-out, Hull held up acceptance of Feis' resignation, left word that it be announced while he was in Moscow.

DIES COMMITTEE DYING

The Dies committee soon will release an interim report, listing the various Nazi and Jap groups which operated more or less openly in this country until Pearl Harbor under the names of tourist bureaus, trade associations, etc.

It will be prosaic, less sensational than previous reports, with a back-handed slap at the administration for permitting such things to happen.

Employees of the committee are bemoaning the report's mildness. Committee funds are getting to the point where the house must be asked for more, but maybe the dough will not be forthcoming unless Dies can throw the house something far more sensational.

The only thing sensational that forthright Martin Dies can drag out now concerns Communist influence among the Negroes, and he hesitates to do this, fearing nation-wide repetition of the Detroit race riots.

WHEAT UNCERTAINTIES

Though no announcement has been made, inside word in the agriculture department is that wheat farmers will get a loan price of 90 per cent of parity, which is a 5 per cent increase over this year.

Officials recognize that something attractive must be done to increase wheat plantings. As it looks now, plantings are going to fall below the high goals set by the government—an acreage increase of 14 million over this year.

This year farmers had the 85-per-cent-of-parity loan, which acted to support the price, plus both parity payments and conservation payments. But congress has knocked out parity payments for next year, leaving a margin of uncertainty as to whether wheat will bring as much as flax or grain sorghums, or some other crop.

Planting is now well along in the winter wheat belt, but it is reported to be a slack planting. Never has there been so much demand by farmers to know what the price is going to be. And the official answer is still withheld.

And when the announcement is made, it will be a loan figure of 90 per cent of parity, whereas farmers would like to have 100 per cent, to make up for the loss of parity payments.

All this confusion comes at a time when there is a greater demand for wheat than this country has ever known. In addition to the tremendous demand for wheat for flour, 450 million bushels have been used for animal feed in the past 12 months, and still more will be needed for the same purpose in the next year. And beyond that, the government has pledged another 50 million bushels for foreign relief.

All this explains why the gates are being opened again to imports of wheat and barley from Argentina, for the first time in quantity since the drought years.

CAPITAL CHAFF

Wendell Willkie in his closed door session with GOP congressmen described Stalin as a "he-man's he-man, who doesn't go in for glamour, but who keeps his word and expects others to do the same."

More and more railroad workers are saying that they would be better off if the railroads were run by the government.

Last spring, delivery of heavy bombers to the U. S. Eighth air force in Britain was increased greatly. The increase is still continuing.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for November 28

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

TRUTHFULNESS AT ALL TIMES

LESSON TEXT—Exodus 20:16; 23:1, 7; Matthew 5:33-37; John 8:42-45.
GOLDEN TEXT—Wherefore putting away lying speak every man truth with his neighbor: for we are members one of another.—Ephesians 4:25.

God hates all kinds of dishonesty—a fact which is emphasized by the additional commandment regarding truthfulness which is before us in this lesson.

God is truth, that is, the very essence of His nature is truth. In Him is no darkness at all (I John 1:5). Lying or false witness therefore reveals a character opposite to God. Hence we are not surprised to find in our lesson that Satan is a liar and the father of lies, and that liars are his children.

I. The Nature of a Lie (Exod. 20:16; 23:1, 7).

The commandment against false witness brings before us one form of lying—for it has to do with perjury, that is, the telling of an untruth in court.

This is one of the worst forms of lying, because it may result in the one against whom it is practiced losing his liberty, his life or his property. It may mean the destruction of his good reputation.

It is obvious, however, that the commandment covers all forms of lying, whether in business, in social contacts, in the home, or in the church. We might do well to consider what the Bible has to say about whisperers, talebearers, backbiters, and others (see Lev. 19:6; II Cor. 12:20). A man's reputation may be as easily ruined by a whispered lie over the back fence or the luncheon table as by formal perjury in the courtroom. "Thou shalt not bear false witness" at any time, anywhere, or in any way.

II. The Practice of Lying (Matt. 5:33-37).

The people of our Lord's day (and who can say that the custom has stopped) were in the habit of telling lies and then trying to make others believe them by an oath.

They would swear by heaven, or the throne of God, or some other sacred thing, and thus try to enforce their false word by some great authority.

The liar is always under necessity of doing something—perhaps telling another lie—to cover his falsehood. When his comfort or advantage seems to be endangered because he is not believed, he brings an oath to bear upon his statement.

Jesus taught the great virtue of simple living and simple speech. A plain "yes" or "no" is usually sufficient for the situation. Qualifying words are apt to lead us astray. The life of a Christian should be so true and above board that no oath should be needed to assure one of his sincerity and honesty.

Since not all are Christians, it is a necessity that men be placed under some kind of oath or affirmation in judicial matters. Hence we need not interpret this Scripture as forbidding an oath in court.

It may be well to say a word about swearing in general. It is all too common among men, women and children. No Christian should ever be guilty of it, or that which sounds like it. We need admonition and correction at that point.

III. The Source of All Lies (John 8:42-45).

The devil is a liar, and the father of lies. Liars are members of his family. Jesus said it, "Ye are of your father the devil."

Liars had better consider their "family tree" and see how they like their spiritual father. He is lustful, murderous, and there is no truth in him (v. 44). If you belong to that family would you not like to change families and be born again into God's family?

Sadly enough the constant lying of the world seems to have infected the minds and hearts of Christians. Instead of being cleansed from this worldly defilement they carry its awful tendencies into the church. Is it not too true that gossip (which is almost always lying), false witness, the tearing down of someone's good name, is all too common in the church?

The great lie within the church, and one of Satan's prize exhibits, is the falsehood of modern religious liberalism (so-called) which is essentially a denial of real New Testament Christianity. Jesus said (v. 42) that if God is our Father we will accept Him as the Christ. The one who speaks sweet words about the example, the manhood, the leadership of the Master and who denies Him His place as God is clearly in mind here as a follower of the father of lies.

Note that in verses 45-47 Jesus challenges His enemies to convict Him of sin or of falsehood. No one has ever been able to meet that challenge.

The claims he made for Himself as the Son of God and the Saviour of the world are plain and unmistakable. If we deny them we either make Jesus a liar, or we lie ourselves, and it is obvious that the latter is the case.

Uncle Phil Says:

Most men would learn it could acquire knowledge with the humiliation of being taught. Facts are stubborn things, you can do just about anything with statistics.

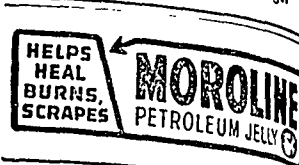

Time may be money, but most of us can spend money in no time.

Critics are like brushes of other people's clothes.

Money lost in speculation dropped by men who are trying to pick it up.

One can easily remember his commitments without writing them down.

Strange isn't it, that the Gold age is never the present age.

The daily enameled unit you see on a soldier's jacket overseas cap are reproductions of his regimental shield displayed in the center of the eagle on his regimental flag. It's a part of U. S. Army tradition. Traditional, too, is the Army man's preference for Camel cigarettes. (Based on actual sales records from service messes and stores.) It's a gift from the folks back home, that always cheers them. And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S. and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.

Relief At Last For Your Cough

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and engulf laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you will have your money back.

CREOMULSION for Coughs, Chest Colds, Bronchitis

Exiles' Contribution

The nine governments-in-exile in London have so far contributed to the Allied nations approximately 450,000 soldiers, 27,000 aviators, 22,000 seamen, 240 naval vessels and about 2,300 merchant ships.

Commonsense Says: PAZO for PILES

Relieves pain and soreness

For relief from the torture of simple Piles, PAZO ointment has been famous for more than thirty years. Here's why: First, PAZO ointment soothes inflamed areas, relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent constipation. Third, PAZO ointment tends to reduce swelling and check bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple. Borough-Your Doctor can tell you about PAZO ointment.

Waste Fats Make Munitions and Medicines; Need 200 Million Pounds a Year, Says Nelson

Every Family Must Save a Pound Each Month to Meet Quota

"An adequate supply of fats and oils is essential to the successful prosecution of the war."

With those words Donald Nelson, chairman of the war production board, urged housewives of the nation to cooperate actively in a campaign designed to salvage every available ounce of waste fat.

The fat salvage drive is aimed at every home. Its specific target is the kitchen where, unfortunately, millions of pounds of glycerine-containing fat are being poured into the garbage pail or down the kitchen drain.

Fats will help win the war and be a prime essential in negotiating and implementing the peace. Fat and oil sources have taken a terrific beating in the war. Whole areas that produced palm and coconut oil have been laid waste, cattle have been killed off to feed fighting men. Europe is in the throes of a fat famine.

How seriously this shortage may affect our own troops and our civilian population depends in a large measure on the people themselves. The quota of 200 million pounds of fat for household salvage in 1943 was not set as a measure of the need. The shortage for all purposes, military, industrial and domestic, was far in excess of that figure. It was worked out that American households could save and turn in 200 million pounds of used kitchen grease without undue hardship and without depriving families of their fat energy requirements.

Due to many factors, some of them beyond the control of homemakers, the rate at which kitchen grease is being turned in, is far short of the quota. Yet, a glance at the figures, at the quantity of meat, butter and shortening, available for family use is convincing proof that American households could salvage double their quota if they would buckle down to the job on a drop by drop, tablespoonful at a time program of saving and then turn in their grease to a local meat dealer collector.

The need for waste fat for glycerine and other by-products for explosives, munitions and medicines is not diminishing as our troops advance on all fronts. To the contrary, it is increasing. Nor is the

need sporadic or momentary. It is a long term, continuing program which will probably extend well beyond the limits of a shooting war, according to an Office of War Production statement.

Without glycerine we could not produce gunpowder to fire many of our shells and ship and plane instruments would not function.

Glycerine has no substitute, or in any case, no satisfactory one has yet been discovered for many types of explosives. Because of the shrinking reserve stock of this vital ingredient, the WPB already has found it necessary to ban the use of glycerine in practically all civilian products, cigarettes, cosmetics, dentifrices and dozens of others.

This drastic move was made because we are nowhere near to bringing used fat collections to the point which will achieve the 200 million pounds yearly quota necessary to provide the glycerine its many war uses require. National collections have continued to climb, even with the advent of meat and shortening rationing, but the highest monthly total so far—7,312,617 pounds last

March—is almost nine million pounds short of the required monthly total.

If you don't think waste fat is important listen to this: 31 table- spoons of used kitchen fat will make enough glycerine for a pound and a half of gunpowder. Or 31 table- spoons of fat will provide powder to fire four 37-mm. anti-aircraft shells. Figuring another way, a pound of fat will yield enough glycerine for 1 1/2 pounds of powder for machine gun cartridges. (There are other materials in gunpowder besides glycerine derivatives, but the glycerine compound is what puts the "punch" in the explosive.)

Other uses for glycerine in war equipment requiring a liquid that does not freeze easily, or has some other necessary quality, are in recoil mechanisms for guns, hydraulic devices, such as presses and elevators, pumps, ships' steering gear, in compasses, depth charge releases and many for other mechanical purposes. Glycerine is also employed in special compounds to coat weapons, as anti-freeze in radiators and on windshields, and in medicines.

Medical Uses.

The medical use of glycerine is constantly growing in importance. Glycerine is present in these and many other preparations:

Tannic acid used in the treatment of powder and other burns.

Some insulins used in the treatment of shock as well as diabetes. Tinctures of opium and gentian used as sedatives to ease pain.

Smallpox vaccine as a preventive injection given to all men in the armed forces.

Sulpha diazine ointments for treatment of fungus growths.

Nitro glycerine tablets for a heart stimulant.

Acridine used as an antiseptic.

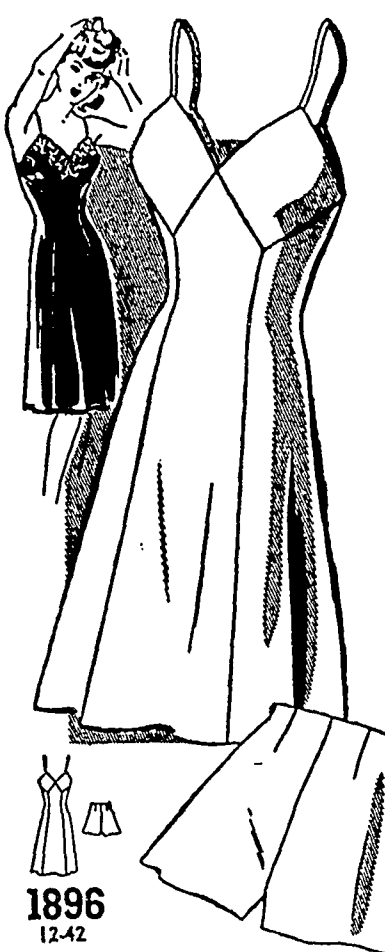

Military medicine is achieving remarkable results in saving lives. With new techniques and drugs, the death rate from wounds has been reduced from 76 per cent in World War I to 31 per cent in this conflict. Sulfa compounds and blood plasma are given much of the credit for this splendid accomplishment.

In order that that high rate of recovery and the low rate of death of our wounded may continue, the manufacturers of medicinals for the armed forces must have a plentiful supply of glycerine. As more men are sent into various fields of action, it is inevitable that there will be more casualties and that a still more plentiful supply of healing drugs will be needed.

At the present time the house- holders of America are contributing around nine million pounds of used kitchen fats to the war effort each month, but this is only a little more than half of what is needed to keep our glycerine stocks at a safe level. It is safe to say that at least three times this amount of valuable glycerine-containing fat still is being wasted. Remember, all fat is wanted. The color is unimportant, as brown fat is as good as white for chemical processing.

The housewife has only to save as much fat as possible each day, store it in a tin can and take her savings regularly to the meat dealer, who will pay her for it and send it on its way to the war production line. Within 21 days it will be processed and the glycerine thus obtained will be put to some vital war use.

PATTERNS SEWING CIRCLE

Body Moulding.

YOU'LL be delighted with the way this four-gore slip with its brassiere top fits your figure! You may finish it with a smart lace front and lace hem. The pattern includes panties to match.

Pattern No. 1896 is designed for sizes 12, 14, 16, 18, 20; 40 and 42. Corresponding bust measurements 30, 32, 34, 36, 38, 40 and 42. Size 14 (32) slip requires 2 1/4 yards 36 or 39-inch material, panties 1 yard. One lace motif plus 4 yards edging to trim set.

Rural Driving Hazards Greater in Winter; Death Toll 24% Above Summer Months

Winter's most serious driving hazards are slippery snow-and-ice-covered roads and poor visibility caused by frosted or fogged windshields and long hours of darkness, and these hazards are more serious on rural highways than on city streets according to studies by the National Safety council.

Declaring that shortage of manpower and of safe winter driving

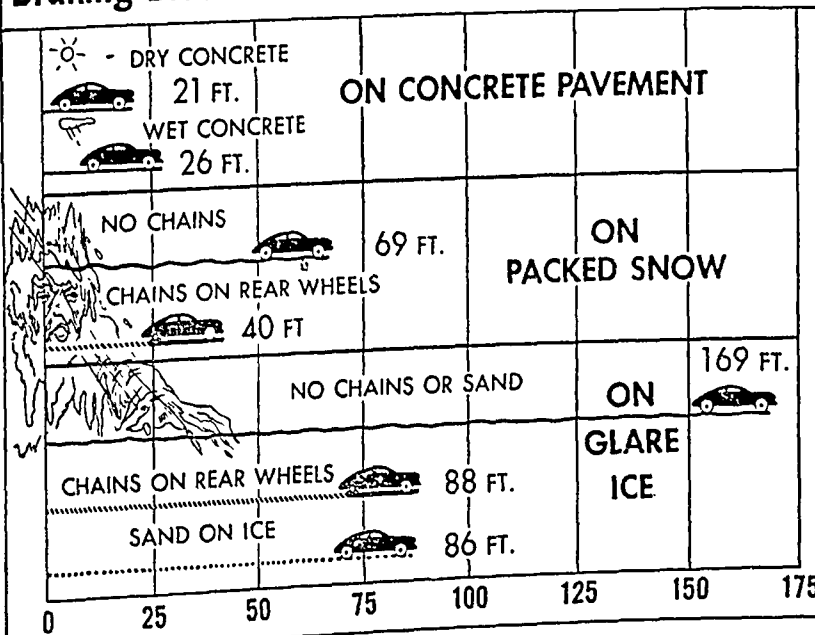

"while the southern winter caused only a 5 per cent increase."

Following are rules, based on council research, for driving under adverse road and weather conditions.

Winter Rules.

1. Adjust speed to conditions.
2. Slow down well in advance of intersections and curves.
3. Follow other vehicles at safe distances.

Braking Distances on Various Surfaces at 20 mph

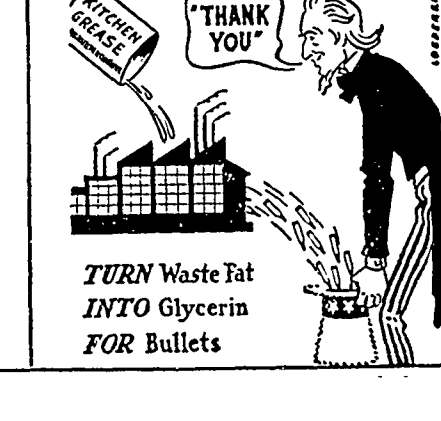

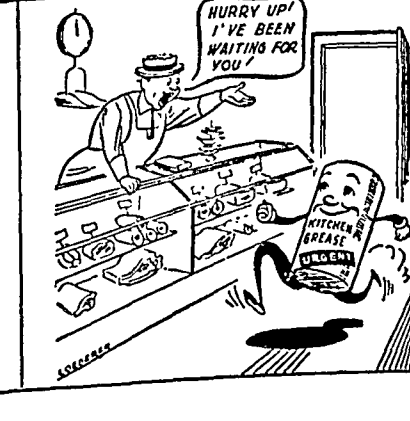

equipment will be an added handicap this winter in 36 northern states, Prof. Ralph A. Moyer, of the Iowa State college engineering experiment station, who is chairman of the council's committee on winter driving hazards, points out significant facts for consideration by farmers and all others who must drive on rural roads this winter. "Traffic deaths in snow belt states last winter ran the mileage death rate 24 per cent higher than the summer toll," Professor Moyer said.

4. Put on tire chains when roads are slippery with snow or ice.

5. Signal intentions of turning or stopping.

6. Apply brakes lightly and intermittently on icy roads.

7. Remember that braking distances on snow and ice are from 4 to 11 times greater than on dry pavement, and that wet ice at near thawing temperatures is twice as slippery as dry ice near zero.

MARCH OF TIME

CARD OF THANKS

I wish to take this means of sincerely thanking my neighbors and friends for their help at my place, and for the cards, letters and flowers sent me during my illness.

J. W. "Bill" Johnson. 1tp

KLEMMÉ LOCALS

Sunday dinner guests at the home of Mr. and Mrs. Walter Lemke were Mr. and Mrs. Nick Schmitt and son of Marble Rock; Mr. and Mrs. Walter Geisler of Nora Springs, and Mr. and Mrs. Alvin Meyer and family of Garner.

Seaman Donald Schaefer left today, Wednesday, for Camp Farragut, Idaho, where he recently completed his "boot training." He has been spending a furlough visiting with his parents here, Mr. and Mrs. Roy Schaefer and other relatives.

Mrs. Truel Steffens, Mrs. Stewart Hevlin and baby, Mrs. Art J. Kudje and Ginger and Mrs. Dwight Hummel spent Monday afternoon visiting with their aunt, Mrs. John Johnson east of town. It was Mrs. Johnson's birthday anniversary.

Mr and Mrs V A Stromer entertained to a pre-Thanksgiving dinner, Sunday: Mr. and Mrs. Geo. Heald and daughter Joyce, of Rolfe; Mr. and Mrs. H R. Stromer; Mr. and Mrs. Aaron Stromer, and family; and Milton and Ruth Ferrer of Mason City.

We are glad to report that Mrs. Gretchen Schlawn is making a good recovery from her recent illness and is able to be up part of the time each day. She is at the home of her son-in-law and daughter, Mr and Mrs. Walter Rosen-dahl.

Mrs. Roche Murray, of Chicago, came last Thursday to spend two weeks in Klemme visiting with her grandmother, Mrs. Frances Ridder and other relatives. Mrs. Murray is the former Miss Enid Harvey, the daughter of Mr and Mrs. Sam Harvey, former Klemme residents

Word has reached Klemme that Sgt Franklin Buseman and Pvt Alvin Keeper, both of Klemme, met each other in England a short time ago. They are going to try to contact other Klemme young men in England and have a get-together.

Sunday dinner guests at the Geo. Stokesbary home at Garner Sunday were Mr. and Mrs. Orville Stokesbary and children of Klemme, and Mr. and Mrs. George Stokesbary of Des Moines. George, a former Klemme boy, is a member of the city fire department at Des Moines.

Mr and Mrs. Emil Patet and Kenneth Schultdt and family were dinner guests Sunday at the home of Mr and Mrs. W. C. A. Gast of near Garner. The occasion was also Mrs. Gast's birthday anniversary. Mr. and Mrs. Gast are retiring from their farm and will soon move to Garner.

Dinner guests Sunday at the Herman Paul home were Mrs. Paul's brothers, Henry of Klemme, and Louie, Seaman First Class of the U. S. Navy, and his wife of Forest City. Seaman Suckow has been enjoying a thirty day furlough. He will leave for the Canal Zone Friday, where he has been stationed as a navy barber.

Small Boy Fractured Arm

Billy, small son of Mr and Mrs. John Waddingham, fractured his right arm above the wrist Tuesday when he fell off from bean bales on which he was playing, at his farm home south-east of Klemme.

AN INVITATION

Friends of Cecil Katter and our daughter, Irene, are cordially invited to attend the wedding ceremony to be held at the Reformed Church on Sunday evening, November 28, at 6.30 o'clock.

Mr and Mrs. Fred Becker.

Elmer Bachman Injured At Community Hall

Elmer Bachman suffered severe head cuts and bruises when he fell from the steps at the Community Hall Tuesday evening. Mr. Bachman, who was attending the dance, stepped outside and as he leaned against the iron pipe railing at one side of the steps, it gave away and he fell several feet, landing on a concrete stairway leading to the basement kitchen.

Mr Bachman was unconscious for some time after the fall and was treated by a local physician.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. to

Mr. and Mrs. Frank Sandry were Mason City visitors Tuesday.

Mr. and Mrs. Levi Klotzbach spent Sunday visiting at the Leslie Smock home in Kanawha.

Lowell Ulrich was a visitor at the Walter Merkel home in Des Moines over the week end.

Mrs. C. J. Wille attended a 4-H convention at Ames over the week end.

Mr. and Mrs. C. E. Harding and son of Greene were guests at the H D Ramsay home, Sunday

Mrs. Elizabeth Smid and daughter, Mrs. Ed Rall, left Sunday for their new home at Hanover, Ill.

Mrs. Quentin Stille and Mrs. Bert Jones were Mason City visitors, Friday.

Mr and Mrs Frank Schultdt of Garner visited with Mr and Mrs Edw Schaefer Sunday afternoon

Mrs Fred Gates, former Klemme resident, is reported seriously ill at her home at Clear Lake

Mrs Frances Ridder and granddaughter, Mrs. Roche Murray, were Mason City visitors, Monday.

Mr and Mrs Ernest Helps were guests at the home of Mr. and Mrs Henry Helps, Sunday.

Paul Grange, manager of the Northern Lumber Co. at Mason City, was a business caller in Klemme, Monday afternoon.

William Stille left Saturday evening for Los Angeles, California, to spend the winter there with his son Donald and wife

A. G. Lau drove to Humboldt on Monday, to attend a district meeting of the De Kalb seed corn dealers.

Mr and Mrs E. J. Schneider were dinner guests Sunday at the home of Mr. and Mrs. P. M. Wilson.

Mrs. Art Kudje, Mrs. P. M. Wilson and Mrs. R. A. Jorgenson visited Tuesday afternoon with Mrs Earl Schaeffer at Forest City.

Mrs Leo Esbeck, Mrs Ed Jacobs, Mrs. H D. Ramsay and Mrs Art Kudje were Mason City visitors, Thursday afternoon

Mrs. Keith Albertson and Mrs Verle Keraus of Garner, were Mason City visitors Monday afternoon.

Mrs Daisy Lemke entertained a number of relatives at a dinner at her home Sunday, in observance of her son Donald's birthday, which was November 17th.

John Griewe left Tuesday on his way to the Sunny South John will work along the route and expects to wind up in Florida for the winter.

Mrs. Levi Ridder, Mrs A G Koerner, Mrs. Orville Stokesbary and children, and Mr and Mrs Gary Koerner were Mason City visitors, Monday.

Mr. and Mrs. C. C. Kilgore and Gus Hollberg were dinner guests Sunday at the home of Mr and Mrs Joe Burgess, southeast of Klemme.

Grandma Smith, who has been staying at the J. N. Day home for the past two months, went to Clear Lake Sunday for a visit with her son-in-law and daughter, Mr. and Mrs. Bert Mathews.

Walter Lemke and family are moving today, Wednesday, to the Alvin Meyer farm north-west of Ventura. Mr. Lemke and Mr Meyer will be in partnership raising turkeys.

Mr. and Mrs. Verle Keraus and son, Mickey of Garner, were Sunday dinner guests at the parental E. C. Buntensch home. Mickey remained here with his grandmother until Monday night

The Methodist ladies took in the sum of \$149.20 at their bazaar and supper last Thursday. They wish to thank those who patronized the bazaar and supper, and those who helped in any way.

Mrs. George Lawhorth drove to Rochester, Minnesota, last Thursday and brought Mr. and Mrs. Todd Berlin to Mason City. Mr. Berlin is making a good recovery from his recent major operation.

Mr. and Mrs. John Neuberger had as their dinner guests on Sunday evening: Mr and Mrs. Emil Blumer, Mr and Mrs. Merlm Neuberger and Dean, and Mr and Mrs. Carol Brager and Darryl.

Miss Luella Lewis, who enlisted as an army nurse and who is taking her training at the Methodist hospital in Des Moines, spent the week end here visiting with her parents, Mr and Mrs. Verner Lewis.

Sunday, November 21st was Carol Montgomery's sixth birthday, so in honor of the event her mother, Mrs. Clifford Montgomery, prepared a big dinner and had as guests, Mr and Mrs Walker and Theone Badker of Clear Lake.

Daryl Frederick, infant son of Lt and Mrs. Harold Kothenbeutel, was baptized by Rev Calvin Grosshuesch Sunday morning at the Reformed church. Lt Kothenbeutel is home on a 15 day furlough Mrs Kothenbeutel and children will accompany him back to Camp Atterbury, Indiana, when he returns to duty.

This Is Another War-Time Thanksgiving

But, Let's Be Thankful!

This is another War-Time Thanksgiving, but let's be thankful for the progress our Nation and our Allies have made in the past year. Let's re-dedicate ourselves to striving toward a complete and lasting Victory which will endow the entire world with Freedom and Democracy that we, as a Nation, have enjoyed since our Pilgrim Fathers celebrated the first Thanksgiving Day at Plymouth in the year 1621.

Let's be thankful that we can buy War Bonds and Stamps voluntarily that will hasten Victory and end the conflict and again bring a World-Wide Peace.

YOUR OWN CREAMERY is an essential War Industry, supplying needed butter to our Armed Forces, our Allies and for Civilian use as well. The Farmer Patrons of this home-owned concern can feel that they, themselves, are really playing an important part in winning the war through Dairying and Food Production.

The Management, Directors and Employees take this opportunity of saying: "Thank You" for your cooperation and patronage during the past year.

Hancock County Will Avenge Pearl Harbor With Scrap

COUNTY-WIDE SCRAP DRIVE
"PEARL HARBOR DAY,"
TUESDAY, DEC. 7

Up Every Pound 'Of Old
Scrap Iron You Can Find
Around Your Property

A meeting held at Britt on
Friday night the Hancock
County Salvage Committee de-
cided to stage a county-wide
metal drive on "Pearl
Harbor Day," Tuesday, Dec. 7.

Scrap Metal Is Vital Material

Great steel mills must have
scrap metal in order to keep
manufacturing critical steels
for the war effort.

Members are urged to comb their
premises for every pound of scrap
they can find. Even if you have
100 pounds of scrap, turn it in
on Tuesday.

Up The Japs With Scrap and
the Pearl Harbor" is the battle
cry for next Tuesday. Get your
iron rounded up and have it
ready for the trucks next Tuesday
evening. You will be paid for
your scrap or you may donate it to
the war effort and the money will be
used for War Work Relief.

"Hackers" To Be Dealt With

Overholt, local chairman who
headed the meeting Tuesday eve-
ning at Britt said that steps will
be taken to deal with those few
who have consistently ignored the
scrap metal in the past.
He said, "Names were
mentioned and this drive is going to
teeth in it to deal with those
few." It was hinted that one
who is taken against these who
refused to co-operate in past
drives, and who fail to co-
operate in this drive, will be deprived
of their ration book and coupons
of all kinds. They may also expect
to be called on by the F. B. I., and
this will result in publicity they
do not like.

Be patriotic and round up every
pound of scrap you can find.
The same town and township
committees used in the past will
oversee this drive.

Avenge Pearl Harbor next Tu-
esday!

4-H Leaders To Meet

Hancock County boys 4-H Club
members will meet at the County
Bureau Office in Garner on
Friday evening, December 7.

A Lineweaver, the Assistant
Boys' 4-H Club Leader, will
be in charge of this meeting.

Not all the victories are on our
side; not all the losses are our
enemy's. Here you see barrel upon
barrel of good American fuel going
up in smoke after a Jap strafing.
The boys cannot be replaced but
the material can—that is, if all real
Americans do their utmost in the war
effort and buy War Bonds.
Make your dollars work for vic-
tory: Buy More War Bonds.

U. S. Treasury Department

GEO. THIEMANN'S SALE IS THIS WEEK FRIDAY

Geo. Thiemann recently pur-
chased the Wayne Pavey property
in Klemme and he and Mrs. Thi-
emann will move to town soon after
their public sale which is adver-
tised this week in The Times. The
sale is scheduled for this week Fri-
day, Dec. 3rd and will be held at
the Thiemann farm 4 miles east
and 3-4 mile south of Klemme.

Included in the offering is a lot
of farm machinery, tools etc., some
household goods and fifty head of
livestock.

Turn to Mr. Thiemann's adver-
tisement in this issue of The Times

WM. THIEL WILL HAVE SALE NEXT TUESDAY

Wm. Thiel is using the columns
of The Klemme Times this week
to call your attention to his closing
out Public Sale to be held at his
farm 3 miles east and 3-4 mile
north of Klemme next Tuesday,
Dec. 7.

Mr. Thiel will dispose of approx-
imately 100 head of livestock in-
cluding 43 head of cattle and 56
head of hogs. He also has a large
amount of farm machinery.

Mr. Thiel has purchased a house
in town the first place north of the
Community Hall and will move to
town soon after his sale.

Turn to his big ad on the inside
page of this issue.

CARDINALS AND SHAMROCKS SPLIT HONORS HERE

The Garner Cardinals invaded
the Shamrock basketball court on
Tuesday evening and split honors
in a double header.

Klemme's Little Shamrocks dis-
played some real power and beat
the Garner reserves 19 to 21, after
a nip and tuck battle all the way.

The Klemme Shamrocks sprang
a big surprise by out-playing the
veterans Garner Cardinals through-
out the first half, taking a 6 to 0 lead
to end the first quarter which the
Shamrocks stretched into a 13 to 8
lead at the half.

But the second half was a differ-
ent story when the Cardinals
caught the Shamrocks off guard
and sailed threw a succession of
shots to tie the score at 18 all, and
to steadily increase the lead from
there on out to defeat the Sham-
rocks 25 to 21.

PAIRINGS MADE FOR COUNTY BASKET BALL TOURNY

Klemme Will Be Host To Tourna-
ment Jan. 26, 27, 28 And 29

Dates have been set and pairings
made for the annual county basket
ball tournament which will be held
in Klemme this year on January
26, 27, 28 and 29.

The pairings are as follows:
Hayfield vs. Woden
Crystal Lake vs. Klemme
Kanawha vs. Corwith
Goodell vs. Britt
Garner vs. winner of Goodell-
Britt game.

NEWLYWEDS HONORED AT SUNDAY SCHOOL PARTY

Mr. and Mrs. Dwight Hummel
were honored at a party held at
the Methodist Church Friday even-
ing which was sponsored by the
Goodfellowship Class. Families of
the class members were present
and the evening was spent in sing-
ing and games, in charge of Miss
Nella Bredbenner.

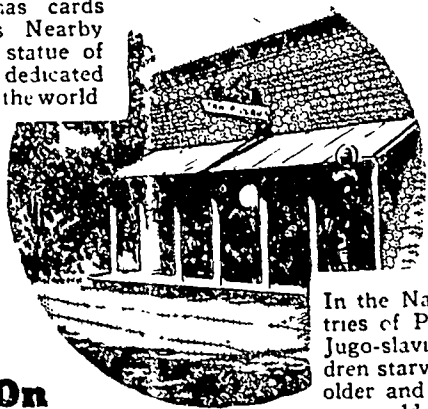

After the social hour a nice
lunch was served by the committee
in charge. Mr. and Mrs. Hummel
were presented with a gift of mon-
ey.

Considerably more sheep and
lambs are on feed this year than
last.

BONDS OVER AMERICA

Less than 100 people
live in Santa Claus, In-
diana, but each year the
postmaster sends out
more than half a mil-
lion Christmas cards
and packages. Nearby
is a granite statue of
Santa Claus, dedicated
to children of the world.

Reformed Church Scene Of Wedding Sunday Evening

MISS IRENE BECKER BRIDE OF CECIL KATTER IN SINGLE RING CEREMONY

Couple Will Reside On The Becker
Farm After Short Trip

A wedding ceremony was per-
formed at 6:30 o'clock Sunday eve-
ning in the Immanuel Evangelical
and Reformed Church when Miss
Irene Marie Becker, daughter of
Mr. and Mrs. Fred Becker, Klemme,
became the bride of Cecil B.
Katter, son of Mr. and Mrs. Ben
Katter of Garner.

The Rev. Calvin Grosshuesch,
pastor, officiated, using the sing-
ing ceremony at the candle-light altar.

Preceding the wedding rites Miss
Phyllis McClellan played "The Ro-
sary" and "Oh Promise Me" on the
marimba. Miss Eunice Larsen
sang "Because" and "At Dawning"
and was accompanied by Miss Mc-
Clellan at the piano.

The professional and recessional
wedding marches were played by
Miss Phyllis McClellan.

The bride was given in marriage
by her father and in the bridal
party were Mrs. Gertrude Gross-
huesch of Mars Blown, maid of
honor, the Meses Arlene Schmidt
and Jacqueline Elling, bridesmaids,
and Marian Prebe and Karen Katt-
er flower girls.

Ray Elling, Garner was bestman,
and the ushers were the Meses A-
rles Barz and Eunice Larsen.

The bride wore a gown of white
silk tulle with sweetheart neckline
and train, pearl coronet and finger-
tip veil, a three-strand pearl neck-
lace and silver slippers. Her bu-
quet was of yellow roses.

Miss Grosshuesch's gown was
dusty rose silk lace net with shoul-
der veil to match, silver slippers
and bouquet of mixed flowers.

Miss Schmidt wore a rose silk
lace net dress and rose coronet.
Miss Elling's gown was of blue and
she wore blue flowers in her hair.
Both bridesmaids wore silver slip-
pers and their bouquets were mixed
flowers.

The flower girls wore yellow taff-
eta floor-length dresses, blue hair
ribbons and white slippers and
their baskets were of blue silk ch-
f-fen.

Mrs. Becker and Mrs. Katter,
the mothers, wore dark dresses and
accessories with white shoulder
bouquets.

Miss Barz wore a blue satin
gown, while Miss Larsen wore a
black skirt with pink waist. Both
ushers wore silver slippers and had
mixed flower shoulder bouquets.

Immediately after the ceremony
guests were ushered to the dining
room of the church where one
hundred and fifteen persons were
served. The guests were seated at
their places by Eugene Habercamp,
Lyle Katter, Alfred Josten, Ed-
mund Josten, Raymond Barz and
Milvern Barz.

The room was beautifully decora-
ted with colored paper streamers
and the tables decorated with flow-
ers and lighted with candles.

Mrs. John Waddingham had bak-
ed and decorated a cake which was
used as the center-piece for the
bride's table. Other decorations in-
cluded crystal glass candle-holders
with aqua blue candles, two large
bunches of yellow and white asters
and aqua blue napkins on which
had been printed in silver "Irene
and Cecil."

Miss McClellan, of Mason City,
who has gained national recogni-
tion as a marimba player, enter-
tained during the dinner with sev-
eral numbers on the marimba and
the piano.

Mr. and Mrs. Katter left after
the dinner for a week's visit in the
Twin Cities, after which they will
make their future home on the
Becker farm east of Klemme. Mr.
and Mrs. Becker are moving to
their home in Klemme.

Mrs. Katter graduated from the
Klemme high school in 1941. She
was an outstanding musician and
won national honors for her ability
on the marimba. She is pianist at
the Reformed Church.

Mr. Katter graduated from the
Klemme high school in 1939 and
since has been farming with his
father northwest of Klemme.

McMULLEN - EVENSON CEREMONY HELD

Kathryn McMullen, daughter of
Mr. and Mrs. A. G. McMullen, and
Everett Evenson, son of Mr. and
Mrs. O. C. Evenson, all of Goodell
were married Nov. 11 at St. Louis.
Both were graduated from the
Goodell high school and she attend-
ed A. I. B. and the past 2 years has
been doing stenographic work in
Des Moines. He enlisted in the navy
3 years ago and was in service on
the Saratoga 2 years. At present
he is attending navy school in St.
Louis. They will reside there.

MUSIC TRAINING SCHOOL FRIDAY, DEC. 10

On Friday, December 10, from
10:30 a. m. to 3:30 p. m. in the Odd
Fellows hall at Britt, Miss Winifred
Martin will hold a leaders music
training school for all chairmen,
leaders, and co-operators in the
Home Project work, also all 4-H
leaders and assistant leaders. Miss
Martin is a music and recreation
specialist on the extension staff of
Iowa State College. She will give
assistance with the songs and gam-
es which are being used this year
in "Around the World With Folk
Music."

Anyone interested in this music
is urged to attend.

Auxiliary Will Have Christmas Party Tuesday Evening

The Klemme American Legion
Auxiliary Unit will meet at the
Community Hall Tuesday evening,
December 7th for their Christmas
party and exchange of gifts.

Lunch will be served by Mrs.
Martha Bredbenner, Mrs. Elmer J.
Arnold, Mrs. John A. Chambers and
Miss Marie Blank.

December 15 Is Deadline For Filing 1943 Income Tax

SAVE YOUR WASTE PAPER FOR THE BOY SCOUTS

There is a critical shortage of
paper and the war department has
asked that all waste paper be sal-
vaged.

The Klemme Boy Scouts are go-
ing to help the war effort by pick-
ing up waste paper in a house to
be used canvass once each month.

Their first drive will be on Sat-
urday of this week. You can help
by bundling up your old newspa-
pers, magazines, books, pamphlets
and have this material ready.
The Scouts will make the rounds
with a truck to get your paper.

Save all your paper, don't throw
it away!

FARMERS MUST FILE ES-
TIMATED INCOME TAX
BY DECEMBER 15

Hancock County farmers must
file a declaration of estimated in-
come and victory tax on or before
December 15 reminds County Ex-
tension Director Paul Henderson.

The December 15 payment in-
cludes such taxes as are due for
the third and fourth quarters of
1943 and the victory tax for the
year, and will bring the taxpayer
up to date on most of his income
and victory taxes, says Carl Ma-
jone, farm management specialist
at Iowa State College. Final ad-
justment will be made on the re-
turn filed on or before March 15,
1944.

For income tax a single person
or married person not living with
husband or wife must file a return
if the gross income amounts to
\$500 or more. A married person
living with husband or wife must
file a return if the gross income is
\$1200 or more. A farmer includes
in his gross income receipts from
the farm and from non-farm source
and the value of merchandise
received in exchange for farm pro-
ducts or services to others. Any
individual receiving \$624 or gross in-
come or more whether single or
married must file a return for vic-
tory tax.

Details about making the De-
cember 15 return may be secured
from the county extension direc-
tor's office by asking for a pam-
phlet just off the press, entitled,
"Farmer's Guide to Making De-
cember 15 Tax Estimates."

SURPRISE PARTY HELD FOR HOWARD BAACK

Mrs. Howard Baack planned and
gave a surprise party for her hus-
band on his birthday, Tuesday eve-
ning, November 23rd.

The evening was spent in play-
ing cards and high prizes went to
Mrs. Alfred Josten and Mr. Ewald
Josten and prizes to Mr. and
Mrs. Merino Albers.

At the close of the games a two-
tiered grand old cake decorated
with candles was lighted by How-
ard and a delicious lunch was served
by the hostess.

Mr. Baack was presented with a
gift from the group.

1943 TOPS FOR IOWA HUNTERS

Duck Hunters With Two Days' Limit Of Fat Mallards

Iowa duck hunters are experiencing the finest duck
shooting since about first World War time, and duck hunt-
ers around Klemme are having the finest duck hunting in
their experience. Mother Nature's first squeeze play on
Northern ducks pushed millions of waterfowl south, but
not too far south to suit the taste of Iowa nimrods. With
plenty of waste shelled corn in the fields, left by mechan-
ical pickers, the ducks are concentrating in large numbers
wherever there is open water.

When armored knights met, it was customary for each knight to raise the visor of his helmet as a means of identification. This gesture has come down through all armies in the form of the salute. Traditional, too, is the Army man's preference for Camel cigarettes. With men in the Army, Navy, Marines, and Coast Guard, actual sales records in their service stores show that Camel is the favorite. It's one of the favorite gifts with service men. And though there are Post Office restrictions on packages to overseas Army men, you can still send Camels to soldiers in the U. S., and to men in the Navy, Marines, and Coast Guard wherever they are.—Adv.

PERFECT GROOMING MOROLINE HAIR TONIC

Early Fountain Pens

Fountain pens were in use early in the 17th century.

NEGLECTED COLDS INVITE SERIOUS DISEASE

Don't just ignore a cold! They're treacherous—tricky. Rest—cold exposure. And for prompt, decisive relief from usual cold miseries, take Grove's Cold Tablets. They contain eight active ingredients—the multiple medicine. Work on all those symptoms of a cold at the same time—headache—body aches—fever—stiffness. Take Grove's Cold Tablets exactly as directed. Accept no substitutes. Get Grove's Cold Tablets for fifty years known to millions as "Bromo Quinine" Cold Tablets. Save Money—Get Large Economy Size.

GROVE'S COLD TABLETS

When Your Back Hurts

And Your Strength and Energy Is Below Par

It may be caused by disorder of kidney function that permits poisons to accumulate. For truly many people feel tired, weak and miserable when the kidneys fail to remove acids and other waste matter from the blood. You may suffer nagging backache, rheumatic pains, headaches, dizziness, getting up night, leg pains, swelling, sometimes frequent and scanty urination with smarting and burning in action. There should be no doubt that prompt treatment is wiser than neglect. Use Doan's Pills. It is better to rely on a medicine that has a countrywide approval than on something less favorably known. Doan's have been tried and tested many years. Are at all drug stores. Get Doan's today.

DOAN'S PILLS

THE BETTER MOUSETRAP
A man decides to build a better mousetrap.

He tries to interest somebody with interest up to a point where he is convinced he would double his money. This scares him.

The inventor sees another capitalist. He almost gets him with the argument that if they are careful they can avoid quantity production.

Spurned again, he contacts a group of financiers who have been successful at losing money. They think the mousetrap will be a success and decide to back it.

They ask him how much money he needs. He says about \$100,000. He refuses to go in unless he will be a million. He reluctantly agrees.

He needs only wood, wire and nails. Owing to a wood shortage he is asked to use plastics. He gets some wire, but prior to setting in and he is told to use soybeans.

He can still use holes for holes, thinks. But he is now stymied by an OPA decision to ration holes. He can only get three to a trap.

He phones his backers that there are so many obstacles coming him that they will all lose money, and he suggests dropping the project. They bring suit to force him to go ahead.

He turns out his first trap. It costs \$850. As it has to sell for 10 cents retail it looks bad. He loses his backers. They are quite satisfied but suggest he turn out a second at a cost of \$10 each and sell them two for a quarter. They are taking any chances on more surpluses.

—
The Better Mousetrap man goes to a factory in Elmira, N. Y., where it can be bought for about \$40,000. His backers buy him four in Detroit at a cost of \$1,500,000 with government aid.

—He gets into production but is forced to suspend work to answer federal questionnaires and fill out new forms.

—After a long struggle he resumes operations. The Mousetrap Workers' Union calls a strike demanding fewer holes in the mousetraps. He offers to cut the holes to one. The WRLB is called in and says that one hole is too many under the Wagner Act.

—He asks the board how mice get into such a trap. It says: "They can't get in under Roosevelt; they wait until Willkie is elected."

—After long negotiations he is allowed to put one hole into each trap except on Saturdays and Sundays.

—Ultimately he is all set for business except for a radio theme.

He listens to 400 goofy jingles. He picks one sufficiently silly. He discovers that the lyric of the product contains the essential vitamins, is made from sun-dried leaves and puts iron in the product.

—He says vitamins and iron do appeal to mice. His advertising agent tells him that radio results will give him wrong.

—Just when he seems out of the OPA rations cheese. It suggests that traps be baited with pig skins and chittles.

—The Mousetrap Workers' Union walks out in sympathy with a strike of Rat Poison Mixers. The Labor Relations board tells him that he gives in inside of ten days or government will seize his plant.

—He now goes nuts and insists on never designed a mousetrap or is in business for himself for a single hour. He swears he is a college professor.

—This lands him a job in Washington as a counsel to business men. Moral—Nothing succeeds like a secret, plenty of confusion and a story that you were once on a college faculty.

Secretary Morgenthau is giving up a dairy farm after 20 years. We understand he finds it hard to make a profit these days because of the government's financial policies.

Probably Mr. Morgenthau had an extremely difficult time trying to make his ends meet in the milk business. Every time he tried to milk a cow he would have trouble trying to beat it at Section 1, Paragraph A, or up to Item 4, Paragraph D.

And it's tough figuring out a surplus while sitting on a milkstool with a cow knee-deep in questionnaires.

—
We can imagine Henry, sunk in a sea of milk and deficits and exclaiming: "In business today, if it isn't the thing it's an udder."

—
Here is a great chance for the Republican party. If Wendell Willkie is smart he will buy in the Morgenthau herd and make it pay even if he has to sell the movie rights.

Mr. Morgenthau will henceforth raise fruit, he announces. His success in supplying millions of Americans with raspberries may have come to his head.

ASK ME ANOTHER?

A General Quiz

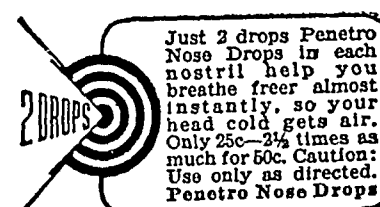

1. "Speak softly and carry a big stick" was the motto of what famous man?
2. In what war did the Poles Kosciusko and Pulaski command American troops?
3. Our planes flying in the stratosphere encounter what degree of coldness?
4. What is meant by a deckle-edged book?
5. What is gangue?
6. In what country is the kopeck a medium of exchange?

The Answers

1. Theodore Roosevelt.
2. Revolutionary war.
3. Downward from 67 degrees below zero.
4. One whose pages are rough, untrimmed.
5. Rocks in which valuable metals occur.
6. Russia.

Chute Jumping Records

Parachute jumping records have never yet been officially recognized and registered by either a civil or a governmental organization in this country.

Just 2 drops Penetro Nose Drops in each nostril help you breathe freer almost instantly, so your head cold gets air. Only 25c—2 1/2 times as much for 60c. Caution: Use only as directed. Penetro Nose Drops

FALSE TEETH OWNERS CAN LOOK YOUNGER

—BY WEARING YOUR PLATES EVERY DAY
—HELD COMFORTABLY SNUG THIS WAY

Face-lines sag—wrinkles form—when plates remain unworn. Avoid this—hold plates firmly all day, every day with this "comfort-cushion," a dentist's formula.

1. Dr. Wernet's plate powder forms soothing "comfort-cushion" between plate and gums—lets you enjoy solid foods, avoid embarrassment of loose plates. Helps prevent sore gums.
2. World's largest selling plate powder.
3. Dr. Wernet's powder is economical; a very small amount lasts longer.
4. Made of whitest, costliest ingredient—so pure you eat it in ice cream. Pleasant tasting.

extended if arrangement is made by
the subscriber.

COUNTY HOME PROJECT OFFICERS ELECTED

The County Home Project officers
chosen at a recent election for the
year of 1943-44 are as follows:

County Home Project Chairman,
Mrs. Harold Oxley, Corwith.

County Home Project Publicity
Chairman, Mrs. Ray Baker, Britt.

County Home Project Music
Chairman, Mrs. Elmer Bredlow, of
Hayfield.

County Home Project Health
Chairman, Mrs. George Gaskill, of
Corwith.

County Home Project Library
Chairman, Mrs. George Heylik, of
Garner.

County Home Project Better
Homes Chairman, Mrs. L. F. Weaver,
Garner.

County Home Project Bond and
Stamp Chairman, Mrs. Elmer J.
Schneider, Ventura.

Present indications are that Iowa
farm cash income this year will be
about 15 billion dollars, as com-
pared with last year, say econo-
mists at Iowa State College.

PASSING PARADE:

Don't You Believe It.

KLEMME LOCALS

Mr and Mrs. John Spitler of
Belmond; Mr and Mrs. Tom Hart-
wig and Mitchell and Mr. and Mrs.
Edward Coyle of Thornton, were
dinner guests on Thanksgiving day
at the home of Mr. and Mrs. How-
ard Spitler.

E. J. Arnold and family were
Mason City visitors Friday.

Mr and Mrs. Benn Coobs enter-
tained the following at their home
on Thanksgiving day: Verner Lew-
is and family; Mr. and Mrs. W. F.
Pavey and Mrs. John Clements.

Bob Kimball, Fireman 3rd Class,
U S Navy, has completed "boot"
training at Camp Farragut, Idaho,
and came home on Thanksgiving
day to spend a furlough visiting
with his parents, Mr. and Mrs.
Walter Kimball, former Klemme
residents.

Mr and Mrs. Todd Berlin, of
San Antonio, Texas, are spending
this week visiting at the George
Lawhorn home. Mr Berlin spent
five weeks in a Rochester, Minn.,
hospital following a major opera-
tion, from which he is now making
a good recovery.

Mr. and Mrs. Walter Kimball of
Boone drove up Sunday to bring
their daughter, Nadine, back to
Klemme after she had spent the
Thanksgiving vacation in Boone.
Mr. and Mrs. Kimball also looked
after business matters here Mon-
day.

Mr. and Mrs. E. F. Jacobs drove
to Des Moines Friday where Mr
Jacobs had a check-up at the Vet-
eran's Hospital. He received a very
favorable report on his condition.
Ed. has felt much better the past
few months and is steadily improv-
ing.

Mr and Mrs. Truels Steffen, of
near Miller, had as their guests on
Thanksgiving day the following:
Art Kudje and family; Joe John-
son; Art Johnson; Steward Hevlin
and family; Mr. and Mrs. John
Johnson and daughters, Bertha and
Doris; Mr and Mrs. Harold John-
son and son; and Mr and Mrs.
Dwight Hummel and Janis and
Joan.

Elwyn Jacobs, student at Simp-
son College at Indianola, spent his
Thanksgiving vacation in Klemme
visiting with his parents, Mr. and
Mrs. Ed. Jacobs. Elwyn is the
proud possessor of a letter in col-
lege football which he won play-
ing on the Simpson team. The re-
markable thing about Elwyn's grid-
iron experience is that he never
played football until he went to
Simpson and he made the first
team and played all of every game.

DECEMBER HOME PROJECT MEETING CHANGED

The Home Project Leader Train-
ing Schools to be held in Decem-
ber have been changed to open
meetings. The leaders will hold no
follow-up meetings for this phase
on "Money Management." Town-
ships will have their meetings at
the places and dates which have
been previously announced from
1:30-4:00 p. m. It is hoped that all
leaders and cooperators will be
able to be present when their town-
ship meets.

HUNTERS

One member of a train crew re-
cently sat on top of the caboose
evidently watching for pheasants,
then when he sighted some he cal-
led out to other members of the
crew who would get out of the
stopped train with guns and fire at
the birds. The train was one o-
perating between Donnan and
Hawkeye in Fayette county.

NEW MANAGER AT FEDERAL NORTH IOWA GRAIN CO.

Mr. Otis Whitcher Returned To His
Former Position At Bagley

Mr. Otis Whitcher, who has man-
aged the North Iowa Grain Co.
business here for the past several
months, was returned to his form-
er position as manager of the ele-
vator at Bagley and left for that
place last Thursday.

Mr. C. K. Finders, of Iowa Falls,
who has been employed by the
Federal North Iowa Grain Co. for
the past seven years as their trav-
eling manager, is now the new
manager of the company's interests
in Klemme.

Mr Finders is married and has a
family of three boys, all of grade
school age.

The Finders family have leased
the Don Christiance residence, re-
cently vacated by Lena Schroeder,
the former owner, and are moving
in this week.

Mr Whitcher made many friends
while in Klemme, but the Com-
pany found it necessary to return
him to Bagley as their manager
there was unable to handle the
business because of advancing age.

Klemme and community extends
a cordial welcome to Mr and Mrs
Finders and their three boys.

When storing cabbage, all the
leaves should not be removed. De-
fective leaves should be removed,
but it is best not to trim all the
way down the head.

DUCK AND PHEASANT SEASON CLOSE DECEMBER 3

Under Federal regulation the
duck season in Iowa closes at sun-
down December 3 throughout the
state. Ducks may be held 10 days
after the close of the season or 45
days under free permit secured by
writing the State Conservation
Commission, 10th and Mulberry,
Des Moines, Iowa.

The pheasant season closes De-
cember 3 at 5:00 p. m. in all the
counties in the "long season" area.
Pheasants may be held in posses-
sion 10 days after the close of the
season, or until June 30, 1944, un-
der permit from the Commission.

Fishing Season Closed Nov. 30

Fishing for all species of game
fish in Iowa was prohibited at
midnight November 30. The frog
season also closed on that date.

We can print anything. Call at
the Times Office.

1 Stack of Hay, Timothy and Clover
Some Silage

2-row Hayes Corn Plow

1 Perfection Single-row Corn Plow
1 13-inch Satley Gang Plow
1 14-inch Walking Plow
1 10-ft. Disc
1 20-ft. Steel Harrow
1 Drag Cart
1 Folding Drag Eversen
1 4-Horse Eversen
1 Endgate Seeder

1 11-ft. Seeder
1 Hayes Corn Planter with 80 rds. wire
1 McCormick-Deering Mower, 5-ft. cut
1 Moline Manure Spreader
1 Letz No. 80 Feed Grinder
1 Calmar Wagon, complete with box
1 Iron-wheel Wagon, with Hay Rack
1 Cart and Barrel
1 All-steel Wheelbarrow
1 Horse Power
1 Top Buggy
1 Cream Cooling Tank
1 Stock Watering Tank
1 Small Tank
3 Sets of Harness
1 Single Harness

HOUSEHOLD GOODS:

1 Kitchen Cabinet
Some Chairs
1 Iron Bed, and Mattress
1 Dresser
1 Power Sausage Grinder

1 2 1/2 H. P. Gasoline Engine
1 24-ft. 6-inch Rubber Belt
1 Grind Stone
1 Brooder Stove
1 Tank Heater
Some Milk Pails and Cream Cans
And many other small tools, and it
too numerous to list.

SUB DISTRICT YOUTH RALLY AT KLEMME METHODIST CHURCH

The young people of the Methodist Church were host to the Sub-District Youth Fellowship in a Rally on Sunday afternoon and evening. Young people came from Garner, Belmont, Britt, Thornton, Clear Lake, and Liberty with their respective pastors and adult counselors.

The afternoon services opened with devotions led by John Schwichtenberg, assisted by Eunice Larsen who sang a vocal solo, and Patty Kudje who played a saxophone solo. Discussion periods were conducted by Mrs. Earl G. Schaefer and John A. Chambers on the subject "We would be building Christian Character and Personality."

A delicious supper was served by the mothers of the young people of the Klemme church. Rev. H. W. Faris of Belmont was the leader of pep songs around the tables.

An hour of recreation under the able leadership of Miss Thelma Chambers was greatly enjoyed as she kept the group busy in interesting games of competition. The evening service was presided over by Elwood Harvey who also led the devotions. Mrs. F. F. Robinson rendered a beautiful piano solo and Rev. F. F. Robinson gave the evening address on the theme of "Building a Christian Personality."

Over a hundred young people were in attendance. The next Rally will be held at the Britt Methodist Church on January 9, 1944.

RELATIVES GATHERED AT THE FRED SCHLICHTING HOME THANKSGIVING DAY

A large number of relatives met at the home of Mr. and Mrs. Fred Schlichting on Thanksgiving day to enjoy a big dinner and a family gathering. These present were:

Mr. and Mrs. Fred Schlichting and Gladys; Mr. and Mrs. Henry Ludeke and Paul, of Meservey, Mr. and Mrs. Harold Lassahn and family; Mr. and Mrs. Art Schenewetter, Mr. and Mrs. George Schoenewetter.

Mr. and Mrs. George Weisbrod and family; Ethel Weisbrod; Mr. and Mrs. Elmer Weisbrod, Mr. and Mrs. Milford Elberts and son, all of Fenton.

Mr. and Mrs. Ralph C. Lude and Marilyn, and Mrs. Daniel Collins Collins and son, of Clear Lake.

Mr. and Mrs. Elmer Ludeke, of Britt, Mr. and Mrs. William Ax and Irvin of Klemme, Mr. and Mrs. John Neuberger and family of Ventura, and Mr. and Mrs. Lloyd Ax of Mason City.

WEEKLY NEWS ANALYSIS

Nazis Wreck Northern Italian Ports To Hamper Future Allied Operations; United Nations Formulate Relief Plan; U. S. Issues Current Casualty Figures

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union

Allied Pact—Seated around conference table from left to right, U. S. Secretary of State Cordell Hull; Russian Foreign Commissar Vyacheslav Molotov, and British Foreign Minister Anthony Eden, sign historic pact in Moscow, calling for League of Nations to preserve postwar peace.

Said Hull: "We agreed upon a broad, basic program of international co-operation. The program contemplates the hastening of victory . . . the preservation of peace and the promotion of human welfare . . ."

ITALY:

Destroy Ports

Italy's northern ports of Leghorn and Pescara were blocked by Nazi demolition squads to render them useless to the Allies for future operations, or in the event Gen. Dwight Eisenhower attempted landings above Rome to trap elements of five German divisions holding out in the mountainous country to the south.

Principal action in Italy centered on the Fifth army front, where Lieut. Gen. Mark Clark's mixed British and U. S. forces were edging forward at the mountain passes at Mignano, to gain the long, level valley leading to Rome.

Once General Clark's warriors burst through at Mignano, they still will have to buck elaborate Nazi mountain fortresses farther up the valley at Cassino, which stands some 60 miles from Rome. Because Allied troops must clamber up rugged slopes in the face of entrenched enemy machine gunners and mortars, and U. S. artillery must rake whole mountain sides to clear out Nazi posts, progress necessarily is slow.

Fit Italy Into War

To get Italy functioning on the side of the Allies, Gen. Dwight Eisenhower established a control commission headed by Maj. Gen. Kenyon Joyce, formerly of the 9th service command.

Purpose of the commission will be to fit the country's agriculture and industry into Allied war plans, and to regulate Italian governmental administration.

To prevent any political party from establishing its hold over the country through military force, the commission will control Italy's revived fighting services.

Advising the commission will be the U. S., British, Russian and French committee on Mediterranean affairs, and Greece and Yugoslavia will be included later.

WORLD RELIEF:

Allied Plans

Assembling in the east room of the White House, representatives from 44 United Nations signed an agreement for the relief and rehabilitation of Europe, with each country providing supplies to the limit of its capacity.

Of the 46 million tons of food, seed, fuel, clothing, raw materials, machinery and medical supplies that will be needed for European relief during the six months following the war, the U. S. will furnish nearly 9½ million tons, Great Britain 3½ million tons, Europe 29 million tons, and other regions 4 million tons. Congress will appropriate the funds for American participation.

Slated for appointment as director general of the relief and rehabilitation administration was former Governor Herbert Lehman of New York. Purpose of the administration is to tide over distressed people of reconquered areas until they can put their factories and land back into production.

Herbert Lehman

CROPS:

Weather Helps

Profiting from favorable weather, the 1943 corn crop was estimated at 3 billion, 85 million bushels by the department of agriculture on the basis of conditions November 1. This compared with last year's record crop of 3 billion, 175 million bushels.

With October weather good and without widespread frosts, the large acreage of late corn reached maturity in Iowa, Missouri, northwestern Ohio, and parts of Michigan and Indiana. Checking summer droughts, rains perked up late corn in the South Central states. Record yields were in prospect for the Northwest.

Other crop estimates for 1943: Wheat, 835,816,000 bushels; oats, 1,148,692,000; barley, 330,212,000; rye, 33,314,000; flaxseed, 51,486,000; soy beans, 206,017,000; rice, 69,019,000; potatoes, 469,092,000; sugar beets, 7,239,000 tons, and peanuts, 2,681,955,000 pounds—record highs for rice, potatoes and peanuts.

Hogs Crowd Markets

Chicago's sprawling stockyards teemed with over 60,000 live hogs after a high three-day shipment of 128,500 head, which compared with 85,552 for the previous week and 66,418 for the same period of 1942.

As a result, packers paid the "floor" of \$13.75 for only the heavier weights out of the 200 to 275 pound range on which the government has pledged price support. Packers obtained many bargains in classes for which no "floor" has been constructed.

So called "floor" prices were high on the flooded market, equalling the lowest tops since last December.

SOUTHWEST PACIFIC:

At Japs' Rear

Pursuing his policy of pinching off Japanese strongholds in the Southwest Pacific by cutting off their communications, Gen. Douglas MacArthur has established U. S. forces to the rear of the enemy's important forward base of Buin on Bougainville island in the Solomons.

With U. S. marines and doughboys standing astride the Japs' communication lines leading to Buin, they were in position to strike against the enemy supplies, and his main body from the rear.

Bougainville is the Japs' last important holding in the Solomons, and apparently they were determined to take advantage of the wild nature of the humid, tropical isle for another long, delaying action.

U. S. CASUALTIES:

Total 120,967

U. S. casualties totaled 120,967 for almost two years of war, with the army reporting 89,648, and the navy 31,317.

Of the army casualties, 12,841 were killed, 30,263 wounded, 23,952 missing and 22,592 prisoners. Since the landing at Salerno, September 9, the U. S. suffered 8,556 casualties in Italy, with 1,295 killed, 4,764 wounded and 2,497 missing.

Of the navy casualties, 12,548 are dead, 5,542 wounded, 8,999 missing, and 4,228 prisoners.

Of the nearly 7,700,000 men in the army, about 2,500,000 men will be serving abroad by the end of the year.

RUSSIA:

Attac's Last Railroad

Russia's last north-south railway came under the attack of Red troops as they pressed forward on a 70-mile front west of recaptured Kiev. As the Russians drove against the railroad, other forces of their army continued attacks on Nevel, less than 50 miles from the Latvian border in the north, and on Krivoi Rog in the south.

At Krivoi Rog, the Germans continued to hold open an escape corridor for the last columns of Nazi forces pulling out of the huge bend of the Dnieper river, where early Russian attacks had threatened them with encirclement.

Crossing into the eastern Crimea from the Caucasus, strong Russian forces drew up for a major attack on the 75,000 German troops reportedly massed in the huge peninsula, guarding the Black sea. The Nazis held their ground at the north entrance to the Crimea.

TIRES:

Continued Shortage

Although production of synthetic rubber is expected to total 818,000 tons in 1944 compared with 233,000 tons this year, only about 30 million tires will be manufactured to meet needs of essential users of cars, light delivery trucks, taxis and farm vehicles. Ordinarily, 50 million tires are made a year.

Tightness in the civilian tire supply will prevail because of military requirements, scarcity of manpower to operate fabricating equipment, reduction in the peace time inventory of tires, shortage of rayon cord for heavy duty tires, and the cut in crude rubber imports.

To obtain maximum use of present tires, the rubber manufacturers' committee counseled drivers to preserve their tire carcasses, or bodies, for recapping by protecting the walls and not running down treads. Further, the committee advised low speeds, adequate air for tubes, and proper alignment for wheels and axles.

Homemade Penicillin

One of medicine's most precious cures, magical penicillin, is being produced at "five cents a plateful" by Dr. Julius A. Vogel in the kitchen of his Pittsburgh, Pa., residence. Properly equipped, any doctor can grow his own supply, Dr. Vogel says.

Plant physician for the Jones and Laughlin Steel corporation, Vogel has used his penicillin to treat external infections, with complete cures effected in more than a score of cases.

CHILD DELINQUENCY:

Supervision Needed

During the last year, delinquency among girls has increased 38 per cent and among boys 11 per cent, Katherine Lenroot, chief of the children's bureau of the department of labor, declared.

With 5½ million women with children under 14 years of age working, and many fathers in service or sleeping days, a general weakening in home supervision is a contributing cause for the delinquency, Miss Lenroot said. More than one million more women will be needed in industry this year, she reported.

Other factors of delinquency, Miss Lenroot asserted, are lack of school facilities in war-expanded communities, and the increase in child labor to five million this year.

"There would be little juvenile delinquency today if children were treated as much of an emergency as armament production," Miss Lenroot concluded.

LEND-LEASE:

British Aid

Up to last June 30, British lend-lease assistance to the U. S. totaled 871 million dollars, of which the major share consisted in supplying base facilities, barracks and hospitals for American land and air forces in the United Kingdom. Incomplete figures indicated assistance to date has topped one billion dollars.

Not included in the accounting, the British said, was the cost of food furnished on the fighting fronts where no adequate records could be kept, and the value of information and experience gained in battle and relayed to the U. S. army and industry.

The British assistance does not include lend-lease granted the U. S. by Australia, New Zealand, South Africa and India, who operate under separate agreements. On August 25, President Roosevelt reported U. S. lend-lease assistance to Britain alone totaled nearly 4½ billion dollars.

BUILDING

In the first 12 months after the final armistice there will be five and a quarter billion dollars spent on private construction, according to a survey of the nation's building needs. About 8½ billion will be expended annually between 1947 and 1951, the report estimates.

Residential building will reach its high point before 1950, and dip to a low in the middle 1950s. Commercial, industrial and community buildings will total over a billion dollars a year between 1947 and '51.

Washington, D. C.

GOOD WORD ON EGGS

If you like eggs—fried, scrambled, or Easter—this may interest you.

The high price of eggs will soon come tumbling down. This Humpty-Dumpty event will be brought about by the sale of five million cases of government eggs.

War Food administration, responding to the prodding of critics, admits that it was putting too many eggs in one basket, for military and lend-lease requirements, at the expense of civilian requirements.

Release of this tremendous quantity of eggs won't alarm the housewife, but worries War Food experts because it might discourage production for next year.

Meantime, War Food and OPA are rowing over the price to be paid for these five million cans of cold storage eggs. WFA officials, protecting the producers, want a higher price for cold storage eggs than fresh eggs.

OPA, thinking of the housewife, says: "This is the first time we ever heard that eggs become more valuable as they get older!"

But War Food stands firm on the principle that the old eggs should bring more money. Their reason is that the old eggs were stored by dealers who were playing the usual seasonal game of holding for a rise in price, without realizing that the government was going to step in and take over at the fixed price.

In other words, War Food experts are trying to hand dealers some of the speculative profit they might have gotten, while OPA—trying to protect the consumer—wants to hold the price down.

The inside government egg debate is still raging.

COLD WINTER AHEAD

Whatever you burn this winter—oil or coal—it is still going to be cold.

The public has the impression that it is only coal which is short now. Actually, oil is even shorter, rations for this winter being based on a 34 per cent cut below pre-war consumption.

The fuel situation is so bad that OPA experts several months ago recommended coupon rationing of coal. A warm debate followed between OPA and the Solid Fuel Coordinator, in which Ickes, supported by the coal industry, opposed rationing.

But OPA experts believed coal would be short this winter and, during the summer, laid plans for coupon rationing. In August, they were all ready to go to press with millions of coupon books.

Finally, however, the coal co-ordinator vetoed the plan. Now it is too late to impose coupon rationing—partly because there is not sufficient time to print the coupons and give out instructions to local boards; also because some coal is already supposed to be distributed—iniquitably—to consumers.

Thus we shall have to rely on "dealer rationing." This does not limit consumption—only strings out the supply in dribbles, making a greater delivery task without decreasing consumption.

The public believes that oil is bountiful compared with coal, and OPA is now besieged with applications for reconversion from coal to oil. These applications are being resisted, since the impression of abundance of oil is merely an illusion.

FEWER TIRES FOR ALLIES

One thing not discussed at the Moscow conference was rubber tires. If the question had been raised, Russia would have been told that tires on Lend-Lease will have to be reduced sharply.

Reason is that U. S. trucks and buses are wearing their tires down to the fabric, and Jesse Jones' long ballyhooed synthetic tires are falling behind schedule. There is plenty of new rubber, but a dire lag in tire production.

Meanwhile, bus and truck transportation has never been more vital. Last year inter-city buses carried more passengers than the railroads (680 million compared with 669 million), though they travelled fewer miles.

If they are crippled, the weight would be thrown back on the already struggling railroads. Also, many places would be without transportation, since 54,000 communities have no rail service.

The army, OPA, ODT and the rubber director's office are putting their heads together to find a way out. One solution will be a reduction of tires shipped on Lend-Lease. Russia alone was promised 500,000 this year, in addition to 2,000,000 already delivered.

MERRY-GO-ROUND

Washington is plagued with an excess of traffic lights. One, near the senate wing of the capitol, is green all the time, thus serving no purpose except to confuse the public.

Gen. "Wild Bill" Donovan drives a midget "Standard" car, made in England. It sells for \$800 new, but on hand.

State department learns that one of the most distressing shortages in France is in ordinary household needles.

'Forts' Raid Schweinfurt

By Doris Fleson

(WNU Feature—Through special arrangement with Woman's Home Companion.)

I was lucky. By chance I walked right into preparations for one of the greatest bombing missions in history. This was the vast raid on Schweinfurt. I saw our boys take off and I saw them return.

The small world of a bomber base in England is organized with utter precision toward one end—to get those planes off the ground, over the target and home. One mission follows another and everybody knows exactly what to do or is told. Outwardly it is calm, but in the background is always one brutal fact: some of our aircraft do not return. When the planes are out on a dangerous mission, voices get shriller and men appear reluctant to abandon one another's company.

Americans and the RAF share their secret skills but not their way of life. Our base is a piece of America—food, equipment, wise-cracks. Few English faces are seen and these are usually liaison officers.

Everybody knew that the coming raid on Schweinfurt was to be something special, that there were some of the most important targets ever bombed anywhere. The Nazis are aware how vital ball bearings are to the war and the plants that make them had been tucked deep into the mountain folds of Bavaria. The Nazis knew Allied fighter planes could not carry enough gasoline to protect the invading bombers which would have to face Nazi fighter fire for hundreds of miles. But Fortresses have firepower to protect themselves and they have a bomb-sight to hit any target. Months ago their crews were handed nameless maps of the Schweinfurt targets to study. In English skies they practiced over and over again formations which would doom the factories.

Restricted to Post.

Finally the crews were briefed. But weather forced cancellation. So important was security on this raid, Colonel Harding restricted to the post every man who attended the briefing, gave special orders that they were not to discuss it among themselves and cut off telephones.

Colonel Harding gave the group final instructions. A West Pointer from West Virginia, he has ice-blue eyes, a quiet manner and a fistful of medals. The latest of these is a silver star for gallantry and achievement in leading bombing raids over enemy territory.

"Don't let the boys tell you they aren't scared on raids," Colonel Harding told me. "Nobody could be such a fool as not to be frightened when flak and fighters come at him. I've been scared plenty."

I was assured by the boys that Harding's briefing technique was okay. One thing the boys can't stand, they told me, was what they called "drip." They know what they are fighting for. What they want to be told is why the target is so important, so that if they get hurt they can feel it's worth it.

Maj. John Kidd of Cleveland led the group off the field. Three squadron leaders seconded him. "Sweetening it out" is the air force's inelegantly accurate phrase for the business of waiting for the planes to return from a raid. The waiting is undramatic but very wearing.

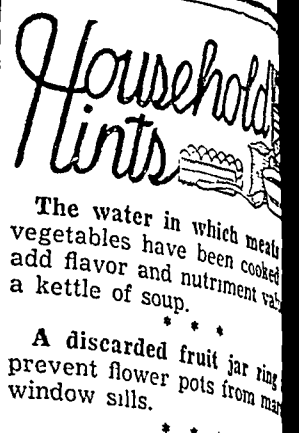

'Happy to Be Alive.'

Outwardly all went on as before after the bombers roared down the runway at the base. Another mission went out and returned. It was a milk run over Holland. Another was briefed but canceled. After many long hours, the Fortresses came back. The gleam of a major's oak leaf on a red fez perched at a rakish angle over a grinning Irish face was the herald. The wearer of the fez was Major Egan; his simple heartfelt greeting was: "I'm very happy to be alive."

Then from all mouths tumbled out stories of the man-made hell they had been through, beginning hours before the target was reached. All agreed that nothing like it in size, venom and duration was ever before experienced in aerial warfare. All around were fighters, Forts blowing up in flame, and the thunder of guns without end. The Nazis arched strings of blinding new rocket shells.

The Fortresses battled German fighters for 2½ hours—the longest engagement in the history of heavy bombings—but they had gone over their target and got away.

A measure of the raid was the volubility of the crews who made it. Their talk lasted through their days of rest and was still going strong when I left the base. Crews are encouraged to talk, of course, not only to help get it out of their systems but to keep intelligence officers fully informed. What they say might help greatly in planning the next encounter with the Nazis.

A discarded fruit jar ring prevent flower pots from making window sills.

Unusual and colorful draperies for draperies can be assembled using celluloid poultry rings. They are available in assorted colors.

A piece of wet sponge put inside a jar of paste will keep contents from drying out after in use.

After polishing brass articles such as buttons and buckles, rub them with colorless nail polish to protect and preserve the color. Colorless nail polish serves as a protective and waterproofing labels.

Signaling Pistol
The Very pistol, used for signaling at sea, throws off light of the intensity of 20,000 candlepower.

Acid Indigestion

Relieved in 5 minutes or double strength
When excess stomach acid causes heartburn, indigestion, sour stomach, and a variety of other symptoms, the fastest-acting medicine known is Pepto-Bismol. It soothes the stomach lining, relieves the burning, and builds up a protective barrier against further acid. It is available in tablet or liquid form. Back to normal in 5 to 10 minutes. 25c at all drug stores.

SNAPPY FACTS ABOUT RUBBER

It was not until almost 50 years after Columbus had first commercial use was made of rubber. Native rubber articles—play balls, bowls, bottles, hats, caps and shoes—were brought to Spain and Portugal from various parts of Central and Northern South America years before the commercial methods of rubber were realized.

A rapidly growing army of over 500 rubber-growing specialists from the U. S. is now in the Amazon rubber district expediting the collection of crude rubber and conquering the leaf disease which taken severe toll on the jungle trees.

HIGHLIGHTS . . . in the week's news

TIGERS: The Detroit Tigers baseball club will go to Evansville, Ind., for their spring training period.

COAL: The emergency regulations on delivery of soft coal have been relaxed, Secretary Ickes announced. As modified, the rules state that a dealer cannot sell coal to a customer who has 30 days supply on hand.

RAISE: With the new increase allowed by the War Labor board, test pilot inspectors will earn about \$410 a month. A \$4 an hour bonus was allowed for this extremely hazardous work.

DIAMOND: A 530 carat diamond, "probably the eighth largest ever found," has been dug up in Sierra Leone, British colony on the west coast of Africa.

Picture on the Calendar on Your Wall Is the Most Widely Known—Also the Most Profitable—Form of 'Art' in America Today

Otto Fischer, Frank Hoffman,
Wyeth and Maud Tousey Fan-
and a few months later the art
dar company's giant presses
urning out full-color or black-
white reproductions of their
ings to adorn calendars which
hang in millions of homes and
s throughout the United States.

ce our fighting men have been
ot overseas, we've been hear-
lot about "pin-up" girls—Betty
le, Rita Hayworth, Dorothy La-
and other Hollywood celebri-
Are any of these the favorite
up girls" of civilian Ameri-
as well as military America?
answer is "They are NOT!"

he favorite "pin-up girls" in the
rican home are five little girls
live up in Canada—the famous

This is one of Andrew Loomis' paintings of the Dionne Quintuplets
which, appearing on a Brown and Bigelow calendar, have made them
America's favorite "pin-up girls" for the last nine years.

Dionne Quintuplets. Moreover,
they've held that honor for the last
nine years and it's doubtful if any
Hollywood star or curvaceous Pow-
ers model will ever displace them
since it seems that the plain people
of America have, both figuratively
and literally, pinned their devotion
to Annette, Cecile, Yvonne, Emilie
and Marie Dionne, whose childish
charms have been displayed the
length and breadth of this land in
paintings by Artist Andrew Loomis
on Brown and Bigelow calendars.
By actual count calendars bearing
the picture of the Quints have sold
into the tens of millions.

What is true of this picture is true
to almost as great an extent of pic-
tures produced by other artists men-
tioned above. For they have pro-
duced pictures in every field—land-
scapes, portraits, "leg art" and
nudes, also some of the best known
sporting pictures in the world. Un-
doubtedly the average American
knows the baby pictures of Maud
Tousey Fangel better than the "Boy
With the Fife" of Manet, and the
Norman Rockwell "Boy Scout" bet-
ter than the "Blue Boy" of Gains-
boro. He has become better acquaint-
ed with the landscapes of Max-
field Parrish, and feels closer to his
famous blues and purples than to the
landscapes of Turner and Corot.

And from daily glances in his of-
fice and on his living room walls,
the average American who hunts
and fishes (and there are 15 million
more of him) has come to know and
love pictures like Frank Hoffman's
"At Bay," one of the outstanding
calendar pictures in the Brown and
Bigelow catalogue, better than any
of Rosa Bonheur's masterpieces No,
the average American may not be
tremendously art-conscious, but he
likes pictures and knows what he
likes. Moreover, you'll find what he
likes hanging in his office, home,
garage, work room, and places of
recreation.

And he can hardly wait till his
bank, grocery, gas, or tire company,
or other concern with whom he
does business, or doesn't, sends him
a calendar with his favorite artist's
picture on it. Whether it's a nude
or revealing bit of anatomy by Rolf
Armstrong or Zoe Mozart, or a more
artistic landscape by Maxfield Par-
rish, a tragic-comic situation painted
in his inimitable fashion by Norman
Rockwell, or a hunting scene by
Frank Hoffman, each of these art-
ists has his fans, and as soon as the
calendar is brought in by the post-
man, it is unwrapped, and the plain
American or his Missus hangs it up
at the time-honored spot on the wall.

The subjects they like run from
the Dionne Quintuplets to historical
scenes such as Columbus Discover-
ing America or Washington Cross-
ing the Delaware. If you think the
present "pin-up" craze is big, re-
member back to the days when
practically every American home
either hung "September Morn" on
the wall, or fought bitterly about the
propriety and even morality of hav-
ing it there.

But the favorite subject, accord-
ing to a Brown and Bigelow sur-
vey, has always been the landscape.
The scene must be a homely, com-
fortable and comforting one—not
the noisy, over-colored, flashy,
modern art. However, the outstand-
ing favorite of the average Ameri-
can, a favorite that has held its
leadership for nine years, are the
calendars picturing the Quints. An-
drew Loomis' drawings of Canada's
chief peacetime industry have sold

into the millions each year; 2½
million at their peak, in 1936, and never
less than a million a year.

Girl calendars, nudes, leggy pic-
tures, what is known to the news-
paper man as "cheresecake," are
next in popularity. Men like nudes
best, and steel companies and tire
companies send these to their men
customers, garagemen, contractors,
mechanics, etc. But a close runner
up is the plain picture of a whole-
some American girl, the clean-cut
type of young girl of about 17. These
are favorites with storekeepers,
small town banks, beauty parlors,
etc. A more sophisticated type is
chosen by city shops, florists, mil-
liners, and laundry and dry cleaning
places.

Besides the Quints, who are the
essence of human interest, the hu-
man interest scenes go biggest in the
average home—pictures like Nor-
man Rockwell's, and the etchings
of a boy and his dog. Religious pic-
tures, which had waned somewhat
in popularity, have spurred recently,
undoubtedly due to the war. And
the subject that is always sure of
its popularity is the outdoor scene.
Even the busiest of executives like
them hanging in the office because
it gives them a chance to relax for
a moment by imagining themselves
in the wide open spaces.

Back in the decade from 1920 to
1930, the mother and child theme in
calendar art was a popular one but
it has fallen off somewhat in the last
10 years. Just why, no one knows.
Calendar makers will tell you that
the idea is "fundamentally sound"
and the only explanation they have
is that no artist recently has drawn
a mother-child picture with exactly
the right idea and technique. Simi-
larly, ship pictures—especially the

This bathing beauty was consid-
ered a very snappy number for cal-
endars back in 1904.

sailing ship scudding along in a stiff
breeze—have declined in popularity.
However, as the American navy
wins more and more victories, it is
probable that pictures of warships
will appear more frequently.

But whether they choose the
Quints, landscapes, human interest,
or girl art, the American public is
"pin-up" minded. It has been long
before the war, and will be as long
as, about this time of the year, the
postman comes around with a cal-
endar and its picture by the Amer-
ican's favorite artist.

Calendars Have Grown to a \$20,000,000 Business in 55 Years

The American public has been
up-minded" for many years—
shortly after the close of an-
war, the conflict of 1861-65,
some unknown but enterprising
us had the idea of combining a
ndar and a sales message.
wasn't until 1888, however, that
B. Osborne, "the daddy of the
ern advertising calendar," not
brought advertising to the cal-
ar on a nation-wide scale but also
ight profits into the picture as

well. Osborne was smart enough
to see the pictorial possibilities in
the new and beautiful county court
house built in Montgomery, Iowa.
He drew a picture of it, attached a
calendar to it and then went out
and sold the idea of printing their
names on the calendar to 22 adven-
turers. This calendar was sold wide-
ly throughout the Hawkeye state and
that started the modern calendar in-
dustry which has now grown into a
\$20,000,000 a year business.

Calendars are made in every con-
ceivable size and shape—from the
smallest which will fit into the
vest pocket to the "jumbos," 29
by 42 inches in size, which will cov-
er a large blank wall. These "jum-
bos" go well in rural areas where
wall space isn't at such a pre-
mium as it is in small apartments
and small business offices in the con-
gested metropolitan areas. Here the
average size calendar is only 16 by
33 inches in size.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.

THE SIN OF COVETOUSNESS

LESSON TEXT—Exodus 20 17; Luke 12:
13-25

GOLDEN TEXT—Thou shalt not covet
anything that is thy neighbor's.—
Exodus 20 17.

The Ten Commandments (the last
one of which we study today) are
characterized by their brevity, their
comprehensive touch with all of
life, and fidelity to the right. But
they are also unique and different
from all other laws in that they
reach into the inner recesses of a
man's heart, a realm where only
God can judge and act.

This last commandment (against
covetousness) emphasizes that point,
for it does not expressly require or
forbid any act, but deals with the
motive of man's action. Man can
judge another man's acts, but he
cannot judge his motives, desires, or
thoughts. God must do that.

But man can, by the grace of God,
control his motives; and hence we
have this commandment and its in-
terpretation

I. The Sin—Covetousness (Ex.
20 17).

It may be a surprise to many to
learn that coveting—or desiring what
belongs to another—is a sin. It has
become one of the "respectable
sins" accepted in the best circles
and practiced by many church peo-
ple.

As a matter of fact, this sin un-
derlies all the other sins against
which the commandments speak. He
who has a love for money and an
evil desire to have his neighbor's
possessions will hate, lie, steal,
cheat, kill, in fact, as Dr. Morgan
says, "The whole realm of human
interrelations is disorganized and
broken up by the dishonoring of the
tenth commandment."

If you have become a lover of
money, or one who longs to have
what your friends own, beware. You
are in real danger.

II. The Result — A Ruined Life
(Luke 12: 13-21).

To have such a spirit makes a
man greedy (v. 13), callous and
selfish (vv. 17-19), and foolish (v. 20),
both regarding this life and that
which is to come.

The yardstick of success in the
world—for an individual, an organi-
zation, or a nation; yes, even for
many a church—is the possession of
wealth, or property, or other
"things." Write it in large letters
on the hearts and minds of our boys
and girls, "A man's life consisteth
not in the abundance of the things
which he possesseth" (v. 15).

The one who was known to his
friends (and to himself) as "a rich
man" (v. 16), but whom God knew
as a "fool" (v. 20), had more than
he could use for himself. He had
to build new and bigger barns, and
could not see the "barns" that were
already prepared, for, as Ambrose
says, "Thou hast barns—the bosoms
of the needy, the houses of widows,
the mouths of orphans and infants."

He was a fool who loved money for
himself. One wonders what he had
to say for himself when that very
night he was called into the pres-
ence of God to give an account of
his stewardship (v. 20). If you are
similarly situated and have the
same attitude, what will you say in
that day?

An important point which we
must note is that Jesus expressly
repeated the connecting of His
name with the so-called "social gos-
pel" in His reply (v. 14).

III. The Cure—Trust in God (Luke
12 22-25).

Because covetousness destroys the
best in life, we ought to shun it like
poison. The best antidote (or cure)
if we have been poisoned by it is
to go all-out in our trust and con-
fidence in God.

We who are children of God are
to take no anxious thought for the
morrow. This does not forbid prop-
er preparation and forethought, but
it does rule out fretful anxiety. The
reasons are very clear and cogent.

First of all, while food and cloth-
ing are important, they are not of
first importance. The vital thing is
that one have life. Otherwise things
are useless (v. 23). We must keep
our sense of proportion, of relative
values.

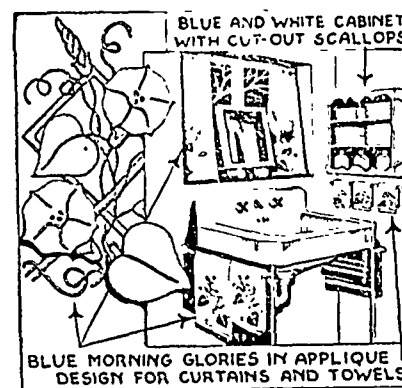

Then too, God is the One who must
care for every one of us. And He
does care for us! Why not trust
Him? He cares for all creation;
can He not care for you? If then
you trust the all-powerful One, what
occasion is there for worry, or cov-
etousness?

And finally comes the devastating
argument. Worry never accom-
plished anything. Anxiety does not
help anyone, anytime, anywhere. So
why be anxious?

It is clear then that a desire for
that which belongs to others is a
sin which destroys man's happiness
and usefulness. It is needless—as
is all anxiety—because only God can
provide, and He will provide if we
trust Him.

Life becomes simple, pleasant, use-
ful, confident, yes, really Christian,
when we get our eyes off things and
on the Lord.

Morning Glories and Scallops Will Make a Cheery Place of Bathroom

The handy man will be fascinated with the
variety of things he can make with this
pattern. The Morning Glory pattern (No
202) contains 10 designs. Send 15 cents
for each pattern desired to

BLUE AND WHITE CABINET
WITH CUT-OUT SCALLOPS
BLUE MORNING GLORIES IN APPLIQUE
DESIGN FOR CURTAINS AND TOWELS

THE Heavenly Blue morning
glories bloom indoors the year
around in this bathroom. The
thought of such morning cheer
should prompt a man to get out
his key hole saw and cut out scal-
lops for the top and bottom of a
box cabinet like the blue and white
one in the sketch, and should start
someone making applique towels
and curtains. The mirror on the
window sill is kept from sliding
forward by a pair of firmly an-
chored spools painted to match the
frame.

NOTE Mrs. Spears has designed a
pattern (No 207) for all types of cut-out
scallop to be used in wood or fabric.

Big Jump
Recruiting Officer—Have you
any preference as to what you
would like to be?
Draftee—Yes, sir, an ex-service
man with a pension.

Too many people with nothing to
say keep saying it.

Its Purpose
Architect—So you insist on four
windows in your den?
Jenks—Yes; my wife needs a lot
of light for her sewing.

He's In It!
Null—I started out on the theory that
the world had an opening for me.
Void—And you found it?
Null—Well, rather. I'm in the hole
now.

That's Where
"Bobby, where are those tarts
your mother put in this jar last
night?"
"I guess, gran,' they must have
vanished into the empty heir."

NEEDED CARS NEED WEED CHAINS

• Weed Tire Chains
are equipment for
jeeps, half-tracks,
trucks and other
military vehicles.

NEEDED CARS NEED WEED CHAINS

• Sometimes peo-
ple forget to repair
old tire chains or to
get new ones be-
fore they're need-
ed. Then there's
trouble.

DON'T START FIRES IN YOUR TIRES!

• Tires won't actu-
ally burst into flames
when you spin them
in snowdrifts or on icy roads. But you "burn 'em up" just the
same. And tire chains will be hard to get this winter. So we
suggest that you act at once to have your old chains recondi-
tioned, and, if necessary, to secure new WEED TIRE CHAINS.

Essential civilian cars and trucks have first call on WEED CHAINS
which are available after the needs of the armed forces have been
supplied. . . . For the best buy in Tire Chains, ask for WEED
AMERICAN BAR-REINFORCED. In these chains, every contact link is
reinforced with a bridge of steel which assures much longer mileage.

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

20 shopping days before Xmas.

Mr. and Mrs. Ed. Thompson were Mason City visitors Monday.

Ira Overholt was at Mason City on business Monday morning.

Mrs. August Baack began work Monday morning as clerk at the Klemme Food Market.

Only 20 more shopping days before Christmas. Shop and mail early!

The C S C S will meet Sunday morning at 10:00 o'clock at the Methodist church.

Mr. and Mrs. Wes Schuldt enjoyed Thanksgiving dinner at the home of Mrs. Frances Ridder.

Mrs. Earl Schaeffer of Forest City was a dinner guest at the Ira Overholt home Saturday noon.

Henry Helps became suddenly ill last Wednesday and is confined to his home.

The Liberty Go-Getters Boys 4-H club will meet on Thursday evening, December 2 at the home of Dale Greiman.

Mr. and Mrs. John Lass went to Tucson, Arizona in time to spend Thanksgiving with their son, Tech Sgt. Alvin Lass and wife.

Mrs. Naska Bock and Miss Lydia Bock drove to Mason City Friday afternoon for a visit at the Bert Auchampach home.

Mr. and Mrs. Wayne Pavey and Carol Ann came Saturday evening and spent Sunday at the Wallace Pavey home.

Mr. and Mrs. W. C. Keraus were dinner guests Saturday evening at the home of their son, Verle Keraus and family at Garner.

Miss Stella Thiemann of Des Moines, spent the week end visiting with her parents, Mr. and Mrs. George Thiemann east of Klemme.

Elmer Bachman, who fell from the steps at the Community Hall and received severe head cuts, is reported to be improving.

Wm. Thiel recently improved his house, north of the Community Hall, re-shingled. Mr. Thiel expects to move to town soon.

Mr. and Mrs. Walter Braner of near Belmond, came Sunday and visited until Monday evening at the parental Levi Klotzbach home.

Miss Ruth Johnson, of Des Moines spent Sunday visiting at the home of her parents, Mr. and Mrs. John Johnson.

Mr. and Mrs. Lloyd Lau and little daughter Cozette enjoyed a 6:30 o'clock Thanksgiving dinner at the Art Boehnke home.

Mr. and Mrs. Clarence Elder and children of Ames spent Sunday visiting at the parental R. W. Elder home.

Mr. and Mrs. John Day enjoyed Sunday dinner at the home of Mr. and Mrs. Martin Kubecek at Mason City.

Mr. and Mrs. Ed Jacobs and children were Thanksgiving day dinner guests at the home of Mrs. Louisa Wistey at Clear Lake.

Miss Jacqueline Kudje, Mrs. P. M. Wilson, Miss Patricia Kudje and Donnie Hevilin were Mason City visitors Friday.

Lt. and Mrs. Harold Kothenbeutel and children left Monday for Camp Utterberg, Indiana, after the Lieutenant had enjoyed a leave spent visiting in the community.

Guests at the home of Mrs. Henry Lau for Thanksgiving dinner were Mr. and Mrs. Lloyd Lau and daughter Cozette, and Mrs. Martha Bredbenner and daughter, Novella.

The entire troop 56 of Klemme Boy Scouts and their leaders went to Britt Monday evening to attend a Court of Honor. Scouts Jimmie Thomas and Roger Ridder were presented their 2nd Class Badges, and the entire troop was awarded a blue ribbon for efficiency at the District Camporee.

Mrs. J. A. Chamber, accompanied by her sister, Mrs. Frank Aldrich of Morristown, Minn., left Tuesday night for a visit with relatives at Rutland, Illinois.

Ben Merkel and daughter, Doris, and little son Leon, of Clinton, spent the week end visiting Ben's mother Mrs. Peter Merkel, and other relatives.

Rev. and Mrs. H. E. Harvey and children, Elwood and LaNelle, and Calvin Schmidt were dinner guests at the home of Mr. and Mrs. Ira Overholt on Thanksgiving Day.

Mr. and Mrs. Herman Paul drove to Des Moines Thursday morning to enjoy Thanksgiving dinner at the home of their daughter, Mrs. Eddie Epps and children.

Mr. and Mrs. Harvey Hubbard enjoyed Thanksgiving day dinner at the home of the latter's parents, Mr. and Mrs. Charles Halfpop at Goodell.

Mrs. Gerald Koerner and Terry; Mrs. A. G. Koerner, Mrs. Levi Ridder and Mrs. John Clements were Garner visitors Saturday afternoon.

Mr. and Mrs. Elmer Beier had as Thanksgiving day dinner guests at their home in Liberty township: Mrs. Herman Bridges, Glenn Bridges and family, and Orville Bridges and family.

Mr. and Mrs. R. W. Elder had as their guests at a Thanksgiving day dinner Mr. and Mrs. C. A. Larsen, Eunice and Junior; Mr. and Mrs. Ben Katter and son, Cecil, and Miss Irene Becker.

Miss Novella Bredbenner, who is attending Iowa State Teachers College at Cedar Falls this year, spent her Thanksgiving vacation in Klemme visiting with her mother, Mrs. Martha Bredbenner.

Mr. and Mrs. Ed Christians entertained to Thanksgiving dinner at their home east of Klemme Mr. and Mrs. Alfred Merkel, Dean and Corrine; Grandma Merkel and Lowell Ulrich.

Dean Merkel went to Camp Dodge Monday to take his physical examination for the Army. Dean has completed one quarter of college work at Waldorf College at Forest City.

Don't forget to purchase your Christmas Seals which have been mailed to you. Put your money, and any unused stamps in the envelope furnished and place it in the box at the Lau Implement Store, or return by mail.

Thanksgiving day dinner guests at the home of Mr. and Mrs. R. A. Jorgenson were Mr. and Mrs. Joe Liebendorfer and son Dick, and Mrs. Bessie Starboard of Hampton, and Mr. and Mrs. Lyle Liebendorfer of Forest City.

MRS. SUMNER TRUMBELL HOSTESS AT PARTY

Mrs. Sumner Trumbell entertained a number of ladies at her home Tuesday afternoon at bridge.

Mrs. Todd Berlin, of San Antonio, Texas, was an out-of-town guest and was presented with a gift.

Mrs. R. A. Jorgenson won high score, Mrs. George Lawhorn, second.

Lunch was served by the hostess.

Producers, Others, Invited To County-wide Meeting

STOCK DISEASES COST FARMERS \$50,000,000 MORE ANNUALLY

Stock And Poultry Men Invited To Attend Meeting

For a county-wide livestock conservation program for county will be made at a meeting of a newly appointed committee to be held at the A Hall in Garner, Monday, December 13, at 1:30 in the afternoon, according to an announcement by County Extension Director Paul Hederson.

The advisory committee, representing producers and groups interested in livestock conservation, includes: Feed Dealers, Veterinarians, Vocational Agricultural Teachers, Sales Barn Operators, Hatcherymen, War Board Chairman, Produce Dealers, Farm Organization Representatives, Chairmen of Club Committee, Live-Stock Dealers and Concentration Managers, Farm Machinery Dealers, Bankers, Lumbermen, Representative of County Transportation Committee, representatives of other Federations in the county.

Quaife, of the Agricultural Extension Service at Klemme, will be in attendance at the meeting to discuss the need for a vigorous campaign on stock diseases and parasites to outline the state and national programs.

The group will also discuss the loss of livestock due to parasites, lack of sanitation, overcrowding together with increases in production and the time that might be obtained for conservation.

All Appoint Committee

County work committee will meet following the meeting. The sub-committee will work on plans for the county program and complete plans for putting it into effect.

Following the county meeting, the points out that Iowa livestock production goals for 1943 have been reached or exceeded. But so they have used all the stock products in 1943 and dug into accumulated reserves. The quantity of feed grains available for feeding, beginning October 1, is expected to be between 10 percent less than the fed during the past 12 months. On the other hand, there is about 10 percent more live-stock and poultry on farms on January 1, 1944.

Livestock diseases and parasites are costing the farmers of Iowa at least 50 million dollars annually, probably more. While death losses are increasing, the unseen losses of weight and effort, due to unhealthiness caused by diseases and parasites in livestock and poultry are even greater.

Effective feed supplies will limit the increase of livestock, but production of meat, milk and eggs can be maintained at the highest level by reducing losses.

4-H TIP TOPPERS GIRLS HELD MEETING

The 4-H Club met on Friday, December 5, at the home of Gloria Greiman. Studying Primary Procedure, making up a list of War Stamps and planning a Christmas party for the folk game, "The Saw Patch," filled the evening.

Refreshments were served by Gloria and her mother, assisted by Mrs. Alfred Greiman. The Club Leader, Mrs. Emory Greiman, and the Assistant Leader, Bernice Weaver.

Our Men In The Service

DORANCE GRANGE RECEIVES PILOT'S SILVER WINGS

Dorance S. Grange, son of Mr. and Mrs. Paul Grange of Mason City, former Klemme residents, was graduated Sunday, December 5, from the U. S. Army Air Forces Fighter Pilot Training School at Victoria, Texas, and commissioned a second lieutenant.

After spending a ten day leave visiting with his parents at Mason City, Lt. Grange will go to Randolph Field, Texas, for four weeks of special training after which he will be assigned to an army training school as an instructor.

PFC LA RAYNE STILLE NOW AT LIBERAL KANSAS

Pfc. La Rayne Stille was transferred recently and his new address is as follows:

BONDS OVER AMERICA

Behind a split rail fence near Hodgenville, Kentucky, is the Lincoln Memorial of granite and marble, erected on the farm site where Abraham Lincoln was born. The one room log house is enclosed within the memorial.

Lincoln's Birthplace

Keep On Backing the Attack With War Bonds

Lincoln saw the evils of a country "half slave-half free." We are fighting now to keep Nazi slavery away from our free shores as much as to liberate the conquered peoples of Europe and Asia.

Miss Anna Trampel Became A December Bride

ANNA TRAMPSEL AND ARTHUR CONNERS MARRIED SATURDAY EVENING HERE

Klemme Reformed Church Scene Of Double Ring Ceremony

Miss Anna Trampel, the youngest daughter of Mr. and Mrs. Peter Trampel who reside on their farm southeast of Klemme, and Arthur Connors, adopted son of Mr. and Mrs. William Bohning of Belmond, were united in the holy bonds of matrimony at the Immanuel Evangelical and Reformed Church in Klemme, Saturday evening, December 4th, at 7:00 o'clock.

Rev. Calvin Groschuech officiated, using the double ring ceremony.

Others in the bridal party were Miss Winnie Trampel, Cavitt, as bridesmaid and Mr. John A. Trampel, of D. W. S. bestman.

The bride was attired in a blue silk dress, with brown accessories. Mrs. Cavitt wore a black dress.

Mr. and Mrs. Connors were honored at a wedding dinner served at the home of Mr. and Mrs. Peter Trampel Sunday noon, which was attended by the immediate relatives of the couple.

Mr. and Mrs. Connors are taking a short wedding trip in Iowa, and will visit with relatives and friends at Kamrar.

Mrs. Connors attended the rural schools of Avery township and grew to womanhood in this community. Mr. Connors received his education in the rural school near Belmond and has since been a farmer by occupation. For the past two years he has been employed at the John Albers farm.

After the first of the year Mr. and Mrs. Connors will move to the tenant house on the Ray Veldhouse farm, where Mr. Connors will be employed the coming year.

FORMER SHAYROCK STAR ON COLLEGE TEAM

Elwyn Jacobs, son of Mr. and Mrs. Ed Jacobs of Klemme, is on the first team at Simpson College. The former Shayrock star has already helped his team win both of their games played so far this season.

In the first game Elwyn scored 16 points as the Redmen won over Iowa Wesleyan 49 to 26.

Tuesday night Drake played the Redmen at Simpson College in a thrilling game in which Simpson won 46 to 45. Jacobs scored 8 of his team's points, and his baskets were all made in critical stages of the hotly contested game.

DORCAS SOCIETY WILL MEET THURSDAY, DEC. 16

The Dorcas Society of the Methodist Church will meet Thursday afternoon, December 16th at the home of Mrs. Gerald Koerner.

Bring your own sewing and also something for the potluck lunch.

Bring a 25 cent gift for the exchange.

WILL LEAVE FOR ACTIVE DUTY, DECEMBER 20

No Klemme Young Men Listed For December Draft

The following men passed their physical examinations at Camp Dodge, Iowa, on November 29, and will report back for active duty on December 20th:

Ernest A. Schetz	Garner
John A. Schmidt	Garner
A transfer, Robert G. Nedved	transferred here from Seattle, will report back for active duty on December 22nd.

Called Into U. S. Navy

The following of the Call were accepted for the Navy:

Everette V. Tande	Kanawha
LeRoy Romp	Garner
Donald H. Boelman	Meservey
Ivan J. Nielsen	Britt
Lavane B. Stott	Garner

The above will report back after inactive duty for seven days.

One Goes To Marines

Dorance L. Knoke of Garner was inducted into the Marine Corps.

MRS. LESTER STILLE HEADS METHODIST W S C S

At the meeting of the W S C S of the Klemme Methodist Church on Thursday, December 2nd, Mrs. Lester Stille was elected President for the coming year. Mrs. John A. Chambers was named Vice-President. Other officers elected for the coming year were:

Mrs. Clarence Lemke, Recording Secretary.
Mrs. J. C. Thomas, Corresponding Secretary.
Mrs. E. J. Arnold, Secretary of Missionary.
Mrs. Gerald Koerner, Secretary of Church Activities.
Mrs. C. A. Larsen, Secretary of Student Work.
Mrs. D. P. Anderson, Secretary of Young People.
Mrs. Frank Ward, Secretary of Publications.
Mrs. Martha Bredbenner, Secretary of Supplies.
Mrs. C. A. Arnold, Secretary of Children's Work.
Mrs. R. A. Jorgenson, Treasurer.

Lunch was served after the social and business hour by the hostesses: Mrs. John Johnson, Mrs. Art Kudje, Mrs. Gerald Koerner and Miss Mary Swanson.

AVERY AND TWIN LAKE HOME PROJECT MEETING

Twenty-one women met at the home of Mrs. Verner Lewis on Friday afternoon, December 3, to study and discuss the problems facing farm families in regard to "Money Management."

Following the program lunch was served by Mrs. Lewis, assisted by Mrs. C. A. Arnold.

Announce Changes In Dairy Production For 4-H Members

FILE DEED AND MORTGAGE; VALUE OVER \$2,000,000.00

County Recorder Fern Katter had a brisk day's business Saturday when she collected \$75.25 in fees on one transaction.

The transaction involved the reorganization and transfer of the M and St. L. railway. H. R. Irwin as special master executed a deed to Lucina C. Sprague of Minneapolis the M and St. L. railway company, Central Hanover Bank and Trust Company of New York, Bankers Trust Company of New York, Bank of Manhattan, City Bank, Farmers Trust Company and Coverdale and Colpitts as reorganization manager.

Consideration was listed as \$2,910,100 and a mortgage was filed in the sum of \$2,015,000.

The recording fee on the deed was \$15.05 and on the mortgage the fee totalled \$60.20.

SCHOOL BOYS AND GIRLS ASSIST IN TYING HEMP

Good progress was made over the county the past week in harvesting hemp when several hundred boys and girls from schools in the county, assisted by several men, tied several thousand acres of hemp.

Hemp plant officials at Britt reported a few hundred acres yet to tie and shock and it is expected the task will be completed in a few more days. The plant will soon be ready to receive hemp.

Boys and girls made good money tying hemp and received 65 cents an hour in this county. Quite a few Klemme boys and girls took advantage of the good jobs.

FAREWELL SURPRISE PARTY HELD ON THIEMANN'S

Mr. and Mrs. George Thiemann's mothers and sisters held a farewell surprise party on them at their farm home east of Klemme Sunday evening.

The evening was spent in a social way and lunch was served later. Mr. and Mrs. Thieman held a very successful sale last Friday and are moving to town soon, having purchased the new bungalow built by Mr. and Mrs. Wayne Pavay about two years ago.

Their son-in-law and daughter, Mr. and Mrs. Maurice Murray will live on their farm.

EXTENDED QUAIL—CLOSE PHEASANT SEASON

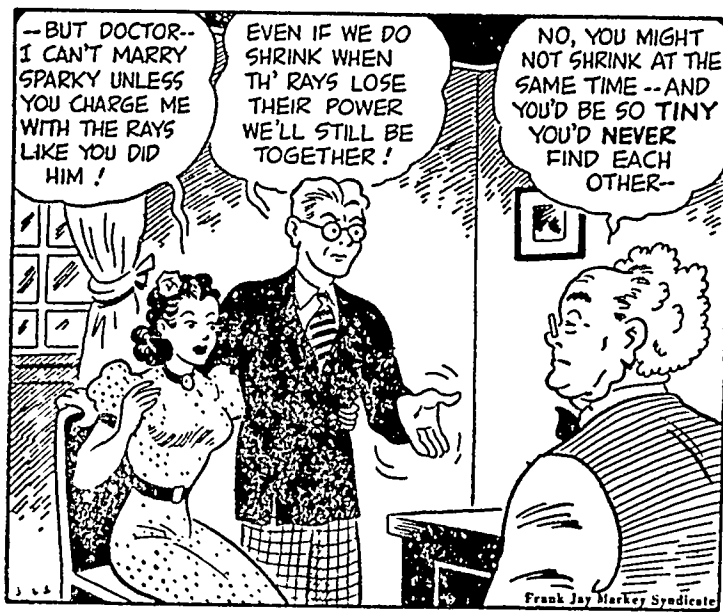

Picture Shows Quail At Winter Feeding Station

The 1943 quail season, in southern Iowa counties, has been extended fifteen days beyond the period set by statute, and the most successful in recent years for quail hunters, will now close on December 15th.

But, there will be no extension on the pheasant season in north Iowa counties. The State Conservation Commission met Monday but took no action on proposals that the season on ring-necked be re-opened. The season closed last Friday. Sportsmen and farmers alike are of the general opinion that the season could safely be extended another thirty days. Compared to seasons in the past, comparatively few birds were taken this year. The Commission said if any action is taken, it will come at a later date.

Brazilian Farmers Lasso Slay Gators With Ax

Lassoing crocodiles is the astonishing pastime of farmers of Brazil, an island in the mouth of the Amazon river, Brazil. Because the beasts menace livestock, the farmers engage in a seasonal "crocodile battle," when the creatures are trapped and shot. Shooting does not assure the death, however, so after the "sport" is over, the farmers haul them, pull them ashore, and kill them with axes.

SNAPPY FACTS ABOUT RUBBER

Group riding is a rubber-saving procedure which is rapidly gaining acceptance. The average number of persons per car throughout the country prior to July 1, 1942, was 2. In six months it jumped to 2.44, and at the beginning of May it had increased to 2.66. The greatest gain has been in rural industrial areas, where the average is now 3.17 persons per car.

Bottled air may be a regular accessory in the postwar automobile, making the car owner independent of roadside stations when emergency tire inflation is necessary. The air bottles, now used by the Army, can be refilled at any air line.

THE NEW COMMANDMENT

TEXT—Mark 12:28-34, John 13:35:14.
TEXT—A new commandment I give to you. That ye love one another, as I have loved you, that ye also love one another. John 13:34.

"new commandment" of love Christ gave not new in sense of then first being known, but in its application (John 13:35). Only since Christ had come can we know how to love in truth. The commandment of love was first in time, being given before the Ten Commandments (see Ex. 20:18). Then, too, it declared the fundamental of all spiritual life, the first thing man needed to know, and the first thing man needed to do.

Love must take first place in our thinking, for even as the Decalogue (Ten Commandments) is the foundation of all moral law, so love for God and our fellow man is that which makes the Decalogue effective in our lives. Love and obedience go together (John 15:10). The lesson teaches us four things—

1. Love God (Mark 12:30-33).

Because "God is love" (I John 4:8) He desires man's perfect love. He is love, He loves us, and He enables us to love Him.

Love is more here than a commandment or the performing of a duty. There is the recognition of a principle of all life. In a world of multiplication of powerful forces and organizations, when we are "power conscious" in an unwise way, it is well to recall that the greatest power in all the world is the power of love.

Let us not forget that all love should rest upon fellowship with God. It has no real foundation if it does not.

2. Love Your Neighbor (Mark 12:31).

Everything about our relationship with God and to God expresses itself in our living. No spiritual truth is to be admired, or kept on a shelf as a cherished possession. It is to be put to work in the affairs of life.

Love for God means love for our neighbor. If we do not love our neighbor (and that means our fellow man—Luke 10:25-42) how then does the love of God abide in our hearts?

It is worthy of note that the recognition and appreciation of this love on the part of the scribe who wrote the Gospel of John brought him near to the kingdom of God, but not into it. He was "not yet" but he was not in it. It is trying to think how close men come to entering without doing so. Reader, have you entered into this life through Jesus Christ?

3. Love Your Brethren (John 13:35).

When we come within the circle of love and see that the distinction about their fellowship is to be love for one another.

The old commandment of love becomes a new one because Christ has made the measure of that love His great love for us. How can we love Him? With a perfect, faithful and thoughtful devotion, and so deeply desired the very best for us that He was willing to lay down His holy life for us, our Saviour from sin.

The thing which marked the early church with glorious distinction was its love for one another, and in a world of hatred, they were killed and destroyed, they were willing to die for their brethren. Tertullian of Carthage (Tunisia) in the second century, that enemies of Christianity said of Christians, "See how they love one another."

4. Love is Obedient, Joyful and Loving (John 15:10-14).

Love is not an impulsive, erratic emotion of man's nature which is made up for neglect and unbelief by occasional displays of emotion and thoughtfulness. No man can love the straight and narrow way of obedience to God's commandments.

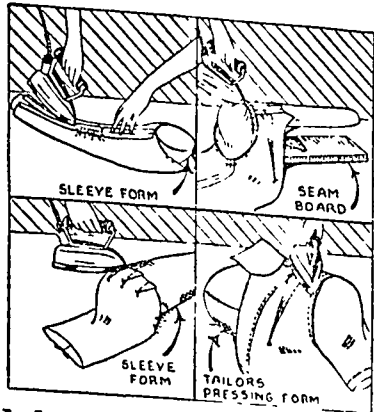

Keeping God's law is not accomplished by reading it, or talking about it, or even learning it by heart, but by definitely practicing its precepts.

Love brings joy into our lives—real and perfect joy of Christ. The little we appreciate what this is. Our fellowship with the Lord is for obedience and sacrifice, that is not a burdensome, dull, drudging experience. It is a joy. Who counts it a trial to do that which pleases a loved one? Do we really love God? Then we will really be in our response to His will, in any possible act of devotion. Love draws no limiting line between which it will not go. Love is: "I count not my life dear, if I may bring deliverance to my friends."

We shall not question His guidance nor blush to own His name, though the testimony may be to our death. This we shall do for Christ's sake, and for the sake of suffering humanity.

BETTER DRESSMAKING

By Ruth Wyeth Spears

home-maker counts that a household must. Her seam pressing board and her pressing cushions are the darlings of her equipment. They also may serve her well on ironing day. It is smooth work with the iron when she tucks them under a shoulder or inside a sleeve.

The sleeve form cushion and the tailors' pressing form are easy to make. The latter is often called a ham cushion because that is the shape of it. The covering should be of heavy muslin or other firmly woven cotton goods. The cover for the sleeve form may be cut by a tight sleeve pattern with all extra fullness taken out. The cushion should be stuffed very tightly. A center core of flat layers of newspaper is sometimes used for the large cushion. Cotton or small bits of clean rags may be used for the rest of the stuffing.

NOTE—This drawing is from Mrs. Spears' latest book, **BETTER DRESSMAKING**. The beginner may learn to sew from this profusely illustrated book; and the experienced dressmaker will find it a useful reference book on modern sewing techniques. Readers wishing to see a copy of **BETTER DRESSMAKING** should send name and address for complete description and special offer. Address Mrs. Spears, Drawer 10, Bedford Hills, N. Y.

Efficiency

"The secret of efficiency and success in our enterprises is to act at once upon our ideas while our fancy is still warm and in a glow."

'Do Your Best and End Will Take Care of Itself'

There's a bit of impressive sentiment in this homely thought of Abe Lincoln's:

"If I were to try to read, much less answer, all the attacks made on me, this shop might as well be closed for any other business. I do the very best I know how—the very best I can; and I mean to keep doing so until the end. If the end brings me out all right, what is said against me won't amount to anything. If the end brings me out wrong, 10 angels swearing I was right would make no difference."

Unique Family

A unique American family is that of the Irish Horse Traders whose 4,000 members, all related by blood or by marriage, spend most of their time traveling through the South in small groups trading horses and mules. Their one official address is an undertaking establishment in Atlanta to which they ship their dead and where they meet for a week every April to celebrate marriages and to hold their annual mass funeral.

Congo Eel Isn't

The Congo eel is not from the Congo and is not an eel but a salamander.

Why Not?

The state police were giving examinations for drivers' licenses. Upon returning from the driving test, a middle-aged Negro was questioned about different highway laws.

The questioner asked: "And what is the white line in the middle of the highway for?" Sam replied promptly: "Fo' bicycles."

His Field

"And did you ever lose yourself in your work?"

"Yes."
"What is your work?"
"Exploring central Africa."

A fellow asked his boss for a raise. He told the boss that he must have one, as several other companies were after him. It wasn't until weeks later that the boss discovered that they were the gas company, the electric company, and a furnishing company.

He Was!

Fortune Teller—This bump on your head shows you are very curious.

Client—That's right. I got that by putting my head in the shaft to see if the dumb waiter was coming up and it wasn't.

5 WARS

Smith Bros. has served the public since 1847. In that period America has fought five wars. Only during wartime has there ever been any shortage of Smith Bros. Cough Drops. Our production now is war-reduced but we're distributing it fairly to all. Still only 5¢. A nickel checks that tickle!

SMITH BROS. COUGH DROPS
BLACK OR MENTHOL—5¢

The Japs were wrong Let's keep them wrong!

The Japs were wrong.

Cutting off our rubber supply in the Pacific didn't take us out of the war—or even slow us up.

For Government, the Rubber Director, the rubber industry, and the petroleum, chemical, and alcohol industries pooled their patents and ideas, worked together, and accomplished the seemingly impossible.

Today, there is no shadow of a doubt that our planes will continue to fly, our ships to sail, our tanks to roll.

For America now has nearly enough rubber to meet our essential needs!

But our tire worries are still here!

The American people saw the new synthetic rubber plants spring up like mushrooms. They heard of large-scale production of synthetic rubber. And they applauded. Unfortunately, they also jumped to the conclusion that they could stop worrying about tires!

It is true that the RUBBER supply crisis is past. But the long-expected TIRE shortage is with us!

"But," you may say, "how can this be when thousands of tons of Government synthetic rubber are being made . . . when such a tremendous tonnage of rubber products is being turned out, as well as more airplane and truck tires than ever before?"

One reason is that—as the Baruch Committee foresaw—few tires could be manufactured until our synthetic rubber supply was well on the way. This resulted in millions of tires going out of use at a time when there were no replacements. Meanwhile, tires left in service have less mileage in them, and prewar inventories are gone.

Another reason is that our military needs are far greater than anyone anticipated.

Also, the rubber companies are using a lot of their machinery and manpower to turn out life rafts, bullet-sealing fuel tanks, and hundreds of other urgently-needed army and navy products, in addition to tires.

And you should know that half of today's requirements are for large-size, heavy-duty bus, truck, artillery, airplane, and combat tires, requiring much more labor and materials than peacetime products.

Finally, the tire industry, like every industry today, is feeling the manpower shortage, and there just aren't enough hands for the job.

Face up on the table!

These problems will be overcome when our enemies are overcome. Meanwhile, we want to put our cards face up on the table.

We've told you frankly why there is a serious tire shortage. Now we want you, and every other American who owns a set of tires, to know that this country's transportation system can still suffer a serious blow . . . unless

you make it your personal duty to take care of the tires you now own.

How to make tires last longer

Do no unnecessary driving.

Live up to the Government regulation—don't exceed 35 miles an hour.

Keep your tires inflated up to recommended pressure, and check them every week.

Avoid hitting holes in the road, or bruising your tires on curbs or stones. Don't start or stop suddenly. Slow down for sharp corners.

See that your wheels and axles are in line.

Switch your tires from wheel to wheel every five thousand miles, and have them inspected regularly for removal of foreign objects and repair of cuts.

And . . . most important of all . . . recap your tires as soon as they become smooth.

HOW GOOD ARE PASSENGER CAR TIRES OF SYNTHETIC RUBBER?

It may be a long time before all civilians can get synthetic rubber tires. Meanwhile, if you should be one of the few who do get them, you will want this information:

Synthetic rubber tires for passenger cars are good tires, and will give you satisfactory service if you take care of them.

You should not think of synthetic rubber tires as *improved* tires . . . but as *emergency* tires. And remember that they have not yet had time to prove what they can do.

It is beside the point to theorize on how they would react to the phenomenally high speeds of prewar days. Every patriotic American knows that tire treads . . . all tire treads . . . wear out faster at high speeds, and so drives at today's recommended speed of 35 miles an hour.

As time goes on, we will learn more about the effects of under-inflation of rough roads, and of other abuses. They damage *all* tires. Indications are that they do proportionately more harm to synthetic rubber tires.

Meanwhile, all tires are rationed to you in trust for the nation; and it is your duty to take every possible care of them, to avoid misuse and prevent abuse.

As experience teaches us more and more about synthetic rubber tires, we will pass the information along to you. Meantime, play safe. Be careful!

If you use synthetic rubber *tubes*, be sure they are properly installed. They should be put into the tire, then inflated, deflated, and inflated again. And they should never be mounted on rusty rims.

TRUCK AND BUS TIRES ARE A DIFFERENT STORY

Truck and bus tires, being larger and heavier, generate

more heat. They are given long, hard usage on all kinds of highways. They are all too frequently overloaded.

Frankly, today's synthetic rubber bus and truck tires will not stand the abuse that prewar tires would stand, especially overloading. Progress is being made daily—but overloading which would have *damaged* a prewar tire can ruin today's synthetic tire.

The Tire Industry is doing its utmost to solve the serious problem of providing the nation's trucks and buses with satisfactory tires in sufficient quantities.

But until this problem is solved, a dangerous threat exists to America's most vital transportation.

Therefore, while treads of present truck and bus tires are immensely important . . . *the carcasses of these tires have a value beyond all price to America, and to America's truck and bus operators!*

Unless tires now in use are made to last, these two essential services will almost certainly break down!

These tires . . . every one of them . . . must be recapped the instant the tread wears smooth . . . before any damage is done to the carcass.

They must be recapped not once, but again and again! High speeds must be done away with . . . especially on hot roads. Overloads must be avoided. Tires must be properly inflated at all times.

The responsibility to take care of these tires . . . to make them last as long as possible . . . is a vital necessity! It must be shouldered by *all* operators, by *all* drivers, by *all* garage men!

No American can fail to heed this warning! The situation is so serious that it is recognized in a new tire warranty. But the real job is to *conserve all tires now in use!*

A new warranty—

With conditions as they are, and synthetic rubber in its present stage of development, a new tire warranty has become necessary and has been adopted. It applies to *all* tires. Under its terms, injuries such as bruises, body breaks, cuts, snags, and heat failures as well as tread wear are *not* subject to adjustment consideration.

Nor are injuries or failures which result from improper tire care or misuse or abuse. This includes failure as a result of overload, excess speed, improper inflation, or other non-defective conditions. Or when tires are used on rims not conforming to Tire and Rim Association Standards.

Don't forget that everyone . . . the Tire Industry, the Rubber Director, and many others, are working together with all their energy, as they have worked from the beginning, to keep America rolling.

And remember that, while the Japs were wrong, you must help keep them wrong! Take care of the tires you now have!

ARMY GIVES YOUNG AMERICA GREATEST EDUCATION

While reading the life of General Hanford McNider, Iowa's beloved soldier of World War I and now fighting in the South Pacific, we were impressed by these words in speaking about young men in the army Gen MacNider says "It's the greatest education any young American can have. It gives him a very real appreciation of his fellow Americans and the stuff they're made of."

He has three sons, Angus 15, Jack, 16, and Tom, 17. Tom has been accepted as an air cadet and will go into training in January, when he becomes 18.

MacNider wishes all three of his sons were old enough to get in the army.

And, in peacetime, MacNider and his family live on their farm east of Mason City.

THIS RADIO PROGRAM REALLY BACK-FIRED!

Those who were listening to Phil Baker's Double or Nothing radio program Sunday evening are still chuckling over the reply a sailor gave to a series of questions leading up to the \$64 question.

It was near the end of the program and the questions had to deal with "navy slang." Baker gave the slang word and the sailor was to translate it into English, such as "red-head," meaning catsup, "flat-top" meaning aircraft carrier, and so on. The next word on the list was "noise," and of course meant soup. But here is where the program went hay-wire. Phil asked the sailor to define "noise" and he immediately came right back with "sten beans."

That started the uproar and the crowd was still whooping when the program went off the air.

Yes, the sailor got the \$64!

MEYERS' PULLETS HAVE BIG IDEAS

Mrs. Wm Meyers, of near Miller, brought a box of eggs to the Times office Thursday which were as big as turkey eggs.

The ten eggs were all very large and pure white. We picked up one of the eggs and it measured 8 1/2 inches the long way and was 6 inches around! Some egg.

The eggs were laid by White Leghorn pullets that were hatched in April, another remarkable fact.

To get around one of those eggs for breakfast we had to take an extra hour to consume one. They were so big that the better half could only fry one at a time in the skillet!

WATERPROOF WORK AND SCHOOL SHOES AT HOME

Autumn and winter frequently bring children home with shoes soaking wet. Wet leather, says Miss Elizabeth Peterson, Extension clothing specialist at Iowa State College, is easily damaged and must be handled gently to keep it from shrinking, hardening and losing shape.

The wet shoes should be carefully cleaned with warm water. Then straighten them, pressing gently into shape and stuff with crumpled paper. The shoes should be thoroughly dried away from extreme heat.

Soles of shoes for farm work and outdoor wear need oiling to keep them water resistant. The following recipe may be used for waterproofing:

One pound of petroleum and two ounces of beeswax.

Melt together the ingredients by warming carefully and stirring thoroughly. Apply the grease when it is warm but never hotter than the hand can bear. Grease the uppers of work shoes lightly, rubbing in well. Grease the edge of the sole where shoes leak most frequently. Saturate the sole by letting the shoes stand about 15 minutes in a shallow pan containing enough of the grease mixture to cover the whole sole. If the shoes have rubber heels, set them so soles will be in the grease but the heels will be outside the pan. Grease softens rubber.

THREE K. H. S. STUDENTS ON KGLO BROADCAST

Three Senior students will represent Klemme High School over radio station KGLO in a fifteen-minute broadcast Monday, December 13 at 4:30 p. m. The program is a part of the tenth annual High School Radio Speaking Program sponsored by the Iowa Tuberculosis Association.

Wava Schenewetter, Allen Lau, and Clara Koehler will each give a five-minute talk.

Mrs. H. N. Campbell is coaching the Klemme speakers.

W. S. C. S. WILL HOLD BOARD MEETING FRIDAY P. M.

The Executive Board of the W. S. C. S. of the Methodist Church will meet Friday afternoon, December 10 at 2:00 o'clock at the home of Mrs. J. C. Thomas.

Alvin Risvold and Maxine to St. John Evangelical Lutheran church. Q. C. Deed 9-17-43, \$25. Lots 14 and 16 in block 2. Sapp's add. Corwith.

BIG TASK AHEAD NOW IS CARE OF MACHINERY

Housing and Protection of Parts by Coating Are Two Essentials

The important wartime job of keeping farm machinery in good condition includes two tasks in addition to repair, adjustment, sharpening and necessary replacement of parts, according to C. H. Van Vlack, Iowa State College extension agricultural engineer. He lists them as proper housing and protection of parts subject to decay or rust, by paint or other coatings.

Cut Repair Costs

Farm equipment that is well protected usually requires less expense for repairs, though the life of the machine may not be greater than the life of a similar machine left outdoors and given some protection. Machines that are housed always are more readily available for repair during the winter and for use during the farming season. A machine that is protected from moisture, sun and dust will start in a minimum of time; moving parts do not rust, and oil holes and bearings are free of dust and gritty material.

Steps for Painting

Van Vlack suggests the following steps for painting farm machinery with a minimum of difficulty:

1. Black up the machine so that all parts may be readily cleaned and painted.

2. Remove all grease with turpentine or kerosene. Wire brush or scrape off loose rust from metal and scaling paint from woodwork.

3. Mix the quantity of dry red lead, linseed oil and gum spirits of turpentine required according to the amount of paint desired. (Leaflet directions are available from Iowa State College, Ames, Iowa.) Metallic zinc paint is preferred where galvanized surfaces are to be repainted.

4. Brush the paint evenly and thoroughly on all metal and woodwork. Two coats will increase the durability.

5. Apply a finish coat of varnish paint or a good lead base paint with linseed oil. An attractive shade of brown can be had by adding a small amount of paste lampblack-in-oil to red lead paint. Thin lampblack with turpentine or linseed oil before adding it. Any good quality exterior house paint can also be used as a finish paint.

Oil or Grease

Bright parts of machines should be protected from weather by a coating more easily removed than paint. Used engine oil will do if the machine is housed. Ordinary axle grease gives more durable protection if the machine is left outdoors.

HANCOCK COUNTY 4-H GIRLS AND BOYS FUN NIGHT

At eight o'clock on Saturday evening, December 11, the Hancock County 4-H Club "Fun Nite" will be held in the Garner high school gymnasium.

A short program, club awards, games and eats will provide a good time for all members, prospective members, parents and friends are invited to attend. Miss Winnifred Martin, specialist in recreation from the Extension Service of Iowa State College, is expected to be present to assist with the entertainment.

ELL MIDGETS MET WITH JACK GREIMAN

The Ell Midget Boys 4-H Club discussed Parliamentary Procedure at the home of Jack Greiman on Friday evening, December 3. The boys also discussed their 1944 program with Paul Henderson, County Extension Director.

The boys and girls planned a Christmas party for Monday evening, December 20, at the home of Emory Weaver.

GAVEL

A gavel made from the first Delicious apple tree was presented to Victor Felter of Indianola recently. Mr. Felter had served for three years as president of the Iowa State Horticultural Society. The tree from which the gavel was taken grew on a farm near Peru in Madison county and was killed at the time of the Armistice day freeze in 1941. The gavel was inscribed: "I. H. S. Felter, president 1941-1943."

CHRISTMAS ENTERTAINMENT

Mr. and Mrs. D. Smalley now of San Diego, California, have requested the Clarinda Herald-Journal to help contact all boys from Clarinda or surrounding community now in the armed services but still located in the San Diego vicinity. Mr. and Mrs. Smalley want to have the boys at their home for Christmas.

LUNCHEON-BRIDGE HELD FRIDAY P. M.

Mrs. P. M. Wilson, Mrs. Jorgenson and Mrs. W. F. entertained a group of ladies at a luncheon and bridge at a room followed by four tables of bridge. Friday. High scores were won by George Lawhorn, second by Mrs. Ed Buntinbach and high by Mrs. Fred J. Arns.

You can't build that home right now. Unc needs your money and he needs the materials. But you can start planning it and buying it. Just shell out of each pay cheque for a Victory Bond and, before you know it, you'll have a running start when Unc says, "Go!" We can help you with the planning, if you'll let us. We have a fine library of home designs. Come in!

YES, SIR! A REAL...

Homey Christmas

Is in Order this Year

—V—

Our third Christmas at war finds home ties stronger than ever before. Families are spending more time around their own firesides than they have for many years. We are getting back to the simpler life—living a little nearer to each other depending on our own homes and families for the cheer which a country at war needs.

This year, especially, is no time for trivial things that do not last. This year, above all others, every family should resolve to give each other gifts of permanence—gifts for home enjoyment. Gifts that will last long past the writing of the peace—gifts that will lift the heart of the home—gifts that build and nourish home morale as it is needed in war-time.

All of this points to FURNITURE GIFTS as the IDEAL CHOICE for this year. We suggest either large furniture items for family gifts, or small ones for individual gifts. A small deposit will hold the gift for you until Christmas.

WAR BONDS in action

Your money goes into battle every time you invest in War Bonds—goes up to the German lines in the form of tanks, planes, assault boats as pictured here in the Mediterranean area.

Success of our troops depends upon the help they get from the home front. Bullets fired yesterday won't win tomorrow's battle. War Bonds bought last month won't pay for our next offensive. Give your dollars action: Buy More War Bonds. U. S. Treasury Department

HYBRID CORN CO. North, Iowa

LIBERTY GO-GETTERS MET AT DALE GREIMAN'S HOME

The Liberty Go-Getters 4-H Club met at the home of Dale Greiman to discuss cattle grub control and farm records. They discussed and planned a Christmas Party to be held at School No 5.

Paul Henderson, County Extension Director, discussed the 1944 program for boys and announced the 4-H Fun Night, December 11 and also announced the Leaders' meeting on December 7th.

Around Iowa

AGE DOESN'T MATTER

Forrest Wynn of Clarinda, like so many others, has found that it is necessary to call on older men to assist with the farm work. Mr. Wynn had 14 acres of corn still out and he wanted it picked so that he could use the stalk field for his cattle. He obtained the help of four men whose ages averaged 70 years. Help with the picking. The helpers were Frank Maxwell, 83, Charles Wynn, 71, Sam Kepner, 68, and Harry Stout, 59. The men picked 50 bushels per hour.

DUCK HUNTING MADE EASY

Mr. and Mrs. Swan Dahlquist of Okobelt learned from their son Herbert of Omak, Washington, that he had found a method of getting ducks without using ammunition. After a flock of wild ducks flew over the town, a duck walked into the mattress shop operated by Mr. Dahlquist. Apparently the duck had received a broken wing when it hit a wire. Later Dahlquist took the bird to a nearby lake and released it.

WRONG SEASON

Following in instructions given by government inspectors, employees of a Rembeck produce packing plant have been building frames and placing screens over 60 openings.

WRONG BABY

A few worried moments for Mr. and Mrs. Lee Curl of Guthrie Center were caused when it was discovered what they had taken a boy baby home from the hospital. The

Curl baby was a girl. A call to Jefferson disclosed the fact that their baby was still there with the correct bead necklace and name band that were placed there immediately following birth. They are sure that they have the right baby now as it was the only girl among seven boys in the hospital.

"FOR SALE"

A "for sale" sign on a shotgun shell box in a Hampton restaurant fooled local hunters as they were all under the impression the box was empty. It was up to an out-of-towner to say "I'll take them." The box was full of 12-gauge shotgun shells.

NEW "WAGON"

Unable to obtain a man with a team and wagon to shuck corn in his life of two and one-half acres, Van Woodruff of Waverly did the work himself using a wheelbarrow to haul the corn. Mr. Woodruff did the shucking.

SAVES STEPS

Dale Bockes of Grundy Center has been saving time in getting his shelled corn to the market. He piles the corn in the field one day and shells it out the next.

FACE CUT

Starting to repair a boiler in a LeMars bank building, Wayne Collins was cranking the motor on a portable electric welder when the tank slipped. Mr. Collins' face was badly cut under one eye by the crank.

TIRE INFLATION NEEDS WATCHING CLOSELY

Goes Down As Temperature Drops And Increases On Warm Days

Under-inflation during cool weather may cause loss of 50 to 75 percent of the life of each tire on the car, truck or tractor. The excessive wear is caused by rim bruises, sidewall snagging, and breaks in the fabric as a result of too much flexing action as the wheel turns.

That's one reason why it's important to check up on tires these days, according to C. H. Van Vlack, Iowa State College extension agricultural engineer. He says that over-inflation also is harmful, since it increases slippage and the tread is worn away rapidly. Over-inflation also leads to weather checking and to breaks in the fabric when the tightly distended tire passes over an obstruction.

Under-inflation Serious

Under-inflation is the more common and more serious of the two misuses. At this time of year, when temperatures are going down, tire pressures also go down, even though there is no leak. Over-inflation is more likely to occur as the temperatures rise during the spring or summer, or on hot days in the fall following a cold spell when more air has been pumped into the tires to bring the pressure up to normal.

The correct pressure for automobile or truck tires almost invariably is imprinted on the tire sidewall. For farm tractors, 4-ply tires for the front wheels should carry a pressure of 28 to 30 pounds, while 6-ply should carry about 36 pounds regardless of size. Rear tires, (all sizes) should carry a minimum of 12 pounds pressure except when plowing. For plowing, the furrow wheel tire should be pumped up to 16 pounds pressure. If added weight, such as a mounted corn picker, is put on the tractor, more air should be added. The tractor dealer knows the correct pressures for that situation.

Adding Weight

Added weight on the tires, whether gained by wheel weights, a water calcium chloride solution in the tires, or a mounted machine, adds traction in proportion to the total weight. The extra traction is gained by added area in contact with the ground, rather than increased ground pressure per square inch. The increase in weight weights be used except for heavy pulling. They should never be used for light work or for operation of a heavy mounted piece of equipment.

When any rubber mounted machine is put away for the winter, it is best to block up the wheels and release the air pressure. Covering the tires with old canvas or burlap will prevent weather-checking.

Soybean Good Food When Green or Fully Matured

Soybeans may be used as food either in the immature or mature state. They are ready to be used as a green vegetable as soon as the pods have filled out but while they are still green. The immature soybean is always green no matter what the color of the dry seed is to be. They are in season in Illinois from about the middle of August until the last of September.

The beans can be cooked either in the pod and shelled later, and they can be shelled and then cooked. Shelling is made easier by pouring boiling water over the pods, and allowing them to stand five minutes and then cooling with cold water. Mature soybeans are usually soaked before they are cooked. An important point to remember in cooking either the immature or the mature soybeans is that they should be cooked until tender, not soft. When done they have a nut-like texture and are not soft or mushy.

Soybean products are of interest and value in planning menus and in keeping them nutritious and well balanced. Some of these are soybean milk, soy curd, toasted salted soys, soy sauce and bean sprouts. Then there are soybean grits, which may be cooked like the various cereal grits and are used commercially in soy crackers.

Refined soybean oil is used in some salad oils, margarine and shortenings. Finally, there is the flour of either high or low fat content, which is usually used in combination with wheat flour for yeast bread, muffins, cookies, griddle cakes, and as a thickening agent in sauces and soups.

Play Has Part in Child's Education and Development

Play is a necessary part of the development and education of every child. For wholesome constructive play children need toys, they need a place to play; they need playmates, and they need sympathetic adults. In time of war, it takes thought and careful planning by parents to see that the children's needs are met as well as conditions will allow.

Good toys are toys with which the child can do things; playthings that are just looked at are of little value. Many of the best toys are used by children of widely differing ages. Blocks and sand and painting materials, for example, are used in a simple way by the toddler but their use continues all through childhood. It is good for a family to have some of these toys that interest children of different ages. They help to keep the family together. They interest the children of the neighborhood and pave the way for companionship among children of different ages as well as those of the same age—companionships, which mean much in the development of children.

Grubs Hatch in Sod

White grubs, which work on a three-year rotation themselves, do the most damage the year following the one in which the adult beetles emerge. They can ruin stands of timothy and other grasses, kill nursery stock, strawberry plants, and damage potatoes and truck crops by feeding on the roots. Modern agriculture has not effectively controlled this pest. Eggs are laid largely in grass sods, and when crops are planted on sod plowed under the next year, the crop roots are attacked by the grubs. The grubs do not severely damage legume or mixed hay or pasture plantings, so that the improvement of hayland and pasture tends to control the insects. They can not thrive in wet or clay soils, but do their damage in the drier, better-drained lands.

Bailey Marches Elephant

In 1815 a New York state farmer, Hackaliah Bailey, bought an African elephant from his seafaring brother. Marching "Old Bet" from town to town by night and exhibiting her by day, Bailey made a small fortune. He built a statue and a hotel at Somers, N. Y., in memory of his pachyderm.

P. T. Barnum, a young Connecticut clerk, closely watched the career of "Old Bet." By 1843 Barnum was well on his way to the remarkable showmanship that was to add many distinctive touches to the American spangleland. Jumbo and General Tom Thumb were Barnum successes now part of circus legend. His "Greatest Show on Earth" dates from 1870. He opened a new circus era in 1872, by putting his show on railroad cars.

First American Circus

There were circuses long before the Circus Maximus of Julius Caesar. For centuries they consisted of chariot racing and feats of horsemanship. Only after reaching the young American republic in 1792 did the change begin. In that year John Bill Ricketts opened America's first circus under a permanent roof in Philadelphia. Setting a pace to inspire P. T. Barnum and later masters of circus promotion, Ricketts marked April 22, 1793, a red-letter day, for on that day President George Washington attended the show. Ricketts' house was packed for weeks thereafter. By 1797 he had built a circus theater in New York and had exhibited as far north as Albany. New circuses were established in other cities.

LOCAL RED CROSS WILL ELECT OFFICERS

A meeting of all Red Cross members will be held at the home of Mrs. Sumner Trumbell on Saturday afternoon, December 11th, at 2:30 o'clock for the purpose of electing officers for the coming year.

All members are welcome to attend this annual meeting.

KANAWHA DRAYMAN BURNED TO DEATH TUESDAY NIGHT

Guy Work, 62, a bachelor, was burned to death early Tuesday morning when the shack in which he lived in Kanawha caught fire and was completely destroyed.

Mr. Work was a drayman.

FREE SUPPER

"There are no strings attached, we mean free," was the announcement made by Wilson Burns, chairman of the building committee of the Center Chapel church in Warren county, on supper invitations to all who helped rebuild the church. The former church, destroyed by fire in September, 1941, was rebuilt at a total cost of \$4,900 plus about \$500 worth of donated labor. Those who contributed towards the building, whether in labor or money, were invited to partake of an oyster supper on Thanksgiving evening.

INVESTMENT

George Halstead of near West Union set traps for gophers and caught 200 of the animals on the Ed Meskel farm. George, 12 years old, invested the \$20 received as bounty in war saving stamps.

GOOD STORE IN A GOOD TOWN"

S. Troops Overcome Early Reverses To Advance on All Fronts During 1943; Italy's Surrender Cracks Axis Bloc

Pushed From Pacific Outposts After Jungle Fighting; Aleutian Victory Removes Threat to West Coast.

By AL JEDLICKA

July 25, 1943, the world was electrified by the news that Benito Mussolini had resigned as leader of Italy. Although details of the Duce's downfall were meager, there was a feeling that the Berlin-Tokio Axis had cracked, and this was confirmed September 8 when Gen. Dwight Eisenhower announced Italy's surrender.

The events shape in accordance with Prime Minister Winston Churchill's calculations of being the "soft underbelly" of Europe. From January 14 to 24, Churchill and President Roosevelt had conferred with their war chiefs at Casablanca, North Africa, where military as well as political plans for 1943 were laid, and the general policy of "unconditional surrender" was established. There was development of these plans by the Allied leaders met again in Casablanca, August 17.

The year 1943 saw a new phase in World War II, with the Allies moving into the offensive and the Axis resorting to rearguard action to slow the drive on their main fronts.

Only was this phase exemplified in Europe, but it also was felt to the fore in the South Pacific where dynamic, imaginative Gen. Douglas MacArthur began the drive to oust the enemy from their positions in the Solomons and New Guinea and clear the path for the conquest of the Philippines and the defeat of the Japs.

As Churchill and Roosevelt agreed in Casablanca, Gen. Bernard Montgomery's British Eighth Army was pursuing Nazi Marshal Erwin Rommel across the North African desert. To the west along the Tunisian border, U. S. forces were moving into position to pinch the enemy as they fought back at Bizerte and Tunis. On May 7, two seaports fell, and five days later organized Axis resistance in North Africa ceased, with the Allies taking 150,000 prisoners.

General Montgomery had begun his drive at El Alamein in Egypt, where Rommel, famed fox of the desert, had holed up, just 67 miles from the great British naval base of Alexandria. U. S. troops

Leaders of U. S. armies on world's far-flung fronts: Gen. Douglas MacArthur, who pushed Japs from Pacific outposts; Gen. George C. Marshall, chief of staff; Gen. Dwight Eisenhower, invader of North Africa, Sicily and Italy.

his release from captivity by Nazi paratroopers September 12. On September 20, the Italian government of King Victor Emmanuel declared war on Germany.

On the Russian front, February 2 saw the end of the great battle of Stalingrad, with the repulse of Nazis, but only after the big industrial city had been pounded into ruins. The Reds claimed virtual destruction of the German Sixth army and Fourth tank army, and capture of Field Marshal Frederick von Paulus and 14 other generals.

June 26, the Nazis launched heavy attacks at Orel and Belgorod, at the two ends of the big bulge in the rich agricultural and industrial province of Ukraine. But the Reds broke through their lines and they slowly fell back to the banks of the Dnieper river.

Below Kiev, the Dnieper swings due east before curving southward for some length, and then cutting back toward the west again, forming a huge bulge. To trap the German army in this bulge, the Russians spilled over the Dnieper below Kiev, but strong German rearguard action at Krivoy Rog gave their forces time to escape encirclement.

During the height of the Russian advance in the south, U. S. Secretary of State Cordell Hull met with British Foreign Minister Anthony Eden and Russian Foreign Commissar Vyacheslav Molotov in Moscow, where with China, the representatives of the three great powers signed a historical pact, agreeing to fight Germany and Japan until they surrender unconditionally, and determining to establish an international organization based along the lines of the old League of Nations to assure collective security.

While battles raged on land in Europe, they raged in the air, too, with U. S. and British bombers battering Germany's great industrial cities of Hamburg, Cologne, Dusseldorf, Essen and Berlin, and dwarfing the Luftwaffe's early attacks on London. Port and manufacturing center, Hamburg, was virtually wiped off the map, and, in all, it was reported 1,200,000 Germans were killed as a result of Allied air raids.

In the distant Southwest Pacific, with the memory of heroic resistance on Bataan and Corregidor still impressed in his mind, and with them his vow to return to the Philippines to avenge the U. S. setback, Gen. Douglas MacArthur struck out against the Japanese in the Solomons and New Guinea. Following their rapid conquests after the paralysis of Allied forces at Pearl Harbor, December 7, 1941, the Japs had surged within striking distance of Australia, before they were stopped short in the historic battle of the Coral sea in May, 1942.

Ousting of the Japs from southern New Guinea. January 24, eastern New Guinea. January 24, the smashing of all organized resistance on Guadalcanal, February 10, giving U. S. control of the entire Solomon Islands, set the stage for General MacArthur's big push to drive the enemy from his remaining advance posts in the two areas.

The first gun was fired June 30, with the memory of heroic resistance on Bataan and Corregidor still impressed in his mind, and with them his vow to return to the Philippines to avenge the U. with U. S. forces landing on Rendova island in the central Solomons. On the following day, U. S. troops set foot on Nassau bay, New Guinea, to fight inland for a junction with Aussies moving northward through the jungles.

Jungle Cover Slows Fighting

Jap troops made use of the dense tropical foliage and rocky, mountainous country, for cover to slow the advances. But especially in New Guinea, General MacArthur adopted the policy of concentrating against enemy bases only and cutting off Jap supply sources for cross-country fighting. Salamaua fell September 15, Lae three days later, and Finschhafen October 3.

Meanwhile in the Solomons, U. S. forces hacked their way to Munda airfield on New Georgia island, August 6, after 38 days of bitter fighting. On October 9, it was reported that the Japs abandoned their last big base of Kolombangara in the central Solomons.

During the Solomons fighting, U. S. naval and air forces took a high toll of Jap ships and barges used to supply or evacuate troops, especially at night. As a result of the New Guinea and Solomons campaigns, U. S. and Aussie forces stood squarely between Rabaul on New Britain island, the enemy's nerve-center for resistance in their advance positions in the Southwest Pacific. Even as the Japs rushed naval and air reinforcements to Rabaul to hold it as a supply center and strategic fortress to threaten the flank of any Allied movement to the north toward the Philippines or Tokyo,

One Russian soldier aims and fires the heavy anti-tank rifle while another hands him the ammunition to blast at an oncoming German tank on the Soviet battlefield.

U. S. airmen dumped hundreds of tons of bombs on the big base. On October 11, doughboys swarmed ashore on Bougainville, in a fight to throw the Japs from their last northern holding in the Solomons.

The Japs' direct threat to the American mainland posed with their occupation of the Aleutian islands June 12, 1942, was ended August 15, 1943, with announcement of U. S. occupation of Kiska. Doughboys setting foot on Kiska found no trace of 8,000 Japanese, with evidence their evacuation had taken place within the two weeks prior to the island's fall. The enemy had quit their Aleutian holdings of Attu and Agattu October 7, 1942.

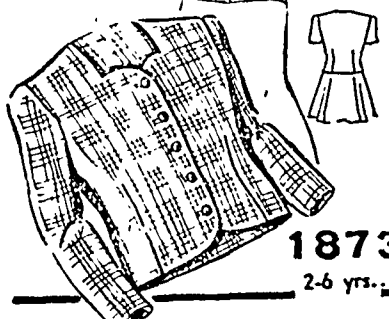

The first gun was fired June 30, with the memory of heroic resistance on Bataan and Corregidor still impressed in his mind, and with them his vow to return to the Philippines to avenge the U. Home Front Interest Focused on Economic Stabilization

During 1943, interest on the home front was focused on economic stabilization, as set forth by President Roosevelt in his "Hold the Line" order of April 7.

The President asked no ceilings be placed on food except to the minimum extent required by law, and directed the reduction of excess prices, which was eventually accomplished by the cutting of costs to

consumers through subsidies. The President also forbade wage increases except to improve standard rates or accompany promotions.

Leading the fight for higher wages, John L. Lewis and his 400,000 United Mine Workers maneuvered for seven months before finally reaching an agreement with the government November 3, allowing a daily

wage increase of \$1.50, and recognizing the miners' claim to underground travel time.

At the height of the coal situation, congress overrode a presidential veto, to pass the Smith-Connally anti-strike bill, June 25, outlawing work stoppages in government owned plants and prohibiting them in other industries without 30 days notice and a secret ballot.

Flight For Freedom

Rosalind Russell and Fred MacMurray

Short:

"UNDER GROUND WORLD"

Mr. and Mrs. August Josten entertained some friends at a card party at their home last Friday evening. High prizes went to Mrs. Donald Neuberger and Mr. Alfred Jurgemeyer, and low prizes to Mr. and Mrs. Howard Baack. After the games Mrs. Josten served a lovely lunch.

Misadventure of 1943. An English baby is called to colors, burglars are scared stiff by the things they stole, a bus driver stands up all his customers, and other queer instances of the past year's most curious happenings are told in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Mr. and Mrs. Louis Perkins and daughter Darlene, and Mrs. Perkins' mother, Mrs. Stella Hinton, drove to Webster City Sunday for dinner at the Lee H. Stewart home. Mrs. Hinton, who has been with her daughter here for several months, will spend some time with her daughter, Mrs. Stewart at Webster City. Miss Darlene Perkins remained there for a week's visit.

Otis Atkins, who has been employed on the Verner Stromer farm for the past three years, left last week for his home at Prior, Oklahoma. He was accompanied by Bob Allen, who is employed on the Herman Stromer farm. Bob will visit at his home at Orangeboro, Missouri. Before returning here he expects to have an operation, but will return to the Stromer farm later in the winter.

Mr. and Mrs. A. E. Alfred of Blairsburg came Sunday to spend the day at the home of their son-in-law and daughter, Mr. and Mrs. Verner Stromer. Mrs. Stromer and son Val, who had been at Blairsburg for several days, came with them. Mr. and Mrs. Alfred are retiring from the farm and are moving to Webster City. Mrs. Stromer was assisting her parents who held a public sale last Thursday.

SHAMROCKS LOST GAME TO HAYFIELD CAGERS

The Klemme Shamrocks split 2 games with the Hayfield quintets on the latter's court last Friday evening. The Little Shamrocks kept up their winning streak by defeating the Hayfield Reserves 18 to 17. The Shamrocks lost their game by the score of 36 to 19.

In the varsity game the Shamrocks were but two points behind at the half, but in the third and last quarters Hayfield's Taylor and Formanek went on a rampage to put the game on ice.

At Goodell This Week

There will be no home games this week as the Shamrocks go to Goodell Friday evening for a two game tilt.

MRS. EDNA THADA ENTER-TAINED STORE FORCE

Mrs. Edna Thada entertained all of her store force at a dinner Sunday at Mason City, after which she took them all to the theatre to see the new picture "Happy Lands". The affair was a sort of pre-Christmas party before the holiday rush and all enjoyed a fine time.

Hancock County Farmers Asked Raise New War Crop

**HANCOCK COUNTY SELECTED
PRODUCE WAXY-MAIZE,
GOOD FOR FOOD**

**Maize Corn Is Used To Re-
place Tapioca Cut Off From
East Indies By The Japs**

Hancock County has been selected one of 16 North Central Iowa counties which will be asked to raise an acreage of Waxy-Maize corn in 1944, County Extension Director Paul Henderson announced.

Waxy-Maize corn is being raised to replace tapioca which was cut off by the Japanese when they conquered the East Indies. It is a war crop that can be used in the manufacture of explosives and paper products.

The Waxy-Maize corn is a war crop which has definite post war possibilities. The starch which is manufactured from waxy corn is superior to that of tapioca which is of a very varying quality.

Farmers who grow the crop in 1944 will receive a premium of 2% over Chicago cash corn delivered to the local elevator's price.

During the past year Iowa farmers grew waxy corn for the first time some 2,000 acres of it. This there will be enough seed available to plant some 60,000 acres of the product, according to Dr. G. H. Prange of the Iowa State College Experiment Station.

The entire 1943 production was handled by the American Maize Products Company and the crop is planted and grown under the direction of the Deane Agricultural Experiment Station, Inc., of Ames.

Waxy corn resembles other yellow hybrid corn except for its waxy characteristics which can only be distinguished by simple chemical tests. It is planted, cultivated, picked, and handled like any other corn but must be cribbed separated from other corn. A temporary crib in the field is satisfactory.

In the fall of 1941, Iowa State

University had about 4,000 kernels of the newly developed corn. This corn was planted in the college greenhouse and the federal greenhouse at Washington, D. C. during the winter. A crop was harvested and time to plant the seed on the college farm by June of 1942. From the field, 360 bushels of seed were harvested, not the best seed, because it was caught by the early frost because of the late planting. It was enough to plant 2,000 acres of corn this year.

The yield this year have generally been high, comparing favorably with the best strains of standard corn, according to reports.

**LIBERTY METHODIST W.S.C.S.
ELECT OFFICERS FOR '44**

The W. S. C. S. of the Liberty Methodist Church met at the home of Mrs. Rose Tanner last Wednesday, December 8th where they enjoyed a luncheon. Each lady brought a covered dish and all members were present except two.

An election of officers was held and Mrs. Kenneth Zwalg was named as president and Mrs. W. H. Lemke, vice president.

Other officers elected included Mrs. George Schoenwetter Recording Secretary, Mrs. Cecil Pitlick Corresponding Secretary, Mrs. Bernard Pringnitz Treasurer and Mrs. Otto Pringnitz Assistant Treasurer. Secretaries were elected for the several divisions as follows:

Children's Work, Mrs. Wilbur Haefner
Missions, Mrs. Rose Tanner
Local Church Activities, Mrs. Kenneth Schultz
Students, Mrs. J. L. Abele
Young Women's Work, Miss Bernice Tanner
Public Relations, Mrs. Ben Riemer
Supplies, Mrs. Ben Ridder
Miss Lois Riemer was elected as President of the Service Guild.

**LEGION AUXILIARY SENDS
OUT CHRISTMAS CHEER**

The Klemme American Legion Auxiliary held their regular meeting at the hall Tuesday evening, December 7th with a large attendance.

The ladies had a lot of fun with their Grab Bag exchange of gifts.

The unit is concentrating on Christmas and already have mailed out beautiful Christmas cards to all the boys in the armed forces. Now the unit will make home-made candy to be sent to the Veterans hospital at Knoxville for Christmas.

It was decided to sew carpet bags at the next meeting.

Lunch was served by Mrs. E. J. Arnold, Mrs. Martha Bredbenner, Miss Marie Blank and Mrs. John A. Chambers.

**FAREWELL SURPRISE PARTY
HELD FOR THE GOLLS**

The friends and neighbors of Mr. and Mrs. John Goll and family and Jake Goll, gave them a surprise farewell party at their home on Thursday evening, December 9th.

The evening was spent in visiting and playing cards, after which a delicious lunch was served by the visiting ladies.

John and Jake Goll have lived for sixty-one years on the Goll farm, both having been raised on the farm and have worked together for thirty-five years.

Garner where they bought a modern home. Their farm is now tenanted by Mr. and Mrs. Leo Jass and family of New Richmond, Minn. Mrs. Jass was the former Miss Viola Goll of Garner and a teacher in the Klemme schools a few years ago.

**FIRST SUB-ZERO WEATHER
HITS NORTH IOWA**

North Iowa is experiencing some real winter weather now. Following a light snow Monday evening, the mercury dipped down to 10 degrees below zero registered at 8:00 a. m. Tuesday morning. It was the first sub-zero weather we have had in Iowa this winter.

The weather has been rather mild thus far with the lowest readings in the twenties.

**BRIDGE PARTY HELD AT
ALBERTSON HOME**

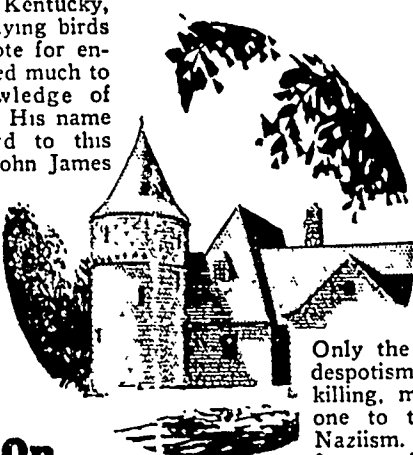

Mrs. Keith Albertson entertained several ladies at her home Friday afternoon at contract bridge. High scores were won by Mrs. H. D. Secres, Mrs. Art Kudje, Ramsay and Mrs. Art Kudje.

Lunch was served by the hostess after the games.

BONDS OVER AMERICA

Early in the 19th century a storekeeper and gristmill operator at Henderson, Kentucky, took to studying birds as an antidote for ennui and added much to man's knowledge of ornithology. His name is a byword to this day. It is John James Audubon.

John Audubon

**Keep On
Backing the Attack
With War Bonds**

Only the knowledge of despotism, destruction, killing, maiming brings one to the surface of Nazism. It has no place for gentle souls; only Himmlers, Schleichers, von Papens, Heydrichs.

Nephew Of Klemme Woman Killed In Action In Pacific

**RICHARD REIBE, USN, NEPHEW
OF MRS. PAUL MUELLER,
DIED IN ACTION NOV. 13**

**Memorial Services To Be Held At
Garner Methodist Church On
Sunday, December 19th**

Mr. and Mrs. Ben Reibe of Garner received word last week Tuesday morning from the Navy Department that their son, Richard, was killed in action in the battle of the Savo Islands, in the South Pacific, Nov. 13, 1942. Richard was the nephew of Mrs. Paul Mueller of Klemme.

Seaman Reibe was stationed on the U. S. S. Atlanta which was disabled and sunk in the Savo Island engagement. Shortly after the battle Seaman Reibe was listed as missing in action.

Richard Reibe was 22 years old, the only son of Mr. and Mrs. Ben Reibe, and enlisted in August 1938, and re-enlisted on Dec. 6, 1941. He held the rank of Seaman Second Class. Before enlisting Richard attended school in Garner and Thornton.

Surviving are his parents and 1 sister, Betty, besides many other relatives.

Memorial Services Sunday
A memorial service will be held at the Methodist Church in Garner on Sunday, December 19th for Seaman Reibe.

**SHAMROCKS WON TWO GAMES
FROM GOODSELL HIGH**

The Klemme Shamrocks won two basketball games at Goodsell last Thursday evening. The Little Shamrocks won over the Goodsell Midges 29 to 12.

Allen Lau paced the Shamrock squad by looping in seven buckets and a charity toss for 15 points, as Lowenberg scored 6 points for the Goodsell boys. At half time the Shamrocks lead was 25 to 4 which they stretched out to 40 to 8 for the final count.

**HOWARD BAACKS ENTER-
TAINED AT PARTY**

Mr. and Mrs. Howard Baack entertained friends to a card party at their home northeast of Klemme on Friday evening, December 10th.

Five Hundred was played at 3 tables with high prizes going to Mrs. Alfred Jurgameyer and Mr. Les Hartbeck; and low prizes were won by Mr. August Josten and Mrs. Les Hartbeck.

A delicious lunch was served by the hostess at a late hour, and the guests declared they had a grand time.

**FINLAND ARRANGES TO PAY
DEBT INSTALLMENT TO U. S.**

Washington. The treasury department said Wednesday Finland had arranged to pay on Dec. 15 an installment of \$233,915 on its debt to this country arising out of the First World War. It owes the United States approximately \$9,000,000.00.

**CHRISTMAS PROGRAM TO BE
GIVEN AT KLEMME SCHOOL
TUESDAY, DECEMBER 21**

**All Of The Grades And Part Of The
High School In Pageant**

A Christmas program and pageant will be presented at Klemme School on Tuesday, December 21 at 8:00 p. m. All of the grades and a part of the high school will participate. Admission is free.

Each grade will present a selection. The 1st and 2nd grades will sing several Christmas songs with the help of a Rhythm Band under the direction of Miss Arlene Bugh. The 3rd and 4th grades will present a reading, "Runaway Jack in the Box," and a song, "How Can Anyone Sleep at Christmas Time," under the direction of Miss Mary Jane Hill. The 5th and 6th grades will present several drills and a song, "Oh Little Town of Bethlehem," under the direction of Mrs. Norma Voetberg. The 7th and 8th grades will present a play, "A Soldier in Bethlehem," directed by Mrs. Clara Smith.

Pageant By Girls' Glee Club

The speech class and the Girls' Glee Club will present a pageant "Oh Come Ye To Bethlehem," as the final number. The theme is of a blind man who regains his sight through the light of the star that shines over Bethlehem. Those in the speech class taking part are: Three Shepherds, Merle Etchen, Carrol Fitch and Raymond Schoenwetter, the Shepherd Boy, Nadine Kimball, the Angels, Corrine Merkel, Eunice Larsen, Julia Bell, Pat Kudje, and Ruth Bell. Two Merchants, Verne Greimann, and Larry Van Syoc, the Blind Man, Elwyn Ridder, Mary La Vehn Schlawn, Three Wise Men, Allen Lau, Ronald Brinkman and Ewald Groshuesch. Extras assisting with the acting parts are Phillip Cook, Ivan Blumer, Eugene Beire and Jim Thomas. Narrators are Clara Koehler, Doris Spiller, Wava Schoenwetter and Mildred Busse. Stage Managers are Mavis Neuhring and Allen Lau. Vocal solos will be sung by Eunice Larsen, Pat Kudje and La Vohn Schlawn.

The pageant is directed by Mrs. H. N. Campbell and Miss Phyllis Sherrill.

**NO DELINQUENT TAX LIST TO
BE PUBLISHED THIS YEAR**

**Because For The First Time In His-
tory Hancock County Has All
Taxes Paid Up To Date**

County Treasurer Roy L. McMillin announces that no delinquent tax sale will be held this year in Hancock County as nearly all of the taxes have been paid.

No delinquent tax list was published this year for what is believed to be the first time in the history of the county. On December 1, 99% of all taxes were paid.

We want your news. Phone 12.

Nearly Fifty K. H. S. Graduates Serving In Armed Forces

**HANCOCK COUNTY INSURANCE
COMPANY HAS MILLION
GAIN IN PAST YEAR**

**T. C. Nelsen, Klemme, Is President
Of Mutual Company**

The Hancock County Mutual Fire and Lightning Insurance Company, with offices at Garner, held its annual meeting last Thursday. E. I. Brecker of Forest City, John Hippon of Kanawha, and A. E. Boman of Forest City were re-elected directors for three years.

Klemme Man Is President

Tom C. Nelsen of Klemme was re-elected president and John Hippon of Kanawha, vice-president. Orville Maben of Garner was re-elected as secretary.

Company Has Nice Gain

Insurance in force gained over one million dollars in 1943 and the company now has over fifteen million dollars of insurance in force.

**METHODIST STUDY CLUB
MET LAST THURSDAY**

"The Mission Defenders" of last year now the "Study Club" of the Methodist W. S. C. S. met with Mrs. Elmer Arnold on Thursday afternoon, December 9.

Mrs. H. E. Harvey was Devotional leader, using the Christmas story. The lesson on "The Church and a Just and Durable Peace" was given by Mrs. Arnold. Christmas solos were sung in three languages, the Swedish, the English and the German by Mrs. Kilgore, Rev. H. E. Harvey and Mrs. C. A. Arnold, respectively.

Nineteen members attended and refreshments were served by the hostess after an enjoyable afternoon.

**WILL DEDICATE HIGH SCHOOL
SERVICE FLAG FRIDAY
EVENING, DEC. 17**

Friday evening the Shamrocks will play the Kanawha Bull Dogs on the home floor in a Seven Eagles Conference tilt. There will be two games and between halves the new Klemme High School Service Flag will be dedicated.

The committee are doing a fine job in collecting the names of Alumni in service, but sometimes it is difficult to find out if the graduate is serving in the armed forces.

The following is a list of graduates in service. Your help in making this list correct will be appreciated. Call Supt. Esbeck if you know of any boys not listed here.

BATS FAIL TO RETURN TO CAVE

View Of The Bat Cave In Maquoketa Caves State Park

Some 2,300 of the 3,000 bats that ordinarily spend the winter months in a quiet hibernation in the bat cave in Maquoketa Caves State Park have failed to make their appearance this winter. In other years the bats arrive about the middle of November, the entire colony entering the cave in a single night. This year only 250 of these interesting mammals made their appearance on November 20, and Conservation Officer Harold Morgan, in charge of the area, has now given up hope for the arrival of the missing members of this interesting group. The State Conservation Commission does not hazard a guess as to whether the missing bats have suffered some calamity or whether they have changed their age-old wintering habit.

In past years the bats entered the cave in herds at night, and no one has ever witnessed their arrival. Immediately upon entering the cave in the fall they congregate in large clusters on the roof near the center of the upper cavern. They do not fly during the winter months; however, their hibernation is only partial. Especially on warmer winter days they chatter furiously when disturbed. Some of the animals hang singly from the roof of the cave, but the majority cling to each other in clusters of from 300 to 500 individuals.

The spring departure in early March is as much a mystery as their sudden appearance in the fall. Generally the flying mammals leave as they arrive in a single night during March. However, in the spring of 1943 during an unusually warm period a large part of the bats left the cavern and the vicinity, after which time a severe cold period set in.

A surprisingly large number of people are afraid of these little animals, and there are many gruesome tales about them which are interesting to say the least. Fairy tales and terrifying motion pictures are partly responsible for the fear which many people have for them. Our native bats can inflict no more harm than an ordinary mouse and will only bite them with their tiny sharp teeth when handled. The food of bats consists almost entirely of insects, which are caught on the wing.

Samoans are proud to fight with our Army and Navy and pleased to spend their pay for War Bonds. This boatswain's Mate at Pago is exchanging currency for United States War Bonds. He has seen enough of war to know that idle money helps no one.

Put your dollars to work for victory. Buy More War Bonds.
U. S. Treasury Department

Airplane Propellers Chiefly Made of Rubber

As the propeller of an ocean liner pushes the water back, and so the ship ahead, so the propeller of an airplane pushes back the air. On the propeller depends much of the performance of the plane. So aeronautical engineers are continually asking: "What's the best way to make a propeller?" There are propellers made of wood, of aluminum alloy or magnesium alloy, and of hollow steel.

But American engineers have now designed and built an entirely new type of propeller. The core is of metal, but only the core. The great part of the new "prop"—designated as the "fairing"—is made of rubber into which bubbles of air have been blown—hard rubber spongecake. Over this hard sponge rubber is a shell of rubber and neoprene, polished and lacquered. In addition to the neoprene chemical rubber which goes into this shell, neoprene cement and a neoprene binder sheet are also used.

These new American propellers are thought to be the best ever made. They're much lighter, although they're able to stand a stress, in flight, of 60 tons. Their polished surface cuts down drag and wind resistance. They hold up under rain and sleet, under cinders, sand and gravel, in temperatures that range from minus 70 degrees Fahrenheit to 140 degrees.

Expert Says Engineering Is Half of Dentistry

Dentistry is 50 per cent engineering, according to Ray C. Brumfield, Cooper Union professor of civil engineering and consultant to a New York manufacturer of dental materials. Dental education, therefore, professor Brumfield holds, should contain a considerable proportion of subjects dealing with mechanical laws.

"Fully one-half of a dentist's work is accomplished through structures in forces," Professor Brumfield points out. "The dentist has the same problems, on a microscopic scale, as the civil engineer. The misuse of structural forces in the mouth can be very detrimental to the tooth structure, causing in some cases complete decay through reabsorption."

For example, a structure placed in the mouth of an individual by one dentist recently was found to be exerting four pounds of pressure on the teeth, instead of the two ounces suggested at by the dentist. There is no way of measuring these forces except through knowledge of fundamental structural laws.

"In addition to forces set in motion by mechanical appliances in the mouth, such as 'braces,' bridges and other structures used in straightening or restoring teeth, the forces resulting from muscular action of the cheek and jaw must be reckoned with."

Kangaroo Rats

Two new subspecies of kangaroo rats have been reported from southwestern San Luis Obispo county and western Santa Barbara county, California, an area not previously known to have any of these mammals.

Kangaroo rats are small burrowing rodents; they eat seeds only, principally weed seeds. In some areas they are known to have an appreciable effect upon soils, the report says. This is due to the fact that their digging loosens and aerates the soil, promotes surface breakup, and helps in the absorption of water.

Previously 38 kinds of kangaroo rats had been identified in California.

Curls From Moisture

When a thin section of wood (about 1/4 to 1/2 inch thick) is moistened with water on one end-grain face, the piece will begin to curl away from the moist side. This is due primarily to the force produced by swelling of the wood fibers on the wet side. If half the length of a strip 12 inches long is treated with a good water-repellent solution which resists the penetration of water, that portion of the wood will remain straight while the untreated half will curl.

List Many Advantages In Using Garden Compost

Compost not only adds the usual fertilizer ingredients to the garden, but also helps the garden soil to hold more water, and makes the soil easier to work. Each fall the dead plant stems, leaves from the lawn, weeds that have not gone to seed, and other waste plant material should go into the compost pile, instead of being burned.

To build the compost, alternate layers of the vegetable matter and of soil or manure are piled and kept wet so that they will rot quickly and thoroughly. Such waste products about the house as coffee grounds, fruit peelings, soot and coal ashes may be added to the compost pile. The pile should be flat on top or slightly hollowed so that rain and snow will soak in. The compost should be worked over several times to mix it well and to speed rotting.

The more manure and fertilizer one adds to the compost pile, the faster it will rot. Superphosphate is a good fertilizer to mix in the compost pile, as most compost materials are low in this element essential to a good fertilizer. Such a compost will provide nitrogen, phosphorus, potash and humus.

Hold Down Fatalities With Portable Laundry

A three-section portable laundry which can turn out more than 1,000 pounds of clean and freshly bedecked linens is helping military doctors at advanced base hospitals to maintain a low fatality rate among hospitalized men.

Navy doctors said the unit is particularly suited to hospital use or for construction by the military or other organizations not having permanent headquarters. A battery of the portable laundry is installed at Camp Perry, Mich., and at other advanced base hospitals. The base hospital at Camp Perry has 94 beds and a 500-bed hospital building.

To keep the laundry unit in good condition, the unit is divided into three units. The first unit is used on a treated surface, the second on a heavy treated surface of steel. Prepared for the possibility of the unit being used in the field, the foundation is protected with a salt preservative which gives protection against decay as well as insects.

Handle Units Carefully

As the first frosts cause the harvest of squash, pumpkins, green tomatoes, and other tender vegetables, the problem of rot becomes uppermost in the gardener's mind. Careful handling of the fruits, even to use of cotton gloves on squash, helps to prevent any breaks in the skin, through which rot organisms can enter.

Each fruit may be dipped in a solution of formalin or chlorox to kill rot organisms on the surface. One part of formaldehyde is used to 240 parts of water, or one part of chlorox to 8 or 10 parts of water. Tomatoes may be wrapped in paper also. Neither tomatoes nor squash should be piled deep in storage, and they should have good ventilation.

Nature's Fortress

One of the large islands of the Solomons group, Choiseul, in the Pacific, has been little mentioned because it is Nature's fortress rather than man's. About 80 miles long and 20 miles wide, it lies among islands repeatedly named in accounts of the fighting. It is 200 miles northwest of Guadalcanal. Narrow straits at its two ends separate it from Bougainville and Santa Isabel. New Georgia parallels it 60 miles to the south in the double island chain of the Solomons.

Even the ebony-black Melanesian natives have found Choiseul difficult to penetrate, and only a few small native villages are hidden along its densely wooded coast. Low mountains that cover the island bear tropical forests and thick vegetation, and leave little room for flat shore land. Three-fourths of the 180-mile perimeter lies behind a forbidding barrier reef that allows few good anchorages close to shore.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

GOD'S GREAT LOVE AND HIS GIFT

LESSON TEXT—Matthew 2:1-12.

GOLDEN TEXT—For God so loved the world, that He gave His only begotten Son, that whosoever believeth in Him should not perish, but have everlasting life.—John 3:16.

Christmas brings us all back to the Christ-child in Bethlehem, and we are reminded anew of our Lord's coming into the world to be the Redeemer. For the babe of Bethlehem is the Christ of the cross, of the resurrection, and the coming King.

"God so loved the world, that He gave His only begotten Son" in what was the world's greatest love gift. But the Word does not stop there. We must do something about God's gift. We read, "That whosoever believeth on Him should not perish, but have everlasting life" (John 3:16).

The story of the coming of the Wise Men to seek the One who had been "born King of the Jews" reveals several attitudes toward Christ which find their counterpart in our day.

I. Expectancy (vv. 1, 2).

These men of another race were familiar with the Jewish Scriptures and knew that the Messiah was to come. Many others, including the religious leaders of the Jews, had the same information. But these men of the East differed in that they looked for His coming with keen desire and expectancy.

One wonders if we have not become so familiar with the story of Christmas that we, like the Jews, have a dead knowledge without expectant faith. We need to awaken and look to God for new grace and strength for these days.

II. Fear (vv. 3, 7, 8, 12).

Herod was a capable, ruthless, ungodly ruler who feared only that someone would take his power from him. He was so determined that this should not happen, that he killed many members of his own family for whom he otherwise had apparent affection.

When he heard that Jesus, who was the real King of the Jews, had been born, he feared, and laid crafty plans to destroy Him. God saw to it that his purpose was not carried out.

There are those of our time who fear the coming of Jesus, because they will not have Him to rule over their lives. They love their selfish ways, and their sinful pleasures; and when they face the question of what they will do with Jesus (and face it they must!), they have only fear and hatred in their hearts.

III. Indifference (vv. 4-6).

When the Wise Men came to Jerusalem to inquire where the Christ was to be born, they received an immediate answer—in Bethlehem. That was clearly foretold in Micah 5:2. The priests and scribes knew all about it, but their knowledge did not move them to action. They told the Magi where to go, but they did not go themselves.

How sad it is to see the indifference of our day to the claims of Christ. There are many who think that simply because they do not hate the church, or the Bible, or do not fight against it, they are guiltless. How wrong they are will appear to them if they will read Matthew 11:23, 24 and recall that the sin of Capernaum was only indifference.

Wake up, careless one, and change your indifference to love and faith, lest you too be eternally lost.

IV. Joy (vv. 9, 10).

These earnest seekers for the Christ-child were full of joy even before they saw Him. "When they saw the star," and knew that God was indeed leading them, their hearts leaped within them as "they rejoiced with exceeding great joy."

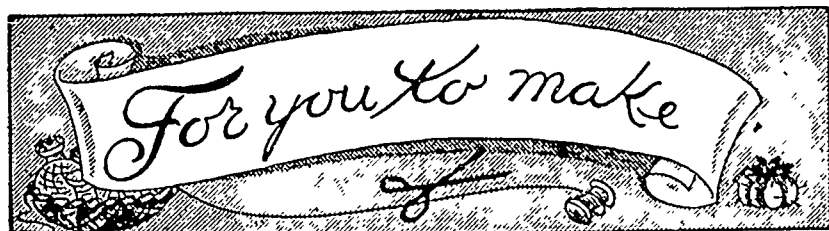

Christmas is the time when there should be real joy in our hearts. It is not enough to be "merry" or "happy." In fact, many thousands could not possibly find anything to be happy about this year.

Happiness depends on what happens, but joy is the gift of God to His children, which is so deep down in their beings that circumstances cannot change it. We may have real, satisfying Christmas joy.

V. Worship (v. 11).

When they saw Christ, they worshiped. Have we been as wise as they were? Then they made gifts, showing that their worship had that reality which made them ready to sacrifice for Him. Have we done anything this Christmas to show our joy and gratitude for the redemption we have in Christ?

The writer of these lines (which will reach you just before Christmas) wants to wish you and yours a very blessed Christmas, and to assure you that he is praying for you that regardless of circumstances the joy of the Lord may fill your soul. Christ has come. He is with us now by faith. He will come again to reign. The Child of Bethlehem's manger is our Great Saviour and Glorious King. Rejoice in Him!

5608

Shoulder Cape.

CROCHET it now and have it ready to wear when the wintry days make their appearance—make one for a gift to a friend who appreciates a "bit of warmth" about the shoulders! The delightfully pretty, soft pink cape is 17 inches in depth, requires only 4 1-ounce balls of yarn and is very easily crocheted.

To obtain complete crocheting instructions for the Shoulder Cape (Pattern No. 5608) send 16 cents in coin, your name and address and the pattern number.

Wasp's Nest

Wasps build a nest by tearing off small pieces of dry wood, chewing them into a pulpy paste, and spreading them out to dry.

ONE OF HISTORY'S GREAT LETTERS—TO A CHILD ABOUT CHRISTMAS

Few newspaper editorials live
longer than a day or two. All the
more notable therefore is the work
of Francis Pharcellus Church, staff
member of the New York Sun, in
whose columns appeared, on Septem-
ber 21, 1897, a piece about the
patron saint of department stores
that is now nearly, a half-century
old but still going strong.

Is there a Santa Claus?

Dear Editor—I am 8 years old.
Some of my little friends say
there is no Santa Claus.

Papa says "If you see it in
the Sun it's so."

Please tell me the truth, is
there a Santa Claus?

Virginia O'Hanlon,
115 West Ninety-fifth St

Virginia, your little friends are
wrong. They have been affected by
the skepticism of a skeptical age.
They do not believe except they see.
They think that nothing can be
which is not comprehensible by
their little minds. All minds, Vir-
ginia, whether they be men's or
children's, are little. In this great
universe of ours man is a mere
insect, an ant, in his intellect, as
compared with the boundless world
about him, as measured by the in-
telligence capable of grasping the
whole of truth and knowledge.

Yes Virginia, there is a Santa
Claus. He exists as certainly as love
and generosity and devotion exist,
and you know that they abound
and give to your life its highest
beauty and joy. Alas! how dreary
would be the world if there were
no Santa Claus! It would be as
dreary as if there were no Virginia.
There would be no childlike faith
then, no poetry, no romance to
make tolerable this existence. We
should have no enjoyment, except
in sense and sight. The ternal
light with which childhood fills
the world would be extinguished.

Not believe in Santa Claus! You
might as well not believe in fairies!
You might get your papa to hire

men to watch in all the chimneys
on Christmas Eve to catch Santa
Claus, but even if they did not see
Santa Claus coming down, what
would that prove? Nobody sees
Santa Claus. The most real things
in the world are those that neither
children nor men can see. Did you
ever see fairies dancing on the
lawn? Of course not, but that's no
proof that they are not there. No-
body can conceive or imagine all
the wonders there are unseen and
unseeable in the world.

No Santa Claus! Thank God! he
lives, and he lives forever. A thou-
sand years from now, Virginia, nay,
ten times ten thousand years from
now, he will continue to make glad
the heart of childhood.

Hancock County Board Proceedings

THE 2ND ADJOURNED NOVEMBER MEETING

Garner, Iowa, Dec. 2, 1943
The Hancock County, Iowa, Board of
Supervisors met in session on above date
with F. J. Schoun, Penn Eckels and John
Chambers, present.

The minutes of the last meeting were
read and approved as read.

On motion and second certificate contin-
ing in force policy No. BB-14772 is ap-
proved.

On motion and second policies No. 12969
and 12970 are approved.

WHEREAS, Thomas O'Rourke, was as-
sessed on cattle in the sum of \$312.00 in both
Britt and Erin Township, and
WHEREAS, this is a double assessment
and a tax of \$15.40 was erroneously as-
sessed against Thomas O'Rourke in Britt Town-
ship.

BE AND IT IS THEREFORE RESOLVED
by the Board of Supervisors of Hancock
County, Iowa, that the personal tax in the
sum of \$15.40 assessed in Britt Township
which is the result of a double assessment
be and the same is hereby ordered remitted
and the County Treasurer be and he is
hereby directed to correct his records ac-
cordingly.

The foregoing resolution was offered and
read by Supervisor Eckels who moved its
adoption, was seconded by Supervisor
Chambers, whereupon the chairman placed
the motion of its adoption and upon roll call
the vote thereon is F. J. Schoun, Penn
Eckels and John Chambers, Aye. Nays
None.

In the matter of a delinquent personal tax
assessed against Andrew Chodur, in Crystal
Consolidated taxing district, it appearing
that Andrew Chodur has offered the sum of
\$112.68 in full payment of said personal
delinquent tax and it is deemed for the best
interests of the Taxpayers of Hancock Coun-
ty, Iowa, that said compromise settlement
be accepted.

BE AND IT IS THEREFORE RESOLVED
by the Board of Supervisors of Hancock
County, Iowa, that the delinquent personal
tax assessed against Andrew Chodur in
Crystal Consolidated School District be and
the same is hereby compromised and the
County Treasurer be and he is hereby au-
thorized to accept \$112.68 in full settlement
of said tax. All as by law provided.

The foregoing resolution was offered and
read by Supervisor Penn Eckels who moved
its adoption was seconded by Supervisor
Chambers whereupon the chairman placed
the motion of its adoption and upon roll call
the vote thereon is F. J. Schoun, John
Chambers and F. J. Schoun Aye. Nays
None.

On motion and second the annual report
of Ray Hunsley, County Weed Commission-
er, for the year 1943 is approved.

BE IT RESOLVED that the claims here-
inafter set out be allowed in amounts desig-
nated thereon and the County Auditor be
and he is hereby directed to draw warrants
on the several funds of Hancock County,
Iowa, in payment of such claims in sums
set opposite each claim.

County Fund	Amount
Edith Elling, Welfare Bd. meeting	18.00

On motion and second the Board adjourn- ed to December 6, 1943 at 9 o'clock A. M.	

ATTEST: FRED C. MISSAL, County Auditor

3RD ADJOURNED NOVEMBER MEETING

Garner, Iowa, Dec. 6, 1943
The Hancock County, Iowa, Board of
Supervisors met in session on above date
with F. J. Schoun, Penn Eckels and John
Chambers, present.

The minutes of the last meeting were read
and approved as read.

On motion and second a notice of warn-
ing to depart is hereby ordered served on
Ella Weaver.

In the matter of the account of Hancock
county, Iowa, against Warren Fox for hos-
pitalization of Warren Fox at the State
Hospital at Cherokee.

BE AND IT IS HEREBY RESOLVED by
the Board of Supervisors of Hancock Coun-
ty, Iowa, that the sum of \$500.00 is her-
eby accepted in full settlement of said ac-
count to December 1, 1943 and the Auditor
be and he is hereby directed to correct his
records accordingly.

The foregoing resolution was offered and
read by Supervisor Eckels who moved its
adoption was seconded by Supervisor Cham-
bers, whereupon the Chairman placed the
motion of its adoption and the vote thereon
is F. J. Schoun, Penn Eckels and John
Chambers, Aye. Nays none.

This being the 6th day of December, 1943,
a date heretofore set for a letting on the
contract for said letting having arrived, the
proof of publication being on file and the
board being fully advised, same was held
and the chairman of the Board of
Supervisors proceeded to open all bids
on file and after duly considering all bids
in file the bid of the Lowe Construction
Co. of Cedar Rapids, Iowa, in the sum of
\$9.95 cents per cubic yard is the lowest and
best bid thereon.

BE AND IT IS THEREFORE RESOLVED
by the Board of Supervisors of Hancock
County Iowa, acting for and in behalf of
Drainage District No. 14 and lateral No. 1
hereof, that the bid of the Lowe Construc-
tion Company of Cedar Rapids, Iowa is the
lowest and best bid for the cleanup of the
main open ditch and the open ditch of lat-
eral No. 1 all in Drainage District No. 14,
Hancock County Iowa and is hereby ac-
cepted as such. All other bids are hereby
rejected.

BE IT FURTHER RESOLVED that a
contract for said cleanup be and is hereby
awarded to the Lowe Construction Com-
pany of Cedar Rapids, Iowa, and Chairman
F. J. Schoun is hereby authorized to exe-
cute said contract in behalf of Hancock
County, Iowa, all in accordance with the
training laws of Iowa.

BE IT FURTHER RESOLVED, That Wm.
Henschen be and he is hereby appointed
Engineer to supervise the project on his
bond as such project Engineer is hereby
fixed at \$500.00.

The foregoing resolution was offered and
read by Supervisor John Chambers who
moved its adoption was seconded by Super-
visor Penn Eckels whereupon the Chair-
man placed the motion of its adoption and
upon roll call the vote thereon is F. J. Schoun,
Penn Eckels and John Chambers, Aye. Nays
none. Whereupon the chairman declared the
resolution duly adopted.

On motion and second the Board adjourn-
ed to December 20, 1943, at 9 o'clock A. M.

ATTEST: FRED C. MISSAL, Chairman
County Auditor

CHRISTMAS SEAL LETTERS NOT ALL SENT BACK

Mrs. Martha Bredbenner reports
that of 110 letters mailed out con-
taining Xmas Seals, only 58 have
been returned, and of that number
48 contained money, totaling \$35.45.
She asks that those who are still
holding the letter to return them
either with the money or stamps.
They can be placed in the box at
Lau's implement store.

HERE'S SOME THINGS TO DO TO KEEP EGGS CLEAN

Clean eggs invariably outsell
those that are soiled, and at present
the difference amounts to about 10
cents per dozen. The difference is
enough that it should pay any flock
owner to follow management prac-
tices that will produce more clean
eggs, says Ralph Baker, Iowa State
College extension poultry econo-
mist.

Baker suggests plenty of nests as
essential. One to each 5 or 6 hens
is sufficient. If there are too few
nests, two or three hens may try to
enter at the same time, resulting in
egg breakage and fouling all eggs
laid in that nest then and for some
time to come. Plenty of straw, ex-
celsior, wood shavings, oat hulls, or
timothy should be kept in each nest
at all times.

Frequent gathering of eggs also
helps. The Missouri Agricultural
Experiment Station found that if
eggs were gathered four times
daily, rather than once, the number
of dirty eggs was reduced one-half
three gatherings—at 11 a.m., 1 p.m.,
and 5 p.m., should result in many
more clean eggs for the farm flock
owner.

Keeping the hens' feet clean by
confining them to the house during
the wintertime, keeping them out

of the droppings, and
litter dry are helpful.
Dry litter is largely a
proper ventilation and
The built-up litter sys-
calls for a 4 or 5-inch
ground corn cobs or oth-
material in the house
tion of a small amount
ter every three or four
only reduces the number
eggs but saves labor in
ing. A dropping pit or
boards and wire under
will help keep the hens'
Darkening the nests
less competition for a
nest and less breakage.
Permitting the hens to
the back of nests helps.
result is accomplished by
strips of burlap or oth-
cover the front of contain-

A meat sparing lunch
can be built around eggs
bacon rings. After pan-
partly cooked, one slice
per person is placed in
in muffin tins. Eggs are
en into the rings and the
in a slow oven 10 to 15
until the eggs are set.

Cannibalism occurs
quently in laying flocks
liquid milk is fed

PROTECT RUBBERS, GALOSHES FROM HEAT AND GREASE

Light heat and grease are the three bug-a-boos when it comes to prolonging the life of rubber footwear

Miss Elizabeth Peterson extension clothing specialist at Iowa State College, explains that rubbers and overshoes should be kept in a dry dark cool place when they're not in use And when they are being worn, they should be kept away from heat and grease

Oil, grease and tar make rubber swell and get weak They should be removed at once with soap and water and then wiped quickly with dry cleaning fluid The fluid should not be left in contact with the rubber more than a minute or two, as it also weakens rubber

Sunlight combines the two enemies light and heat, which weaken and crack rubber, making it sticky

Summer rubbers not in use now should be washed with water and soap dried, stuffed with crumpled paper and stored in a cool, dark place

Save your kitchen fat and oils

Our Men In The Service

MERRY CHRISTMAS TO ALL FROM NORTH AFRICA

The Times received a Christmas card Saturday from Capt A H Dulmes, stationed somewhere in the North Africa area Here's the message

"42 of them I have seen,
The next one is drawing near.
We have a little job to do,
So I won't be home this year
Brighten your hearts with cheer
I won't be home in '43,
But will the following year"
"Doc" says to pass it along, so there's his Christmas greeting to the folks in this community

KLEMME SOLDIERS MEET IN THE PACIFIC AREA

Mr and Mrs George Buseman received an air-mail letter Monday from their son Wayne, stating that he had met Raymond Keeper and that the boys got together after a telephone conversation

Duane Johnson and Wayne Buseman are still together, and have been together ever since they enlisted three years ago

The Klemme boys are presumed to have met somewhere in Hawaii Raymond Keeper stated that he expected to get home soon

KLEMME SAILOR WRITES TIMES EDITOR

December 4, 1943

Dear Jergie,
I have a little extra time so I thought I would drop you a few lines There isn't much to tell here, but I'll do my best I am still up here at Farragut Stuck for the duration, I guess I was supposed to leave last Monday on an Aviator Ordnance draft, but I was omitted because I was an alternate That's just like being drafted into the army If your an alternate, you can go if someone is sick or missing Well anyway I didn't get to go and was I mad I think I will go out about Friday of next week so it won't be so bad

I got three of your Klemme Times papers yesterday I hope they still keep following me, because its sure good to get some home town news once in a while

The draft I was supposed to go on went to Oklahoma so maybe I will get to go to Chicago or The Great Lakes It doesn't make any difference where I go, but just so I leave Farragut There isn't much to tell here and its very tiresome

We haven't had any snow here yet, but its been very wet We had a terrible wind storm the other night, so the weather isn't so bad except its' very wet

Well, I guess I better knock this off as I can't think of much else to say.

Sincerely yours,
A Sailor

MRS. ALBERTSON ENTERTAINED AT BRIDGE

Mrs Keith Albertson entertained a number of ladies at an auction bridge party at her home last Tuesday afternoon High scores were won by Mrs Lloyd Lau and Mrs Martin Barz, and low score by Mrs Wally Krietlow of Garner Mrs Albertson served lunch after the games.

FARMERS CAN SELL MEAT BUT MUST COLLECT POINTS

While there has never been a restriction on the farm slaughter of hogs, there has been a limit placed on the amount of pork and lard that can be delivered by a farmer to persons living off the farm.

The War Food Administration has removed these limitations for the 90 day period from Nov 17, 1943, to Feb 17, 1944, according to marketing specialists at Iowa State College

Farmers must still collect ration points for meat sold off the farm, however.

COPPER AVAILABLE FOR FARM WIRING

Extension of existing rural electric lines to increase wartime food production is possible for farmers who meet certain minimum requirements. This fact is not as widely known among Iowa farm people as are the advantages of electrical power, believes Harold Beatty, Iowa State College Extension agricultural engineer

There's scarcely a farmer, he says, who cannot see one or more ways in which electricity could help him increase his output of meat, milk or fiber, or could help meet farm labor shortages

Beatty quotes these regulations as listed by C J Bradley, REA member of the Iowa USDA War Board

Here Are Regulations

1 A farmer may obtain electrical service if he has five animal units on his farm

2. Extension of the existing electric line is at the rate of 100 feet per animal unit, with the distance measured from the power line to the proposed location for the meter

3 The farmer must own, or be able to purchase with or without priority assistance, one or more of the following Water pump for livestock, chick or pig breeder, feed grinder, milking machine, milk cooler, milk sterilizer, or incubator

4 When these conditions can be met, the farmer should go to his county War Board for certification both of animal units and for electric service and to get a copper certificate This copper certificate entitles him to 35 to 75 pounds of copper, depending on the number of animal units owned or produced

This copper is used for wiring the farm premises with the exception of the dwelling There are other means whereby farmers may obtain wire for their dwellings and other supplemental needs, under War Production Board regulations

BLANKETS MORE PRACTICAL THAN COMFORTERS FOR HOME USE

Blankets are more serviceable and practical than the more luxurious comforters Blankets can take laundering, while comforters require drycleaning And the sturdier fabrics of blankets will take more abuse than the finer comforter coverings

If the luxury of a comforter is desired, Miss Nora Workman, home furnishings specialist at Iowa State College, recommends one covered with a closely woven cotton sateen or similar fabric Silk, rayon, taffeta or satin coverings soon become shabby A wool-filled comforter is warmer and lighter than a cotton-filled covering The opened comforter should be evenly filled and have no "thin spots"

Strawberries should be mulched as soon as the ground freezes hard and before the temperature drops below 15 degrees.

WEEKLY NEWS ANALYSIS

Meeting of Allied Military Strategists Foreshadows Smashing Anti-Axis Blows; Nazi's 'Winter Line' in Italy Cracked; Fierce Fighting Continues in Pacific

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Wash Day—On a tropical Pacific island, marines pay natives \$2.50 per month for laundering their clothes.

FOUR POWERS: Map New World

Meeting in the Near East, the "Big Four" of the Allied powers plotted the destruction of the Axis, with the provision that all territory overrun by the enemy must be returned to the subject people.

For Germany and her small allies, President Roosevelt, Premier Stalin and Prime Minister Churchill drew up an ultimatum demanding unconditional surrender or else vowing the enemy's destructive defeat. Administration of reoccupied territory along the pattern of joint cooperation employed in Italy also was formulated in accordance with principles of the Moscow conference.

Conferring with Chiang Kai-shek in the shadow of Egypt's pyramids, President Roosevelt and Prime Minister Churchill agreed upon unconditional surrender for Japan, with restoration of Manchuria, Formosa and parts of China proper to Kai-shek's government, and return of all other territory occupied since Pearl Harbor.

ITALY:

Crack 'Winter Line'

Striking at both ends of the Nazis' winter line in southern Italy, the Allies made deep penetrations in their drive to Rome. To avoid giving up any billeting or other facilities, the Germans dynamited towns in the Allies' path.

The smash against the Nazis' defenses began with the Eighth army's assault on the enemy's hilly posts overlooking the Sangro river.

Aided by swarms of Allied fighter-bombers and massed artillery which laid down a carpet of fire on the Germans' ground, U. S. and British troops pushed forward for gains which were measured in miles.

To offset the Allies' charge, it was reported that Nazi Rommel rushed reinforcements to the battle zone.

SOUTHWEST PACIFIC:

Aussies Gain

Moving to cut off supply sources feeding embattled Japanese troops to the south, U. S. Liberator bombers flew in force to the enemy's big base of Wewak to dump tons of explosives.

To the south, Australian troops slowly picked their way through jungle up the northeastern coast of New Guinea, isolating strong Jap outposts on inland paths. Disruption of communications would cripple enemy resistance at these points while the Allied forces worked toward main points.

On Bougainville, U. S. troops were held to short gains by stubborn Japs, entrenched in strong fortifications behind jungle foliage. U. S. advances resulted from careful squirming through the dense brush.

Bloody Action

The single bloodiest action of U. S. forces in the war thus far was the capture of the Gilberts, where the Yanks suffered 3,722 casualties.

Fiercest fighting was on Tarawa, where 1,026 marines and doughboys were killed and 2,577 wounded, charging the Japs' steel and palm-logged fortifications. Losses at the other little islets totaled 66 dead and 123 wounded.

Gilberts' casualties compared with 3,767 suffered on Guadalcanal, and the 3,497 during the struggle for the Salerno beachhead. Jap losses in the Gilberts were estimated at 5,700.

WAR MATERIAL: On Sale

As the army and navy put surplus material on sale, Secretary of Commerce Jesse Jones told a congressional committee that the government's Defense Plants corporation favored disposing of its multi-billion dollar factory facilities after the war to private industry without helping companies build monopolies.

Declaring it was selling surplus materials to aid the home front's war effort, the army asked bids on mechanics' precision tools, airplane parts, lubricants, refueling funnels, etc., while the navy was selling mattresses, bedsprings, pillows, paint, etc.

Jones said the government should be careful in selling these holdings to large companies which could monopolize these fields through additional acquisitions.

Ask Better Distribution

To help meet consumers' needs, the War Production board authorized manufacture of 64,000 three-burner electric stoves in 1944, and also called conferences to plan better distribution of available goods.

Few of the 24 electric range manufacturers will turn out 64,000 stoves, only 10 per cent of the normal production. Civilians will share the output with the army, navy and hospitals.

To provide a greater flow of goods into congested war production centers and open new sources of supply to retailers whose previous wholesale channels have been cut off by the war, the WPB is expected to formulate a policy depending upon the voluntary compliance of distributors.

RUSSIA:

Fight for Ukraine

Having stopped the Russian tide, German troops struggled to roll it back again in the prized Ukraine, long the apple of Hitler's eye in the east.

Its top soil rich for farming, the bowels of its earth full of essential minerals and ore, the Nazis followed their early capture of the Ukraine by vast resettlement projects. Squeezed out of the eastern portions of the province, they tried to cling to the western.

Having pulled 300,000 troops out of the Gomel bulge, the Nazis also slowed the Reds' drive in the north. All along the 1,200 mile front, inclement weather made mush of the terrain, complicating transportation problems already made difficult by the two sides' disruption of rail facilities.

LABOR:

Want Wage Boosts

Spearheading a drive to smash the government's "Little Steel" formula limiting wage increases to 15 per cent over January, 1941, levels, the CIO's United Steel Workers announced they will ask 485 companies to reopen negotiations for new contracts.

Meanwhile, the senate was to act on a resolution granting 1,100,000 non-operating railroad workers a flat 8 cents an hour wage increase, after the Office of Economic Stabilization refused to allow the raise, proposing boosts ranging from 10 cents per hour for the lowest paid to 4 cents for the highest.

The Steel Workers said they would ask the companies which possess 85 per cent of the industry's capacity, for a general pay increase of 17 cents an hour over the present hiring rate of 78 cents, and a guaranteed weekly wage.

CHILD DELINQUENCY:

Blame Parents

Famed founder of "Boys Town," Father E. J. Flanagan told a special senate committee investigating the present tide of juvenile delinquency that the mother should remain in the kitchen where she belongs.

"The present war is being fought primarily for future generations, and it would be a hollow victory if we were to sacrifice our children in . . . winning it," Father Flanagan said.

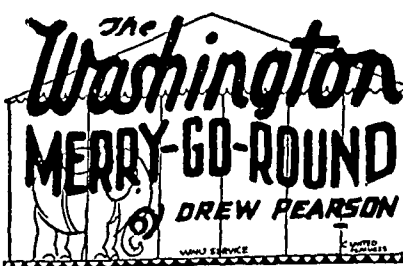

From the Judge Baker Guidance center, Dr. William Healey of Boston, Mass., declared parental duty required correction of "natural tendencies of a boy to display he-man qualities . . . and of a girl to . . . give herself to a serviceman."

Flanagan said, "A mother renders more invaluable service to her country right in the home than the most skilled riveter or machinist could ever contribute."

From the Judge Baker Guidance center, Dr. William Healey of Boston, Mass., declared parental duty required correction of "natural tendencies of a boy to display he-man qualities . . . and of a girl to . . . give herself to a serviceman."

Washington, D. C.

SUPPLY OF U. S. PLANES
WASHINGTON.—Army Air Chief General "Hap" Arnold was called before a closed-door meeting of the senate Truman committee the other day to explain, among other things, why more planes weren't reaching the fighting fronts.

Arnold, while being cross-examined by the committee's number one aviation expert, Sen. Mon Wallgren of Washington, admitted one significant fact:

That the number of planes of all descriptions on our Pacific and European fighting fronts is lower than most people realize and lower than he desires, despite the fact that we are producing combat planes—bombers and fighters—at the rate of 8,000 a month.

For a while, the cross-examination of Arnold made the sparks fly. "I'm amazed to learn that the British have more combat planes in action than we have," grilled Senator Wallgren, "though we are producing more planes than the British. Why is that?"

"We're doing the best we can," retorted Arnold angrily. "You can't expect us to send planes to combat areas unless we have trained crews to operate them. However, I can tell you that we have many more planes on the way, and ready for shipment, that will soon give us a great numerical advantage."

"That's fine," said Wallgren, "but why has it taken so long? It seems to me that we should have more than the number of planes you mention on the battle fronts when we are producing at the rate of 96,000 a year."

Arnold replied that some planes had been cracked up or damaged in training accidents in the United States, though trainer crashes were being reduced considerably. Also, many planes coming off assembly lines have to undergo "modification." For instance, planes slated for Alaskan duty have to be "winterized." Also, it takes longer than most people realize to deliver planes to combat areas.

"I'm not trying to interfere in your business, general," said the Washington senator, "but it seems to me that a pitifully small number of planes have been delivered to the fronts, considering our rate of production."

"I don't agree with you," responded Arnold hotly. "I think we've done very well under the circumstances."

The air chief went on to explain that most American pilots have a training course of 500 flying hours, compared to 150 hours for German pilots. One reason the Nazis have shortened their pilot-training courses is because they are running low on aviation gas reserves, Arnold said.

However, he did not entirely convince the committee that the ratio of planes delivered to the fighting fronts could not be considerably increased.

SYNTHETIC TIRES

Early next year, the American public will get its first real test of synthetic tires. These will not be passenger, but bus and truck tires, which will begin to come out of tire factories some time in January.

They will be hurried to the wheels of buses and trucks, now limping along on sharply reduced rations. Even in September, the allocation of 550,000 civilian bus and truck tires was inadequate. But now the figure has been reduced still further to 335,000 for November and December.

Operators of trucks and buses are worried about the new tires, knowing that early tests have shown they do not stand up under heavy loads. This in spite of the fact that they are only 70 per cent synthetic, with an admixture of 30 per cent natural rubber.

Result will be that truck and bus loads will have to be reduced all over the country. Since they are already operating above normal capacity, reduction of loads will mean reduction in the total performance of trucks and buses.

Of course, the synthetics may prove to be better than tests have shown, but the trucking industry has its fingers crossed.

BLOOD DONORS

Red Cross officials estimate that Americans are giving their blood for transfusions at the rate of one every two seconds. "We are bleeding 100,000 people a week."

But donations might be much larger if donors could be reached all over the country. Actually, there are only 33 cities where centers have been established.

MERRY-GO-ROUND

One of the prized show-pieces in a private collection of old guns and other knick-knacks belonging to Rep. Frank Boykin of Alabama are the spurs Jesse James was wearing when he died.

One out of every ten members of congress has been a newspaper man in the past. Working newspaper every day hear from some paper man myself. This has earned the gag line. "Until you found there was no money in old newspapers."

AROUND THE HOUSE

To sprinkle clothes for ironing, try using a clean whisk broom or a bottle with a perforated top.

If your curtains look droopy a quick dip in eucalypt dye will remedy the situation.

Hem a 27-inch square of material and sew a small bone ring to each corner. Take the four rings together and you have a bag that will hold many pairs of socks or stockings. The bag may be hung conveniently on a hook in a closet.

Keep rubber goods away from the heat as heat has a tendency to crack and break down rubber.

Dried fruits taste better if a lemon juice is added to them when they are cooked.

FALSE TEETH HELD FIRMLY BY

Comfort Cushion

NOW WEAR YOUR PLATES EVERY DAY—
HELD COMFORTABLY SHUG THIS WAY

It's so easy to wear your plates regularly—all day—when held firmly in place by this "comfort-cushion"—a dentist's formula.

1. Dr. Wernet's plate powder forms soothing "comfort-cushion" between plate and gums—let's you enjoy solid foods, avoid embarrassment of loose plates. Helps prevent sore gums.

2. World's largest selling plate powder. Recommended by dentists for over 30 years.

3. Dr. Wernet's powder is economical; a very small amount lasts longer.

4. Made of whitest, costliest ingredients—so pure you eat it in ice cream. Dr. Wernet's plate powder is pleasant tasting.

All druggists—30¢. Money back if not delighted.

Dr. Wernet's Powder
RECOMMENDED BY MORE DENTISTS THAN ANY OTHER

NEEDED CARS NEED WEED CHAINS

● Weed Tire Chains are equipment for jeeps, half-tracks, trucks and other military vehicles.

● Repair old tire chains now or get new Weeds before you get stuck in snow or mud, or skid into a smash-up.

Uncle Sam would have used TIRE CHAINS

Whenever Uncle Sam's military vehicles run into snow, ice, mud or sand, tire chains are put on to get them through safely and on time. The government also recognizes the importance of tire chains for farm cars and trucks under WPB Order L-201. But military needs are so great, we urge you to repair usable old chains so long as they are safe. If you must have new ones, buy WEED CHAINS. For the best buy ask for WEED AMERICAN BAR-REINFORCED—longer mileage, better traction, greater safety, thanks to the bridge of steel on each contact line.

HIGHLIGHTS . . . in the week's news

FAIR: State and county will be held this coming year in many places that have had none since the war began. Delegates to the annual convention in Chicago of the Association of District and County Fairs, coming from 22 states, resolved to reopen the big shows. It was said that fairs held this year drew larger crowds and made more money than for a long time.

FOOTBALL: Attendance at college football games declined 18.4 per cent from 1942, a survey of 57 large colleges and universities disclosed. The drop was biggest in the South, with 28.4 per cent, and smallest in the East, at 6.4 per cent. A similar downturn was shown when 1942 figures were compared with 1941, the decline between the two years being 19 per cent.

PATTERNS

Have a Two-Piecer!

Have a two-piecer in your wardrobe—the top may be wool, the skirt a solid color—it may all match. Here's a gay spirit which is good for play.

A Bell Pattern No. 1877 is for sizes 10, 12, 14, 16, 18 and 20. Length bust measurements 28, 30, 32 and 34. Size 12 (30), with 3/4 requires 4 1/2 yards 39-inch material.

An unusually large demand and war conditions, slightly more time in filling orders for a few of our popular pattern numbers.

Great Tasting Food & Drug

Sulfa Drugs, Blood Plasma, New Techniques Have Doubled Soldiers' Chances of Survival

Only 3% of Wounded Die Now, as Against 7% in World War I

A man wounded in action now has a much better chance of recovering than ever before, thanks to the advances of medical science, says Maj. Gen. Norman Kirk, surgeon general of the U. S. army. Chief reasons for the improvements are the use of blood plasma to overcome shock and hemorrhage, sulfa drugs to hold down infections, and the greater mobility and superior organization of medical units.

So far in this war, 3.16 per cent of those who were brought in wound-

Army Nurse Lieut. Dorothy Holstein neatly bandages Seaman Douglas Strater's head. He was wounded by a fragment of a 37 mm. shell fired from a Nazi plane, while he was serving on a sub-chaser in the harbor of Palermo, Sicily. Dangling on his bare chest is the Purple Heart, awarded for his part in this action. (Army photo)

ed have died, as compared with 7.35 per cent in the last war, or less than half. While these figures are not entirely comparable, since more men are killed outright by the more lethal modern weapons, nevertheless, a very substantial improvement has been made. The life-saving branches of the services have more than kept up with the deadliness of the latest bombs and shells.

For instance, in one of the Egyptian campaigns, head wounds resulted in a mortality rate of only 9 per cent. In World War I, from 50 to 60 per cent died. Head wounds are injuries to the scalp, skull or brain. Losses of extremities will be much smaller than last time, it is predicted, on experience to date, largely because infections can be better controlled now.

Control of infection by use of the highly publicized sulfonamides and the mysterious and rare penicillin is popularly misunderstood, army doctors warn. The sulfa drugs hold the infection in check until the natural defenses of the body are able to kill the bacteria. Penicillin prevents the growth of new bacteria. It has been found gratifyingly successful in treatment of osteomyelitis and other stubborn types of infections that will not yield to sulfonamides. While these "miracle drugs" do not mean the end of infected wounds, surgeons say that this most serious danger is being conquered.

Wounded Get Speedy Aid.

Speedy treatment is probably the most important point in saving lives, after the new techniques. It is estimated that 80 to 90 per cent of wounded men receive first aid within an hour after being hurt. Every soldier carries a little kit with him, containing sulfa tablets and dressings. If he is hurt badly, and unable to apply these himself, a comrade will do it. Then, as soon as possible, stretcher-bearers come for him, and carry him to a first aid tent, the battalion aid station, only a few hundred yards behind the firing line.

Here a doctor examines the wound and checks the treatment administered by the medical aid soldier. The doctor treats the shock with injections of blood plasma, and gives morphine to ease the pain. He puts on necessary splints or dressings.

As soon as the man's condition permits he is moved by ambulance, jeep, or litter to a collecting station, which is also a mobile unit, placed as close to the front as is at all safe. Here the patient is classified as to type of injury: head,

chest, leg, etc. A complete record is made of the injury and treatment received so far.

Next the injured soldier goes to the clearing station, where a mobile surgical unit is on hand to take care of desperate cases. By the time the clearing station has been reached, men with minor wounds are ready to return to service. Men with serious wounds are sent on to evacuation hospitals, hundreds of miles away. Airplanes are frequently used to move casualty cases swiftly. After treatment at the evacuation hospital, a man may be returned to service, or sent back to the States for prolonged treatment. If he is unfit for any service, he is given a medical discharge.

Navy Much the Same.

Naval medical care is similar to the army's. Small ships, such as submarines and destroyers, have little more than first aid equipment, while battleships have a complete hospital aboard, known as the "sick bay." This includes a ward room of 36 to 180 beds, a surgical dressing room, an operating room, dispensary, laboratory, and doctors' and dentists' offices. Wounded seamen from smaller ships are moved to these sick bays.

First aid supplies are located in many parts of every ship, so that destruction of one section will not deprive men in other parts of aid.

The marine field hospital system resembles the army's, with certain differences necessitated by the special problems of that dashing corps. Base hospitals are much like those of the army, being large and completely modern.

Treatment of mental cases has received much attention in this war. First, every effort is made at induction stations to reject men who would be likely to break down under stress of war dangers and hardships. Despite this caution, many men crack under the strain. In various overseas hospitals, admissions for mental ills amount to 20 to 25 per cent of all cases. Soldiers who suffer neuropsychiatric collapses are sent to evacuation hospitals, where they are treated by sedatives, prolonged rest, food, and certain techniques that allow them to release their pent-up emotions. They are encouraged to talk about their frightful experiences. From 50 to 70

Pharmacist's mates on board a U. S. destroyer in the Mediterranean inject blood plasma into the arm of a captured enemy. He was a crewman on a submarine sunk by the destroyer.

per cent will recover in from two to five days. Most of the others are eventually sent home. The navy has had similar experience, and employs about the same procedure.

Reconditioning.

The army medical department is developing a program to put the wounded soldier in the best possible condition upon his dismissal from the hospital. This is called reconditioning. One phase is designed to reorient the handicapped man—the blind, deaf, and crippled. Blind men are taught Braille writing and reading and other skills that make life easier. The deaf learn lip reading. Men who have suffered amputations get artificial limbs and special training. When possible, these unfortunate men are helped to earn a living in some new trade.

Those men who can return to service are encouraged to do so, as the army believes that a veteran who has been wounded in action is the most valuable kind of soldier.

These men fully appreciate the wisdom and necessity of instructions for escaping injury in combat.

The reconditioning patients are divided into four classes:

1. Those nearest the point of recovery, who are capable of eight hours of physical training daily.
2. Those who can stand six hours of physical exercise daily.
3. "Walking" cases, still receiving treatments.

Cream Developed by Navy Medical Corps Protects Skin From 'Flash Burn' Injuries

A skin cream that gives positive protection against one of the deadliest and most disabling of battle hazards—flash burns—has been perfected by Naval Medical researchers.

The substance has the consistency of ordinary cold cream but is battleship gray in color. About an ounce and a half, smeared across the face, neck, forearms and hands, will afford protection of those parts.

4. Convalescent cases, still confined to beds.

Men in the first two classes are segregated from other patients, put back in uniform, and placed under regular discipline. These soldiers go on marches up to 15 miles, engage in training maneuvers, play body contact games, and work at such projects as victory gardens, poultry raising, and construction work. Generally these men are willing and eager to return to service.

Soldiers in classes three and four receive every treatment possible to hasten recovery—massage, sun bathing, supervised exercise. Those who can help the ward attendants in their duties, and engage in such games as their condition permits. A program of education in military and cultural sciences and entertainments helps to keep their minds occupied and at ease.

The army maintains about 80 general hospitals in the United States, each containing about a thousand beds. There are about 600 smaller institutions at various posts throughout the world. Army personnel have about 350,000 beds available, and more hospitals are in construction. The navy operates 36 general hospitals and seven convalescent institutions in the United States, totaling 40,000 beds. Facilities at posts and stations amount to an additional 25,000 beds.

Prevention.

Another important service of the medical departments is prevention of diseases by antitoxins and sanitary measures. Inoculations in both army and navy include serums to prevent typhoid fever, smallpox, tetanus, yellow fever, typhus, cholera and plague. Some are given to every man in service, others only to those who will likely be exposed to a particular disease.

Results have been most satisfactory. During 1942 there were no cases of yellow fever or cholera in the army, and only a few cases of smallpox and plague. About 50 men became sick with typhus, but only less than half a dozen died. Scarcely any man who had been inoculated for tetanus developed infection. The navy reported similar success in battling diseases.

Last war the influenza epidemic swept through army camps, causing 80 per cent of the disease deaths in 1918. A mild epidemic threatened in December, 1941, and lasted until March, 1942, but it was easily controlled, and practically no deaths resulted. A form of pneumonia called "atypal" has been widespread, and has put many men in the hospital, but the mortality rate is low. Recovery is slow, so loss of time from duty is serious.

Servicemen in the tropics are exposed to some bizarre diseases such as filariasis, a parasitic ailment transmitted by mosquitoes. The ailment breaks forth in lesions and glandular swellings. Only about seven cases per 100,000 men have been reported.

Fighters in the South seas have encountered malaria in the swampy islands. In 1942 the army's rate of malarial infection was about 30 men per thousand. It rose to 80 per thousand during 1943, because of increased activities in the steaming jungles. The marine landing forces report a rate of 155.5 per thousand, or nearly 16 per cent. This, despite mosquito repellents, screens, spraying of mosquito larvae and administration of drugs, including quinine compounds, to servicemen. Malaria is called a serious health menace by the medical authorities.

Widespread battlefronts have multiplied the problems of the medical

Dental care is a constant need among the fighting men. Lieut. George Fry is one of the navy dentists who is keeping the marines' teeth in first class condition.

(Marine Corps photo)

corps this time, but advances of science and improved organization have combined to make the serviceman's chances of returning to civilian life unimpaired much better than they have ever been in the long history of war.

It is not necessary to apply the thin coating to covered portions of the body since clothing alone—even a thin undershirt—provides adequate protection against all but the most intense flash burns.

Picture shows a laboratory-made flash burn on the arm of Lieut. Com. Gordon B. Fauley, who is in charge of the research project that developed the cream.

News Reel:

Insiders discussed the Windsors and de Marigny. . . . One revealed the cause for the rift between them. . . . It appears that some time ago the de Marignys received an invitation to a party at the Windsor house. . . . "We're not going," de Marigny is supposed to have tactlessly said publicly. "We have our own friends for a party and don't want to be bothered." . . . This must be an old one, but what matter? . . . Congressman Chas. Eaton was asked why in the Senate the committee is called "Foreign Relations" and in the House it is known as "Foreign Affairs." . . . "The Senate," Eaton is supposed to have replied, "is too old to have affairs!"

The OWI tells the column that its conductor was denounced in an official Nazi propaganda broadcast from Berlin via D. N. B. on Nov. 17th. . . . The attack said in part: "The U. S. news services have a low mentality. To mix up gossip with political facts is an American technique. Gossip of a very low nature is constantly used. It is the gossip of the very common who can only look at things from the limited perspective of the ego. For example: Two children who sailed on the Lusitania in spite of German warnings, and who lost their lives, were discussed at the time in the press down to their pink ribbons and lace garments, but no one in America heard of the 100,000 German children who died owing to the British-U. S. hunger blockade, and no one, therefore, realized that the U-Boat war was the logical consequence."

"Walter Winchell is an example of the depth to which public life reaches when human interest becomes an end in itself. He reports on society gossip from the private lives of well known people, on commercial and personal wrongdoings, divorce scandals, triangle affairs and unnatural dispositions. His readers number about 27,000,000, and it has been stated officially that most of his FACTS are incorrect." . . . Heheheh. . . . Incorrect facts!

The Dials: Anyone who is still deceived by Franco's neutrality act should flip his dials to Radio Madrid (Franco's mouthpiece), which spends all its time sending mash notes to Germany, Japan and Argentina. . . . One way to rouse the silver-lining polyanalysts out of their daydreams is to nudge them with the grim fact that even when America wins a battle many Americans are lost. . . . Another battle the Nazis are losing is the battle of wits. They offered \$20,000 for the capture of General Tito, the heroic Yugoslav guerrilla. The Yugoslav radio replied by offering a reward for the capture of Gen. Pavlich, the Yugoslav Quisling. They offered 35 cents.

Nazi barbarism, witnessed by our soldiers, left them with an undying hatred for Germans, Quent Reynolds reported. Shove that down the throats of the fools who talk about a soft peace and still believe Nazis are people.

Simon & Schuster's next big book will be "Target—Germany"—to be given the Willie treatment (paper cover). It's the story of the 8th Air Force and was written on assignment from Maj. Gen. Ira Eaker by two nationally known mag writers. Though anonymous in the book, they are Major Richard Thruelsen, ex-associate editor of the SEP, and Capt. Arthur Gordon—former managing editor of Good Housekeeping.

Films about the war do not tempt soldiers. The most popular pictures are those that feature girls, gags and Grable. . . . The shortage of joke scribbles hasn't harmed most radio comedies. Their radio surveys are higher than ever. . . . One of the better short subjects is titled "Women at War." It stars the WACS, in eye-filing technicolor. . . . An exciting new book is "Where's Sammy?" It details the adventures of one of FDR's favorite picture-snappers—Sammy Schulman. It is crowded with attractive newspaperman stuff, too. The publisher is Random House.

Some of the quiz shows have become comedy programs, with the questions serving as stooges for quips. . . . Movietown should dream up new angles about films dealing with Nazi-occupied places. Too many of the recent ones fall in the same pattern. You cannot make Americans understand the nature of the enemy with yawns. . . . Hollywood makeup wizards should quit trying to give Dinah Shore a coating of glamour. They hide her fresh, natural appeal.

Nothing that happens in the rest of the world can change the first-night swanky doodles. They still have the best seats, the best clothes and the worst manners. . . . If you want to fracture some illusions about Broadway—have a look at the pasty-faced, weary Broadwayites, who sit around in the all-night places. Nearly all of them appear ten years older than they are—and they feel it.

Why doesn't someone stop the radio clowns from using physical disabilities as the subject for quipping?

MILITARY TRAINING A PEACE-TIME ASSET

Postwar domestic and world problems are a challenge to American citizenship. Teen-age boys of today will be called upon in a few years either to help solve those problems or to enforce decisions which must soon be made.

Youth should prepare now for the most momentous days in history. An ideal combination for such preparation is military training, with its teachings of discipline and responsibility, and an educational course including the classics, sciences, mathematics, government and other essentials.

This combination is available at Northwestern Military and Naval Academy, from which many leaders in the armed forces, business and the professions have graduated.

The records of this institution prove its high standards. It enjoys an Honor School R O T C rating from the War Department. Its broad curriculum captures boyhood enthusiasm. Small classes provide individual teaching and personal attention from instructors.

Parents desirous of having their sons enter Northwestern for the winter term, starting on January 4th, are urged to contact Academy quickly because school has limited enrollment and vacancies resulting from mid-year graduation are filled quickly.

Located on beautiful Lake Geneva, the 75-acre campus is a constant delight to boys. Second semester opens Jan. 27. There is also a six weeks' Summer Naval Training Camp during July and August, with unusual recreational facilities. Write to Northwestern Military and Naval Academy, Lake Geneva, Wis., for illustrated catalogue.

SNAPPY FACTS ABOUT RUBBER

The war and the crude rubber shortage have given emphasis to synthetic rubber, but for more than 70 years prominent chemists in Europe, Russia and the United States have been working on the development of this substitute for natural rubber.

One tonner can collect about six gallons of latex from a morning's tapping on a rubber plantation. This yields about 20 pounds of rubber.

The first scientific or commercial interest taken in rubber was evidenced in 1745, when Charles Marie de la Condamine made a report on this substance to the Paris Academy of Sciences.

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. 1tc

Ira Overholt was at Webster City on business Monday.

Mr. and Mrs. Henry Christenson of Goodell last week moved to their home in Kanawha.

W. F. Dunn of Forest City was looking after business matters in this community, Friday.

Mr and Mrs. Walter Braner of Belmond were visiting at the parental Levi Klotzbach home Monday.

Levi Klotzbach returned to work Monday at the Jacobs Hardware after being ill at home since before Thanksgiving day.

E. J. Schneider returned Tuesday afternoon from Ottawa, Illinois, where he spent a few days visiting with his mother.

Mrs Benn Coobs, Mrs. Henry Keeper and Mrs John Clements were Garner visitors Friday afternoon.

Mr. and Mrs John M. Neuberger and children were dinner guests Sunday with his parents, Mr and Mrs. John Neuberger.

Mr. and Mrs. Paul Kropp of Leonard, Minnesota, are visiting at the home of their son, Leon Kropp and family in Liberty township.

Mr. and Mrs. Emil Patet drove to Forest City Sunday where they were dinner guests at the Jerome Edmond home.

Mrs. Paul Grange of Mason City, and son Lt. Dorance Grange of San Antonio, Texas, were calling on Klemme friends Thursday.

Mr. and Mrs. R. A. Jorgenson were visitors at the Lyle Lieben-dorfer home at Forest City Saturday evening.

Mrs. P. M. Wilson entertained to dinner last Wednesday Mrs. E. J. Schneider, Mrs. Daisy Lemke and Mrs. Naska Beck. After dinner the ladies tied a wool quilt.

Mr and Mrs C C Kilgore and son, Lt Lyndon Kilgore, and Gus Hollburg were dinner guests at the Joe Burgess home southeast of Klemme Wednesday evening.

Mr and Mrs. John M. Neuberger and children of near Ventura, and Mr. and Mrs. Lloyd Ax of Mason City, were supper guests Sunday evening at the Wm. Ax home

Sunday dinner guests at home of and family; Mr. and Mrs. George Thiemann; Earl Neuhring and family; and Mrs. Evert Barz, Carol and James.

Mr. and Mrs. Wayne Pavey and daughter Carol Ann of Webster City spent Sunday visiting at the parental W. F. Pavey home. Carol Ann remained here with her grandparents as her mother had a tonsil operation performed Tuesday.

Billy, son of Mr. and Mrs John Waddingham, came home Thursday from the Mason City hospital where he went for a surgical operation on his arm which was fractured recently. Billy is making a good recovery.

Mrs. E. J. Schneider went to Moline, Iowa last Friday for a short visit at the home of her son-in-law and daughter, Mr. and Mrs. Schriber. Her granddaughter, Marlyn, came home with her for an extended visit.

Miss Dorothy Baack, daughter of Mr. and Mrs. Herman Baack has returned to her work in Detroit, after visiting at home. Miss Baack is employed as an assistant to one of Detroit's leading ear, eye and nose specialists.

Mr. and Mrs. Paul Kropp of Leonard, Minn., spent Tuesday in Klemme visiting with Mrs. Louisa Rosendahl. Mr. and Mrs. Ewalt Josten, Mrs. Werner Schlavin, and Mr. and Mrs. Walter Rosendahl visited there in the evening.

Robt. E. Sandberg, S 1-c, who is stationed at Farragut, Idaho, spent a few days the past week visiting with his grandparents, Mr and Mrs. Sandberg at Goodell. Robert left for a San Francisco, where he will now be stationed.

SOY BEAN ACREAGE FOR 1944 will be discussed by a representative of the County AAA at our annual meeting Friday, December 17 at the Legion Hall. Klemme Coop. Grain Co. 1tc

Mr and Mrs. Fred J. Arnold and son Bobbie, were dinner guests at the Wilbur Carr home at Garner on Sunday. It was Mr. Carr's birthday anniversary.

Be sure to send in your check and registration slips for your 1944 license. We will mail your new stickers out to you. Roy L. McMillin, Treasurer, Garner. 2tc

Mr. and Mrs. P. M. Wilson spent Sunday in Des Moines with their daughter Mrs. Robt. Rasser and son Bobbie. It was Bobbie's 7th birthday and his mother had a party for him to which eight little boys were invited. Grandma Wilson baked a cake for Bobbie's party.

Henry Smid, who has been working in the Bethlehem Steel Co. ship building yards at San Francisco, California, arrived in Klemme on Monday evening. He came back to report to the draft board in Franklin county for induction into the armed forces.

Roy Smock returned Monday from the University Hospital at Iowa City where he went for a check up. Roy has been getting around without the use of crutches, but was advised to use them again for a time until his leg gets stronger.

The ladies of districts 1 and 2 had their follow-up meeting on Tuesday, December 8th at the home of Mrs. Caris Kropp. The lesson was: "Meeting the Family Food Needs in War-time," and was discussed by the thirteen ladies present. Lunch was served following the meeting.

Mr and Mrs. C. C. Kilgore entertained at a pre-Christmas and birthday dinner Sunday in honor of their son, Lt. Kilgore, who was home on a leave, and to observe the birthday of Mrs. Joe Burgess and son Dean. Mrs. Burgess' birthday was the same day, and Dean's was on Monday. Dean's was the most important as there were seven candles on the cake. Those present were Joe Burgess and family, and Lt. Kilgore.

OPERATE ALL TRACTORS ON GASOLINE IN WINTER

Practically all tractors, regardless of type, should be operated on gasoline during the cold weather months, advises Donald K. Struthers, extensions agricultural engineer at Iowa State College.

This applies to tractors which are designed to operate on low-grade fuels during normal field operations as well as those specifically built to burn gasoline.

Tractor fuels and distillates are difficult to vaporize at any time particularly during cold weather. In extremely cold weather it is also advisable to set the exhaust manifold heat regulator to the "hot" position even when burning gasoline. This helps to vaporize the fuel and helps to prevent crankcase dilution. It also results in more power per gallon of fuel, Struthers says.

HOLIDAY HOMECOMING

BILL sure got a warm welcome! Bud knew it was "kinda' sissy" to hug his big brother, but that's the way he really felt down inside.

Bill is only typical of boys in the armed forces. There will be Christmas and New Year furloughs—millions of them! And we'll bet every boy is counting the days until that train starts rolling toward home. All too soon that precious furlough will be just a memory, and it may have to do for a long, long time.

Disappoint a soldier? Not for the world! Nor would you. That's why the Rock Island is counting on your cooperation—why we're asking that you be guided by these travel suggestions:

- 1—If it is essential that you travel during the holiday period, leave on a less congested day.
- 2—If your plans change, cancel reservations promptly. Someone else needs your space.
- 3—Try carrying one piece of luggage. If you need another bag, check it through, identifying it with your name and address.
- 4—Help prevent dining car congestion. On short trips eat before you leave or after you arrive... or take a lunch with you. Some trains serve box lunches and sandwiches.
- 5—Avoid standing in line at the depot ticket windows by using City Ticket Offices wherever possible. You'll get tickets, information and reservations there more easily.

As yesterday—and today—so tomorrow ROCK ISLAND'S sole purpose is to provide the finest in transportation.

BRING THEM HOME TO STAY • BUY MORE WAR BONDS

ROCK ISLAND LINES

ONE OF AMERICA'S RAILROADS • ALL UNITED FOR VICTORY

IT WILL SOON BE . . .

CHRISTMAS is just around the corner . . . in fact, just about a week away. Usually we can make many suggestions for gifts from the lumber yard, but this year it is more difficult. However, with a few pieces of lumber you could build many little conveniences around the house.

Many of these jobs can be done during the winter months, so why not figure today on:

- Kitchen Cupboard
- Room Partition
- Extra Closet
- Attic Insulation
- Built-In Cabinets
- Corner Cupboard
- Build Breakfast Nook
- Lay New Oak Floors

Here's another suggestion: Begin planning this Xmas for that new home after the war. We have plans to suit your requirements. Make yourself a future Christmas Present by starting your New Home now!

Deer Killed On Klemme Hiway

DEER STRUCK BY CAR ON HIGHWAY NEAR KLEMME DIES OF INJURIES

It is rather unusual to hear of deer running along the highways in Iowa, but a deer was struck by a car near the Albert Etchen farm two miles south of Klemme Saturday afternoon.

After being struck by the car (driver unknown) the deer was badly injured but managed to get into a nearby cornfield.

Mrs. Etchen observed the injured deer and called her brother, Ben F. Greiman. Ben arrived with his son and the two found the deer which they easily caught because it evidently had a broken hip. Ben and his son loaded the deer into a truck and took it to the farm northwest of Klemme. They put the deer in a box stall and tried to make it comfortable.

Ben then called the Sheriff, Police and Deputy Elmer Hutter came out to look the situation over and advised Greiman that if the deer died to skin it and save the hide until the Conservation Commission was notified.

The deer, which was a large and pound doe, however, died Monday of the serious injuries it had received. Mr. Greiman is awaiting word from the State Conservation Commission on what to do with the hide, which is very beautiful.

Deer are being shot in the vicinity of Ledges Park in order to reduce the number and it is thought that the shooting has satisfied the animals.

Several farmers around Klemme have reported seeing deer running at large the last week.

SCHOOL BOARD AND WIVES, FACULTY ENTERTAINED BY HOME EC CLASS

The advanced home making club of the Klemme High School under the direction of Miss Dorothy Dietrich entertained the school board and their wives and the faculty at a Christmas dinner Wednesday, December 15.

Christmas was the theme used throughout the dinner. The centerpiece was made up of evergreens flanked about a Santa on a snow glistened mirror. Red candles were glowing among the evergreens. At the place of each lady was a white mum tied with a red ribbon.

After the dinner the guests enjoyed games, winners being Mr. Arthur Kudje and Mrs. H. G. Voetberg.

CLOSING DATES AHEAD FOR KLEMME BUSINESS PLACES

Klemme business places will observe two holidays ahead and will be closed all day on:

Christmas Day, December 25th
New Year's Day, January 1st

Demand for fertilizer this year is expected to be larger than last year.

KEEPING CHRISTMAS

Are you willing to forget what you have done for other people, and to remember what other people have done for you; to ignore what the world owes you and to think what you owe the world; to put your rights in the background, and your duties in the middle ground, and your chances to do a little more than your duty in the foreground; to see that your fellow-men are just as real as you are, and to try to look behind their faces to their hearts,

hungry for joy; to own that probably the only good reason for your existence is not what you are going to get out of life, but what you are going to give life; to close your book of complaints against the managers of the universe, and to look around for a place where you can sow a few seeds of happiness—are you willing to do these things even for a day? Then you can keep Christmas. And if you keep it for a day, why not always?

Pre-Christmas Nuptials Held At The Reformed Church

VELMA KADUCE BRIDE AT A CANDLE LIGHT CEREMONY FRIDAY EVENING, DEC. 17

Church Decorated With Evergreen For Wedding Ceremony

Miss Velma Kaduce, daughter of Mr. and Mrs. John Kaduce, of Klemme, and Mr. Paul Lau, eldest son of Mr. and Mrs. Emil W. Lau of Klemme, were united in marriage at the Emmanuel Evangelical Reformed Church in Klemme, Iowa, Friday evening, December 17th at 6:30 o'clock in a candle light ceremony with Rev. Calvin Grosshuesch officiating at the single ring ceremony.

The church was decorated with evergreens for the occasion.

Other in the bridal party were Miss Lois Ann Lau, sister of the groom, bridesmaid Leonard Kaduce, brother of the bride was the best man.

The bride wore a brown velvet dress with Rosewood accessories, and carried an ivory silk handkerchief which had been her grandmother's. Her corsage was of pink roses and small chrysanthemums.

Mrs. Lau wore a soldier blue dress with brown accessories and a corsage of small red roses.

The bride's mother wore a navy blue dress, and the groom's mother wore a brown dress. Both ladies wore corsages of winter flowers.

Eugene Habercamp, cousin of the groom, presided at the piano and played both the processional and recessional wedding marches. Allan Barz sang, "At Dawning," and "Because."

A wedding dinner was served to the immediate relatives and close friends at the home of Mr. and Mrs. John Kaduce, Sr., after the church ceremony. A three-tiered

decorated wedding cake, topped by a miniature bride and groom, served as the table's centerpiece.

Both Mr. and Mrs. Lau were raised in this community and grew up on their parent's farms and attended the schools of this community. Mr. Lau graduated from the Klemme high school in 1937.

In the spring Mr. and Mrs. Lau plan to start housekeeping and farming for themselves on a farm southwest of Coodell.

A wedding dance and reception was held in their honor at the Community Hall Monday evening.

WE WAR BONDS

Money spent for War Bonds goes to the front. Sometimes it provides spectacular equipment like planes, oft times it buys a runty donkey like this American soldier is taking ashore in Italy. The quicker your dollars go to action, the sooner it will be over. Buy More War Bonds. U. S. Treasury Department

HE'S A HOT SHOT BASKETBALL EXPERT WILL GIVE DEMONSTRATION

Wilfred Hetzel, a trick shot basketball expert, will give a demonstration at the Klemme high school gym on Tuesday evening, December 23rd at 7:30 o'clock.

Following this show the Shamrocks will play the Alums. The admission is 15c, 25c and 35c, or admission by showing your season ticket.

FAREWELL PARTY HELD FOR MRS. J. J. STILLE

About sixty-five neighbors, relatives and friends held a surprise farewell party for Mrs. J. J. Stille at her home in Liberty township on Friday evening, December 10th.

All enjoyed a social evening and after a nice lunch was enjoyed by all.

Mrs. Stille, who has moved to Klemme, was presented with some nice gifts, and her many friends and neighbors wished her happiness in her new home.

DORCAS SOCIETY MET WITH MRS. GERALD KOERNER

The Dorcas Society of the Methodist Church met last Thursday afternoon at the home of Mrs. Gerald Koerner, just west of town. Sixteen members were present.

The meeting was in the form of a Christmas party and the ladies had a gift exchange. Lunch was served.

The next meeting will be held at the home of Mrs. R. W. Elder, with Mrs. Herman Bridges as co-hostess on January 20th.

Vegetable soybeans may be pulled up and taken indoors for further curing as soon as they have lost their leaves and the pods have turned brown. If left outdoors they

Coop Annual Meeting Held

LARGE CROWD ATTENDED ANNUAL MEETING OF THE KLEMME COOP. GRAIN CO.

The annual meeting of the members of the Klemme Cooperative Grain Company was held at the Community Hall last Friday, starting at 12:00 o'clock noon when hot coffee and doughnuts was served.

Mr. Frank Robotka, of the Iowa State College, was the principal speaker and gave an interesting talk on topics of vital interest to farmers. Talks were also given by representatives of the Triple A.

One of the purposes of the annual meeting is for the election of directors. At this meeting all of the directors were re-elected. The directors now serving are Wm. H. Greiman, Carl Wille, E. J. Arnold, Emil Lau, Lester Stille, Paul Goll, and Fred Klinge, Jr. At a later date the directors will hold a meeting to name officers of the company for the coming year.

HIGH SCHOOL SERVICE FLAG DEDICATED FRIDAY EVE

In a special ceremony at the high school gym last Friday evening, the Klemme High School Service Flag was dedicated.

Julia Bell read the list of names of Klemme graduates serving their country in the several branches of service. There are fifty-two stars in the school's flag.

To the list of names published in The Times last week should be added:

Melvin Coobs, Army
Miss Gertrude Trushuesch, Army Nurse
Miss Lucila Lewis, Army Nurse

"WHY GO TO CALIFORNIA?" ASKS MRS. SCHAEFER

Why go to California?" asks Mrs. Fay Schaefer when you can pick flowers in Iowa in late December.

To back up her question Mrs. Schaefer picked several decorations and sent them to The Times Office, with a note saying they were from between her house and Fred Kluck's residence.

The flowers were picked on December 13th.

"Dandelions may not be orchids but they do look good in winter and is proof that Iowa winters are not so bad."

Has anybody seen a robin lately?

Canada is harvesting an all-time record of flaxseed. They were asked to expand their acreage and they overshot the goal by 293,000 acres.

WEEKLY NEWS ANALYSIS

U. S. Forces Advance in South Pacific As New Air, Sea, Land Blows Hit Japs; 1944 Farm Machinery Output Doubled; Germany Stunned by Bombing of Berlin

EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysis and not necessarily of this newspaper.)
Released by Western Newspaper Union.

SOUTH PACIFIC: Outposts Crumbling

Less than a week after U. S. forces under Maj. Gen. Holland Smith swarmed onto the shores of the Gilbert islands of Makin, Tarawa and Apamama, the stars and stripes floated bravely over them and most of their 6,000 Japanese defenders lay dead.

Even as U. S. forces were mopping up the Gilberts, from which the enemy once menaced Allied supply lines to the southwest Pacific, American airmen struck another heavy blow at

Maj. Gen. Holland M. T. Smith

Jap naval forces serving their embattled troops on their last Solomons' holding of Bougainville island. Of a force of six Jap destroyers, two were sunk by torpedoes and two more by gunfire by a smaller squadron of U. S. warships.

In ground fighting on Bougainville, U. S. forces expanded their base of operations under support of heavy artillery barrage and bombing attacks of Mitchells and Venturas.

FARM MACHINERY: Doubling Output

Rationing of farm machinery will be reduced to 31 types next year as increased raw material allotments will allow the manufacture of almost twice as much equipment as was made in 1942 and about 80 per cent of the 1940 total. Production of repair parts will be unrestricted.

With sufficient carbon steel available, only uncertainty of supplies of anti-friction bearings, malleable castings and forgings is ruffling farm machinery manufacture. As in all mechanical production, bearings are the chief bottleneck.

Despite the improved outlook for farm machinery, difficulties may arise from the scarcity of hauling vehicles, including trucks, and in acquiring replacement tires for trucks now in operation.

LIVING COSTS: Up 23 Per Cent

While the War Labor board's "Little Steel" formula restricted wage increases to 15 per cent over the January, 1941, level, living costs have risen 23.4 per cent since then, according to figures of the department of labor.

Originally, WLB awards were based on a 15 per cent increase in living costs from January, 1941, to September, 1942. Since September, 1942, however, there has been another 5.6 per cent rise, with labor demanding a corresponding reduction in living costs or higher wages to equalize the present condition.

Further, labor charged that the government figures on living costs were inaccurate, and the President appointed a special committee to look into the subject.

WORKING WOMEN: More Needed

With 16½ million women already at work, another million are needed to round out war production demands.

As of October, only 700,000 people remained unemployed, and with this sharp reduction in the number idle, it has been found necessary to call on women to fill in many jobs, especially in busy war production centers.

The extent to which women have been recruited for industry since the armament program got under way can be glimpsed by the fact that only 10,800,000 were working in October, 1940.

CONGRESS: Ban Subsidies

To the senate for approval went a house bill prohibiting payment of subsidies to reduce or maintain retail food prices and only allowing their use to stimulate agricultural production.

Championed by the administration as a means of keeping living costs down, retail subsidies were attacked in the house as inflationary, in that such savings to consumers only added to their purchasing power, and money borrowed for the purpose increased the national debt.

The administration is now spending approximately 800 million dollars annually on retail subsidies for meat, butter, milk, and other products. Under the house bill, subsidies would be continued only for domestic vegetable oils, fats and oil seeds.

In approving subsidy payments to stimulate production, the house voted to extend the life of the Commodity Credit corporation to June 30, 1945, and maintain its borrowing power at three billion dollars. CCC also was given permission to resell at a loss perishable fruits and vegetables bought to support prices.

Vote for Higher Taxes

Also to the senate went a house bill providing for 2½ billion dollars in additional taxes, far below the 10½ billion dollars requested by Treasury Secretary Henry Morgenthau.

Largest source of new revenue in the bill would be obtained from taxes on goods, such as beer, liquor, jewelry, luggage, bulbs and cosmetics, and from services such as telephones and telegraphs, amusements, transportation and club dues.

Adjustments in individual and corporate income taxes would provide substantial revenues, with approximately 600 million dollars being obtained from additional levies on business.

Local postal rates would be increased to three cents and charges would be raised on money orders and special deliveries.

EUROPE: Fortress Smoulders

With its home front rocked by Berlin's devastation by 1,000 RAF bombers, Germany sought to bolster the southeastern flank of her smouldering Fortress Europe by turning to military maneuvers to influence wavering, neutral Turkey.

While Berlin's populace dug out of its ruins, Germany was reported moving troops through Sofia, Bulgaria, to the Grecian frontier, fronting Turkey.

German Foreign Minister Von Ribbentrop (at right) greets Bulgarian regent, Prince Kyrill (at left), while Hitler looks on in background.

key. The moves closely followed the Nazis' capture of the strategic Aegean islands of Kos, Leros and Samos, from where they could threaten Turkey's western coast.

The Germans' movements appeared to be their answer to Allied pressure on Turkey to cast her lot with the U. S., British and Russian cause. Under terms of the Turkish-British alliance of 1939, each country promises to come to the assistance of the other if attacked.

In Italy, Britain's 8th army occupied lowlands along the Adriatic coast, in preparation for an assault against the Nazis' mountain positions immediately to the north. U. S. casualties in Italy since September 8 were placed at 1,613 killed; 2,685 missing, and 6,361 wounded.

WORLD RELIEF: Big 4 to Cooperate

In accordance with the principles of the Big Four pact of Moscow, the U. S., Britain, China and Russia will work together in the United Nations Relief and Rehabilitation administration for obtaining supplies for the postwar's needy countries.

The U. S., Britain and Russia will co-operate in estimating the requirements of the different European peoples. To get the necessary supplies as speedily as possible, it was suggested that raw materials be especially allocated to pre-war industrial nations with available machinery for manufacturing goods.

United Nations not invaded are to contribute 1 per cent of their national income toward a fund for financing relief and rehabilitation operations.

Rationing After War

Because of prospective demands on U. S. food supplies for feeding other nations, rationing will not only continue but also may be more severe after the war, Secretary of Agriculture Claude Wickard told a senate committee.

Declaring that the time needed to feed other people will determine how long rationing will go on in this country, Wickard said the severity of the control will depend to a great degree on the supplies we have on hand when the war ends. All tillable land out of the 20,000,000 acres owned by the government should be returned to farming by sale or lease after the war, Wickard said.

WORLD BANK: For Reconstruction

To join with private capital in reconstruction and rehabilitation in the postwar era, the U. S. treasury has proposed a world bank and laid details before congressional committees for study.

Announced by the treasury's financial wizard, Harry D. White, the bank not only would help in advancing long term credit for rebuilding the shattered economies of nations, but in some cases it would also guarantee repayment of loans made by private capitalists.

U. S. contribution to the bank would amount to 700 million dollars at the start, and possibly 3½ billion dollars in all. Great Britain would advance less than a billion dollars, Soviet Russia's share would be substantially less.

RUSSIA: Counter-Punches

Red armies launched a heavy attack on the northern sector of the 1,200 mile Russian front as German Marshal Fritz von Manstein's troops pecked out new gains in the vicinity of important railroad junctions to the west of Kiev.

In their drive in the north, the Reds took another step closer to the pre-war Polish border, and pressed against the upper section of the railroad system constituting the Nazis' last north-south rail link in Russia.

After recapturing the rail hub of Zhitomir in a whirlwind comeback, the Nazi attack lost some of its impetus against stiffening Red resistance, and although the Germans beat forward for further gains and spread the scope of their drive northward to take in still another section of the rail line previously cut, their pace was slowed by concentrated Russian artillery fire.

U. S. SPENDING: Sees Need

Special advisor to the board of governors of the Federal Reserve bank, Economist Alvin H. Hansen proposed annual government expenditures at the rate of 15 to 18 billion dollars to prevent postwar depression.

Declaring that the last great depression was the result of a drop of 15 billion dollars in private investment between 1929 and 1932, Hansen said it was necessary for the government to develop a program for meeting such crisis, so as to halt big dips in consumer buying and attract capital back into business.

The present war will be followed by a period in which people will spend money for accumulated needs, Hansen said. But unless government stands by with some kind of program to take up the slack in employment that will follow the filling of all these orders, we might well run into another depression, Hansen asserted.

LIGHTING:

A new type of electric light that requires no wires, but obtains its current from a beam of high-frequency radio energy, was demonstrated recently in New York. Experts said that this will be the lighting of the future. Also shown were radiant heat lamps that gave off enough heat to cook food, and a mercury vapor lamp, the most brilliant known. It uses 10,000 watts, and produces a light one-fifth as bright as the surface of the sun, it was reported.

Washington, D. C. PRESIDENT AND NEWSPRINT

Some of the President's newspaper friends who have been consistently for him over a long period of years are now suggesting that this is a good time to turn the other cheek regarding his constant feud with the press. They suggest that he personally could step into the current newsprint shortage and take a strong stand on an issue which seriously threatens one of the basic freedoms of the country—freedom of the press.

Actually, a good many bureaucrats have been nibbling at the newsprint problem, but no one has stepped in with any forthrightness to cut red tape and solve the problem. It now looks as if only the White House could do this.

Not generally realized is the fact that newsprint shortage is due not so much to decreased woodpulp production in the Canadian forests, but to much greater use of cardboard and packing material in sending war supplies abroad. This is a terrific drain and, though U. S. publishers have patriotically cut their newsprint, they will have to cut to the bone unless energetic moves are made by the government.

The plan put forward by newspaper executives friendly to the White House includes:

1. Greater use of war prisoners in the Canadian and Maine forests.
2. More equitable distribution of newsprint among publishers. At present, the papers with the big Sunday editions have scarcely suffered at all, being able to absorb their paper cuts out of their Sunday "fat."

On the other hand, medium-sized papers may have to take terrific punishment.
3. Stricter supervision of cuts by throw-aways, dodgers, comic magazines and newsprint users who have not kept such accurate records of their past consumption. The newspaper industry has suffered by its past efficiency, having kept very accurate records.

4. More emphasis on the paper salvage campaign. At present, only 35 per cent of the nation's waste paper is being collected and salvaged. The waste paper reclaiming machinery is running at only 51 per cent of capacity. Approximately 6,000,000 tons of waste paper are normally collected and sold for paper board but now only two million.

The newspapers stepped in and did a great job of collecting scrap iron when the nation needed it, but now, when the newspapers need newsprint, they themselves are somewhat handicapped in blowing their horn.

What the White House will do remains to be seen.

GOOD NEIGHBOR PEACE

Ten years ago, there was a very serious war between Bolivia and Paraguay in the jungles of the Gran Chaco. Last week, the presidents of Paraguay and Bolivia met at the border of the two countries in the Chaco, erected a large cross, and pledged themselves and their countries to everlasting peace.

The bitterness which animated these two South American countries has been wiped away, and they are Good Neighbors in every sense of the word.

Some diplomats hope this incident is a forecast that the bitterness actuating the enemies of World War II may likewise be eliminated after the passage of time.

INSIDE STORY OF HORNET

The navy department has okayed publication of the inside story of the famous airplane carrier Hornet, written as a book, "A Ship to Remember," by Alexander Griffin of the Philadelphia Record.

For the first time it reveals the spectacular operation of the ship which carried General Doolittle's bombers within a stone's throw of Tokyo. Among other things, the navy okayed publication by Griffin of the fact that, at one time, the Hornet practically acted as a substitute for Henderson Field in the Solomons. That badly messed-up airport, on the night of October 14, 1942, had only five planes left and gasoline to send out only four. So the Hornet came alongside the island, threw her planes into action and, for 36 hours, substituted for Henderson Field.

Even more astonishing is the revelation that, at one time during the low point in the South Pacific battle, the U. S. navy had only one aircraft carrier left undamaged in that entire expanse of water—the Hornet.

MERRY-GO-ROUND

Wheeler MacMillan, Farm Journal candidate for President, arrived in Wisconsin two days after Willie!

OPA will soon hoist prices for essential war commodities being produced by small war contractors. This is to compensate the contractors for higher labor costs.

The Truman committee has received reports of "sanctioned loitering" in the naval torpedo plant at Alexandria, Va.

Washington is interested in U. S. Judge "Jeffy" O'Connor's proposal to punish the Germans by making them stay in each country until they build up all the property they have damaged.

PATTERNS

SEWING CIRCLE

Pattern No. 8470 is in sizes 6, 8, 10 and 14 years. Size 8 requires 2½ yds. 35-inch material, 3½ yards required.

Due to an unusually large demand for current war conditions, slightly more is required in filling orders for a new pattern.

Send your order to:

SEWING CIRCLE PATTERN DEPT.

HIGHLIGHTS . . . in the week's news

SHIPS: Shipyards under management of Henry J. Kaiser have launched 1,087 vessels since January 1, 1941. Mr. Kaiser told the New York Economic club. Of these, 985 are Liberty ships, 40 or more are tank-landing ships, 40 are fast tankers, and 12 are aircraft carriers. "Two or three," he said, "are troop transports with seven decks, carrying 4,000 passengers."

CABLES: The navy will make it possible for naval personnel to receive cablegrams at most shore installations outside continental United States. Service will be expanded shortly after the first of the year.

The army has forbidden fixed text holiday greetings to be transmitted to soldiers overseas between December 6 and 25, to prevent overtaxing of facilities.

White Flowers For Your Linens

7568

WHETHER it's towel or pillowcase, scarf or cloth you are considering, it will be enhanced by these "true to life" garden motifs.

Pattern 7568 contains a transfer pattern motifs averaging 4 1/4 by 3 3/4 inches; 25c.

Due to an unusually large demand and late war conditions, slightly more time is required in filling orders for a few of our most popular pattern numbers.

People Keep on Getting Hurt, War or Not, In Ingenious, Sometimes Humorous Ways

Reaper Strips Farmer; Soldier, Ogling Girl, Falls in Coal-Hole

The comic note creeps in now and then, even in the grim catalogue of the year's accidents. A few ludicrous examples from the files of the National Safety Council indicate what vaudeville-like mishaps can happen.

Residents of Coconut Grove, Fla., were mildly surprised one day when their morning mail was delivered by a mailman who, of all things, wasn't wearing any pants. It wasn't the heat, the pantsless postman explained. He'd merely fallen off his bicycle and landed in an anthill. And, he added with simple pride, even when the United States postal service gets ants in its pants, the mail must go through.

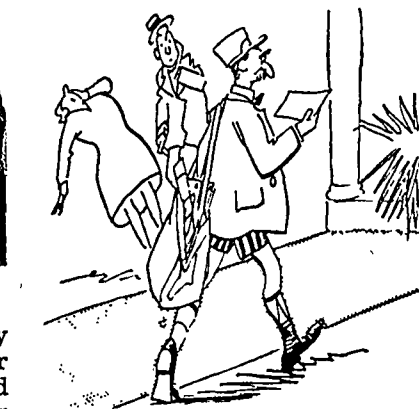

Dr. W. A. Franklin stood before his junior high school class in Ponca City, Okla., to demonstrate the safe way to handle matches. "First, remove the match," he was saying, "then close the container." As he flipped open the container to demonstrate, all the matches caught fire. Dr. Franklin bandaged his burned hand. Then, with exemplary fidelity, he closed his lecture with this observation: "That, students, is what happens when one becomes momentarily careless."

As Private Ernest M. Scofield of Denver, Colo., huddled in a foxhole in the Solomons, dodging enemy shot and shell, a stray bullet dislodged a coconut from a tree limb overhead. The coconut landed kerplunk on Private Scofield, broke his left leg, and he became the army's first coconut casualty.

Residents of Dayton, Ohio, were startled one fine day this summer to see a small electrically-driven invalid's chair scoot through a red traffic light and crash into a huge six-ton trailer truck. When Ben Myers, the unperturbed and uninjured pilot of the chair, had been extricated from the wreckage, he explained he was on his way fishing and, bubbling over with high spirits, had failed to observe the light. Sympathetic onlookers helped him pick up and reassemble a large and wriggling supply of crawfish, crickets and grasshoppers, and he went hilariously on his way.

Blitz Welding. During army maneuvers in Tennessee, a bolt of lightning struck the zipper of a sleeping bag, neatly welded it all the way around and sealed up a soldier who happened to be inside. The soldier, understandably perplexed, howled for help, then pleaded for anonymity.

In Chicago, Colton Ankebrandt was testifying in the case of a driver who inadvertently had piloted his auto into Mr. Ankebrandt's parlor, through the wall of the house. The incident had happened ten days before. "And where is the car now?" asked the court. Mr. Ankebrandt appeared surprised. "Why, your honor, it's still in our parlor," he replied. "It doesn't bother us

much." Foreseeing, however, that Mrs. Ankebrandt might wish to rearrange the parlor furniture some day, the court ordered the car removed.

Lieut. D. M. Schultz of the army air forces ran into trouble while flying over Portland, Ore., and bailed out. Obligingly, he landed on the roof of the U. S. Veterans' hospital, where it was no trouble at all for hospital attendants to pop out and treat him for minor injuries.

There, there was the case of Sgt. D. P. Smith, an aerial gunner of the Australian Air forces, who was visiting the Chicago Service Men's Center. He decided to try his hand at bowling. He did all right, too, for a novice, except that he neglected to remove his fingers from the bowling ball. He accompanied the ball on a short flight and made a crash landing with more embarrassment than pain.

In Detroit, a city-bred horse

named Davie, blase in the heaviest auto traffic, ran away and wrecked his buggy when he met a terrifying sight—another horse.

At Hammonton, N. J., a speeding train hit a truck driven by Jules Press. Mr. Press left the truck and flew high into the air. So did four blankets. The blankets landed on the road bed. Mr. Press landed on the blankets. No—no pillow.

Highballer.

In Mankato, Sask., a steer in a cattle car poked an inquisitive horn through the car's slats, caught up a switch lamp hanging outside the car and roughly baffled the engineer by swinging red and green signals all the way to Moose Jaw.

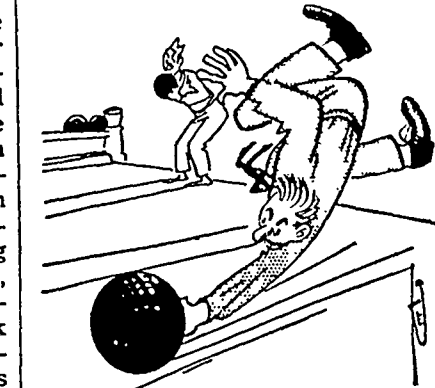

Herbert L. Carpenter, a subway rider in Brooklyn, N. Y., appeared before the mayor with a plan to eliminate subway rushes, of which Mr. Carpenter had grown weary. Later the same day he was trampled in a subway rush and had to go to a hospital for treatment.

In South Bend, Ind., Miss Ruth McGrady slipped, fell, broke her right wrist, stood up, slipped, fell, broke her left wrist.

Private Louis Henriquez fell 14 feet down a coal-hole as he was strolling along in Denver, Colo. Afterwards, dug up and refreshed with a bath, Private H. explained: "She smiled as we passed."

Mrs. Blanche Heck of Centerville, Iowa, had not ordered her winter coat. She was a little surprised when a loaded coal truck entered her home, pushed the bed on which she was lying, through the wall, into the next room, and left her against a hot stove, uninjured.

James Hollingshead was taking a horseback ride in Summerberry, Sask., one day when a passing freight train frightened his horse. The horse dashed against the train,

thoughtfully tossed Mr. Hollingshead onto a passing flat car, backed away, and fell dead.

Loyal comic strip fans were goggle-eyed one day when Connie, of "Terry and the Pirates," drove a car up and over an opening bridge. "Of course, it could only happen in the funnies," they told themselves. But a 17-year-old Milwaukee, Wis., youth did it in real life. He drove up the rising leaf of the Sixth street bridge, made a graceful 18-foot arc over the gap, then pancaked on the slanting span on the other side. The car was damaged, but the driver was unhurt.

It is described in the Bible that the lilies of the field toil not, neither do they spin. But Rancher Walter Wynhoff of Wilbur, Wash., is no Lily. For as he toiled on his ranch, the spinning rod of his reaper caught his overalls and spun him into the air. When he landed he was clad casually in shoes and eye glasses.

Canned. And little Erian Wittola, three, of Kulm, N. D., crawled into a large cream can in his back yard. He had no trouble getting in, but his parents were able to get him out only after an operation on the bottom—of the cream can.

In Omaha, Neb., the Berigans' dog, Bozo, got his foot and tail caught in a hay mower. Farmer Berigan jumped over a fence to help Bozo, cut himself on one knee and hit himself in the eye with the other knee. His daughter, Pat, ran out of the house, slipped and sprained her wrist. Mrs. B., startled as she was canning vegetables, jumped and cut her finger. Champ, another Berigan

dog, jumped over the barn door to see what was going on, and broke his foot. The Berigans learned later that a cousin in Keokuk was uninjured that day.

For Old Siwash.

When Phillips high school defeated Amundsen high in a hard-fought football game in Chicago, not a player on either team was hurt. But as Phillips scored a touchdown, an enthusiastic substitute on the bench

yanked Coach Lou Tortorelli's arm so violently that the coach's left shoulder was dislocated.

Staff Sgt. Leroy Post of Evansville, Ill., survived 37 bombing missions in the New Guinea area. He helped sink three Jap transports and shoot down at least six Jap planes. For this he was awarded the Distinguished Flying Cross and the oak leaf cluster. Then he was removed from the danger zone to become an instructor in an armament shop in Salt Lake City. A few days later his arm was caught in a machine and the bone was fractured.

And in Pocatello, Idaho, the sole survivor of a plane crash was Private John J. Lucky.

Engineer Corps Has Only Half Accidents Of Private Industry

The army's corps of engineers has achieved a reduction of 45 per cent in accident frequency and 31 per cent in accident severity below that of private construction.

As compared with the accident rates for the five-year period, 1936 to 1940, it is estimated that the engineers' safety program during the past two fiscal years has saved more than 1,000 lives, averted 34,908 lost-time injuries, and prevented the loss of 6,306,374 man-days, with the saving in wages of workers amounting to \$46,604,104.

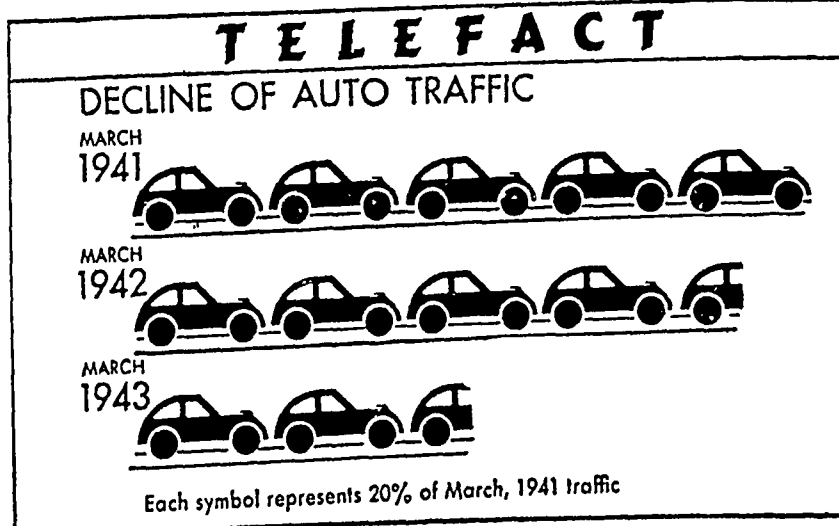

Regulations of the corps, rigidly adhered to, require that all lost-time accidents on construction projects over which the corps has jurisdiction be reported. The statistics so gathered, comprising the greatest mass of construction accident statistics and case histories ever assembled, have shown what practices cause the accidents, thereby enabling the engineers to take preventive measures.

Strict Code Enforced.

When the army's construction program was expanded in 1941 to the greatest the world has ever known, specific uniform safety requirements were established by the engineers and compliance enforced in all construction contracts.

Outstanding among the requirements were those providing for mobile first aid stations; central infirmaries staffed with trained nurses under the supervision of one or more full-time physicians on all projects where a thousand or more workers were employed; the employment of a full-time safety engineer on all similar projects, and the maintenance of a first aid log at all field stations and infirmaries.

The current program is placing the most stress on the proper use of heavy construction equipment which, although responsible for but 25 per cent of the total injuries, causes up to 52 per cent of the time lost in all accidents on construction projects.

Lipstick, Face Cream and Paint Disguise and Protect Our Fighting Men

Cosmetics for camouflage, for preventing skin chapping and sunburn, and for other similar purposes are reaching overseas theaters of operation in large quantities, the war department says.

When cosmetics are used for camouflage, the basic objective is to eliminate the bright reflection of the white skin and to obscure the paint on irregular blotches. Cosmetics

are used by virtually all combat elements including certain ground echelons of the army air forces.

Paint for face and hand camouflage has been standardized in nine colors: light green, dark green, sand, field drab, earth brown, earth yellow, loam, earth red, and olive drab. Tubes containing these shades are issued to soldiers in appropriate areas, together with small booklets of instructions.

Soldiers in desert areas, as well as

in extremely cold climates, are supplied with chap sticks, since it has been discovered that in dry desert climates lips will crack badly even in temperatures of 110 degrees.

Other important aids for the soldier are insect repellents and creams to prevent sunburn. The latter filter out the sun's burning rays but allow tanning of the skin. Hundreds of thousands of two-ounce containers of this preparation are in use by troops at the fronts.

The New York, Washington And Hollywood Express:

Nancy de Marigny will inherit \$4,000,000 from the Oakes estate when matters are probated in Canada. She also gets \$1,400,000 from the fortune Oakes left in Nassau. . . But not until she is 30, and she's 19 now. . . Wise father. . . She's virtually broke—had to hock her Nassau farm, etc., to raise \$30,000 for the defense fee. The lawyers, however, cut their retainer in half when they learned she didn't have it. . . Intimates say the reason Dorothy Thompson has been so sentimental about postwar Germany is that she'd like to be the first Ambassador to Germany after the war—to straighten them all out. She's said to be working on it already. . . Pearl Buck's comment on the Chinese situation: "We send missionaries to China so they can go to Heaven—but we won't let them into this country."

Damon Runyon, in his confession-al the other day, admitted bravely enough: "My prediction that the war in Europe will be over by Christmas now seems somewhat improbable." . . . Somewhat, indeed. . . We wondered who would make such a statement. . . We certainly never thought Runyon would want to contribute to the complacency set. . . It is comforting to learn, however, that he is the first to debunk his own error. . . We wish his friend, Richard Tregaskis, author of "Guadalcanal Diary," would tell his publishers to catch the next edition of his book and omit our name where he carelessly put it and replace it with Damon's. . . Because we never said that any war would be over at any time. . . We are the guy who always said it would never be over for some of us. . . And that when anybody asked: "When is the war going to end?" the reply has always been: "When we win it!!!"

The Statler in the Capital turned away 321 contingent reservations one day last week. . . We recently mentioned a war mother's complaint about conditions in an Army hospital (at Tuscaloosa, Ala.) for returned wounded. She told us the bed linen hadn't been changed for two weeks, the men's pajamas ditto, the food awful, etc. . . We sent her charges to the War Dept. . . As a result, the commanding officer of that hospital has been replaced and \$5,000 rushed to improve conditions. We wish servicemen's newspapers everywhere would reprint that, please.

Edmund Wilson replaces Clifton Fadiman as the book critic on The New Yorker. . . Warner's has offered Kyle Crichton of Collier's a contract to write out there. . . In Miami Beach the soldiers (who sing as they march) invariably shout: "What the hell are we fighting for? The WACS and WAVES will win the war!" . . . FDR might be amused to read page 23 of the Feb. 15th, 1908, issue of the Saturday Evening Post. The article on the page is titled: "Is Roosevelt a Menace to Business?" . . . A noted FDR booster was being teased about his loyalty. . . "Listen," said the heckler, "Willkie has his eye on the presidential chair again!" . . . "That," was the retort, "isn't quite as good as what Roosevelt's got on it."

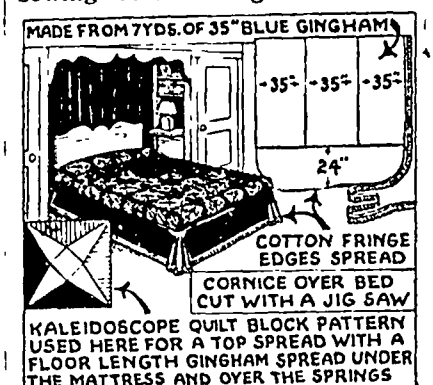

The bootlegger, who has already emerged in the firewater shortage, is one who shouldn't have the social standing he had in the Dry Era. . . Now the circumstances are different. If a man encourages a Black Market in booze just to get himself an occasional quart, he's doing something that hurts. . . The Black Market needs only something like a popular product—like booze—to crack the whole structure of price control. . . If booze gets flowing illegally, it's going to flood the works. You can drink yourself right into inflation, brother.

This is how the Astors became New York's biggest real estate operators: During the War of 1812 the blockade hurt merchants most. Astor loaned them money, refusing all collateral but mortgages. He gained all of his property through foreclosures. . . Waterfront workers have names for various piers. They are usually named after women. . . Years ago the city's biggest sporting events were races between steamships in the Hudson. . . A ship laden with gold was sunk in Hell Gate Channel, 50 years ago a part of Long Island Sound. Many attempts have been made to recover the treasure, but the gold is still there.

Recently the AP and others reported that correspondent Larry Allen (taken prisoner by the enemy) had escaped and walked for a month back to our lines. . . Later the story, never confirmed, was declared false. . . Intimates just got a postcard from the newspaper man—dated Oct. 7th. . . So, the stories that he escaped two months ago do not stand up. Mailed it from the same camp he'd been at for a year. . . A new lipstick due soon will be slogan'd: "Guaranteed to Leave Its Mark"—on letters to soldiers.

Kaleidoscope Quilt; Attractive Bed Nook

DO YOU know the Kaleidoscope quilt pattern? A block is shown here. It is put together so that from every angle it makes a different design. One of these fascinating quilts made in two tones of blue and white started all the sewing and sawing for the at-

tractive bed nook you see in the sketch. The bed and woodwork are painted white. The built-in closets and book shelves at each side of the bed are connected with a scalloped cornice of thin wood. Widths of blue gingham are stitched together for the full curtain.

NOTE—Mrs. Spears has prepared a pattern for the Kaleidoscope quilt (No. 200) and for the cornice scallops (No. 207) to be cut with a key hole or jig saw. Patterns are 15 cents each and may be ordered direct from

CALOX TOOTH POWDER

SNAPPY FACTS ABOUT RUBBER

Military requirements take the major portion of available rubber supplies for tires (for planes, trucks, and other war vehicles), troods for tanks, boats, balloons, raincoats, ponies, shoes, surgical supplies, and hundreds of other essential military items. That's why patriotic civilians take the restrictions on their rubber use in an understanding spirit.

According to the court historian to Philip II, and recorded in 1615, Columbus was credited with having found natives bounding rubber play balls (1490-1500) and to have brought some back from Hispaniola to Queen Isabella.

YOUNG ENSIGN

Harriet Louise Svendsen, 3 months old, probably does not know what it is about but the officers of her father's battalion have made her an Ensign in the nurses naval reserve corps. Harriet Louise's father is Lt Reinert Svendsen, formerly of Decorah, now stationed in the Aleutian Islands with a medical corps. The officers of the battalion had a surprise dinner party for Lt Svendsen and at the time went through the formality of making Harriet Louise an Ensign and also presented her with a war bond.

CENTENNIAL

December 5, 1943, was an important date for members of the First Congregational church of Maquoketa. On that date, they celebrated the 100th anniversary of the founding of the church. A church dinner and a historical program were held by way of celebration. The first church services were held in a log blacksmith shop banked with dirt and sod to keep out the cold. The present church building was recently remodeled.

pasture in Warren county to drive 70 head of cows to the dairy barns near Fort Des Moines.

OLD WARRANT CASHED

In 1917, J. R. Sherman of Clarinda witnessed what might have been the first automobile accident in the county. At a coroner's hearing later, Mr Sherman was called as a witness and received a court warrant for \$1.00. He misplaced the warrant among cancelled checks and found it only last week. The warrant, now 27 years old, was cashed at the Page county treasurer's office.

RETIREES FROM SERVICE

For 37½ years, Hugh O'Neill of Clarion carried mail to rural patrons of the local postoffice. On November 30, Mr O'Neill retired from the service. He started carrying mail on February 1, 1902 and with the exception of three and one-half years has been working continuously at the job. He has traveled approximately 340,950 miles in that length of time.

KILLERS CAUGHT

Poultry on the Glen Knox farm in Marion county have been the claimed victims of foxes this fall. Mr. Knox set two steel traps, one on each side of an opening in a fence corner, hoping to catch one fox. The next morning he found two red foxes, one in each trap. Mr Knox has caught eight foxes this fall.

PREPARED

The Emmetsburg City Council is doing its best to prevent skating accidents on unsafe ice on Medium lake. It has ordered erection of signs saying "Ice Unsafe For Skating." When the ice is safe enough for youngsters to skate on, the sign will be removed. Arrangements have been made to move to the lake the shelter house owned by the Emmetsburg Legion post.

COW SLIPS

Donald Flakerud of Ridgeway was injured when a cow slipped on a barn floor and fell on him. The cow started to arise but again fell on him. Donald received torn ligaments in his leg, and a broken bone in his knee.

SKETCH

A contestant on a recent Dr I Q radio program failed to identify Eleanor Roosevelt from the first clue given in a biographical sketch submitted by Mrs. Daryl Ross of Arlington. Mrs. Ross received \$275 from the sponsors for the sketch.

ARDELLA NELSON ON HONOR ROLL

The name of Ardella Nelson appeared on the Super-Honor Roll for the fall quarter recently released by the Hamilton School of Commerce, Mason City. Super-Honor Roll requirements are a grade point average of 3.5 with no grades below B. Miss Nelson is enrolled on the Junior Secretarial Course at the Hamilton School.

HELLO, FOLKS!

Mr. and Mrs. Ernest Pringnitz are the parents of a 10 pound baby boy born to them at the Rust Nursing Home at Garner, on Wednesday morning, December 15th.

Mr. and Mrs. John Waddingham are the parents of a baby girl born to them Monday, December 20th. The little miss tipped the scales at 5 pounds and 8 ounces.

CHRISTMAS EVE PROGRAMS AT KLEMME CHURCHES

There will be Christmas Eve programs at both the Klemme Reformed and Methodist Churches on Friday evening, December 25th, beginning at 7:30 o'clock.

A Christmas Eve program will begin at the Liberty Methodist Church at 7:30 o'clock.

POSSIBLY VALUABLE

A coin made of a metal resembling brass has been found by Ben Struckman of Little Rock. The coin is about the size of a nickel and has a head and lettering on one side. The other side is plain. The word "Vercingetorix" is printed on the head side. That is believed to refer to one of Caesar's governors who died in 46 B. C.

GLITTERING more fantastically than the jewels of Aladdin's cave are the Christmas trees in the windows of this town and adjoining farm areas. Everywhere, everywhere Christmas, and the spirit which Christmas brings.

We love this town and its environs. We have grown up here and have come to regard ourselves as "a fixture." We have a great many friends, "but not a friend to spare," and at this time we want to thank them, one and all.

YES, CHRISTMAS COMES BUT ONCE A YEAR, SO IT BEHOOVES US ALL TO MAKE THE VERY MOST OF IT. ON THE EVE OF THIS JOYOUS SEASON WE TAKE GREAT PLEASURE IN WISHING ALL OUR FRIENDS THE FULLEST MEASURE OF CHRISTMAS JOY AND HAPPINESS.

HOUSEHOLD MEMOS

by Lynn Chambers

Conserve Sugar, but Satisfy Sweet Tooth (See Recipes Below)

Saving on Sugar

Conservative summer and fall can leave many a family low on sugar. Homemakers are writing in and asking for recipes which will give their families "just something to satisfy the sweet tooth"—but that something must be sugar-saving.

That jellies are rationed you have to use what sugar you get for putting up those juices canned during summer for jelly that means there will be less than before left for baking. Sugar substitutes can be utilized not only in cakes and cookies, desserts and icings. Many cake mixes, too, can be made with less than they call for.

Out-of-season now include cranberries which are perfectly delicious in this steamed pudding:

Steamed Cranberry Pudding. (Serves 4)

2 cups fresh cranberries
1 1/2 cups flour
2 teaspoons salt
1/2 teaspoon cinnamon
1/2 teaspoon cloves
1/2 teaspoon mace
2 teaspoons soda
1/2 cup hot water
1/2 cup molasses
flour, salt, spices and soda; cranberries in two and add to ingredients. Combine hot water and molasses; blend with first. Transfer to greased pudding mold, cover and steam 2 1/2 hours. Unmold and serve with your favorite pudding sauce.

Chocolates satisfy the sweet tooth in your family? Here is a lovely dessert:

Chocolate Puff Souffle. (Serves 6)

1/2 7-ounce package semi-sweet chocolate
1 cup milk
3 tablespoons sugar
Pinch of salt
1 tablespoon vanilla
3 eggs
Melt chocolate with milk in top of double boiler. Beat with egg beater smooth. Add sugar, salt, vanilla and unbeaten eggs; beat with beater 1 minute. Cover, and pour boiling water 20 minutes over lifting cover. Remove from heat and serve immediately with cream.

It is possible to make cakes with any sugar at all, but better results can be achieved if some sugar is used in the cake. Too many all-purpose cakes have a coarse texture which we are unaccustomed after years of light, fine-grained cakes. Here are suggestions which you can add to your wartime ration collection:

Lynn Says:

Starve the Garbage Can! Precious vitamins lie right underneath the thin skin of carrots. Don't pare, just scrub the vegetable. The same is true of potatoes. Rub well and cook with skins on, then eat skins and all. Young beets can be cooked as green beans. Season and serve. They'll be delighted. Tops of spring onions make wonderful seasoning. Celery tops are grand for soups, salads. Harsher parts of celery can be freed for soup. Carrot and radish tops are attractive for garnishes. Parsley and lettuce are more than garnish—they're to be eaten. Check refrigerator every morning—and the bread box, too. Use every bit of leftover in that day's meals.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

Of The Moody Bible Institute of Chicago.
Released by Western Newspaper Union.

Lesson for December 19

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

CHRIST THE FULFILLMENT OF THE LAW

LESSON TEXT—Hebrews 1:1-3; Romans 10:4-10.
GOLDEN TEXT—God hath in these last days spoken unto us by His Son.—Hebrews 1:1-2

The center of all Christian thinking is the fact that God has revealed Himself to man. This revelation is found in the Bible, for it is the Word of God. That is why the commandments which we have studied in recent weeks speak to us with such authority. They are not the expression of human opinion of how we should live. They are God's commands which we are to obey.

The great and final revelation of God and His love was not the written Word—the Bible—but the Living Word—His Son. The coming of Christ is our lesson for next week, on Christmas Sunday. But this week we want to learn a little more of what His coming into the world meant. He was—

I. God's Last Word (Heb. 1:1-3).

Through the ages God had been speaking through the prophets, constantly revealing Himself as a God of power, justice, holiness, truth and mercy.

In different ways and at various times (v. 1) He spoke through them, but always there was a pointing forward to the One who should come. Abraham was called out to found the nation (Gen. 12), and Jacob the family or tribe (Gen. 49), in which He should come. He was to be a prophet like Moses (Deut. 18) and of the kingly house of David (II Sam. 7). All the offerings of Leviticus spoke of His priestly service. Isaiah saw Him as both the reigning and the suffering Messiah (Isa. 53).

All this was incomplete until He came, and when He did, He revealed all the glory of God. He made the perfect and final sacrifice for sin, and sat down (His work was finished) at God's right hand (the place of power).

Let us be clear about this: in Christ God's revelation is perfect and complete. We need look for nothing more. The claims of those who appear with a "new light" or some mysterious hidden power are so obviously untrue that we ought not to be at all interested.

But not only is Christ God's final Word, He is—

II. God's Best Word (Heb. 1:4-9).

The prophets and their messages thrill our souls and move us to more earnest living. But the Christ is our very life as well as our Redeemer.

The angels are God's messengers—mighty and magnificent beings, superior in their way to man (Ps. 8:5). The early church made too much of angels (as do some groups today), but Protestantism of our day has made too little of them. They are great and powerful beings who minister on our behalf and who are honored in the loyal service they do for God.

But when they stand beside the Son of God, it becomes evident that He holds a place of incomparable glory and majesty. He is the highest revelation of God, the best Word that God could have spoken to needy and sinful humanity.

We do well to think of who Christ is and what He has done. Just in this passage from Hebrews we find that He is the express image of all of God's glory; He is the upholder of all creation; He has the place of honor and power at God's right hand; He is the only begotten of the Father; His throne has been established forever, and so on.

How well might unbelievable that this glorious One is also our Saviour. This is stated in verse 3, but is developed in our next point.

III. God's Saving Word (Rom. 10:4-10).

If sinful man were only permitted to look on His glory it would be a great privilege, but it would not help him in his desire for holiness and eternal joy. There was a "great gulf fixed" between sinful man and a holy God until the Son of glory became the God-man, when the eternal Word became "flesh and dwelt among us" (Luke 2:14).

Christ as our Saviour is the "end of the law" to the believer (v. 4), not in the sense that He terminates the law by setting it aside, but by completing or fulfilling all of its requirements.

Just so the Christian is set free from the law, not in order that he may disobey it, but that he may keep it in the power and grace which Christ gives him. The Ten Commandments are the law of life for the Christian because he loves the Lord Jesus Christ and wants to obey Him. We do the things which the Decalogue require not to be saved thereby, but because we thereby honor the name of our Saviour.

The unbeliever, struggling under the burden of sin, says, "How can I come to know Him?" and we find the answer in verses 8-10. It is "by faith."

ASK ME ? ANOTHER ?

A quiz with answers offering information on various subjects

The Questions

1. The United States has had how many national political parties?
2. A harp usually has how many strings?
3. Who wrote the Virginia statute for religious freedom?
4. Do men in the armed forces of the United States have a draft classification?
5. According to legend, who stole fire from heaven and bestowed it upon mortals?

6. Where did the ancient Pitts live?
7. How many equal sides has an isosceles triangle?

The Answers

1. Thirty-five, only five of which have elected Presidents.
2. Forty-six strings.
3. Thomas Jefferson.
4. Yes, Class 1-C.
5. Prometheus.
6. Britain.
7. Two equal sides.

Local Happenings

Klemme and Vicinity

Merry Christmas, everybody!

We still have a few nice boxes of Christmas cards. Times Office.

Mr. and Mrs. Richard Ax were dinner guests Friday evening at the home of Mr. and Mrs. Caris Kropp.

Allan Barz began work last week for the Central States Electric Co. at Garner and last week was reading meters in Klemme.

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Mr. and Mrs. Otto Lemke and Mrs. C. A. Larsen were visiting in Mason City last Thursday.

Mrs. Hulda Wiles came Thursday from Des Moines for a visit with Klemme friends.

Wallace Pavey was ill with the flu over the week end and unable to be at his shop.

Merlin Neuberger was ill with the flu over the week end and his father, John Neuberger, went out to the farm to do the chores.

Miss Ruth Johnson of Des Moines spent the week end visiting at the home of her parents, Mr. and Mrs. John Johnson, east of town.

Mrs. Ethel Swanson Peterson spent several days of the past week in Des Moines visiting at the John Etchen home.

Mrs. Sumner Trumbell went to Des Moines last week for a couple of weeks visit at the Clair West home.

Henry Helps, who has been ill for the past four weeks, is still confined to his bed, but is much better.

Mrs. Wm. Meyer and daughters of near Miller were doing their Christmas shopping in Klemme Tuesday.

Miss Irene Harms, who teaches at Newton, Ia., came the latter part of the week to spend her Christmas vacation visiting at the James Thomas home.

Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox; Mrs. R. A. Jorgenson, and Mrs. John Clements were visiting in Algona Tuesday afternoon.

There was a large crowd present at the Methodist Church Sunday evening to see the pageant presented by the young people. Mrs. H. N. Campbell directed the play.

Alfred Schlei of Fenton was in Klemme on business Thursday and visiting with relatives and friends. Alfred has been at Fenton now for about a year.

Mr. and Mrs. Luther Schmidt, who were married recently, moved into the Albert Schmidt house in the north part of town last Wednesday. Luther will farm the land and deal in livestock.

Miss Luella Lewis, who is taking Army Nurses Training at the Des Moines Methodist Hospital, came home Tuesday to visit over Christmas with her parents, Mr. and Mrs. Verner Lewis.

Wm Thiel, who held a closing out sale at his farm northeast of town a couple of weeks ago, moved to Klemme Monday. Mr. Thiel sometime ago purchased the house one block north of the Community Hall, where he is now living.

Mrs. J. J. Stille, who held a public sale at her farm a few weeks ago, moved to town last Thursday. Mrs. Stille purchased the Mrs. Elizabeth Smid home south of the Park on Main street and is now getting comfortably settled in her new home.

Howard Schoenwetter of Athens, Georgia, arrived home Saturday to spend the holidays visiting with his parents, Mr. and Mrs. George Schoenwetter in Liberty township. Howard is a teacher in the University of Georgia and specializes in instructing army men.

Cards and letters from Mrs. J. N. Day and Mrs. Ira Overholt say they had a nice trip to California and that they are enjoying themselves. Mrs. Day is visiting at the home of her son, Dorance, and Mrs. Overholt is with her daughter, both at Los Angeles.

Calvin "Bill" Grosshuesch, who is a freshman at Mission House College at Plymouth, Wisconsin, came home Monday to spend the Christmas vacation with his parents, Rev. and Mrs. Calvin Grosshuesch. Reuben Grosshuesch, who is student in the Seminary at Plymouth, will arrive home later in the week.

The Times received a card from Mrs. Antonio Keraus, who is spending the winter with her son, Jesse and family at Alameta, California. The town is near San Francisco, and Mrs. Keraus says the weather is foggy and damp and not too enjoyable. The climate further south is much better, she says.

RURAL YOUNG PEOPLE HAD XMAS PARTY

The Hancock County Rural Young Peoples group enjoyed a Christmas party at the Central States building in Britt on Monday evening, December 13.

Recreation was enjoyed followed by a grab bag exchange of gifts.

A business meeting was held and the following officers were elected for 1944. Pres., Iris Abele. Garner; Vice President, Lucille Anderson, Woden; Secretary, Lillian McDermott, Britt; Treasurer, Walter Andersen, Woden; Reporter, Anna Jane Olson, Garner.

Miss Muriel Stille of Garner led the group in Carol singing.

Refreshments were served at the close of the meeting by the committee in charge.

FIFTY-FIFTY CLASS HAD PARTY

The Fifty-Fifty Class of the Methodist Sunday school held a Christmas party Monday evening at the home of Rev. and Mrs. H. E. Harvey.

Games were played and gifts exchanged and Mrs. Harvey and Mrs. J. A. Chambers served lunch.

Moving pictures were shown by Dwight Hummel.

Clifford Montgomery was elected president; George Dodd, Vice-president and Mrs. Dwight Hummel secretary for the coming year.

A slot ventilator on the south side of the laying house helps control draft and moisture and thus promotes good health in the flock.

Store News

Mr. Ben Ruter, Mr. and Mrs. John Ruter, and Mrs. W. Willen from Amsterdam township, were Klemme shoppers Thursday. Mr. Ben Ruter had a farm auction recently and is moving to Kanawha. His son John and family will operate the farm. This was their first visit to Klemme. They purchased linoleums, rugs, rocking chairs, a dining table and a desk.

A new three-room tenant house has been moved onto the Bellamy-Kinsey farm east of Klemme. While in town Thursday Mr. Bellamy arranged to have us cover the three new floors with good linoleum.

Mr. and Mrs. LuVerne Thompson from Corwith, and Mr. and Mrs. Wm Erdman from Kanawha, were shoppers in our Linoleum Department, Friday.

Mrs. Howard Shahan and Mrs. Peter Pals, Jr., from Belmond, came to Klemme early this week in a pick-up and loaded it up with purchases.

Mr and Mrs Clarence Bast, of Ventura, were in Klemme Tuesday with their pick-up and hauled away a nice knee-hole desk, and a beautiful platform rocker.

The Otto Neuhring family, who now live west of Mason City, will move March 1st to the L. R. Boomhower farm a mile east of the Mason City Sugar Factory. Mr. and Mrs. Neuhring were in Klemme this week making purchases of home furnishings needed for the nice large home on the new farm.

George Morgan, night watchman at the Britt Hemp Plant, bought a heavy inlaid linoleum for their kitchen as a Christmas gift for his wife.

Mr. and Mrs. Emory Thompson of Belmond Route 2, also selected kitchen linoleum this week.

The above are just a few of the farther-out customers who visited our store this week.

EMIL BEIER TO HOLD CLOSING OUT SALE JANUARY 12

The Times has printed sale bills for Emil Beier who will hold a closing out sale on his farm 3 mi west and ¼ mi south of Klemme on Wednesday, January 12th. The sale ad will be published in The Klemme Times next week.

Listed is Mr. Beier's herd of fine Holstein cattle. These cows have a high production record. Other livestock includes 6 horses, 40 hogs, 12 sheep and poultry, besides a full line of machinery, some household goods and hay.

Watch for the big ad next week

ELL TOWNSHIP FARM BUREAU MET AT WEAVER SCHOOL

The Ell township Farm Bureau held its regular meeting Friday evening December 17. Ell No. 3 school pupils gave a Christmas program.

Reports were given by Mrs. L. T. Weaver, Township Chairman; Addis Greiman, Township director. A short talk on "Feed and Livestock Conservation" was given by County Extension Director, Paul Henderson. A lunch was served by the committee.

BACHELORS WILL SERVE AT NEXT MEETING

When the Legion and Auxiliary meets on Tuesday evening, Jan. 4 at the Community Hall, the bachelors will serve lunch after the meeting. Those on the serving committee are: Ernest Henschen, Jeff Bell, Albert Kraus, and Charles Hitt.

SHAMROCKS PLAY CRYSTAL LAKE HERE TUESDAY EVE

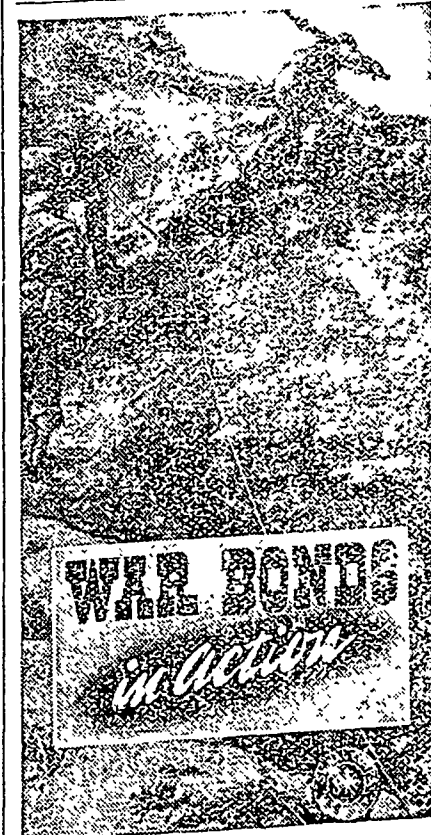

Crystal Lake comes to Klemme Tuesday evening, January 4, for a double header basketball game with the Shamrocks.

For a curtain riser beginning at 7:00 o'clock, the Kanawha grades will tangle with the Klemme mid-

KLEMMIE BUSINESS PLACES CLOSE NEW YEAR'S DAY

As previously announced places of business in Klemme will be closed all day Saturday, January 1st.

Post Office Hours
Postmaster Day announces that the post office will be open only on the following hours on New Year's day:
7:00 a. m. until 10:00 a. m.
3:30 p. m. until 5:00 p. m.

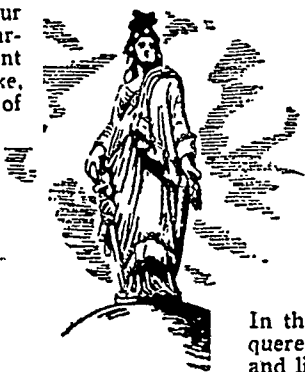

Over the top in Italy! One more ridge, one more mile on the road to Berlin.
As in victorious military campaigns, people on the home front must sacrifice to provide all the sinews of war. One of these is the regular purchase of War Bonds.

U. S. Treasury Department

BONDS OVER AMERICA

Surmounting the Capitol Dome at Washington stands Crawford's bronze statue of Freedom, symbol of the freedom and liberty our government has guaranteed to immigrant and native citizen alike, since the founding of the Republic.

Home of Freedom

Keep America Free;
Buy War Bonds

In the capitals of conquered Europe freedom and liberty are hollow, mocking words mouthed by jackal puppets like Mussert, Quisling, Laval, Degrelle or Laurel.

Miss Betty Ward Became A Bride Christmas Day

CEREMONY PERFORMED AT METHODIST PARSONAGE CHRISTMAS DAY

Bride Is A Graduate Of The Klemme High School, Attended Business College

Miss Betty Gene Ward, eldest daughter of Mr. and Mrs. Henry N. Ward, Klemme and Mr. Melvin R. Schaefer, eldest son of Mr. and Mrs. Elmer Schaefer of Garner were united in marriage at the Parsonage of the Methodist Church in Klemme on Saturday afternoon December 25 at 4:30 o'clock with Rev. Herschel E. Harvey officiating at the single ring ceremony.

Miss Velda Schaeffer, sister of the groom, acted as bride-maid and Burr Church, uncle of the bride, was best man.

The bride wore a light blue two piece dress trimmed in wide white r-c-rac. Her hat was also light blue. Her locket was gift of the groom.

Miss Schaefer wore a darker blue dress trimmed in blue braid, and a light blue hat. She also wore a locket.

The bride's corsage was white baby chrysanthemum and the bridesmaid's was of mixed colors.

The groom and best man both wore dark suits and white chrysanthemum boutonniers.

After the ceremony the couple went to the home of Mrs. Mary Church, grandmother of the bride, for dinner.

Mrs. Schaefer was a 1943 graduate of the Klemme High School and attended Hamilton College of Commerce this fall. The groom graduated from Hancock County Schools and has since been engaged in farming.

The couple will reside at the home of his parents for the present.

COUNTY GETS 1944 QUOTA OF MACHINERY

The Hancock county agricultural committee has received its quota of farm machinery for Hancock county for 1944 as follows: Pickup balers, 7; combines, 20; cornpickers, 35; tractors, 67.

Applications far exceed the quota and the machinery situation in the county will not be materially benefited. The committee recently met with implement dealers in the county to discuss the machinery and repair situation.

HANCOCK COUNTY PICKS TWO UNIFORM TEXT BOOKS

The Hancock county board of education has adopted 2 uniform text books to be installed in Hancock county rural schools next year. They are language for grades 1 to 8 inclusive and a standard dictionary. A hearing on this matter will be held in the office of County Superintendent Charles S. Whitney March 7, 1944. During 1943 readers and science books were installed as the first in a uniform series of text books to be used in the county.

SPECIAL FEATURES IN THIS ISSUE

We want to call the attention of our readers to two very interesting features in this issue of The Times.

On page two you will find a complete summary of the most important events of the past year, under the heading "The Year In Review."

On page three is a cut of "The World Calendar," with all years alike, all quarters alike and with all holidays coming on the same week day of the year.

This calendar may be adopted after the war.

SELF-FEEDING IS BEST WITH HENS

Self-feeding high protein concentrate and grain to poultry is economical. This has been shown by tests conducted at Washington State College.

W. R. Whitfield, Iowa State College extension poultryman, recommends the summary of the tests as one answer for poultrymen who seek a feeding method that will get good wartime production with a minimum of labor and feed.

Compared Methods

The following methods were tried: All mash; mash self-fed with grain hand-fed; mash (18 percent protein) and grain both hand-fed; and high protein concentrate and grain both self-fed. The test period was 9 months.

The all mash method obtained an average of 118 eggs per hen for the 9-months period and required 6.3 pounds of feed per dozen eggs. It cost 11½ cents per dozen to produce the eggs. When the mash was self-fed and the grain hand-fed, egg production averaged 123 eggs per hen. When mash and grain were both self-fed, production averaged 136 eggs.

Concentrate

Self-feeding the concentrate with grain brought an average production of 150 eggs per hen. This method had the lowest feed requirement—4.9 pounds of feeds per dozen eggs—and the eggs cost only 8.6 cents per dozen. The three other methods resulted in higher feed requirements and production costs ranged up to 9.5 cents per dozen.

ELL 4-H BOYS AND GIRLS HOLD CHRISTMAS PARTY

Ell Township 4-H boys and girls held a meeting Monday night at the home of their leaders, Mr. and Mrs. Emory Weaver. The boys discussed farm records. Donald Greiman and James Steward led the discussion.

The girls group sang songs from the folk music leaflet. It was reported that \$25 worth of war stamps had been sold by the girls to other people.

After the business meetings a Christmas party was enjoyed with Mr. and Mrs. Weaver, Lincoln Goll and Bernice Weaver in charge.

1943 Conservation Review Is Given By Game Commission

A brief review of the 1943 fur, fish, and game take in Iowa gives a great deal of satisfaction to game officials and sportsmen alike. The over-all picture of hunting, fishing and trapping makes it possible for the Conservation Commission to state unqualifiedly that 1943 has been the best enjoyed by sportsmen in modern times.

The fishing season opened and closed with excellent angling in practically all waters of the state. Except for periods when the streams were high in midsummer and for a mediocre trout season, angling was tops. Catfishing in particular was good, with many fishermen aiding shortage of rationed meats with regular catfish dinners. The commission had the novel experience of being requested by some local residents at Spirit Lake to temporarily close fishing in that lake to prevent too many fish from being taken.

The brightest spot in a bright hunting picture has been the remarkably good quail hunting. The quail season was extended 15 days beyond the regular open season because of extremely heavy quail populations. At the close of the season game technicians stated that only a small portion of the surplus quail were taken by hunters and that the quail population is much greater than in the previous banner year, 1939.

The next rosy glow in '43 hunting was the pleasant season. After a spring season of eight days, the Conservation Commission by administrative order made 37 open days for the fall shoot. With more birds and heavier cover, plus a six daily bag limit and 18 possession limit, Iowa's pheasant hunters this year apparently got their fill of pheasant shooting. In spite of the fact that one hen could be included in the bag in much of the territory, post-season observations indicate a heavy breeding stock throughout the pheasant territory.

Squirrel hunters had an excellent season, and these animals, too, enter the winter with heavy breed ing stocks. Cottontail rabbits, while not so numerous in the south part of the state as a few years ago have continued to show increases and heavy populations exist in many sections of both northern and southern Iowa.

The duck season, set 15 days earlier than in recent years, was far the most part good. The earlier opening allowed a great deal of blue-winged teal shooting before this fine duck had left the state. An early November storm sent millions of the estimated 150,000,000 duck population through Iowa, and for several days splendid duck shooting was enjoyed in localities that for the past two decades had become accustomed to a duck famine. After this flight many ducks returned north, and hundreds of

fat, corn-fed mallards remained on northern Iowa lakes at the close of the season. With more ducks migrating through Iowa this year than for many years, some of the best duck hunting grounds furnished little or no duck shooting.

The fur animal take this year has been greater than in any year since fur records have been kept by the Conservation Commission, and although final figures on the take have not been received, furs are certain to double and possibly triple the '42 figure. The only fur-bearing animal that has not shown an increase has been skunk, in other years one of the "big four". Muskrats, Iowa's number one fur bearer, have shown the greatest increase, and high fur prices and open weather have allowed trappers to crop them dangerously close in some areas. Indications are that mink and raccoon both have been heavily tapped. However, it appears that there will be ample seed-stock of these and the other fur bearers to guarantee a good 1944 season.

THIS IS TIME OF YEAR TO LOOK OUT FOR FIRE

The time of year is approaching when fire prevention measures should be maintained most carefully in Iowa, according to Harold Beatty, Iowa State College extension agricultural engineer.

Studies at the Iowa State College Experiment Station show that January, February and March comprise the period when fires are most frequent and do the greatest damage. The greatest number of dwelling fires occur during the latter two months.

Operation of heating systems accounts for prevalence of dwelling fires during the winter months. As a safety measure Beatty suggests, make certain that the draft is open and the check is closed on the furnace or stove when the fire is started. Check the damper and air-draft control carefully before retiring for the night.

As further measures to keep fire as your friend and not as your enemy, don't use gasoline or kerosene to start or revive fires, and do keep the ashes in metal containers away from the building. Keep oil stoves and lamps away from drafty locations and away from curtains and other inflammable materials. Fill the fuel tanks in daylight away from flames.

Careful attention to these safety measures will help reduce the number of dwelling fires and will cut down on the toll of 1¼ to 1½ million dollars property damage and loss of life which is the average annual cost of fire.

Mr. and Mrs. H. O. Halverson of Britt, were visitors at the Lewis Mau home Sunday.

Boy Trapper And Mink

SALERNO

RUSSIAN VICTORY

The Year in Review

Chronology
OF THE YEAR
1945

The year began with these important events:

- January**
- 1—Russians capture Veliky Luki, great railway center.
 - 6—78th Congress convenes.
 - 23—British troops enter Tripoli, capital of Libya.
 - 25—Advancing Russians take Voronezh, Nazi anchor.
 - 26—"Unconditional Surrender" agreement of Casablanca conference announced.

January

- 1—Russians recapture Veliky Luki, railroad center.
- 1—U. S. Department of War Information announces 61,126 service casualties to date.
- 12—U. S. planes based in Africa bomb Naples, Italy.
- 13—British take 40 miles from Tripoli.
- 23—British enter Tripoli, Libyan capital.
- 25—Voronezh, big Nazi stronghold, falls to Russians.
- 26—"Unconditional Surrender" agreement of Casablanca announced.

February

- 2—Last German troops surrender in Stalingrad, U. S. Naval forces repel major Japanese attacks in Solomons area.
- 6—Allied headquarters establish separate U. S. command for North Africa.
- 14—Last Japs withdraw from Guadalcanal.
- 14—Rostov and Voroshilovgrad captured by Russians.
- 15—Russians take Kharkov, important base.
- 16—Cruiser Chicago is sunk by Japs; U. S. Navy reports 15 Jap ships hit.
- 26—U. S. flyers raid Kiska in Aleutians.

March

- 3—Rzhev retaken by Russians.
- 4—Allied bombers destroy Jap convoy of 22 ships.
- 11—British attack Mareh line in Tunisia.
- 11—Allied forces take Gafsa in Tunisia.
- 20—Chinese check Jap drive in Hupeh-Hunan region.
- 24—Advancing Russians retake Abinsk and other towns near Smolensk.
- 26—U. S. and British troops advance in Tunisia.
- 31—British take Matoula and two other cities in Tunisia.

April

- 1—Fortresses raid Cagliari, Sardinia; Chinese drive Japs back into Burma.
- 4—Chinese retake Chuchichuan.
- 5—Allies bomb Naples, Kiel, Antwerp, Brest.
- 10—British capture Sfax, important Tunisian port.
- 17—Bremen and other north German cities bombed in "biggest raid."
- 20—Russians attack on Kuban front.
- 21—Japanese execute U. S. fliers.
- 23—U. S. Naval forces occupy Funafuti Islands, southwest Pacific.

May

- 7—Bizerte falls to Americans; British first army takes Tunis.
- 14—Last resistance ends in North Africa.
- 15—Nazis attack in Kuban, Russian front.
- 19—U. S. bombers raid Pantelleria, Italian island fortress.
- 23—Guerrilla warfare spreads in Balkans.
- 23—Japs admit loss of Attu.
- 31—French Alexandria fleet joins Allies.

June

- 9—Curtin says invasion danger past in Australia.
- 11—Pantelleria, Italian island fortress, surrenders.
- 12—Lampedusa, fortified Italian island, capitulates.
- 13—Chinese recapture Sungtze, port city.
- 15—Chinese charge Japs use gas.
- 16—RAF bombs Cologne.
- 30—U. S. forces land on Rendova, in Solomons.

July

- 1—Rendova taken by U. S. forces.
- 5—Russians launch offensive on 160 mile front; U. S. Navy battles Japs off Solomons.
- 12—British capture Syracuse.
- 23—U. S. troops enter Palermo.
- 24—Americans take Marsala, Trapani.
- 25—RUSSO-LIBYAN RESCUES KING EMMANUEL ASSUMES GOVERNMENT.
- 26—RAF raids Hamburg, Hanover, Essen.
- 27—Italian peace negotiations begin.
- 28—Fascist party dissolved Riots sweep Italy.

August

- 1—U. S. planes bomb Ploesti refineries.
- 5—Russians take Orel; British capture Catania, in Sicily.
- 6—Americans occupy Munda, in Solomons.
- 11—Russians drive into Ukraine.
- 17—Allies enter Messina, Island of Vela Lavella in Solomons taken.
- 21—Resistance ends on Sicily.
- 21—U. S. and Canadian troops occupy Kiska.
- 24—Quebec conference on war plans ends.
- 25—British Admiral Mountbatten made chief of Allied Southeast Asia command.
- 30—Russians retake Taganrog, Nazi anchor.

September

- 1—Japs withdraw air base from New Guinea.
- 2—Allied forces invade mainland of Italy near Reggio Calabria.
- 7—Allies capture Polini, Dellanovva.
- 8—ITALY SURRENDERS UNCONDITIONALLY, Stalino, steel center, falls to Russians.
- 9—British troops take Taranto; Greatest Allied raid strikes northern France.
- 10—Germans seize Rome.
- 11—Allies take Salerno, Italian fleet surrenders.
- 14—Salamanca falls to U. S. and Australian forces.
- 16—Novorossiysk recaptured by Russians.
- 24—Nazi troops evacuate Corsica.
- 26—Jap defense at Finschhafen stiffens.
- 30—British take Foggia.

October

- 1—Allied forces take Naples, 22 days after landing at Salerno.
- 3—Australian troops capture Jap base at Finschhafen, New Guinea.
- 5—Island of Corsica, in Mediterranean, is freed of Nazis.
- 9—Russians complete mopping up of Caucasus region.
- 13—Italy formally declares war on Germany, by action of Premier Marshal Badoglio.
- 14—In great raid on Schweinfurt, Germany, important ball-bearing factories are

destroyed, at a cost of 60 Flying Fortresses; Japanese, continuing thrusts from Burma, invade Yunnan province, China.

November

- 1—Russian troops isolate Crimean peninsula, cutting off escape for many thousands of German soldiers.
- 2—U. S. Marines invade Bougainville island in northern Solomons.
- 4—RAF planes drop more than 2,000 tons of bombs on U. S. Dusseldorf, Germany.
- 6—Key capital of the Ukraine, retaken by Russians.
- 7—British Eighth army advances in Italy, taking eight towns.
- 11—Nazis scuttle ships, blast installations to block harbors of Leghorn and Pescara.
- 13—Russians capture Zhitomir, important rail center of southern front, Chinese forces report gains along Yangtze river.
- 19—Greatest raid in history blazes Berlin, dropping 2,500 tons.
- 23—Another huge air attack smashes Berlin. One-fourth of city said to be razed. Makin island, member of Gilbert group, is taken by U. S. combined forces.
- 26—Russians rip 37-mile-wide gap in Nazi lines north of Gomel.
- 27—Marines take Tarawa, one of Gilbert Islands, after "toughest fighting" in their history.
- 30—British Eighth army bursts through Nazi lines in Italy, approaching Rome.

December

- 1—RAF and U. S. bombers continue massive raids, hitting Dusseldorf region. President Roosevelt meets with Churchill and Chiang Kai-shek in Cairo, Egypt. Agree to "strip Japan of her stolen empire."
- 6—Roosevelt, Churchill and Stalin meet at Teheran, Iran, reach "complete agreement on measures to crush Germany."
- 7—U. S. naval task force raids Marshall Islands.
- 7—Chinese admit loss of Changteh, important city in "rice bowl."
- 9—Turkey promises Allies all "aid short of war," Chinese recapture Changteh.
- 13—Russian troops regain initiative in Kiev front; British Eighth army cracks Nazi line in Italy, capturing 6,000.
- 14—President Roosevelt, returning from conferences, visits Malta and Sicily.
- 15—American planes raid Greece; U. S. heavy bombers smash Jap base on New Britain Island.
- 16—Prime Minister Churchill stricken by pneumonia, German bombers sink 17 United Nations merchant ships.
- 17—American Sixth army lands at Arawe, on New Britain Island, southwest Pacific.

January

- 1—President Roosevelt calls for unity among Allies, stresses "the supreme necessity of planning what is to come after the war."
- 4—U. S. Supreme court frees Thomas Pendergast, Democratic political leader of Kansas City, under statute of limitations ruling.
- 6—78th Congress convenes, Samuel Rayburn speaker of house for third term; Pleasure driving banned in eastern states, Fuel oil ration reduced 25 per cent.
- 11—U. S. and Britain relinquish extraterritorial rights in China.
- 12—OPA sets corn ceilings at approximately \$1 a bushel.
- 28—Joint staff system, by which men can be inducted into navy, marines and coast guard as well as army, announced.

February

- 8—National income in 1942 was \$113,824,000,000 as compared with \$94,500,000,000 in 1941.
- 9—Roosevelt orders 48-hour work week minimum in labor shortage areas.
- 12—President Roosevelt promises stepped up attacks on Europe and Japan.
- 14—Mme Chiang Kai-shek addresses Congress asking for more vigorous prosecution of the war on Japan.
- 20—Dried foods rationed, effective March 1.
- 23—Secretary of Agriculture Wickard suspends wheat quotas.

March

- 2—U. S. and Chile representatives sign lend-lease agreement.
- 7—Draft classification "4H" for men between 28 and 45 ended.
- 11—Lend-lease extension to July, 1944, signed by President.
- 24—Establishment of naval base at Casablanca announced by navy.
- 25—Chester Davis named Food Administrator.
- 29—"Critical shortage of doctors is developing," an OWI survey reveals.

April

- 8—President moves to check inflation by executive order freezing wages and forbidding war workers to change jobs.
- 10—Feed of wheat, selling prices raised from \$1.02 a bushel to \$1.07.
- 11—A bill permitting the national debt limit to rise to 210 billion dollars, and a rider repealing the \$25,000 net salary limit becomelaw without president's signature.
- 20—President Roosevelt confers on war and postwar problems with President C. Macho of Mexico.
- 30—Soft coal miners of United Mine Workers union reject President Roosevelt's order; U. S. breaks relations with Martinique.

May

- 1—Federal government takes over closed coal mines.
- 11—Churchill arrives in Washington for war conference.
- 13—Merger between Western Union and Telegraph companies is completed.
- 26—NLRB approves eight cent an hour raise for more than a million non-operating railway workers.
- 27—Machinis's union, with 565,000 members, withdraws from the AFL.

June

- 3—United Nations food conference ends.
- 7—Coal miners of the United Mine Workers union return to work.
- 10—President signs "pay-as-you-go" income tax bill.
- 21—Riots in Detroit between white and colored mobs are suppressed by Federal troops, after more than 24 hours of disorder. Twenty-nine killed, 700 injured; Coal miners strike for third time since 1902.
- 23—President Roosevelt threatens to draft strikers in essential industries.
- 28—Judge Marvin Jones succeeds Chester Davis as War Food Administrator.
- 29—Federal court of appeals in Chicago grants new trials to six persons convicted of aiding Herbert Haupt, executed spy.
- 30—Five senators appointed to visit war zones and report on U. S. Army and Navy.

July

- 1—House rejects amendment to Labor-Federal Security bill, thereby cutting off funds for National Youth Administration; President Roosevelt gives last minute reprieve to Max Stephan, sentenced to death for aiding escape of a Nazi flyer.
- 7—Gen. Henri Giraud, French commander of Northwest Africa, arrives in Washington.
- 15—The Board of Economic Warfare is abolished and its functions transferred to the Reconstruction Finance Corpora-

THE YEAR'S TEN
BIGGEST EVENTS

SELECTED BY: BAUKHAGE
(WNU Washington Correspondent.)

I—MILITARY:

- (a) Russian summer-fall offensive.
- (b) Pacific offensive (Attu, New Guinea, Solomons, Gilberts).
- (c) Italy surrenders.
- (d) Air offensive against German cities.

II—DIPLOMATIC:

- (a) The four-power conferences (Moscow-Cairo-Teheran).
- (b) Formation of the UNRRA.

III—DOMESTIC:

- (a) Passage of the Connally Resolution.
- (b) Administration moves to right (OPA, Food Administration, War Mobilization, Stabilization, Economic Warfare).
- (c) Republican political gains.
- (d) Congress revolts against anti-inflation program (subsidies, reduced tax bill, resolution favoring railroad wage increase).

tion; Chester Bowles is named general manager of the Office of Price Administration.

- 10—World's largest pipeline, the "Big Inch," running from Longview, Texas, to Phoenixville, Pa., is opened.
- 21—John Lewis, as president of United Mine Workers, signs two-year contract with Illinois Coal Operators Association; War Department reveals 65,058 prisoners of war in country.
- 28—Navy asks for more WAVES, stating that enrollment must reach 91,000 by end of 1944; Coffee rationing ended by OPA; Blue Network of Radio Corporation of America sold for \$8,000,000.

August

- 2—Race riot sweeps New York, resulting in death of five Negroes, and injuries to 500; Drafting of pre-Pearl Harbor fathers set to begin on October 1; U. S. Army flier in England dives through bomb and lightning fighters at 780 miles per hour.
- 6—June personal incomes totaled \$12,162,000,000, a new record.
- 7—Airplane production reaches record of 7,373 units.
- 13—Gasoline ration in Midwest and Southwest reduced from four to three gallons per coupon.
- 14—The War Manpower Commission establishes new list of 149 critical occupations for first priority in draft deferments.
- 19—The army must be raised to 8,200,000 men by January 1, 1944, and the navy to 2,861,000, the War Manpower Board announces.
- 23—The Guifty Coal Act, passed in 1937, to stabilize coal prices, expires. No move made to renew it.

September

- 2—The exchange ship Gripsholm sails with 1,310 Japanese, to be exchanged for 1,250 Americans at Goa, Portuguese India; Churchill and Roosevelt confer in Washington.
- 4—William Jeffers, director of the nation's rubber program, resigns.
- 7—Republican Postwar Advisory Council meets at Macao Island, Mich.
- 8—Drive for 15 billion dollar third war loan opened by presidential address.
- 14—Col. William Coleman is convicted by a military court for drunkenness and careless use of firearms, demoted to captivity.
- 17—President Roosevelt reports to Congress on Quebec conference.
- 23—Shoe ration stamp becoming valid November 1; Japs must list six months.
- 25—Edward Stettinius Jr. moves from lend-lease administrator to succeed Sumner Wells as undersecretary of state.
- 29—Senators report on war tour.

October

- 4—Treasury asks for ten and a half billion in new tax revenue.
- 7—Merger of Western Union and Postal Telegraph companies is completed.
- 11—Censorship of weather news is lifted.
- 12—National Labor board rules that labor unions have a moral responsibility not to strike.
- 13—American Federation of Labor votes to take United Mine Workers back into fold.
- 18—Third war loan passes goal of 15 billion dollars by nearly four billions.
- 20—The 48-hour work week for war industries is extended to 30 more localities.
- 22—Zinc-steel pennies are to be discontinued, Treasury announces.
- 28—Wildcat coal strikes referred to President by War Labor Board.

November

- 1—Federal government seizes 3,000 coal mines in which strikes are halting production.
- 2—Elections of various state and national officials reveal Republican trend.
- 3—United Mine Workers ordered to return to work as president John Lewis accepts new wage agreement, giving miners \$56.74 for 48-hour week.
- 5—Senate votes peacetime collaboration with other nations, 85 to 5.
- 6—Fifteen non-operating railroad unions reject wage increase offered by emergency committee; Bernard Baruch is appointed chief of a new unit of the Office of War Mobilization.
- 18—Army officials reduce budget by 13 billion dollars, which sum will revert to treasury.
- 24—A subsidy of 100 million dollars is allocated to stabilize price of flour.
- 25—House votes against extension of consumer subsidies.

December

- 1—Ration values of meats reduced 30 per cent.
- 3—U. S. plane output for November announced as 7,789.
- 4—Army will retire 25,000 officers, reducing total to 625,000.
- 7—Biggest U. S. battleship, the 45,000-ton Wisconsin, is launched.
- 10—Non-operating rail workers get senate approval for eight cent per hour raise.
- 11—Senate military committee plans graduated discharge pay for servicemen, ranging from \$200 to \$500.
- 15—President Roosevelt returns to capital; senate committee votes to retain food subsidies for 60 days.
- 17—OPA promises lowering of meat ration points.

January

- 1—New Year's Day football results: Rose Bowl—Georgia 9, U. C. L. A. 0; Sugar Bowl—Tennessee 14, Tulsa 7; Orange Bowl—Alabama 37, Boston College 21; Cotton Bowl—Texas 14, Georgia Tech 7; Sun Bowl—Second Air Force 13, Hardin-

Simmons 7, Kazar Stadium—East All-Stars 12.

Stars 12, West All-Stars 12.

17—Ted Williams, formerly of Boston Red Sox, named "player of the year."

February

- 20—William Cox, New York sportsman, purchases Philadelphia Phillies for about \$230,000 from National League.
- 21—The Big Ten athletic council ended the rule forbidding freshmen to play on varsity teams.
- 24—Bucky Harris signs to manage Philadelphia ball club.

March

- 13—Greg Rice runs fastest 2 miles at K. of C. meet, in 8-52.7.
- 17—Philadelphia team wins the Golden Gloves championship in New York.
- 18—Detroit wins national hockey league title.
- 20—Cornelius Warmerdam sets new pole vault record of 15 feet, 8 1/2 inches.
- 25—Pauline Betz wins national indoor tennis singles championship.

April

- 6—Cleveland Rams, professional football club, suspends playing for duration.
- 8—Detroit Red Wings defeat the Boston Bruins, 2-0 to capture the Stanley Cup.

May

- 1—Count Fleet wins Kentucky Derby, in 2:01.
- 2—Count Fleet wins Preakness, in 1:57.2.
- 21—Bob Montgomery outpoints Beau Jack to gain lightweight title.

June

- 5—Count Fleet wins Belmont Stakes.
- 20—Gunder Hagg outruns Greg Rice to win 5,000 meter race.
- 26—Francisco Segura wins Nat'l Collegiate tennis title, defeating Tom Brown Jr.
- 28—Whirlaway, 5 year old race horse, retired.

July

- 2—Patty Berg defeats Dorothy Kirby for Women's Western Open Golf Championship.
- 10—Gunder Hagg establishes 8:53.9 American record for 2 miles.
- 13—American League team wins annual All-Star game, 5 to 3.
- 26—Harold McGspaden defeats Buck Wheatley by 1 stroke to win All-American golf title; Patty Berg takes women's title.
- 27—Fred Simmons quits Brooklyn to become manager of Phillies.

August

- 8—Ryder Cup golf team, captained by Craig Wood, defeats Walter Hagen's team.
- 9—Edward Schenken wins the contract bridge master's championship for fifth time.
- 23—College All-Stars defeat the Washington Redskins, professional football champions, 21-7.

September

- 1—The St. Louis Cardinals and New York Yankees retain strong leads in National and American leagues.
- 6—Lieut. Joseph Hunt takes the national amateur tennis championship.
- 18—The St. Louis Cardinals defeat the Chicago Cubs 2-1, clinching the National league pennant; Collegiate football season opens.
- 19—Detroit Lions beat the Chicago Cardinals in professional football opener.
- 25—The New York Yankees take the American League pennant for the 14th time.

October

- 2—Occupancy wins Belmont Futurity.
- 3—Final baseball standings, St. Louis Cardinals, won 105, lost 49, for a percentage of .682. The New York Yankees, won 98, lost 56, for a percentage of .636.
- 6—Columbus O. American Association team, defeats Syracuse, N. Y., Inter national league team, to capture "Little World Series" title.
- 10—Yankees win World Series, defeating Cardinals, four games to one.

November

- 2—Stanley Musial, St. Louis Cardinal outfielder, named most valuable player in National League.
- 5—Spurgeon Chandler, New York Yankees pitcher, chosen most valuable in American League.
- 14—U. of Southern California and the U. of Washington chosen for Rose Bowl.
- 19—Beau Jack regains lightweight title, outpointing Bob Montgomery.
- 27—Great Lakes defeats Notre Dame (19-14) in year's biggest football upset.

December

- 12—Chicago Bears win western pro football championship.
- 13—Ned Ray regains title as All-Star National Bowling champion.

January

- 6—Fire kills six and injures 100 in Chicago bowling alley.
- 21—Thirty-five Americans die when a transport plane crashes in the jungle near Port Moresby, Dutch Guinea.
- 26—Brig. Gen. Carlyle Wash and nine other army men die in an army transport plane that came down near Flomona, Ala.
- 31—Twenty-eight persons die in sanitarium fire in Seattle.

February

- 11—Eighteen lose lives when a Liberator bomber crashes in Newfoundland.
- 18—Twenty-eight die when four engine bomber crashes a flame into a packing plant in Seattle, Wash.
- 22—Yankee Clipper crashes and sinks in Tagus river, Lisbon, Portugal.

March

- 2—Nineteen bodies recovered in coal mine disaster at Bear Creek, Mont.
- 21—Flood waters spread over a wide area in Georgia, Mississippi, Alabama and destroy 41 buildings valued at \$175,000 at Fort Riley, Kan.
- 21—Spreading floods in Mississippi valley take twelve lives, and leave 108,000 homeless.
- 23—A Pennsylvania R. R. express train jumps the track near Delair, N. J., killing 14 and injuring 89 persons.
- 24—Death toll in flooded region of lower Mississippi valley reaches 17 and 160,000 are estimated to be without shelter.
- 31—Deaths from all causes over Memorial day week-end holiday total 154.

June

- 6—Navy reports 84 men killed when a ammunition ship collides with tanker off Port Arthur, Tex.; Eighteen soldiers are killed when an army truck falls over a 300 foot embankment near Nashville, Tenn.

16—Two are killed, 11 injured in riot growing out of lynching in Beaumont, Tex. Martial law declared.

21—Race rioting in Detroit is suppressed by Federal troops after 24 hours of disorders. Twenty-six Negroes and three white men are killed, and more than 700 are injured.

July

- 22—Maj. Gen. William Upshur, Capt. Charles Paddock, both U. S. M. C. officers, and four other persons are killed in Navy plane crash near Sitka, Alaska.
- 27—Three soldiers who became lost in desert maneuvers near Yuma, Ariz., die of thirst.
- 28—Hurricane sweeping over Texas Gulf coast kills 13 persons. Damage estimated at 10 million dollars.
- 29—Twenty persons were burned to death when American Airlines plane crashes and burns near Trammel, Ky. Two escape.

August

- 1—Ten persons, including Mayor William Baker and Maj. William Robertson, die when Army glider crashes in demonstration flight in St. Louis.
- 2—Five Negroes killed, more than 900 white and colored injured in race rioting in New York city's Harlem district.
- 5—Fourteen persons are drowned in a "flash" flood in central West Virginia.
- 28—Twenty-one miners are killed in gas explosion at Sayreton, Ala.
- 30—Twenty-nine persons are killed and 150 injured in wreck of crack Delaware, Lackawanna and Western R. R. near Wayland, N. Y.

September

- 6—Eighty persons killed and 177 injured, when Congressional Limited of the Pennsylvania R. R. is derailed near Philadelphia.
- 7—Twentieth Century Limited train of New York Central R. R. is derailed near Canastota, N. Y., killing three; Houston, Tex., hotel fire takes lives of 50 men.
- 17—Explosion of depth charges at the Naval Air Station, Norfolk, Va., takes 25 lives. About 250 are injured.
- 20—Twenty-five soldiers die when Army transport plane crashes near Maxton, N. C.

October

- 16—Crash of airliner 47 miles west of Nashville, Tenn., takes 10 lives.
- 23—Navy announces that 88 seamen died when two tankers collided off Palm Beach.

November

- 23—Six children die in farm home fire near Chicago.

December

- 13—Twenty marines killed, 29 injured in Hawaii when collision of navy planes releases bomb.
- 16—Sixty-nine killed, 50 injured in collision of two fast trains near Bule, N. C. Forty-eight of the dead were servicemen.

January

- 5—Famed Negro scientist, Dr. George Washington Carver, 78.
- 6—President emeritus of Harvard U., Dr. Abbott L. Lowell, 86.
- 10—"Message to Garcia" hero, Col. Andrew S. Rowan, 85.
- 23—Alexander Woolcott, 56, "The Town Crier" of radio, author, critic, playwright, actor.

February

- 7—Dr. Attilio H. Giannini, 68, physician, banker, motion picture executive, civic leader.
- 19—Lynn Overman, 55, comedian.

March

- 10—Poet and author Stephen Vincent Benet, 44, Pulitzer prize winner with "John Brown's Body."
- 20—Former governor of Illinois, Frank O. Lowden, 82.
- 28—James A. Farrell, 80, president of the United States Steel corp.

April

- 22—Luren D. Dickinson, 84, former governor of Michigan, foe of "high life."
- 28—Maj. Gen. Robert Olds, 46, commander of the U. S. Second Army Air Force.

May

- 11—Maj. Gen. Stephen O. Fuqua, 68, chief of infantry in U. S. Army, 1923-32.
- 28—Adm. Henry A. Wiley, 76, Pacific fleet commander, 1927-29.
- 26—Edsel B. Ford, 49, president of Ford Motor Co.
- 29—Sylvester Q. Cannon, 77, Mormon church leader and publisher.

June

- 4—Maj. Kermit Roosevelt, 53, son of the former President, on active duty in Alaska.
- 16—Dr. Albert Bushnell Hart, noted historian and Harvard U. professor, at 88.
- 23—Rear Adm. Nell E. Nichols, 63, former commandant of Boston Navy Yard.

July

- 14—Actress Beverly Sills, 76.
- 27—Rev. Ernest Lynn Waldorf, 67, bishop of the Methodist church, Chicago area.
- 29—Opera star Marie Gay Zanzanelli, 64.</

You Only Need to Buy a Calendar Once in Your Life—If We Used 'World' Model

Date Always on Same Day Week, Every Year

ELLIOTT PINE

by Western Newspaper Union.

Year's day falls on Saturday this year. If it hadn't been for Hitler and the ambition of Japan, New Year's day would be Sunday this year, and in fact it would be every year.

In 1931 the League of Nations to talk about calendar reform. During the next four years much talk, but at last emerged from the welter of the 13-month year, and the World Calendar. In the calendar, New Year's day is on a Sunday. If it were not for the League would still be in use by now. So responsible for wrecking, and sidetracking, calendar

calendar can wait. Time and a better way of measuring can be adopted at some time. Of the two schemes, the World Calendar seems to be the better as it does not break with custom and tradition, and the month calendar does.

Advantages of the World Calendar are, first, it is perpetual; any date in any year is always the same day of the week. Every quarter is the same in arrangement. Third, months are almost the same length have 30 days and four weeks. Every month has 26 weeks.

How It Works.

World Calendar is based on a year of equal quarters. Each month period contains the same number of days: 91. The first quarter of each year has 31 days; the second, 30. So January, April, July and October are 31-day months; the other eight each have 30 days.

To accomplish this rearrangement necessary only to change seven days in the familiar pattern. The change is made in February. That peculiar month gets two additional days.

Two days are the 31st of January and the 31st of August, which are taken from these two months, leaving each an even 30 days. Then the 1st of March is sliced off and added to April. Lastly, December becomes "Year-End day," which number on the new calendar.

"Year-End day" is the really new feature of the World Calendar. The 365th day is the one which grows every attempt to form a year evenly divisible year into four quarters. By calling the last day of the year "Year-End day" and making an extra Saturday, the problem is pretty well solved.

Other difficulty, the additional leap years, as 1944 is, must be taken care of some way. This is done by adding a day to June. In leap years the last week of June has two Saturdays.

"Year-End day" seems so fantastic, the first time it is thought about, but it is no more difficult in principle than turning a watch around or advancing your watch an hour when you cross one of the time belts, or picking up or losing a whole day at the International Date line, out in the Pacific. It would not be hard to get accustomed to the new calendar. It is only about 60 years since the Standard Time system was adopted.

Difficulties as well as the advantages of Standard Time have now been taken for granted. Now we are living in a temporary disturbance in the time system, called War Time, which inconveniences many, despite its necessity. The "Year-End day" would fit in much easier than it seems at first.

Advantages of the World Calendar are several. First, the calendar is "perpetual"; any particular date in any year would always fall on the same day. Thus, for instance, May 21 would always fall on Tuesday, no matter what the year. It would be Tuesday in 1950, 1949 or any other year. The 1st of July would always be Wednesday; Christmas always Monday. April 1st day always would fall on Sunday. This is what is meant by a "perpetual" calendar. Even leap year does not

throw the World Calendar out of joint, as the extra day is fitted in as a numberless or "intercalary" day like Year-End day. Leap-Year day is an extra Saturday too.

Next in importance, probably, is the fact that every quarter of every year would contain the same number of days, 91, making calculations of interest, rent, comparative production, and so forth, much easier. Each month would have 26 weeks days, so direct comparisons of months as equal working periods would be possible. Thirty-day months would have four Sundays, 31-day months five Sundays, so the extra day would not be a working day anyhow. Holidays, insofar as

An Inca calendar, made of hammered gold, found in Peru. The symbols around the rim are supposed to represent the months. Many ancient peoples devised fairly satisfactory calendars, often having the year divided into 12 30-day periods. The five days left at the end of the year were special days, sometimes feasts, sometimes unlucky or evil days.

possible, would be celebrated on Saturdays, Sundays and Mondays.

Holidays, at least in the United States, would fit into the week-ends rather conveniently. Christmas, the 25th of December, would always be on Monday, giving most working people a 2½ or three-day holiday. The new holiday, "Year-End day," being an extra Saturday on the end of December, would lengthen the New Year's week-end, for New Year's day would be Sunday always. Labor day would fall on Monday, September 4, every year, providing a nice long week-end. The disruption of holidays in the middle of the week would be done away with.

Thanksgiving day could be moved to Monday, November 20, if it were thought necessary, or Monday the 27th. Washington's birthday could be celebrated on Saturday, the 11th of February, the original date before the adjustment of 1752, which brought it to the 22nd. So various other holidays, observed in different sections and states, could be moved to the nearest Monday, Saturday, or Sunday.

Churches in Favor.

Church councils and synods have gone on record as favorable to the World Calendar, as well as a fixed date for Easter. Between 1931 and 1936 the Episcopal church, the Presbyterian, the United Lutheran, and the Methodist Episcopal of the South, to name a few, have all passed resolutions endorsing calendar reform, and a fixed Easter. The Roman Catholic church, while making no formal declaration of approval, has stated that no dogmatic difficulties exist. Eighteen Catholic bishops and archbishops, throughout the world, are members of the World Calendar association. The Eastern Orthodox church, through the Pa-

triarch of Constantinople, has endorsed the plan. Little religious opposition has been shown or is anticipated to the World Calendar, in fact.

Business men want some kind of calendar reform. The difficulties of computing interest, making comparisons of periods, keeping inventories, and other accounting problems, are much complicated by the irregularities of the months. A few businesses use 52 weeks, divided into 13 periods of 28 days, or four even weeks. But this 13-month calendar, it is thought, would never be adaptable to general use, for many reasons, some traditional and sentimental, but real, nevertheless. In any case, the International Chamber of Commerce went on record in 1933 as favoring the World Calendar, or a similar plan.

Lawyers Like It.

The legal profession also has endorsed the World Calendar through action at a conference of the American Bar association in 1931. Lawyers are particularly anxious for the complications of the present calendar to be ironed out, according to spokesmen.

Social activities would be easier with the World Calendar in use, as invitations would then be dated accurately more often than now. People would not be arriving on the wrong day so frequently. Practically everybody, in fact, would benefit by a simplified calendar: farmers, merchants, housewives, scientists, schoolteachers and everyone else. Publishers of calendars would be the only losers.

Leaders of every important nation have endorsed the calendar reform, most of them advocating the World Calendar, or some similar 12-month, equal-quarter plan. In June, 1931, a special League of Nations committee, after due consideration, had trimmed 200 proposed reformed calendars down to two. One was the 12-month, perpetual, equal-quarter scheme, known in the United States as the World Calendar. Delegates of six nations leaned toward the 13-month plan. Most speakers stated that the people they represented would wish to retain a 12-month calendar from custom and religious reasons, and that, in their opinion, a change to a 13-month calendar would be too drastic to gain wide acceptance. In the end, the question of reform was laid aside for further study.

Must Wait on New 'League.'

In the '30s the League of Nations steadily lost power and prestige, and with the outbreak of the European war the only international body capable of putting the World Calendar into effect, disappeared. It must be remembered that a new or reformed calendar would have to have world-wide acceptance. The world has grown too small, as has often been said lately, for nations to go their ways independently. Air travel will demand uniformity.

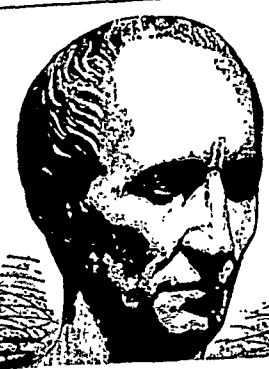

It may be that the Peace Conference everybody is looking forward to will give this calendar reform matter consideration and perhaps, in the postwar period of eagerness for improvements, some new League may be able to have the reformed calendar adopted. Swift action will be necessary, however, as the next chance to slip the World Calendar into use without a ripple will be January 1, 1950. If much time is spent in arguing and ratifying, the opportunity for a smooth transition will pass again.

Julius Caesar

Roman Emperors Gave Us Our Present Calendar

Our present calendar was arranged by Julius Caesar and his nephew, Augustus. When Julius returned from his Egyptian campaign in 46 B. C., he brought with him Sosigenes, a famed astronomer, to correct the Roman calendar. This sage established the length of a year at 365¼ days, divided into 12 months. The unevenly numbered first, third, fifth, seventh, ninth, eleventh, thirteenth, fifteenth, seventeenth, nineteenth, twenty-first, twenty-third, twenty-fifth, twenty-seventh, and twenty-ninth months had 29 days, regularly, and 30 only

in leap years. The seventh month was named Julius, by order of the senate, to honor Caesar.

When Caesar Augustus came to power he had the eighth month named after himself. This being a 30-day month, Augustus felt it was inferior to July, so he lengthened August to 31 days, taking the extra day from February. Then to avoid three 31-day months in a row, he pulled the 31st day off September and November, and added them to October and December. Thus the egotism of one man completely disrupted the wise and orderly year of Julius.

PEACE RUMORS OF THE MOMENT

COPENHAGEN.—A third cousin of a former Nazi microphone adjuster (he always adjusted the mike to the proper level for Hitler in his early days) was seen here today talking with a man in pink whiskers, who was looking at some Christmas cards. He bought a couple of cards himself in fact. He is the type who would ordinarily regard this as compromising his belligerent background. Something must be up.

LISBON.—Reports here by way of Dresden by way of Persia via Wappingers Falls, N. Y., say that Fritz Von Piggie is in Switzerland with peace feelers. This is based largely on the fact his valise looked larger than last time. He is known to have sat at a table drawing figures on a tablecloth for almost an hour.

GENEVA.—It is reported here that Germany wants peace, but can't make up her mind about the length of the rope.

MADRID.—A Swiss minister lunched with a friend of General Franco here last week. This friend is known to have another friend named Schultz. Schultz denotes German connections. The Swiss minister insists that the man kept asking for peace in a loud voice. The waiter, however, says the fellow was simply ordering green peas.

CAIRO.—Reports coming out of a man coming out of a plane coming out of the Near East (or maybe it was the other way around) say that a group of prominent Germans have organized what is called the CAIBW (Committee to Ascertain If It's Being Watched).

If it finds it is not being watched it is believed it may lead to a meeting at which it may be admitted in strict confidence that Sherman was right. The stock markets of the world slumped ten points following this news.

CHUNGKING.—A persistent story circulated here is that according to word from Baden-Baden via Venice and Cos Cob, Adolf Hitler would consent to peace if he were assured he could pick his own headstone. He has now decided on a plain shaft with just the inscription "A. Hitler" on it, with no mention of Mein Kampf.

MARSEILLES.—According to a man who knows a man who knows a gossip columnist in Indo-China, Marshal Goering has told a few intimate friends that he will accept peace the minute he thinks he can get enough out of it to live on. He is feeling the effects of war. One of his chins is missing.

MUSINGS

Whatever became of those Japanese circus performers who wound up every performance hanging by teeth or toes, waving the American flag?

The British were a half hour late going over Berlin the other night, and half the citizens who own clocks thought something had gone wrong with their timepieces.

By Advice of Counsel?
This radio station goes on and on, sirs,
But isn't responsible for its sponsors.

It is proposed to up the telephone tax to 15 per cent on all local calls and to 25 per cent on toll line calls. Even jiggling the hook may be classified as a luxury soon.

No Tick
I needed some cuffs on my trousers
But I met with a hardy rebuff;
My tailor refused absolutely
To do anything "on the cuff."

"Badoglio Takes Two Titles From the King."—Headline.

This, we understand, leaves Emmanuel holding the bantam weight and best "chow" in the show titles.

Song for the Japanese War Office
What a terrible price for bunk,
What a terrible price for bunk,
What a terrible turn
To get kicked in the stern
By a fleet that you said you'd sunk!

Twenty-five Years Ago
Sleeping in a hammock,
Six feet from the deck
Kept one sailor dreaming
Of a broken neck.

Ima Dodo calls them the Gilbert and Sullivan Islands.

The Hero of the Day
Elmer Twitchell stood in the center of the great plaza in Washington, where he had been suddenly summoned. There was a fanfare of bugles, a round of cheers and then Elmer found himself being escorted to a platform on which stood the President of the United States and other dignitaries.
The President pinned a medal on his chest.
"This," he said, "is the Congressional Award for Distinguished Bravery in the Face of Peace!"

PATTERNS SEWING CIRCLE

Barbara Bell Pattern No. 1852 is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 38 requires 4½ yards 39-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

Address

Drama in Bow
NATURALLY, since we must use less material in clothing, we must expect a sheath-like treatment to be the next new step fashion takes. Here it is, in a dress with a bow for drama.

Pattern No. 8509 is designed for sizes 10, 12, 14, 16, 18, 20. Size 12, short sleeves, 3½ yards 39-inch material.

Tried and True
YES, it is the tried and true two-piece fashion, always so useful in any wardrobe, which is presented in this pattern. The jacket is smartly belted.

PREPARING BOYS FOR LEADERSHIP

Today's teen-aged boys, too young for the armed services, must soon assume the responsibilities of citizenship, industry, and professional life. During the reconstruction period which seems not far away, the principles of military training acquired at such an institution as Northwestern Military and Naval Academy will prove as valuable to the cadets enrolled as though they were being equipped for war.

This type of training, plus the basic classic education which provides cultural background, equips young boys with the knowledge and self-confidence that will be needed when they face the business, civic and social problems that lie ahead.

For fifty-five years Northwestern Military and Naval Academy has helped to prepare boys for successful careers. The location of the school, on beautiful Lake Geneva, is ideal. The quality of the school's work is attested in the records of its graduates, many of whom are men distinguished in various fields.

The second semester opens Jan. 27. There is also a six-weeks' Summer Naval Training Camp on the wooded 75-acre campus of the Academy during July and August. Write to Northwestern Military and Naval Academy, Lake Geneva, Wis., for illustrated catalogue.—adv.

Sensational New Dry Yeast Now on the Market

An amazing new fast-rising dry yeast for baking that keeps without refrigeration has been placed on the market here by the Fleischmann people whose fresh yeast has been a household favorite for four generations.

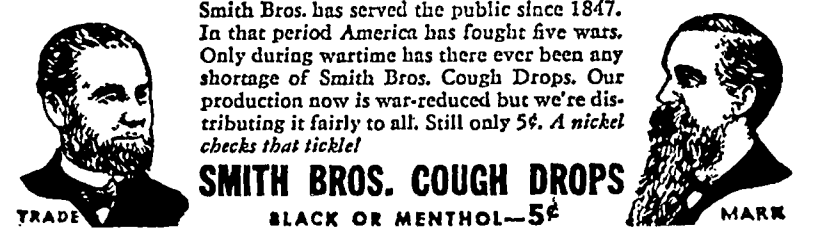

The new yeast, called Fleischmann's Fast Rising Dry Yeast, is simple to use and because of its fast action, does away with old-fashioned, over-night baking methods. Moreover, it is especially suited to these times because since it keeps without refrigeration, housewives can keep a supply for weeks or even months right on their pantry shelves to be used when needed.

In an area where the product was recently placed on the market, according to a recent survey, eight out of ten housewives voted this new yeast the best dry yeast they had ever tested. They discovered that it saved baking time and gave consistent, dependable, uniform results. The new yeast comes packed in small air-tight packages and is inexpensive.—Adv.

EASY TO BUY

Be sure to insist on PURE ASPIRIN Quality Assured
genuine St. Joseph Aspirin every time. You can't buy aspirin that can do more for you, so why pay more. World's largest seller at 10¢, 36¢ tablets, 20¢, 100 only 35¢. Get St. Joseph Aspirin.

5 WARS

Smith Bros. has served the public since 1847. In that period America has fought five wars. Only during wartime has there ever been any shortage of Smith Bros. Cough Drops. Our production now is war-reduced but we're distributing it fairly to all. Still only 5¢. A nickel checks that tickle!

"BUTTER FAR SUPERIOR TO OLEO"

"Says Butter Is Far Superior To Oleo", reads the headline on one of Dr. William Brady's syndicated health articles in daily newspaper. He points out that what, with government sanction and the blessings of a lot of so-called dietitians and economists fighting for academic freedom, is called 'Vitamin A' on the oleo label should properly be called "pro-vitamin A", as it is only the precursor, or the material the animal or human body can use to manufacture real or natural vitamin A". Says the doctor: "Real, natural vitamin A, ready for use in the body without further metabolism or change, is present in the fat of milk and hence in butter". After all, the dairy cow is hard to beat—Modern Dairymen.

Butter this week was paid high compliment by U. S. consumers. Questioned by the Office of Civilian Requirements housewives in 120 counties answered with the wartime shortage they would like most to be relieved—Butter.

In order of preference these were the war-short items, both food and non-food, that American families missed most: 1. Butter, 2. Meats, 3. Sugar, 4. Soap, 5. Canned Goods, 6. Fruits, 7. Elastic Tape, 8. Coal, 9. Hosiery 10. Washtubs. Of the first six five were food items.

—D. P. M. Association News

The crank came into the editor's office with his complaints about the paper, and was rather taken back when the editor suddenly cut into his remarks by picking up his phone and ordering a six-shooter, a sledgehammer, and a boat.

"Wh-what are you going to do?" asked the startled visitor.

"Shoot the printers, smash the press, and throw the type into the river. What in the name of anything sensible is the use of my printing this paper if it doesn't please you?"

Iowa this year has only about 4 tons of hay for each 5 of last year with about the same number of animals to feed.

SCHOOLS HELP

Winneshiek County rural school pupils collected and turned in 74 bundles totaling 2,200 pounds of children's clothing during a recent drive. The clothing will be sent to needy children in the United States and abroad.

BRIDGE COLLAPSED

Ed Grell and Elmer Schwartz of Ricketts, Crawford county employees, received minor bruises when a bridge collapsed beneath the weight of a tractor they were operating. The men fell 18 feet.

CONVERSATION

The main topic of conversation for two days in Prole was the destination of a truck load of coal that passed down the highway near the town Prole residents had been unable to obtain coal for some time.

COON DINNER

A 22-pound coon was caught in a trap set by Case Schipper of Ireton

A VACATION

J. S. Farley of near Grinnell is retiring from active farming soon. He is holding a closing out sale on the farm where he has lived for 70 years. Mr. and Mrs. Farley who will celebrate their golden wedding anniversary on Christmas day will continue to live on the farm where Mr. Farley was born. Their son, Gordon, will be the auctioneer in charge of the sale.

STARTED YOUNG

Independence police officers found a young man, a 12-year-old Waterloo boy, well prepared for a career of some kind. When apprehended, the boy had in his possession his mother's big butcher knife and his grandmother's .32 caliber revolver. He reported that he was on his way to meet a friend in Chicago. The boy had only \$.30 to help defray his expenses.

FUTURE READING

Forrest Thomas, of near Gladbrook, believes in planning for future reading matter and being able to keep posted on local news. Recently, Mr. Thomas paid his subscription five years in advance for the Traer Star-Clipper.

REDECORATED

The interior of the Henry county courthouse is being redecorated. Plastering is being repaired, insulation material in the ceilings of some of the rooms is being installed and most of the interior of the building is being repainted.

SOFT-HEARTED

Lon Helgen of Emmetsburg sent several pheasants to friends this fall. The friends reported they enjoyed the pheasants very much but disliked plucking the feathers from such beautiful birds. To make it easier, they placed the head of each bird in a paper sack while they were dressing the pheasants!

PRACTICING

Charles Haskell of Garwin began early to do some of the hiking that he will find necessary in army training. He walked twelve miles to register under the selective service act. Haskell recently passed his 18th birthday.

KLEMMIE YOUTH IS ELECTED KING AT WALDORF COLLEGE

Eugene Habercamp, son of Verner Habercamp, was honored at a college party on December 10th at Waldorf College, Forest City, when he was named "King."

Each year an outstanding boy and a girl are chosen by the music teachers of the college as Queen and King. Students who have high grades and excell in music are thus honored at a party.

HANCOCK ASSESSORS MET FOR INSTRUCTIONS

The annual meeting of Hancock county assessors was held at the courthouse in Garner Friday, Dec. 1. Election of officers was held and assessors were given instructions on the listing of personal property for the year 1944 and will receive their supplies. Hancock county supervisors also met with the assessors in joint session on that date.

OFFICIAL NOTICE

The Hancock County Board of Education will consider textbook adoption for the county rural schools in the following fields:

1. Language
2. Grades 1-8
3. Dictionaries

Hearings will be held on March 7, 1944 in the Courthouse in Garner, Iowa beginning at 9:00 a. m. Bids will be received until 12 o'clock noon of the day of the hearing. The Board of Education reserves the right to waive formalities and to reject any or all bids.

Hancock County has a total enrollment of about 1025 in the 18 schools. Samples may be sent to each board member if you so choose, but the book company representatives are NOT to interview the board members individually or collectively except at the time of the hearing.

This publication complies with Section 1151, Code of Iowa 1939, and is published by order of the Hancock County Board of Education.

Board members are:

- Mrs. H. C. Meyer, Britt, Iowa
- Mrs. S. B. Durant, Forest City, Iowa
- Mr. C. A. Robinson, Britt, Iowa
- Mr. W. E. Puffer, Corwith, Iowa
- Mr. F. C. Missal, Garner, Iowa

Kidneys Must Work Well

For You To Feel Well

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood. If more people were aware of how the kidneys must constantly remove uric acid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly. Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer aching back, aches, headaches, dizziness, rheumatism, getting up at night to urinate. Why not try Doan's Pills? You will be using a medicine recommended by the country over. Doan's stimulates the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

DOAN'S PILLS

Pretty Crocheted Bedroom Slippers

5650

THE cuff around the top may be emphasized by an edging of contrasting color—with the button matching, the smartness of these slippers is assured. The sole may be crocheted with rug yarn. These slippers are pretty in rose with black soles and edging.

To obtain complete crocheting instructions for the Bedroom slippers (Pattern No. 5650) send 16 cents in coin, your name and address and the pattern number.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

HOME NEEDLEWORK
530 South Wells St. Chicago.

'Flowering' River Really Billions of Small Insects

A strange sight in Hungary, known as the "flowering of the Tisza," is caused by the drowning of billions of small insects. Once in three years they hatch, fly over the Tisza river, and fall on its surface, coloring it richly with their bodies to make it appear covered with small yellow flowers.

The river remains that way for days and always attracts a large number of visitors.

DISCOVERY OF COLDS' RELIEF
(home medicated mutton suet)—which grandma used for coughing—nasal congestion, muscle aches of colds—teaches modern mothers to follow her example. So their families get relief from these colds' miseries with Penetro, the salve with modern medication in a base containing old fashioned mutton suet. 25c, double supply 35c. Demand Penetro.

Said the Optimist:
If I have lost my ring I still have my finger.

SNAPPY FACTS ABOUT RUBBER

By the end of this year almost 50% of the tires now on war workers' cars in Ohio are likely to be completely worn out under normal use, according to a survey which showed that war workers faced a crisis in their motor transportation. Failure to have tires recapped in time is one factor responsible for this situation.

Use of nylon cord instead of cotton or rayon has made possible the manufacture by B. F. Goodrich of an airplane tire that conserves materials, yet provides extra strength and light weight. Nylon cords in motor vehicle tires are well advanced in the experimental stage.

LABOR PREPARES FOR 1944

More government officials are gradually leaving to become associated with farm and labor unions. The CIO Committee for Political Action has now recruited:

C. B. Baldwin, former Farm Security administrator and short-time state department official, and

Raymond S. McKeough, former congressman from Illinois, and former OPA regional director for Indiana, Illinois and Wisconsin.

Meanwhile, Aubrey Williams, former director of the National Youth administration, has joined the Farmers' union.

MAIL BAG

G. L. T., Great Neck, L. I.—The Caucasus mountains are 17,000 feet high. But the passes through which Stalin flew en route to Teheran are 12,000 feet.

H. L., Chicago—All Argentine meat exports are bought by the British government, which then resells part to the U. S. army. Thus, U. S. soldiers are eating Argentine beef bought from Britain. Value of Argentine meat exports last year was 139 million dollars.

DWINDLING AAA

Budget estimates for the next fiscal year are not yet public, but here is one estimate which will come as a blow to farmers.

The famous "Triple-A," which saved farmers in 1933 and has always been synonymous with the New Deal, is about to be cut drastically. It is the Roosevelt administration which is making the cut, not congress.

In fact, Budget bureau first proposed, in closed-door hearings, to eliminate AAA altogether. This proposal was ruled out, but Budget then made a 50 per cent slash from 400 to 200 million dollars.

Taken together with the near elimination of Farm Security administration, the AAA cut indicates how far farmers have come back economically.

NO SECRET 2ND FRONT

The invasion of western Europe is just around the corner, but it cannot come so fast as to surprise anybody—least of all the Germans.

In fact, the first news of the coming invasion will probably come from Germany. They will spot the gathering of the world's greatest armada of fighting ships, presumably along the channel coast of England, and they will announce by radio that the invasion is coming and that they are ready for it.

Even before that, they will be forewarned by a switch in tactics of the British and American air forces based on England. Those forces will turn from long-range bombing to an all-out trip-hammer assault on Nazi coastal installations. The channel is so narrow that British-based planes will be able to make as many as three daily round trips each to the German-held shore, dumping bombs on coast artillery, rail lines, ammunition dumps, troop concentrations and, in general, tearing up everything in sight.

This strategy—the pattern of which was made clear in assaults on Tunisia, Pantelleria, Sicily and Naples—takes most of the surprise out of surprise landings. The air forces will trumpet the invasion of Europe to the waiting world.

LIGHTS OUT

WPB officials are worried about the American public's profligate use of electricity and water. Proposals have been studied to ration electricity, but these have been set aside in favor of voluntary economy.

Few people realize that extra lights or a dripping spigot mean waste of coal or fuel oil. Some cities have no meter control of water, with a resultant high consumption. Chicago is one.

It's an American's privilege to take a bath, but he takes so many more baths than Europeans that the U. S. per capita consumption of water is more than twice that of Europe. WPB doesn't say so officially, but it implies that six inches of water in the tub will make you just as clean as a full tub.

The worry comes from the problem of keeping war plants provided with light and water. Electric companies which have always promoted heavier use of electricity ("buy a new toaster or iron") are now spending money to advertise conservation.

Note to WPB: One of the most wasteful users of light and power is the government itself. Practically all government offices are overheated.

MERRY-GO-ROUND

There are 10,313 Mexicans in the U. S. army, and 950 Cubans.

Agricultural experts are intrigued with Alston Waring's book, "Roots in the Earth," a boost for the small farmer.

Smiling Jimmie Davis, author of "You Are My Sunshine," and candidate for governor of Louisiana, suggests that all candidates conduct their campaigns in the form of a bond drive for Uncle Sam. Maybe the man who sells the most bonds should be elected.

Scotch Customs Brought to U. S.

"Should auld acquaintance be forgot,
And never brought to mind?"

There may be no way of proving whether or not Robert Burns was thinking of New Year's Eve when he wrote "Auld Lang Syne"; however, two things are certain: the Scotch have always made a big fuss over New Year's and no American celebration thereof would be complete without this traditional bit of Scottish verse.

In Scotland, the wassail bowl went 'round at New Year's time. Traditionally, the custom originated when Rowena, daughter of Hengist, presented Prince Vortigern with a bowl of wine and the salutation, "Lord King, wass-hael," or literally, "To your health." The prince drained the bowl with one draught, returned the maiden's salutation by immediately falling in love with her, and the two lived happily ever after.

The wassail bowl itself was an ornament of graceful design—decorated with branches of greenery that formed a canopy over it. The mixture within was warm and included ale, sugar, and nutmeg or ginger; highly spiced, sweetened wine was added by hosts who could afford it.

On New Year's Eve at the stroke of 12 the head of the household, toasting his family and friends, sipped the mixture and then passed it to the others present. Sometimes, the party would pile into a wagon or sleigh and, carrying kettles of the beverage, buns, cheese, etc., would stop at various houses throughout the community. The refreshments went around at each "stop" and nobody got home till morning.

Why New Year Starts In Middle of Winter

Why does the year start in the middle of winter?

Perhaps the most valid reason is that the first day of January is conveniently near an annually recurring celestial landmark—the earth's perihelion, or point of closest approach to the sun. It's a fact that in the dead of the northern winter, due to our planet's elliptical orbit, we are a few hundred miles closer to the solar disk than on the hottest day in summer.

New Year day doesn't exactly hit the mark. On or about January 4 the center of gravity of the earth-moon system is nearest the center of gravity of the sun. That is, two imaginary points are closest together. One is at approximately the center of the sun and remains constant through the ages. One is about 2,000 miles below the surface of the earth.

Happy New Year!

Gladys Benson, the "Girl of a New Day," emerges from a huge globe in a New York ballroom to wish everyone the happiest kind of a New Year.

New Year's of 1863 Important Historically

One of the most important New Year's day receptions ever held in the White House was that of January 1, 1863, and it was significant because of a momentous event which took place immediately afterwards. Abraham Lincoln had drawn up his Emancipation Proclamation, had read it to his cabinet and had won their approval of this document which would commit the government irrevocably to the destruction of slavery. At noon William H. Seward, secretary of state, brought the proclamation to Lincoln for his signature.

"I have been shaking hands since nine o'clock this morning and my right hand is almost paralyzed," Lincoln told him. "If my name ever goes into history it will be for this act, and my whole soul is in it. If my hand trembles when I sign, all who examine the document hereafter will say: 'He hesitated.'" Saying that he signed—but those who look upon the signature on that historic document now say that it was written as boldly, as firmly and as unflinchingly as any ever signed "A. Lincoln."

New Year and Old

Oh, New Year—Leave the olden joys to me!

The sturdy faiths, the shining loyalty

Of friends the long and searching years have proved—

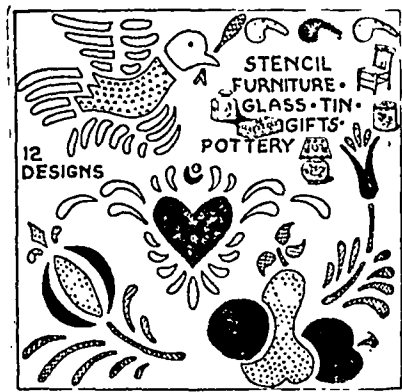

The glowing hearth fires and the books I loved!

All wanted kindnesses and welcoming—

All sure, hard trodden paths to which I cling!

With all the strange new blessedness you bring.

ON THE HOME FRONT with RUTH WYETH SPEARS

NOT all the Pennsylvania Dutch were free-hand artists and you may not be either. The early Dutch artisans often used stencils for the main part of a motif and added a few flourishes to give a free-hand effect. You may do that too or you may stencil the scrolls and flourishes on chairs, chests and gay gifts.

All of these quaint motifs are symbolic. That is the Dove of Peace that you see in the upper left corner of the sketch. The tulip symbolizes Lily Time or the

Birds Are Masons; Build Lasting Abodes of Clay

Some birds show great ingenuity in the handling of clay and mortar.

The widely distributed baker-birds build oven-shaped structures of clay, planted in the most blatant manner in exposed positions, where they are taken to be lumps of stone by the hungry night-prowling beasts. These clay nests take several months to construct, and become so hard that a hammer must be employed to get at the eggs.

The cock-hornbill incarcerates his lady in a hollow tree and bricks up the opening with clay, leaving only a space sufficient for the passing of food through to her

golden age of peace and plenty promised the Dutch settlers in the New World. The pomegranate bud and fruit symbolized God's bounty. The blade, the flower, the seed and the heart of man were symbols used in decorating.

NOTE: Mrs. Spears has prepared stenciling designs for 12 authentic Pennsylvania Dutch motifs with color guide and directions. There is a large design for cupboard doors, designs for chairbacks, dresser drawers and chests. Also borders and small motifs for decorating bottles, boxes, jugs and tinware. These designs may be used many times for gifts and for bright touches in every room in the house. Ask for Pattern 262 and enclose 15 cents. Address:

Gas Arising From Sea Off Peru Defies Explanation

Along 700 miles of the coast of Peru, says Collier's, volumes of hydrogen sulphide arise at times from the sea, a mysterious marine phenomenon that still defies scientific explanation.

Not only does this gas kill much bird life and cause epidemics of headaches in coastal towns, but it becomes so dense in and around the port of Callao that it tarnishes silverware and blackens boats and other objects painted in light colors, hence its name—"The Callao Painter."

You breathe freer almost instantly as just 2 drops Penetro Nose Drops open your cold-clogged nose to give your head cold air. Caution: Use only as directed. 25c. 2 1/2 times as much for 50c. Get Penetro Nose Drops.
